2. [Queen_Creek_Hams] QC_Hams group name/addresses have changed

Yahoo group: Queen_Creek_Hams
Date: 2006-04-16 17:22:18 UTC
From: notify@yahoogroups.com
Topic: 2 Message: 2

Hello,

The moderator of the QC_Hams group has changed the group's name.
This means that both the group's email address and the group home page
location have changed.

The group email address:
Queen_Creek_Hams@yahoogroups.com

The group home page location:
http://groups.yahoo.com/group/Queen_Creek_Hams

If you have links which point to this group or an address book entry
for the group, you should update them, as the old addresses will no
longer work.

Regards,

Yahoo! Groups Customer Care

4. Membership Update

Yahoo group: Queen_Creek_Hams
Date: 2006-05-01 17:35:10 UTC
From: Joe Sammartino
Topic: 4 Message: 4

About 15 invitations to local hams inviting them to join this new
Group went out today via email.

The email addresses came from QRZ.com (mostly). QRZ.com lists about
64 entries for Queen Creek.

Please pass the word to your local ham friends. If they are
interested in joining, just have them send an email to me a:

n2qoj @ n2qoj.com.

Or, they can send an email to:

Queen_Creek_Hams-subscribe @ yahoogroups.com

Regards, Joe, N2QOJ.

5. Re: [Queen_Creek_Hams] Membership Update

From: Jim Henderson
Topic: 4 Message: 5

Joe, I think there are a lot of hams who have not kept their info current. Over the past 8 years or so, I have
seen several hams listed who have either died, moved, or are inactive.

This list of yours is a good idea, and maybe we can find all those missing hams!

I look fwd to seeing who is on this reflector.

KF7E

Hi Everybody (all three of us so far!),

Jim - Please let us new guys know - Are the locals active on 2/440/220?

If so, do you know which repeaters are most often used? Simplex?

BTW - brought my wife and son to Rudy's this past Saturday. Just missed breakfast but lunch was great.

Regards,

Joe, N2QOJ

8. Hello

Yahoo group: Queen_Creek_Hams
Date: 2006-05-02 04:43:03 UTC
From: Terry Pendergrass
Topic: 8 Message: 8

Funny thing, I downloaded APRS+SA the other night and sent Brent H. an email about not remembering my code. He sent it to me and I got the software setup. I was looking at nearby stations and went to Joe's (N2QOJ) website seeing that he has a motorcycle mobile. I recently purchased a 2005 RoadKing and am considering putting on some type of APRS station.

It's definately a small world.

Terry aka KD7HUU

9. Re: Hello

Yahoo group: Queen_Creek_Hams
Date: 2006-05-02 21:12:50 UTC
From: Joe Sammartino
Topic: 8 Message: 9

Hey Terry et al,

I've been running the motorcycle without radio and Ars here in AZ.

Back in NJ, it was usually my Kenwood TH-F6A and a speaker mike that kept me in touch my local hams.

I use an APRS homebrew setup in my Dakota truck: The rig is a YAESU FT90, the tnc is a TinyTrakII, the GPS is a Garman eMap. Except for the Garmin cable, I fabbed all the cable interconnects and the TT2 enclosure. The TT2 can handle either an HT or my mobile radio the way I have it set up.

Lately, I've been running no radio in my truck but still work Echolink via a laptop and aircard. Works great. I even run a "truckcam" when roving around: www.n2qoj.com/truckcam.html

My emphasis has been on keeping in contact with my old crew back in NJ since I am not active on vhf/uhf here yet.

But I do keep an ADI-247 220 mobile in the truck also for when I want that RF link back to my Echolink node: n2qoj-l.

I do want to mount a mobile radio on my Honda Shadow 1100 sometime soon. Maybe we can get a ride scheduled soon. Any ham/cycle groups around here? Here's a website ;you might find interesting regarding ham radio and motorcycles: http://www.ba-marc.org/

Thanks for joining the Group and I look forward to meeting you and everyone else on the Group in due time.

Regards,

Joe, N2QOJ

Well, for anyone who participated in last week's W7 Area QSO Party,
I hope you had a great time.

So, as Jim mentioned in his post, is anyone interested in breakfast
at Rudy's this Saturday, tomorrow, 5/12?

25. New features

Yahoo group: Queen_Creek_Hams
Date: 2006-05-16 20:21:32 UTC
From: Joe Sammartino
Topic: 25 Message: 25

Hey folks,

Three new features have been added to the GROUP home page description:

- QRZ callsign lookup box
- a link to a contest schedule for the next 8 days
- a link for a 12 month contest schedule

After you click on the contest schedule links, you can include them in your "Favorites" or create a link icon in your browser.

Or, just come to the Group home page when you want to check the schedule.

Enjoy,

Joe, N2QOJ

27. Hello

Yahoo group: Queen_Creek_Hams
Date: 2006-06-01 21:30:25 UTC
From: Joe Sammartino
Topic: 8 Message: 27

Hope all of you are doing well.

All of my free time has been tied up over the last two weeks with friends and family visiting from NJ and Florida. We still have one guest here for another week or so.

Since it was my wife's birthday this past Sunday, we decided to spend the day motorcycling to Payson for some R & R. We stopped at Saguaro Lake first for some breakfast. It was my wife's first time on my ride and she enjoyed it. I posted some pics on my website at www.n2qoj.com.

Are any of you heading out this weekend to hamfests or other ham activities?

73, Joe

Joe, I don't think it really matters how many reminders you send. Rudy isn't going to come off of vacation for us! hehehehe

As I'm sure all the attendees seen the writing on the wall, Rudy's is closed for vacation until 8/21 or something like that.

and I actually changed my bike wash until tomorrow to show up.

See ya next time we do this.

Terry AKA KD7HUU

P.S. Joe, just kidding ya...

I've been out of the HAM thing long enough, being that I don't have a vehicle to use my radio in/on, that I didn't even think about getting on the radio. I was there about 7:45 but didn't see anybody that looked 'hamish'

I figured the reminders were automatic, just couldn't resist the temptation to heckle.

I was there at about 7:32, nobody but me and some guy sleeping on the bench out front. Were you on the bike? I saw someone - I think it was Sossaman and Chandler Heights - on a Harley do a double-take at my 2 antennas on my red Dakota.

After calling you and Jim on 146.520, I decided to head out for Circle K at Chandler Heights & Power for some java. I even swung through Jim's neighborhood a bit - nice quiet area.

So, for all of you, that was my short-lived adventure this morning.

73, Joe

49. Rudys

Yahoo group: Queen_Creek_Hams
Date: 2006-07-29 21:57:05 UTC
From: jhenders@swlink.net
Topic: 49 Message: 49

Folks, I am having lots of outgoing email troubles with my new Qwest DSl. Sorry I was not able to put out the word earlier that Rudys closed. I went there just at 0730, and came home to put out the word. But I see it didn't make it.
Was going to suggest either the 'other' place just south of Rudys, or else the excellent Flight Deck cafe at Williams Gateway.

I tried to find the 220 MHZ secret frequency John uses, but I did not think to try 146.52, sorry.

We will try again!

KF7E

51. New Member - Bill, K1ATV

Yahoo group: Queen_Creek_Hams
Date: 2006-08-05 19:53:53 UTC
From: Joe Sammartino
Topic: 51 Message: 51

Please welcome to the Group, Bill, K1ATV.

Bill's special interest appears to be ATV, among others.

I've played with ATV back in NJ using the Cable TV tuner trick and a dual 440 beam array at NX2Q's mobile shack. It was a lot of fun.

Regards,

Joe, N2QOJ

52. ham radio music video

Yahoo group: Queen_Creek_Hams
Date: 2006-08-05 20:23:33 UTC
From: Joe Sammartino
Topic: 52 Message: 52

Please take a look: http://64.27.98.24/clip.ram

You will nead RealPlayer installed to view it.

Some background: I first found this video and website,
www.hamband.com, a couple of years ago.

I knew that Joe Walsh of the Eagles was a HAM and quite active with
the ARRL and had performed at Dayton. So, I had sent him an email
noting this ham video as something he might be interested. Well, he
though it was interesting too. Then an article from the ARRL came out.
You can find the article here:

http://www.arrl.org/news/stories/2004/03/19/2/

Regards,

Joe, N2QOJ

60. new Library project in Queen Creek

Yahoo group: Queen_Creek_Hams
Date: 2006-09-14 04:27:00 UTC
From: Joe Sammartino
Topic: 60 Message: 60

Does anybody know if Rudy's will be affected by the new library construction project?

I passed by today on the way to the post office and so the big yellow construction project signs on the north side of Ocotillo, not to far from the intersection, maybe 10 yards. The sign indicated that it would be the site of the new library.

It looks like all those businesses will have to go for the project.

61. Novices on HAM TV? Certainly!

Yahoo group: Queen_Creek_Hams
Date: 2006-10-16 01:00:39 UTC
From: William Munsil
Topic: 61 Message: 61

Wake the kids! Tell the neighbors!

It may be a little known fact that Novices can operate Fast Scan HAM TV!

Novices have all privileges between 1.270 and 1.295 GHZ (1270 to 1295 MHz). This includes HAM TV!

This band of frequencies includes two nationally recognized HAM TV channels: 1277.25 and 1289.25 MHz (video carrier).

Just thought you'd like to know.

Joe,

Try out Tri-Tek Electronics on Dunlap in Phoenix. They have some stuff, although not anywhere in the league of some of the mail order houses like All Electronics Corp.

Their link is http://www.tritekelectronics.com/

The best places to go are Frye's Electronics over by I-10 and
baseline, or Circuit Specialists 200 S Country Club Dr in Mesa
(http://www.circuitspecialists.com/)

Other than these, everyone that I know who needs parts just has
accounts at Newark, Jameso, and Allied!

77. HAM TV Transceiver for sale

Yahoo group: Queen_Creek_Hams
Date: 2006-11-15 05:32:47 UTC
From: William Munsil
Topic: 77 Message: 77

I purchased a newer HAM TV transceiver so I have one for sale.

It's a homebrew using all PC Electronics boards - exciter, FM audio board, receiver board and 10-watt brick amp.

Frequency Range: Two channel transmitter, crystaled for 434 MHz (AZ simplex and repeater input, also used in CA); 426.25 MHz (not used in AZ, but used in CA). Tunable receiver, 420 - 450 MHz.

It was used for several years in support of the Rose Parade video coverage and, after that activity ceased, was put up for sale on eBay.

It has standard RCA plug audio and video inputs as well as the old style 10-pin camera connector.

I bought it as a part of a package deal so I'm asking 150 bux cash for it.

By accident I found that I could access the White Tanks HAM TV repeater 50 miles west of me.

Come pick it up at my house in East Mesa.

Phone number is 480-380-2663.

No, that is an all-female group.

FOC is the British Firstclass Operators Club, about 500 Members world-wide
and dedicated to CW, though a few Members do own microphones. They have social events in
North America a few times each year, as well as in Europe and the UK. These dinners are
pleasant events with XYLs and/or family present, and typically are 'Jolly Good Shows'.....

No boat anchors, though!

85. SARC Ham Fest

Yahoo group: Queen_Creek_Hams
Date: 2006-12-05 18:52:01 UTC
From: jasinnj2000
Topic: 85 Message: 85

Well, I attended the ham fest at MCC last Saturday.

The usual stuff was there. Boat anchors to Laser Pens.

I bought the following items:

2 hot dogs
1 coffee
6 raffle tickets

The hot dogs worked without any problems.

The coffee was interesting.

The raffle tickets were DOA. They did not work.

Joe

86. HAM TV at the Rose Parade - Info from World Radio, February 1980

Yahoo group: Queen_Creek_Hams
Date: 2006-12-17 15:17:27 UTC
From: William Munsil
Topic: 86 Message: 86

The Rose Parade covers only 6.5 miles and all signals are aimed at the HAM TV repeater on Mt Wilson. They are then retransmitted all over the LA basin on 1.2 GHz.

There were four fixed camera locations and two additional receiving stations - one at the command van and one for the parade VIPS.

Station One was located at the beginning of the parade where it turns the first corner. Stationed there were WB6BAP, WB6LQP, and me - then known as N7AOU - having hitch hiked there from Phoenix.

Station Two was a short way down the parade route with a narrow window of access to Mt Wilson. Stationed there were W6ORG, his wife, WB6YSS and their two children. This was a hastely selected location as the original site was unusable.

Station Three was manned by WB6CMW, KB6OW and N6BCK. They were located on a balcony of one of Pasadena's taller structures.

Station Four was located on top of KA6AGE's van with WA6YJM assisting with voice co-ordination. It was the farthest location down the parade route.

At the repeater site were K6KMN and WA6SVT making sure that all was in order there.

The VIP receiving site was manned by WB6MEU and the assistant manager of the Tournament of Roses organization.

In the command trailer - along with several other hams operating the voice radios - were WA6BAV and WA6JEY who had overall control of the video transmissions.

Joint co-ordinators of ALL amateur communications, WA6AAD and WB6OJK, congratulated the ATVers especially for a "beautiful and colorful job well done."

From 1968 until about 2004 hams provided all the communications for the parade officials and "shadowed" many of them.

At one time TORRA, Inc - Tournament of Roses Radio Amateurs, Inc - had over 300 dues-paying hams on the roster!

Those were the days, my friends!

Unfortunately, like all good things, it has ceased to exist but some former members are now working the LA Marathon - including one motorcycle mobile HAM TV station and a pedestrian mobile "hard hat"

cam.

All call signs listed were those that the participants held 26 years ago. Some may have changed and some may have become silent keys in the ensuing years.

Bil Munsil
K1ATV HAM TV
Hams should be seen as well as heard.

I send everyone my best wishes at this season of goodwill. One of these days we must all get together at Rudys or other venue.

In fact I am sorry I didn't think of it earlier in the week, but I was away in Alaska on a job last weekend and am completely out of sync with the requirements of the holidays. (we had to work in minus 24F so I claim brain paralysis).

91. Voice radio - 100 years old on Christmas Eve 2006

Yahoo group: Queen_Creek_Hams
Date: 2006-12-25 17:11:50 UTC
From: William Munsil
Topic: 91 Message: 91

Copied from QRZ.COM and before that the BBC.

The world's first radio broadcast took place a hundred years ago on Christmas Eve 1906.

The broadcast, a program of live music, readings and phonograph recordings, was transmitted to ships in the Atlantic Ocean by Reginald Fessenden ☐ a prolific inventor largely forgotten by history.

In the early 1900s, people communicated by radio using Morse code. Fessenden, a Canadian rival of Marconi, decided to broadcast a voice message. His invention of AM radio was years ahead of its time.

On 24 December 1906, radio operators at sea were startled to hear a voice coming over their receivers. Before the word broadcast had even been invented, they heard a mix of speech with live and recorded music ☐ including a rendition of 'silent night'. However, Fessenden's innovation failed to take off commercially and it wasn't until the 1920s that the massive potential of radio for entertainment was realised.

Fessenden originally planned to broadcast across the Atlantic to Scotland. With considerable effort, masts and equipment were built at the small hamlet of Brant Rock near Plymouth, Massachusetts and at Machrihanish on the west coast of Scotland. When, at the last minute, a storm destroyed the Scottish installation, he decided to broadcast to ships at sea instead.

Thanks, borrow works. I would really like one of my own.

BTW, I always return borrowed stuff! I had an acquaintance once who had a "hobby" - he would borrow SomeThing with absolutely no intention of ever returning it unless the owner specifically contacted him and asked for it back. He had a collection of borrowed stuff in his garage. Strange guy; a Palestinian from CA.

111. Local electronic parts houses

Yahoo group: Queen_Creek_Hams
Date: 2007-02-28 06:47:29 UTC
From: jasinnj2000
Topic: 100 Message: 111

Kenn et al,

If you are looking for local places to buy parts, etc., then look at the archived messages for some suggestions.

Here's what had been recommended to me by Jim and Alan of our Group:

"The best places to go are Frye's Electronics over by I-10 and baseline, or Circuit Specialists 200 S Country Club Dr in Mesa (http://www.circuitspecialists.com/)"

"Try out Tri-Tek Electronics on Dunlap in Phoenix. They have some stuff, although not anywhere in the league of some of the mail order houses like All Electronics Corp.

Their link is http://www.tritekelectronics.com/"

Regards,

Joe, N2QOJ

118. Phoenix area repeaters

Yahoo group: Queen_Creek_Hams
Date: 2007-03-14 15:37:46 UTC
From: jasinnj2000
Topic: 118 Message: 118

Another good link to local repeaters:

http://mmi-comm.tripod.com/mcrep.html

Note: In most cases, if UHF repeater PL is 100.0Hz, then consider it open. Otherwise, consider it closed and get permission from repeater owner before use.

119. HAM TV in Germany

Yahoo group: Queen_Creek_Hams
Date: 2007-03-19 18:54:50 UTC
From: William Munsil
Topic: 119 Message: 119

As of Feb 28, 2007 there were close to 150 HAM TV repeaters in Germany
of which about 20 had digital inputs and/or outputs.

Germany is slightly smaller in area than Montana!

122. HAM TV uses in Southern California

Yahoo group: Queen_Creek_Hams
Date: 2007-04-29 15:27:38 UTC
From: William Munsil
Topic: 122 Message: 122

HAM TV uses in Southern California
Info from WA6SVT

Video for public service can be used for damage assesment after a tornado, earthquake, fire, or flood. When the fires of 2003 in the San Bernardino mountains were burning, infrared cameras were used to find hot spots in the smoke that helped guide the fire department air operations and OES to send in the water tanker planes and helicopters.

After the Northridge quake, video of all major bridges was shown to the EOC with safety inspectors viewing the bridges to see more quickly than going in person to evaluate closing roads etc. It saved time in decision making. The key is to have a trained ECS or RACES group to get out to the site that voice communications indicated an expert is needed and get the visual picture back to the expert or decision makers.

Joe:

Thanks for the welcome! Stay tuned - I may have a new callsign in a few weeks as I am working on a vanity application. I'm looking to build out an HF station in the coming months. I will probably make it transportable as I am very interested in portable/emergency communications. I'm currently active on 2m (147.12 morning drive time; 147.36 - 2100 net), 70cm (449.650 Pinal repeater), and 900 Mhz (I have a GTX HT and GTX mobile as a base). I'm interested in digital modes and will probably have PSK31 on 80 meters by the end of the Summer. I am D-star capable on 70cm, though I don't know many others who are - yet. My daughter and I have 2 horses and you can occasionally catch me "Equestrian Mobile" on the 449.650 on weekends.

That's it for now - thanks again for the welcome!

Sonny,

Sounds like you have some great plans in place. Keep us updated.

I usually take some motorcycle rides on the weekends, sometimes just local stuff. I will be taking my HT along and checking in to those repeaters you mention. I don't normally operate vhf/uhf repeaters since I am usually operating into my Echolink node via 223.690Mhz simplex.

Good luck on getting the hf transportable station setup.

Hi folks,

I thought that you may find this file interesting.

It's a list of the stores in the area shopping centers, including the
new stores that are in process.

Just navigate to the "files" section and download the "stores" PDF
file or click on this link:

http://groups.yahoo.com/group/Queen_Creek_Hams/files/stores.pdf

Regards,

Joe, N2QOJ

Here is the URL for the coverage map of the Mt Lemmon HAM TV repeater.

Look it over to see if you will be able to receive it with the right equipment.

132. More than you ever wanted to know about linked HAM TV repeaters

Yahoo group: Queen_Creek_Hams
Date: 2007-05-15 23:19:50 UTC
From: William Munsil
Topic: 132 Message: 132

Well, maybe not more than some folks would like to know.

The latest issue of ATV Quarterly magazine has a very complete and highly technical article concerning the Amateur Television Network HAM TV linked repeaters.

Much of it is above my head - no pun intended - but I recommend it to anyone who would like to set up linked repeaters.

I'm not an expert but I play one on HAM TV

ARRL Field Day coming up among other contests.

Here's the basic info - regards, N2QOJ

==========

ARRL Field Day: 1800Z, Jun 23 to 2100Z, Jun 24
Mode: All
Bands: All, except 30, 17, 12m

Classes:
A: Club/nonclub portable
B: One/two person portable
C: Mobile
D: Home
E: Home-emergency power
F: EOC

Max power:
HP: >150 watts
LP: 150 watts
QRP: 5 watts

Exchange: W/VE: Operating class + ARRL/RAC section

DX: Operating class + "DX"

Work stations: Once per band per mode

QSO Points: 1 point per phone QSO
2 points per CW/digital QSO

Bonus Points: see rules

Multipliers: (none)
Score Calculation: Total score = total QSO points + bonus points

142. For sale - 1991 vintage 10 watt transceiver semi-kit

Yahoo group: Queen_Creek_Hams
Date: 2007-08-11 22:56:23 UTC
From: William Munsil
Topic: 142 Message: 142

Be the first one on your block to run UHF HAM TV!

A year or so ago I picked up off eBay all the boards for a 1991 vintage 10 watt PC Electronics UHF HAM TV transceiver.

The boards include the video exciter, the audio subcarrier board, the 10 watt PA with board and heat sink, and the down converter board in an aluminum box.

The other boards will have to be mounted in an enclosure of your choice.

You will have to supply your own enclosure and pots, knobs, etc.

I have 160 bux in them and will let them all go for that price but shipping is extra.

143. Mobile HAM TV test

Yahoo group: Queen_Creek_Hams
Date: 2007-08-23 15:48:19 UTC
From: William Munsil
Topic: 143 Message: 143

I plan to go mobile with my HAM TV this Saturday sometime between the hours of 2 and 6 PM. The transceiver gets awfully hot in the car so I don't know how long it will last before it overheats.

You can pick up the video off the Shaw Butte W7ATV repeater on 421.25 MHz or the equivalent of CABLE channel 57 or direct on CABLE channel 59 (434 MHz).

Hook your cable-ready TV to a vertically polarized UHF ham antenna and point it at Shaw Butte.

I will be listening on the Shaw Butte voice 146.84 repeater.

Hi Bill,

This aspect of being a ham has always fascinated me.

One question - what type of coverage does the Shaw Butte repeater provide? I'm down by Johnson Ranch in Queen Creek and I'm not even sure an antenna would help me I'm so far away.

Any recommendations (pre-built or homebrew)?

Alan

If you can access the 2-meter 146.84 on Shaw Butte with an HT on a rubber duck antenna you might be able to watch the HAM TV repeaster there but it will require a vertically polarized UHF beam and a HAM TV down converter. I have a couple of the down converters cheap.

If you can access the Mt Lemmon UHF FM voice repeaters with a beam antenna you should be able to see the Mt Lemmon HAM TV repeater but it outputs in the 1.2 GHz band so you will definitely need a 1.2 GHz beam and HAM TV down converter. It operates in beacon mode - transmitting a video signal continuously - when there is no activity.

For everything you EVER wanted to know - well, maybe not - go to hamtv.com. That's the PC Electronics website and Tom, W6ORG, the owner, has been manufacturing and selling HAM TV equipment since 1965!

Hi Bill,

Well, no luck with my HT on Shaw Butte (even with a better than stock antenna). However, I can easily hit Mt Lemmon with no problem (even with reduced power) on the same HT.

Go ahead and send me the articles you have on ham tv - I'd like to take a look at them.

Thanks in advance for the assistance....

I did not hear anyone on the 146.84 asking for a video signal so I did not send any. I put out a call from the HRO parking lot after I had lunch at the Chinese restaurant there and got no response.

Oh well - maybe next time.

Don't forget the Sunday and Wednesday evening video and audio nets.

157. 2-Way HAM TV at the Tucson Hamfest

Yahoo group: Queen_Creek_Hams
Date: 2007-10-19 03:33:09 UTC
From: William Munsil
Topic: 157 Message: 157

This just in from Ron, AE6QU (excerpt):

"Miguel Enriquez's Pueblo H S ARC will be communicating with Tom Fagen's Scout Post 599 at the Tucson Hamfest this Saturday starting at 8 AM."

I will be unable to attend and I'm happy to see that the mode is doing fine with "new blood."

I will be watching the Mt Lemmon repeater here at the house but I'm not sure I can access it.

I have suggested to the W7ASC guys that they put up a 1.2 GHz antenna and down converter as long as the ham shack has to be moved anyway. I have volunteered a mast-mounted down converter.

Ron has offered to do a site survey to see what can be seen on 1.2 GHz from the center.

He will also attempt to arrange a daytime QSO schedule so that visitors to the center can see active HAM TV.

Welcome to our new member KE7OWL, Steven --

Here's Steven's comment:

I live in QC. Just got Tech & General license. Just got 1st radio today
(HT VX170). Looking for local support and to contribute.

Sounds good to me, I'll be there if at all possible. I would very
much like to meet everyone and put a face with a name.

162. QC repeater?

Yahoo group: Queen_Creek_Hams
Date: 2007-10-24 04:18:09 UTC
From: ke7owl
Topic: 162 Message: 162

So I've scoured the WEB to find many listings of repeaters. Is there a specific 2M open repeater in QC or San Tan? Any repeaters up on the San Tan Mtns?

Here's what my WEB search came up with when searching for QC repeaters. I've no idea if these are active, old, etc. Any idea?

146.62 (K7UGA/CADXA)
223.690 (N2QOJ)
224.2-
224.360 (KB2N)
224.4-
442.175+
443.1250 (WD8MHM)

???

I purchased an HT Yaesu VX170 2m which I like very much so far.

I've also stumbled across some other equipment in which a very nice friend at work is loaning to me. Would like to get some comments on this equipment. Is it too old/outdated to be effective? What problems may I run into?

Kenwood TH-215A (5W 2M HT, c. 1985)
Kenwood TM-201A (25W 2M Mobile, c. 1983)
Kenwood TS-140S (100W HF Base, c. 1987)
Kenwood PS-430 (480W,20A power supply, c. 19??)

Here is a site that I use http://www.azrepeaters.net
<http://www.azrepeaters.net/> they keep their list updated pretty
good.

and here is the 2M repeaters in Maricopa County

http://www.azrepeaters.net/pmwiki.php?n=RepeaterMaps.Maricopa2Meters
<http://www.azrepeaters.net/pmwiki.php?n=RepeaterMaps.Maricopa2Meters>

Steve:

I am not the best one to ask about VHF/UHF repeaters, but here's my 2 cents:

146.62 K7UGA was removed over 4 years ago from it's location over near Ocotillo and Coyote, east of Queen Creek.

443.125 was relocated, maybe off the air (I can't hear it) when WD8MHM moved up to the Rim country over 2 years ago. You can email Dale at his QRZ.COm address.

I can't comment on the 224.360 or 223.69 as my only 220 rig is a small HT and I can't hear anything on those frequencies. However Joe N2QOJ can likely tell you himself about his, and the KB2N is a mystery to me since that call is licensed in NJ on QRZ.COM. Maybe he brings a repeater with him on visits?

There are no Amateur repeaters in the San Tans as there is no site available, nor have I heard of a commercial site.

I use the 147.32 CADXA repeater when I am in range (it is waaaayyy up on the north side of Phoenix) although there are good repeaters on 2m on several peaks to the north and east of Queen Creek. Cannot offer much info, since I rarely use any VHF/UHF FM repeater excpt for emergencies. Even in my mobile, I am usually on HF.

You might look closer at the various AZ repeater organizations and spend some time listening to several of their other listed repeaters that you feel have 'your kind' of conversations. Some are special interest, some are very open and friendly, and some are less so.

Perhaps you can look into one of the groups that are involved in Amateur emergency communications preparedness, as not only will you meet locals, but do some good at the same time.

If you would like to meet for breakfast ar Rudy's on Saturday, drop me an email directly with yoiur phone number. Maybe we can get some others on this group interested in another 'eyeball QSO'. This weekend is the CQWW SSB DX contest, so depending on band conditions, I may or may not be involved. But let me know.

I know Joe expressed interest, but I have not seen anyone else respond yet.

173. Arizona Near Space Research

Yahoo group: Queen_Creek_Hams
Date: 2007-10-26 21:13:15 UTC
From: Terry Pendergrass
Topic: 173 Message: 173

I, Terry(KD7HUU), used to be part of Arizona Near Space Research, you can find out more about them at their website http://www.ansr.org <http://www.ansr.org>

I'm not sure if this is OK to post(Joe let me know if it's not and I won't do it again) , but I thought some might be interested in either tagging along or monitoring.

Email from Jack Crabtree (founder of ANSR)
Arizona Near Space Research (ANSR) is pleased to announce the flight of ANSR-40. This high altitude balloon flight will take place on Saturday, November 3, 2007 at 9:00 A.M. The primary launch site will the the University of Arizona Maricopa Agricultural Center, near Maricopa, AZ (33 deg 04.42 min, 111 deg 58.97 min). The alternate launch site will be the Gila Bend High School, in Gila Bend, AZ (32 deg 57.33 min, 111 deg 58.97 min). Final launch site choice will be depend on the predicted winds aloft. Watch for additional announcements on Thursday and Friday prior to launch day.

The balloon will be a 3000-gram weather balloon, filled with helium. The expected burst altitude will be 90,000 feet or more. The flight is anticipated to last about 2.5 hours from launch to touchdown.

The balloon payloads will consisting of TEN "Changes in Altitudes" BalloonSats each weighting less than 1.5 lbs. The BalloonSats will carry temperature and pressure sensors as well as digital cameras. Ten Middle and High Schools from across Arizona will participate. This flight is sponsored by the Arizona Space Grant Consortium and we thank them for helping us fulfill our goal of "Promoting Science and Education through Amateur Radio and High Altitude Balloons."

In addition, the standard ANSR Flight Computer and Pico-Beacon will accompany the student payloads. The ANSR Cross-band repeater will again be activated on this flight. Stations, especially those distant from the balloon, are invited to use the repeater when the repeater is not in use by the chase and recovery team. Please give priority to the chase and recovery teams if asked. Feel free to use the Yahoogroups Ballooning site to coordinate DX schedules. Peak altitude should be about 10:30 to 10:50 A.M. MST (1630-1650 UTC)

The following is the payload frequency plan:

APRS Beacon

445.950 MHz packet at 5, 25, 35, 55 seconds UTC time via KD7LMO-11

Cross Band NB-FM Voice Repeater

Input: 145.560 MHz/162.2 Hz PL tone

Output: 445.525 MHz Linked to IRLP Node 9255

APRS when repeater not in use on 445.950 MHz at 10, 20, 40, and 50

seconds UTC time via KD7LMO-11

Landing prediction after burst at 15 and 45 seconds UTC time via

KD7LMO (no -SSID)

Pico Beacon APRS

445.950 MHz packet at 0, 30 seconds UTC time via KD7LMO-12

Our mobile cross band Digipeater will repeat the APRS data to the
144.390 MHz standard APRS frequency and subsequently I-GATED to the
Internet for out of area trackers. You can track the flight using either
of the following links:

http://www.findu.com/cgi-bin/find.cgi?kd7lmo-11
<http://www.findu.com/cgi-bin/find.cgi?kd7lmo-11>

http://map.aprsworld.net/kd7lmo-11 <http://map.aprsworld.net/kd7lmo-11>

Be sure to check this site for updates to this announcement prior to
the flight.

Jack Crabtree, W7JLC
ANSR/AZ Space Grant Liaison

George Helser's correct amateur radio call sign is W7SAZ. I listed it incorrectly in the GMRS description notes.

That is a pretty good site.

Here is another:

wwww.buxcommco.com

Lots of connectors, PKS31 interfaces, parts. Great prices too

188. various

Yahoo group: Queen_Creek_Hams
Date: 2007-11-02 13:47:16 UTC
From: ke7owl
Topic: 188 Message: 188

1. I really must frequent this group more often. Y'all had a meet-n-greet already that I missed.

2. Is there a Queen Creek Amateur Radio Club? Or is this group pretty much the beginnings of one? Has there ever been a QC HAM club that meets regularly?

3. What does it take to get a repeater on San Tan Mtn? Is there electricity up there? Who is the local govt. authority to talk to? Pinal? Anyone ever investigate this before?

4. I find this Yahoo web interface cumbersome. Is there a way to get access to this group through email?

5. Are there any decent Usenet amateur radio groups?

6. Does anyone have any spare equipment laying around? I'm looking for a few silver-plated amphenol/teflon SO-239 chassis connectors, PL-259 connectors, 50' of RG-8 coax, and some center/end insulators.

7. Can PVC pipe be used as center/end insulators in an antenna system? Is this safe? Or must it be the ceramic type?

8. Why the heck do antenna tuners cost so dang much money?!??

9. Does anyone else live in an HOA? Have you had any luck with antennas in your attic? Is the Ventenna worth it? Is it worth it to try to make it oneself? What is used as the counterpoise for the Ventenna?

10. For HF, how is your ground? Did you have any trouble driving an 8 foot solid copper rod into the ground around here?

11. From your house, what 2M repeaters have you been able to hit? From my house (Ocotillo & Hawes), using a 5/25 watt (25 year old) 2M mobile, with a mag-mount antenna in the attic, I've hit the following 2M repeaters. Not exactly sure if the Location is correct on some. For example, the ones listed at Mt Ord have coordinates, according to qrz.com, in the middle of Phoenix. So I'm confused about that.

Output Location Call Tone Sponsor
145.350 Wildflower Mtn, Peoria KD7CCV 162.2 DAWN
145.410 Pinal Pk K7EAR 141.3 EAARS
146.720 Mesa grain silo WA7ZFZ 162.2 MARA
146.740 Signal Pk, Pinal WA7HUH 162.2 GCR
146.820 Chase Tower N1KQ 162.2 MCRG
146.840 Shaw Butte W7ATV 162.2 AATV
146.860 Mesa ground tower K4CSD 162.2 City of Mesa

146.880 Mt Lemmon, Tucson N7OEM 110.9 N7OEM
146.920 Mt Ord W7MDY 162.2 ARA
146.940 White Tanks W7EX 162.2 ARA Calzona Link
146.960 Mt Ord WR7GC 141.3 Gila Co RACES
146.980 Bell Butte AI7R 100.0 Tempe
147.080 Thompson Pk, Phoenix KG7UN 162.2 Maricopa County
147.120 East Mesa WB7TJD 162.2 SARC
147.160 Mt Lemmon K7EAR 141.3 EAARS
147.200 Pinal Pk W7ARA 162.2 ARA
147.240 Shaw Butte W7ARA 162.2 ARA MCECG
147.320 Cave Creek K5VT none CADXA
147.340 Scottsdale Grnd Twr W7MOT 162.2 MARCA
147.360 Mt Ord W7MDY 162.2 ARA

Is this good for this my setup? Or should I be hitting many more 2M repeaters from here in QC?

>

No there is no QC Amateur Radio Club now or has been before as far as I know. We'll have to hear from some folks that have been around longer than me - Jim?

* No, given the size of the ham population in Q.C. Township and the multitude of clubs from A.J. to Florence and Casa Grande to Buckeye and Avondale, there has not been one I know of in Q.C., certainly in the past 10 years.

> 3. What does it take to get a repeater on San Tan Mtn? Is there
> electricity up there? Who is the local govt. authority to talk to?
> Pinal? Anyone ever investigate this before?
>

I can't talk to this one - I'd be interested in a repeater at San Tan too - especially for my Echolink. Again, we need some input from the others.

* Money, power, God-like influence with the Native Americans that own that area, and FCC approval. No power, no roads, no sites, no access. Oh, did I mention money? Solar might work, but forget running a power line. Everyone from Uncle Sam (FAA) to commercial and ham interests have tried. As i think I mentioned before, the closest site is south east of Sacaton and that is off limits to hams and to new users.

Join a couple of the multitudes of clubs with repeaters mentioned in last answer... :-)

> 4. I find this Yahoo web interface cumbersome. Is there a way to get
> access to this group through email?
>

Cumbersome? I can't share that opinion.

* Me neither. A reflector is a reflector, and I am glad Jon set this up. It works better than my 220... :-)

> 6. Does anyone have any spare equipment laying around? I'm looking for
> a few silver-plated amphenol/teflon SO-239 chassis connectors, PL-259
> connectors, 50' of RG-8 coax, and some center/end insulators.
>

Not me but tell us what you are up to - it sounds like a transmission line into the house.

* Even Radio Shack does not carry good stuff like this anymore. Order from The WireMan, CableXperts, or other online store. Get out your wallet. Or go to the December hamfest in Mesa. In fact, Steve, judging from your long list of questions, you will likely find not only some of these items there, but also answers and many possible new friends. Besides, you can always marvel at all the old boat anchors....

> 7. Can PVC pipe be used as center/end insulators in an antenna system?
> Is this safe? Or must it be the ceramic type?
>

Jim, please help - Jim seems qualified to tackle this one too. I think PVC, especially in this climate, is ok but let's see what everyone else thinks. I'm sure many of you have experience that can address this question.

* If you get UV-resistant PVC, it will make decent insulators. But the question really is 'what are you going to use them on'? HF, VHF, outside antennas or inside, etc? What might work for 100w on a wire antenna for 80m might be unsuitable for 2m or 70CM.

8. Why the heck do antenna tuners cost so dang much money?!??
>

MFJ, LDG, Dentron, or what? I think the LDG autotuners are nice. The MFJ manual tuners come with lifetime warranty. The rig manufactures want a bunch of money but they look nice too.

* Because people will pay $$ for someone else to overcharge them for under-quality parts sold as a tuner for all occasions. In reality, if you read the ARRL Handbook you can figure out what the best circuit is for your specific application, locate parts at one of those ham fests, and build it your self for lots less. It will likely work better, last longer, and teach you some valuable theory in the process, too. L-network, Pi-network, 50-Ohms to hi-Z or 50-Ohms to low Z? Hi pass or low pass characteristics? Balanced tuner or unbalanced?

10. For HF, how is your ground? Did you have any trouble driving an 8
> foot solid copper rod into the ground around here?
>

Can't answer - others, please.

* only the last 7 to 8 feet.

11. From your house, what 2M repeaters have you been able to hit?.

With my HT and rubber duck, about 15 on 2m. With my IC-706 at 100w into 22 elements (vertical polarization) at 40 ft, I have used repeaters in California and New Mexico, and heard just about every one listen within 150 miles of QC. But I would rather work HF.

As for your query about HOAs, I do not live in one. It was hard to find a suitable place, but worth it. However, I have operated from restricted places with stealthy antennas, and successfully installed them for others. (Did a stealth flagpole for some friends in Sun Lakes - SGC autotuner at the base of a 16-ft pole and they can work 40-10m with ease).

You just have to be smarter than these gestapo-mentality enforcers. A pair of doublets in parallel in the rain gutters on 2 sides of a house can be turned into quite a phased array that is out of sight and out of mind.

Good luck.

Jim, KF7E

There is also a HAM TV repeater - W7ATN - on Mt Lemmon as well.

It requires a 1.2 GHz HAM TV down converter and vertically polarized 1.2 GHz antenna.

It comes in P-3 (we use P-units) - snowy and no color - here at my house at Southern and Sossaman and I can access it as well.

It operates in beacon mode so there's always a video signal on the air.

There is also a Yahoo Arizona HAM TV Group - plus a national Yahoo! HAM TV Group.

Bil
K1ATV HAM TV
Mesa AZ
Hams should be SEEN as well as heard.
(Unless they live in nidost resorts, that is.)

Steve:

I just looked for ARRL Handbooks on my bookshelf... I used to have several but have given most of them away. My 2007 edition is, sadly, lacking much of the wonderful old info about antenna tuners and circuits. Many of the editions up until about 1990 had it all in them.

In my 1978 edition, much of the tuner info is on p582, where they show 4 curcuits suitable for a good 'homebrew' tuner for unbalanced (coaxial) outputs.

Two of these are 'high pass' design, and 2 are 'low pass'. Info on which is which, and why, can be found on p48 and 50.

It appears a good idea to have 2 ARRL Handbooks these days, one old one for the gold mine of tried and true basic theory, and a recent one for all the whiz-bang new technology.

But if you cant match the transmitter to a good antenna, you won't do much talking on the air on any band from DC to light, hihi.

Sounds like I should look into getting an old handbook. I am not an electronics guy. I may have used a soldering iron once in my life. Of course I learned some theory with regard to capacitors, inductors, etc to get my General license. But I have no practical experience. I wouldn't even know where to begin to build an antenna tuner.

I would probably want an antenna tuner that handles random wire and/or ladder line. For HF (10m to 160m) I was going to run a wire in the attic from east to west. This wire would be 33' long on both ends (dipole) totaling 66 feet. In the middle I'd attach ladder line and run it down into my shack which would then connect to the antenna tuner. This feed line may be about 50'. I can't put the antenna tuner at the feed point because that is up in the attic. I realize this length dipole will most likely only get me talking on 10m to 40m. (40m = 62' dipole).

This is all just theory from books. I have never actually done this but am eager to try.

I have a $25 mag-mount 2m/70cm antenna in the attic that works great on my 2m mobile. But I want to move that back to the truck, and build a VHF antenna for the attic. This one will be 19" vertical with 19" radials bent down to between 30-45 degrees to bring the impedance up to 50ohm.

I don't believe I have the test equipment to actually measure these antennas I want to build. I do have an o-scope and a multi-meter. But that's it. No SWR or watt-meter.

I got my Technician license in Sept, then studied for General and got it in October. I am now studying for Extra.

Back to you, from Mr. Beginner.

199. Upcoming ANSR balloon launch

Yahoo group: Queen_Creek_Hams
Date: 2007-11-09 14:06:28 UTC
From: Terry Pendergrass
Topic: 199 Message: 199

Just passing on this email about an upcoming balloon launch.

Arizona Near Space Research (ANSR) is pleased to announce the flight of ANSR-41. This high altitude balloon flight will take place on Saturday, November 17, 2007 at 9:00 A.M MST. The primary launch site will be the University of Arizona Maricopa Agricultural Center, near Maricopa, AZ (33 deg 04.42 min, 111 deg 58.97 min). Alternate launch sites will be the Gila Bend High School, in Gila Bend, AZ (32 deg 57.33 min, 111 deg 58.97 min) and the Freeman Exit launch platform east of Gila Bend, AZ (32 deg 50.70 min, 112 deg 19.05 min). The final launch site choice will be depend on the predicted winds aloft. Watch for additional announcements on Thursday and Friday prior to launch day at http://groups.yahoo.com/group/Ballooning/ <http://groups.yahoo.com/group/Ballooning/> .
The balloon will be a 3000-gram weather balloon, filled with helium. The expected burst altitude will be 90,000 feet or more. The flight is anticipated to last about 2.5 hours from launch to touchdown. The balloon will carry three ASCEND! payloads designed and built by students from the University of Arizona, Arizona State University and, Embry Riddle Aeronautical University. The payloads will carry various scientific instruments and each will weight less than 4.0 lbs. This flight is sponsored by the Arizona Space Grant Consortium and we thank them for helping us fulfill our goal of "Promoting Science and Education through Amateur Radio and High Altitude Balloons." Additional information about the ASCEND! program can be found at http://spacegrant.arizona.edu/research/ascend <http://spacegrant.arizona.edu/research/ascend> . The standard ANSR Flight Computer and Pico-Beacon will accompany the student payloads. The ANSR Cross-band repeater will again be activated on this flight. Stations, especially those distant from the balloon, are invited to use the repeater when the repeater is not in use by the chase and recovery team. Please give priority to the chase and recovery teams if asked. Feel free to use the Yahoogroups Ballooning site to coordinate DX schedules. Peak altitude should be about 10:30 to 10:50 A.M. MST (1730-1750 UTC)

The following is the payload frequency plan:

APRS Beacon
445.950 MHz packet at 5, 25, 35, 55 seconds UTC time via KD7LMO-11

Cross Band NB-FM Voice Repeater
Input: 145.560 MHz/162.2 Hz PL tone
Output: 445.525 MHz Linked to IRLP Node 9255
APRS when repeater not in use on 445.950 MHz at 10, 20, 40, and 50 seconds UTC time via KD7LMO-11

Landing prediction after burst at 15 and 45 seconds UTC time via
KD7LMO (no -SSID)
Pico Beacon APRS
445.950 MHz packet at 0, 30 seconds UTC time via KD7LMO-12

Our mobile cross band Digipeater will repeat the APRS data to the
144.390 MHz standard APRS frequency and subsequently I-GATED to the
Internet for out of area trackers. You can track the flight using either
of the following links:
http://www.findu.com/cgi-bin/find.cgi?kd7lmo-11
http://map.aprsworld.net/kd7lmo-11
Be sure to check http://groups.yahoo.com/group/Ballooning/
<http://groups.yahoo.com/group/Ballooning/> for updates to this
announcement prior to the flight.

200. mobile / portable HF operating

Yahoo group: Queen_Creek_Hams
Date: 2007-11-12 04:42:14 UTC
From: jasinnj2000
Topic: 200 Message: 200

I'm starting to get the notion that maybe some HF capability in my truck would be nice, especially on those trips to Four Peaks for shooting and such.

What are your experiences with mobile or portable HF operating?

I think Jim uses an ICOM 706 MKIIG with a homemade mobile antenna. I'm thinking about using the same rig or maybe the Yaesu 857D.

Please let me know your thoughts - especially on moble HF antennas.

Thanks,

Joe, N2QOJ

Folks,

Area ham fests are coming up. I've entered the next couple into this Group's calendar with automatic reminders.

December 1, 2007 - Superstition ARC
http://wb7tjd.org/hamfest/
6 AM to 2 PM
Mesa Community College

January 12, 2008 - Westfest - ThunderBird ARC
7 AM to 12 PM
http://www.w7tbc.org/Westfest.html
Thunderbird School of Global Management Activity Center
59th Ave & Country Gables Lane, Glendale, AZ (Quarter mile South of W. Greenway Road). Follow the signs to the Activity Center Parking Lot.

73, Joe - N2QOJ

ANSR-42 Flight Announcement
<http://www.ansr.org/2007/12/08/ansr-42-flight-announcement/>
<http://www.ansr.org/2007/12/08/ansr-42-flight-announcement/>
Updated ANSR-42 Flight Annoucement
Changes:
- Removed NSRV beacon from the flight
- Only 20m PSK-31 on HF beacon, no 80m for this checkout flight.

Final launch location posted Friday 14Dec to Yahoo Ballooning and www.ansr.org Monitor Sacaton repeater Saturday morning for pre-flight and launch location changes if the winds change.

Arizona Near Space Research (ANSR) is pleased to announce the flight of ANSR-42. This high altitude balloon flight will take place on Saturday, December 15, 2007 at 9:00 A.M MST (1600 UTC). The primary launch site will be University of Arizona Maricopa Agricultural Center, near Maricopa, AZ (N33.073667 W111.9828333). Launch location updates published to Yahoo ballooning group and http://www.ansr.org with any changes flight morning via the Sacaton repeater.

The balloon will be a 1200-gram weather balloon, filled with helium. The expected burst altitude will be 90,000 feet or more. The flight is anticipated to last about 2.5 hours from launch to touchdown.

The balloon will carry four packages:
1) Cross Band Voice Repeater
2) HF-Beacon: New hardware checkout
3) New "Yellow Box" APRS Beacon: New hardware checkout
4) ASU Space Grant: ASU flying their Space Grant package.

Note that we have a HF PSK-31 beacon on this flight, very interested in long range contacts and feedback via IRLP during the flight and data sent to the Yahoo Ballooning group.

Talk In Prior to launch / tracking when cross-band repeater not available on the Sacaton Peak,AZ repeater, 447.725 MHz/100.0 Hz PL tone. Our mobile cross band Digipeater will repeat the 445.950MHZ APRS data to the 144.390 MHz standard APRS frequency and subsequently I-GATED to the Internet for out of area trackers.

Payload frequency plan:

Cross Band NB-FM Voice Repeater
Details: http://www.kd7lmo.net/pc.html
Input: 145.560 MHz/162.2 Hz PL tone
Output: 445.525 MHz Linked to IRLP Node 9255

Sorry to hear you may not be going, Terry ---

Here is the link to my streaming video of Google Earth and live tracking of the balloon via APRS ID KD7LMO-11 and KA7NSR-11.

http://72.204.250.6:8080/

or ...

http://joeoffice.no-ip.info:8080/

This is a direct stream from my home PC desktop.

The Google Earth should update each APRS ID location every 60 seconds or so. I also have UI-View32 running in the background. I'll run them side-by-side until tomorrow morning at 9AM, then switch to Google Earth only.

Regards,

Joe - N2QOJ

211. ANSR-42 update

Yahoo group: Queen_Creek_Hams
Date: 2007-12-15 19:15:16 UTC
From: Terry Pendergrass
Topic: 211 Message: 211

Thanks to Joe for helping me get situated on Google Earth this morning.

Here is an update from Jack.

The tracking and recovery report they have a visual on the ANSR-42 payloads. The bad news it that they draped over some medium tension power lines. The power company has been called but it is not known how long it will take to get the payloads down. In the meantime, the beacons continue to work. On findu.com you can almost see the powerlines. Is anyone still copying the 20m PSK-31??

216. Rudy's Saturday 12-29 breakfast

Yahoo group: Queen_Creek_Hams
Date: 2007-12-28 15:22:48 UTC
From: Jim Henderson
Topic: 216 Message: 216

I will be there 0800 or so, and I think a couple of other hams from Chandler/Mesa will be there also. Last Saturday breakfast in 2007 !

218. Spare 220 rig?

Yahoo group: Queen_Creek_Hams
Date: 2007-12-28 21:55:19 UTC
From: William Munsil
Topic: 218 Message: 218

Yolanda Martin, KB4MES, is a "lowly" novice and she can only operate VHF voice on 1.25 Meters. She's been a novice for over 20 years and has never communicated via ham radio.

Does anybody out there have a spare 220 HT and some kind of antenna they would donate?

She doesn't know I'm making this request.

226. Arizona PRB-1

Yahoo group: Queen_Creek_Hams
Date: 2008-02-04 16:21:11 UTC
From: Terry Pendergrass
Topic: 226 Message: 226

In case you don't get the ARRL newsletters:

ARRL ARIZONA SECTION NEWS February 2008 ARIZONA PRB-1 Dan Brown NA7DB is working with Representative Nancy McLain onre-introducing the Arizona PRB-1 bill. Recall that last year it got throughthe House with a 56 to 2 vote in favor of the bill. Dan says "We discussed some possible changes/additions to the bill. Thepolitical decision is to leave the bill exactly the way it passed the House. If we try to make it more complex or involve money, it will create frictionin the process. The strategy for the House is to contact the Representatives and thank themfor their support last year. Then let them know that the same bill theyvoted YES on last year is up again and we will appreciate their support. In the Senate where our bill was held by the Government CommitteeChairman, we have made BIG progress. So please do not attack that Chairman! We have made progress with the HOA lobbyists and have an agreement with theArizona Counties Association. We still will have to contact all 30 Senators and make sure theyunderstand our Bill and ask for their support. There will be Committee hearings to attend and we need groups of Hamsmaking the rounds of the House and Senate to meet with and educate thosefolks. Because of the Budget Crisis I think it will be in February when ourBill comes up. Please let me know if you would like to be involved in the Committeehearings process and personally visiting with our legislators in this effortto get our Amateur Radio Bill passed. I hope everyone will be involved incontacting their Representatives and Senators when we have a Bill number. A huge thanks to everyone who made the effort last year to help get ourbill through the House. I hope in 2008 we will get the job done in theSenate also."

Terry

237. Queen Creek Emergency Preparedness

Yahoo group: Queen_Creek_Hams
Date: 2008-03-20 14:26:06 UTC
From: Terry Pendergrass
Topic: 237 Message: 237

While contacting Joe LaFortune about the CERT class I asked him about Amateur radio and the towns emergency plan and this is what he replied. It is actually from two different emails.

The Town's Emergency Operations Plan does contain a provision to use amateur radio. This has also been discussed in some of our fire meetings as the Town is in the process of standing up a municipal fire department. This need will grow as we determine how to incorporate amateur radio as the fire department matures.

At this time we do not have the emergency operations plan on the website. Since we are just standing up our municipal fire department I am not sure at this time when we will be reviewing our emergency operations plan again. We are currently in the process of opening a temporary fire station, starting the design process on a permanent second station, and purchasing/equipping three new fire trucks. I will hold on to your contact information for future use when I have a better idea of schedule.

This sounds like a good oportunity for us to get involved with the town and grease some wheels. I don't know much about doing this but will start doing some research and try to be pro-active. If anyone has any prior dealings with this kind of thing, I'm sure you could be utilized.

Terry, W5NRA

This could be a good opportunity.

I went down this road here several years ago, when I was asked to write the Q.C. tower ordinance. This was before LaFortune was involved. At that time I could only find 3 other hams, one on HF and 2 VHF only. The HF op has since passed away. QC hame were very hard to find in person, although therer were about 22 listed in the FCC database.

Now that there is a CERT process, and the beginnings of a Town plan within which Amateurs volunteers could be used, maybe it is time to beat the bushes again, perhaps by going so far as knocking on every door in the present database shown for QC, and see if there is a ham there and if they have any interest.

I used to do lots of Emergency comms, belonged to RACES, Navy MARS, and local groups. But now under ther ARRL plan, all past eqperience doersnt coult and one has to start with the new CERT. SO this would be the time to organize and all do it together!

And a Happy Easter to all.

KF7E

Hey Terry,

Thanks for the posting. I am thinking about applying for the class myself. Are you planning on taking it also?

A quick question: do we have an official radio club out this way - I mean other than SARC? I'm in Pinal County around Gantzel and Combs.

I hang out on the SARC repeater most of the time, but I have a FT-1802M on order for my truck and hope to hang out on simplex a little more - otherwise, I use a VX-150. I'm studying to upgrade to my General Class, but I'd like to become more proficient with what I have first before I step up. It would be good to spend some time learning from knowledgeable hams - never had the opportunity.

Thanks for your time.

Peace,

Don KE7AVV

Quit wishing - start praying!
Be today the person you want to become tomorrow.
*Compassion is most often needed where it is least deserved.
Since laughter is good for the soul, look in the mirror more often---works for me!
The greatest things in life aren't things.
Life's challenges don't build character, they simply reveal what's inside a person.
A word of advice: When the horse dies, get off it!
The people who really matter don't count how many times you fail but how many times you get back up and try again.

Yes, but it will be the later class as I recently broke my hand and currently have pins holding it together.

>
> I hang out on the SARC repeater most of the time, but I have a FT-1802M on order for my truck and hope to hang out on simplex a little more - otherwise, I use a VX-150. I'm studying to upgrade to my General Class, but I'd like to become more proficient with what I have first before I step up. It would be good to spend some time learning from knowledgeable hams - never had the opportunity.

From: Terry Pendergrass
Topic: 243 Message: 243

What do you guys think about having a breakfast next Saturday not this weekend as it's Easter weekend. Maybe we can discuss the town emergency plan a bit and the CERT program.

Terry, W5NRA

"QRZ Lists 2 Pages of hams in QC. Where are they? I'm concerned about antenna limitations and the way around them. W5NRA sent me a link to the site"

Welcome, Tom --

Good question! We have not run across too many of those hams.

Joe, NQOJ - E. Arrowhead Trail

Hi Tom, I haven't heard any more from the HOA since sending them the email telling them I use it for emergency communications. But, I'll keep you posted if I hear any more from them.

Terry

Sure, Terry, why knot? Sounds like a Good Idea. Its been a while ...

BTW, I took the CERT class (QC CERT Class # 4) in Sept. `05 and enjoyed it. They talked about an Annual Event where they would "test"all the current CERT teams but, it never happened.

One thing that was obvious when we did our Final Exercise for the class was that they had no communications at all; and no Plan. I've talked to other CERT groups and some have hams that do it. Something else that any CERT group could do is suggest that ALL their members who can afford it purchase an FRS/GMRS radio and bring it to an Event. A Better Idea would be to have a Communications Coordinator who could organize comms at any CERT event and might even suggest specific models of radios for members to buy ... and/or features ...

See you guys next Saturday @ Rudy's ... (Jim, Terry, Joe, Mike...?) ... 0800?

Kenn, WB7OSR

Topic: 54 Message: 249

I ran this search also on the UALR site, which I frequently find is more accurate. In theory both sites should have the same FCC data, but on this search for 'Queen Creek, AZ', I got 87 listings with 11 shown as INACTIVE.

There must be a lot of concealed antennas around here.. :-)

Here is the link:

http://callsign.ualr.edu/callsign.shtml

I see NA7AA is still listed even though he passed away 3 years ago and his license is expired; also there is a W8YFN listed a block down the road from my house, but never have seen a man living there in the 8 years I have been in this QTH.

I briefly drove by the houses in my area for these callsigns:

AD7PD, this is a UPS store and business front, no residence or antenna.

KC7FNI No antenna visible

AA7PE, No antenna visible

AA7K hard to see, set way back from road, possible a 2m whip on garage

N7BBL Eureka! Telescoping tower with microwave or 1296 type antennas.

I did not check these calls in QRZ.com for email addresses. Does anyone on this reflector know these hams or have heard them on the air?

73 and Happy Easter

KF7E

I plan to be there, I think Kenn will, and possibly a visitor Sonny, AA7K.

253. Breakfast at Rudy's - Saturday, March 29 @ 8 AM

Yahoo group: Queen_Creek_Hams
Date: 2008-03-29 17:36:47 UTC
From: jasinnj2000
Topic: 253 Message: 253

Hi folks,

I just wanted to say that I had a great time at breakfast today.

I had a thought- while we work on the list of QC hams, we should have a good list of our Group members too.

I'll put together a list and post it here later today or tonight.

Regards,

Joe, N2QOJ

256. Group Member List

Yahoo group: Queen_Creek_Hams
Date: 2008-04-10 06:18:42 UTC
From: jasinnj2000
Topic: 256 Message: 256

Folks,

Here's a list of current Group members:

"Joe Sammartino", "jsammartino@...", "N2QOJ"
"Steven Connet", "ke7owl@...", "KE7OWL"
"Michael Dougher", "doughersm@...", "KD7VXX"
"Don Gudeman", "just_radar@yahoo.com", "KE7AVV"
"Bil Munsil", "wmunsil@...", "K1ATV"
"Jim Henderson", "jhenders@...", "KF7E"
"Alan Lagerhausen", "azalanpc@...", "KD7RPX"
"Teddy Pendergrass", "w5nra@...", "W5NRA"
"Len Rulason", "rulason@...", "N8AGQ"
"Charles Kollet", "w7crk@...", "W7CRK"
"Sonny Horton", "AA7K@...", "AA7K"
"Kenn Burnell", "merchmanaz-st3@yahoo.com", "WB7OSR"
"Tom Miller", "k8pnw@...", "K8PNW"

13 members is the total membership count.

Regards,

Joe

From: William Munsil
Topic: 257 Message: 257

Ron Phillips, AE6QU, tells me that the HAM TV repeater on Mt Lemmon now puts out 30 watts and is no longer in beacon mode.

It is about P3 or P4 here at my house in Mesa now but I have vertical sync problems.

For those of you that have 1.2 GHz antennas and down converters it would be appreciated to pass along reception reports.

As I said, you will need to key it up first - or have someone else key it up.

Bil

Joe, you must be a Teddy Pendergrass fan! My name is Terry. LOL I've
been asked many, many times if my name was Teddy, but I have checked
my birth certificate and it is indeed Terry.

260. New Database of Hams in the 85242 zip

Yahoo group: Queen_Creek_Hams
Date: 2008-04-14 18:46:37 UTC
From: Terry Pendergrass
Topic: 260 Message: 260

I created a new database of hams in the 85242 zip code. I set it up so any member can edit as needed, so we can add or delete as we see fit. Mainly my thought was that we can use this to weed out the list of hams willing to support, in whatever capacity they feel they can, the town in the emergency plan.

Terry
W5NRA

P.S. Hope you don't mind Joe.

273. My first board meeting - copied from another Yahoo! group

Yahoo group: Queen_Creek_Hams
Date: 2008-06-04 06:17:42 UTC
From: William Munsil
Topic: 273 Message: 273

Ok guys my first board meeting was very err ahh interesting to say the least. We had a great time all though I didn't understand all the proper protocol. One guy at the head of the table I think he's in charge calls the meeting to order and notes the exact time. Then a motion is made to approve the minutes? Kinda weird I thought. There is no motion we are all sitting down, and why are we approving minutes its only been two since the meeting started, and why do we have to approve them anyway. Then I learned the guy really in charge is the guy that yells the loudest. The in charge person changed every couple of minutes for awhile. Well that was ok at least we didn't have to approve them again. The minutes that is. Some people at the meeting evidently did not work well as the current person in charge would yell "YOU ARE OUT OF ORDER YOU ARE OUT OF ORDER" Then someone else would yell "ORDER ORDER" and well that really confused the waiter because he would come running and....Well it was all very interesting.

I live in Q.C. in Maricopa County.

I am willing to do Rudy's this coming Saturday (5 July) is anyone else
can make it also. Say 8AM?

We have lost a couple local hams due to moving away, etc. We have not
been holding 'regularly scheduled' breakfasts. But we can always start.

But we can start :-)

I live inside the town's borders near Power & Chandler Heights. I would love to join the group for breakfast, but can't this weekend due to an early AM appt up in the Camelback area. The 12th is a potential option for me, however. I'm more accustomed to having my weekend breakfasts a little earlier - that 8AM start means half the day is done already ;-)

hehe, yeah 8AM is right smack dab in the middle of whatever it is I do.
I'm not sure I can make this one either, we have a lunch or something
going on in NorthWest Phoenix. I will have to take a snack just for the
trip. I will try to make it but not sure yet.

Terry, AKA W5NRA

P.S. I live behind the firestation in downtown QC, about 0.5 miles as
the crow flies from Rudy's.

Yeah, well, it's late for me too but I can sacrifice every once in a while, especially for a Good Cause!

I have a UHF/BNC Connector to return to you. I'll bring it Saturday.

No, Sonny couldn't make it because of a prior commitment up north.

I won't be able to make it this week - I have a 9AM appt at Camelback & 24th. I'll shoot for the 12th if everyone else plans to be there.

73 and happy 4th!

OOps, I forgot about that appt. Well, the 12th is the IARU contest, one of the few I still find fun. But I may be extra hungry after tuning dead bands!

This road was just rebuilt to the tune of millions, and it is no better then the old one.

Seems like the engineer needs to go back to school, and the taxpayers are due a refund.

But we had 3 news helicopters hovering around this morning, and the damage and flooding was worse over towards the south east.

The arroyo behind my home, part of the same Engineering Excellence project as the part on Power, was a 4- deep, 30' ft wide raging torrent this morning. And thanks to the brain trust of engineers and QC Inspectors, there is a new Grand Canyon being born... very historic, no wonder the news choppers were filming!

Found more water in the shack, but did not come from the roof as it did in December. No damage, but a mess.

I hope evereyone else fared no worse.

Drive carefully, more rain tonight.

Power Road closed between Ocotillo and Chandler Heights
Posted Date: 7/11/2008
Flooding due to the heavy rain late Thursday and early today has caused the Town's Public Works department to close Power Road from Ocotillo to Chandler Heights roads. Approximately 80 feet of the shoulder on the west side of the road has been washed out.

Crews are currently on the scene gathering materials to stabilize the road.

At the time of this notification, there was not estimated time for reopening Power Road in that area.

For media inquiries, please contact Marnie Schubert, Communications & Marketing Division Manager at 480-797-8691.

307. "Dateline Presents" "Tower Dogs"

Yahoo group: Queen_Creek_Hams
Date: 2008-07-20 17:33:36 UTC
From: Terry Pendergrass
Topic: 307 Message: 307

This was taken from http://www.msnbc.msn.com/id/25736991/
<http://www.msnbc.msn.com/id/25736991/>

Thought some might be interested, if you are on Cox and have the HD package it is going to be on Channel 712 at 9 or 10PM local time.

PRESS RELEASE
updated 9:03 a.m. MT, Fri., July. 18, 2008
NEW YORK - - An upcoming "Dateline Presents" takes a never-before-seen journey into the perilous world of the tower climbers who work on the frontlines of America's high-tech communications system. They scale heights of up to 2,000 feet, in all types of weather, to install, maintain, and upgrade cell phone, Internet, and broadcast towers coast to coast. And according to figures cited by OSHA, these so-called tower dogs have the highest death rate per capita of any occupation in the country.

The hour-long broadcast goes up close and personal to give a no-holds-barred look at tower dogs' lives ☐ up in the air and on the ground. We experience their on-the-job tension and watch them work hard, play hard, and mourn when they lose one of their own. In a twist on all the dangerous-job programs viewers have already seen, "Tower Dogs" follows an unusual subcontract crew boss: a woman named Nikki Collins, a single mom, former cheerleader, and the person keeping her tough-guy charges in one piece.

There are approximately 9,500 tower climbers working at any given time, and they spend about 300 days per year on the road. A "Dateline" team worked with veteran tower dog Doug Delaney for four months documenting this group of tower climbers as they worked their way through 40 towns and cities in 24 states. During this time there were seven fatalities nationwide, including five deaths in a 12-day period in April.

"Tower Dogs" airs on Monday, July 21 at 10:00 PM/ET. David Corvo is the executive producer.

From: William Munsil
Topic: 309 Message: 309

We just finished another successful Drive Time Net on 147.12, the Superstition ARC repeater here in East Mesa.

It runs weekdays from 7 to 8 AM and has all kinds of wonderful pieces of trivia - if I do say so myself since I was acting net control today.

You need not be a member of the Superstition Club nor mobile, for that matter.

This morning we had nine mobiles and three fixed stations - not counting yours truly - for some or all of the net.

I started out listing events that happened this day in history - things like today is Monica Lewinsky's birthday and Pancho Villa died on this day.

Then I went to the 10,000 Answers to Trivia questions including the speed of light in miles per second, the number of bytes in a megabyte - which is wrong in the book.

Well, enough of an advertizement.

I hope you will all join us tomorrow on 147.12 between 7 and 8 AM.

311. 2M Repeaters Reachable from Queen Creek

Yahoo group: Queen_Creek_Hams
Date: 2008-07-25 18:22:41 UTC
From: Kenn Burnell, WB7OSR
Topic: 311 Message: 311

I'm trying to set up some HTs for two grandsons who will take (and, pass) their Technician tests on August 18th. As such, I would like to get an idea of what repeaters folks have been successful in working from Queen Creek with an HT. I have been able to hit 146.92, 147.36 and 146.72 from my roof on a good night with a "5 watt" HT and a 1/4 wave rubber duckie.

Obviously the antenna used will make a lot of difference. I have several rubber ducks, a mobile magnetic mounted 5/8 wave whip and a Diamond X-30 on the roof. But the boys will begin with rubber duckies.

I would appreciate comments from anyone with experience in this area.

Okay, looks like that's going to be me! For all you 2M in The Group, know that the nearest 2M repeater seems to be an ARA (http://w7ara.org/Web/) repeater on Pinal Peak, SE of Globe. I can key it from my front yard in QC with a 1/2 watt HT. Frequency is 147.200 +, PL is 162.2 .

I think slightly different.

The target market is/was the same small elitist club of extra rich Amateurs that buy the top rice-box $10,000 rigs - except that to produce it in the choked, overly regulated European manufacturing arena added the extra cost that made it too expensive to conpete against the Japanese.

In Europe, where factories and most technical industries seem to be offering their employees 4-8 weeks of vacation, generous other benefits, as well as the complex European Community ISO standards and expensive accomodation to such things as RoHS electronic manufacturing, then that is a LOT of cost overhead to try to make up for in the marketplace.

The characteristics of that radio were truly cutting-edge.

But there are very few situations where the edge a rig like that gives a ham can be truly observed in operation, and the difference between that one and the next level down is not far in performance but is thousands of dollars. (Anyone interested in a good comparison of current RX performance can look up Bob Sherwood's test data at http://www.sherweng.com/table.html)

For 1/3 to 1/4 of the price of the German model, I could do just as well in the pileups with K3, Orion 2, a Flex Radio, or Omni 7. In fact, my old TS850SAT with Inrad filters is on this data sheet, and still commands better numbers than a lot of other, newer rigs.

For $12,000 I could have 2 new K3s (one to use and one hot spare!) plus $6000 worth of new tower and antennas!

Alas, I am not in that elite market niche...

Subject: [Queen_Creek_Hams] ARRL article

Has anyone seen this article that's been flying around"

German Radio Manufacturer Halts Transceiver Production
"Production of the PT-8000 equipment series has been halted. Due to the persistent challenges we've had to overcome in the process of bringing the official EU-wide manufacturer's model to fruition, it became necessary to make more and more adaptations in the design of this cutting-edge transceiver. The lofty design goals of the PT-8000 could be attained in some prototypes. We encountered difficulties that we could not overcome at justifiable expense in guaranteeing, without reservation, a high standard of mass production involving many suppliers. We appreciate the great interest this project has

attracted over its entire course. -- Translation by Rick Lindquist, WW3DE"

http://www.arrl.org/news/stories/2008/07/30/10236/

I just can't believe the company's statement. I don't think they are being truthful at all.

I think they finally realized that the target audience was so small that they could never make this radio at any profit margin. $12,000 to $16,000 ???? Plus there are many mil spec alternatives now. Are they for real? I guess they have severe drug use in Germany too.

The link above will bring you to the complete article.

Try this very good repeater mapping tool:

http://k5ehx.net/repeaters/qrepeater.php?coverage=0&clat=33.248680&clong=-111.634511

That link will show you all repeaters covering the Queen Creek area.

Or, start here:

http://k5ehx.net/repeaters/qrepeater.php

318. Re5: 2M Repeaters Reachable from Queen Creek

Thanks, Joe.

This is VERY impressive.

It's Interesting that the k5ehx.net Web site didn't come up when I
googled (well, GMBMGoogle [http://www.givemebackmygoogle.com/])
"amateur radio repeaters arizona". I did find a lot of interesting
sites that addressed repeater site locations in AZ but I was actually
hoping for a map. The one you found is almost perfect. Now all I have
to do is figure out how to read it -- as in how to find the repeaters
for given coverage-circles.

Here are other maps that I found for Arizona from ARA::>

http://w7ara.org/Web/Photo/Maps/State.htm

and Maricopa and Pinal counties from artscipub::>

http://www.artscipub.com/repeaters/
http://www.artscipub.com/repeaters/states/Arizona.asp

Regds, kenn

Thanks, Joe.

I just found another mapping site for AZ repeaters in the QC area::>

http://www.levinecentral.com/repeaters/google_mapping_distance.php?Address=85242&Miles=25&BP2=1

The map link above displays 21 repeaters within 25 miles of Queen Creek, AZ.

Regards,

Kenn, WB7OSR

1291.34 MHz in the town of Alpine shows up in Phoenix so there are errors.

I'll bet none of the HAM TV repeaters is included.

Another error - on the 220 map it shows Hayden Peak in the Phoenix
area but it's actually in the Kingman area.

326. loss of power

Yahoo group: Queen_Creek_Hams
Date: 2008-08-11 18:35:51 UTC
From: jasinnj2000
Topic: 326 Message: 326

Hi Folks,

Running laptop and air card now!

We lost all power in my neighborhood - Cortina / 188th Street & Canary
- at 11:20 AM.

I was just wondering if anybody else on the Group is affected.

Having some local repeaters programmed in sounds like a good idea now!

Regards,

Joe, N2QOJ

Please welcome Conrad, K1EC.

He is located at E. Desert Springs and is interested in researching some local ham radio groups.

Conrad - there are many listed in our "Links" section and I'm sure our Group members will be happy to give you personal experiences.

He has an interesting web site at http://www.qsl.net/k1ec/ with lots of great pictures.

Again, welcome to our humble Group!

Welcome to the group Conrad! I noticed that you spend some time on the
3905 nets, maybe we'll make contact there as I get on there every once
in a while. Mostly between studying or when I'm not swamped doing the
school thing. I did get my USB Signalink last night, so I'll be playing
around with that.

There isn't any mention of it at either of these AATV websites:

http://www.qsl.net/ki7cx/aatv_f.htm

http://www.qsl.net/aatv/

The club calendar doesn't seem to be up to date - Jan '07 is the last
entry.

You may want to send an email to one of the club officers.

It was held on December 9th in 2007:

'Arizona Amateurs on Television (AATV) Annual â□□Pig Feastâ□□ Sunday
December 9th, 2007 at 1:00 PM.
6101 W. Michelle, Glendale, Arizona. Talk in frequency 146.84 pl 162.2
contact ki7cx@... for more information."

Another ham of the old breed is gone.

Oliver was a ham for over 65 years, IIRC, and was known for most of
those years as William Seven William George William (W7WGW), Oboe Love
Ida Victor Easy Roger.

When I became licensed in 1977 he kept THE list of all the repeaters -
a
small number as opposed to now - in Arizona and was one of the first
repeater builders - WR7AFC (Arizona's Finest Channel) which was
located
on Mingus Mountain.

After retiring from KOOL-TV channel 10 as a transmitter site engineer
he
and his wife (who preceeded him in death) moved to a small community
just east of the Pima County line, northwest of Benson on I-10.

Several years ago he gave up W7WGW and became W7AFC.

Some info from W7GNP:

Services will be held on Friday September 12, 2008 at 11:00 a.m. at
the Southern Arizona Veterans Memorial Cemetery in Sierra Vista, AZ.
In lieu of flowers please contribute to any veteran charity.

THE ACCIDENT

This ham is sitting at his desk answering a letter from his insurance company...

I am writing in response to your request for additional information for block 3 of the accident reporting form. You said in your letter that I should explain more fully, and I trust that the following details will be sufficient.

I am an Amateur Radio Operator and on the day of the accident I was working alone on the top section of my new 80 foot tower. When I had completed my work, I discovered that I had over the course of several trips up the tower, brought up about 300 pounds of tools and spare hardware. Rather than carry the now unneeded tools and materials down by hand, I decided to lower the items down in a small barrel by using a pulley which was attached to the gin pole at the top of the tower.

Securing the rope at ground level, I went to the top of the tower and loaded the tools and material into the barrel. Then I went back to the ground and untied the rope, holding it tightly to insure a slow descent of the 300 pounds of tools, (you will note that in block 11 of the report form that I weigh about 155 pounds.)

Due to my surprise at being jerked off the ground so suddenly, I lost my presence of mind and forgot to let go of the rope. Needless to say I proceeded up the side of the tower at a rather rapid rate. In the vicinity of the 40 foot level, I met the barrel coming down. This explains my fractured skull and broken collerbone. Slowed only slightly, I continued my ascent up the side of the tower, not stopping until the fingers of my right hand were two knuckles deep into the pulley.

Luckily, by this time I had regained my presence of mind and was able to hold onto the rope in spite of my pain. At the same time however, the barrel of tools hit the ground and the bottom fell out of the barrel. Devoid of the weight of the tools, the barrel now weighed only about 20 pounds. (I refer you again to my weight in block 11.) As you can imagine, I began a rapid descent down the side of the tower. In the vicinity of the 40 foot level I met the barrel coming up. Well, this accounts for the two fractured ankles and the lacerations of my legs and lower body.

The encounter with the barrel slowed me enough to lessen my injuries when I fell into the pile of tools, and I was fortunate to have only 3 vertebrae cracked. I am sorry to report however, that as I lay there on the tools, in pain, unable to stand and not observing the barrel 80 feet above me, I again lost my presence of mind-- I let go of the rope.

It is even older than that, so far the oldest link I have is the ORIGINAL story was by Gerrard Hoffnung in an address to the Oxford Union in the 50's and concerned that barrel of bricks.

One English friend in Kenya remembers it coming from India post war.

Universal humor, I suippose.

There are three Chinese astronauts in space berween 24 and 30 Sep and at 4:30 PM Beijing time tomorrow they will be doing the first ever spacewalk outside the Shenzhou7 spacecraft.

You can watch the english service of Central Chinese Television at the following URL:

http://english.cctv.com/index.shtml#

If my math is correct Beijing time is 15 hours ahead of MST.

Thanks Joe.

Well, I enjoyed the time and met some new friends. I wrote my callsign on my name tag it sparked a little conversation with the group. There was one other ham in the class, that i'm trying to get him somewhat aquaintedwith our group. I also spoke to Joe LaFortune about our group and will probably send him a link. He stated that they will be incorporating Amateur Radio service into their Emergency plan sometime this next year and I asked him to keep us in his mind when they start doing that.

It really felt like "a disaster" when we did our final class as we were on the simulated emergency situation. To me it felt like we were very disorganized, but the Fire Chief said that we did what we were supposed to do. Several of us realized that after we examined and moved victims that our gloves were still in our backpacks. It's a good thing we didn't get docked for that.

Overall, it was enjoyable and great learning experience.

Terry

Topic: 366 Message: 368

Congrats, Terry.

That makes two hams that I know who have completed the CERT class in Queen Creek. I would recommend that every ham radio operator take the CERT class. I would rate it just below the CCW course

http://www.azccw.com/

as Courses to Take.

Here's a secret site for AZSERC -- Local Emergency Planning Committees are appointed by the Arizona State Emergency Response Commission

https://www.azserc.org/AZSERCHome/tabid/36/Default.aspx

Here are some local CERT newsletters::>

http://www.ci.gilbert.az.us/fire/pdf/CERTNewsletter0408.pdf

http://www.chandlercert.org/news/March_Newsletter.pdf

Here's how Chandler announced a CERT Annual Drill a couple of years ago and encouraged members to bring their own FRS radios.

http://www.chandlercert.org/news/October_Newsletter.pdf

My take on comms and CERT is that there is no "leadership" or Plan from Homeland Security for local CERT groups to communicate among themselves or to anyone else. So, it's everyone for themselves!

Regds, kenn

With hurricanes, tornadoes, fires out of control, mud slides,
flooding, severe thunderstorms tearing up the country from one end to
another, and with the threat of bird flu and terrorist attacks, 'Are we
sure this is a good time to take God out of the Pledge of Allegiance?'

Currently there is only one DATV repeater in the US - in Columbus OH.

There are several in Germany, however.

AATV and ATN separately are discussing one.

When plans are completed for the new Columbus module on the ISS it will have a DATV downlink so school kids can see the astronauts while they are talking with them.

I plan to stay analog so I can still use my analog receivers for something. :)

There is a new Yahoo digital group but it will be primarily data and voice.

381. Re: HAM TV at the Mesa Hamfest

Yahoo group: Queen_Creek_Hams
Date: 2008-12-07 00:36:18 UTC
From: William Munsil
Topic: 373 Message: 381

It was nice to visit with some of the folks I've communicated with in the past.

Several folks came by my HAM TV mobile and I also walked across the parking lot with my pocket portable and showed the picture and audio to lots more.

There were quite a few questions about Digital HAM TV - DATV - and many folks were surprized that there was one repeater and two or three mobile stations in the US - Columbus OH - and many more in Germany. There was one question about necessary changes to Part 97, the ham radio rules, because of DATV. I see no reason why since hams can experiment with all modes of transmission.

397. Talking on the phone and driving - some interesting observations

Yahoo group: Queen_Creek_Hams
Date: 2009-02-16 20:39:06 UTC
From: Joe Sammartino
Topic: 397 Message: 397

I found this to be a very interesting article on a local YAHOO ham radio Group that I thought was interesting enough to share.

Regards.

Joe, N2QOJ

==========

By Stephanie Chen
CNN

(CNN) -- Most of us know we shouldn't be talking on a handheld cell phone while driving. But recent studies suggest that hands-free devices are just as dangerous on the road.

Engaging in a phone conversation on a mobile device while driving distracts the brain and delays reaction times, experts said. Drivers are more likely to swerve between lanes, slow down and miss important signs.

"When you're on a call, even if both hands are on the wheel, your head is in the call," said Janet Froetscher, president of the National Safety Council, which in January urged legislators in all 50 states to pass laws prohibiting motorists from using cell phone devices.

A recent University of Utah study found that drivers engaging in a cell phone conversation on a headset were more likely to make errors behind the wheel than a driver talking to a front-seat passenger.

"It doesn't matter what kind of cell phone device they are using, because the impairments are so large," said University of Utah professor David Strayer, who used a high-tech driving simulator for his experiment.

Strayer's study, published in December, concluded that conversations with a front-seat passenger can actually mitigate accidents, because the passenger can help observe road conditions and warn the driver of possible hazards.

In Strayer's previous studies, he found driving while talking on a mobile device is "just as bad as driving drunk <http://topics.cnn.com/topics/drunk_driving/>."

The risk of getting into a car accident while talking on a wireless device -- including headsets and vehicles with built-in communication systems -- is growing as the number of cell phone subscribers increases.

There are 270 million cell phone subscribers in the United States, up from 76 million in 1999, according to CTIA -- The Wireless Association,

an organization representing the wireless communications industry.

In a survey by Nationwide Insurance, 80 percent of people admitted to talking on their cell phones <http://topics.cnn.com/topics/Cellular_Phones> while driving.* *About 45 percent of drivers said they have been hit or nearly hit by someone using a cell phone, according to Nationwide's survey, conducted in 2006.* *

Some experts said drivers talking on cell phones are four times more likely to get into a crash than those who don't talk on their phones behind the wheel.

One study from the Harvard Center for Risk Analysis estimated that 636,000 traffic accidents <http://topics.cnn.com/topics/Automotive_Safety> each year -- about 6 percent of all accidents -- are caused by drivers using their cell phones, resulting in an estimated 2,600 deaths.

Elderly and younger drivers are most at risk of getting into an accident when they talk on a mobile device while driving, said Arthur Kramer, a psychology professor at the University of Illinois at Urbana-Champaign.

"I don't think legislation alone is the answer," Kramer said. "Education needs to go along with the legislation to encourage people that these are risky habits for yourself and for others."

There is no federal law against using handheld devices on the road, but six states and the District of Columbia have such laws, according to the National Conference of State Legislatures, a group that tracks legislative data trends. No states ban the use of hands-free or wireless communication devices, experts said.

Some private industries, such as trucking and bus companies, prohibit their employees from using cell phones on the road. Other states restrict teenagers from talking on cell phones while driving.

Anne Teigen, a policy specialist on transportation issues for the National Conference of State Legislatures, says states are moving to ban handheld cell phone use. Almost all states have debated the issue, but many governments are reluctant to pass restrictions because they say there isn't enough research.

They point out that talking on a mobile device isn't the only distraction. Other distractions, such as reaching for the glove compartment, changing the radio station or putting on makeup, also can cause accidents.

The popularity of smart phones equipped with Internet, text messaging and e-mail present drivers with even more distractions. Such new technology also makes it difficult for states to keep their laws updated.

"Then there is the final question of whether these laws are enforceable or not," Teigen said.

Some members of the cell phone industry are advising drivers to stop using cell phones on the road, but few have taken a stance on hands-free devices, because research has been limited.

Verizon Wireless was one of the first cellular phone companies to support hands-free driving laws in the early 2000s. The company is focusing on promoting laws against text-messaging while driving. So far, only a handful of states ban the practice.

Aegis Mobility, a Vancouver, Canada, company, has created a device that would reduce cell phone usage in cars. The product, DriveAssist, set to launch this fall with a major network carrier in the United States, will enable cell phones to automatically detect when a mobile user is driving.

Users can subscribe to DriveAssist's service, which manages incoming and outgoing calls, text messages and e-mails electronically. Callers get a message that the recipient is driving but can leave an emergency message alerting the driver to pull over and return the call.

"People find it hard to stop talking on their cell phones because we've been conditioned our entire life to answer the phone," said David Teater of Spring Lake, Michigan, one of the product's backers.

Five years ago, Teater's seventh-grade son died in a daytime car accident after a woman talking on her cell phone ran a red light.

"Her life was ruined as well," Teater said. "She had no idea what she was doing was so dangerous. The vast majority of drivers have no ide that it's dangerous.

"

Topic: 398 Message: 398

Queen Creek residents invited to safety fair
Posted Date: 3/5/2009

Residents of all ages are invited to the free Play it Safe safety fair, hosted by the Queen Creek Fire Department from 10 a.m. to 2 p.m. Saturday, March 14 at the Queen Creek Library, 21802 S. Ellsworth Road.

Children can receive free bicycle helmets, navigate safely through bicycle obstacle courses, play exciting games and listen to safety stories read by the Queen Creek firefighters! Safety technique demonstrations will also take place, including how to use a fire extinguisher correctly. Fire engine tours will be available to those interested in learning more about the operation of fire engines.

For more information about the safety fair or to view safety information, please visit www.queencreek.org<http://www.queencreek.org/Index.aspx?page=124&recordid=3501>.

406. AATV Video Net on the Internet

Yahoo group: Queen_Creek_Hams
Date: 2009-04-25 22:12:03 UTC
From: William Munsil
Topic: 406 Message: 406

The Sunday and Wednesday evening video nets will be on batc.tv on a trial basis.
Start time is 7:30 PM but there might be activity at other times as well.

Go to batc.tv, click on Member Streams and look for KD7RDB.

If the word "streaming" is there click on it and you can watch the net.

There is also a way to check in with comments via the Internet.

It does require a high speed Internet connection.

There are about a dozen ATV repeaters also available as well as maybe two dozen individual streams.

407. HAM TV at RST

Yahoo group: Queen_Creek_Hams
Date: 2009-04-28 22:56:52 UTC
From: William Munsil
Topic: 407 Message: 407

Ron Phillips, AE6QU, of Sun City will be demonstrating HAM TV for the RST (Radio Society of Tucson) ham club in Tucson on Tuesday, May 12, 2009 at 7:00 PM.

The meeting location is at Cox Media, 1650 E River Road, Suite 201.

There will be an optional pre-meeting dinner at 5:00 PM at Ruby Tuesday located just south of River on Stone Ave.

I may also attend but it's not certain yet.

If I do attend I will bring my mobile HAM TV station along with me - including my 1.2 GHz down converter.

How about all of you Southern AZ folks who have run ATV in the past plan to attend - and everyone else, too, of course.

Subject: Queen Creek: Road closure at 196th Street and Ocotillo Road
To: <jsammartino@...>

Road closure at 196th Street and Ocotillo Road
Posted Date: 5/29/2009
A sinkhole that has developed on 196th Street has forced the closure of the roadway at the intersection of Ocotillo Road. It is expected to remain closed until approximately Thursday, June 4. Residents living in this area south of Ocotillo Road should access their neighborhood from alternate points on Hawes or Sossaman roads.

We feature downloads of all kinds every day at Lifehacker. Today, however,
we're bundling all the best free downloads for new computer owners,
re-installers, would-be geeks, or anyone who wants to save time installing
the best stuff out there. This is our 2009 Lifehacker Pack for Windows
computers.

The idea is the same as when we first introduced the Lifehacker
Pack<http://lifehacker.com/149665/geek-to-live--lifehacker-pack>more
than three years ago—a single, handy list that we think improves the
computer lives of Windows users. We're also providing a utility to download
some or all of these applications at once—more on that after the list.

You can head directly to each application's download page from the
[Download] links following their write-ups, and see what Lifehacker
originally wrote about them at the [LH Post] link. If there's a portable
version of an application that you can run off a thumb drive and/or test out
without installing, we've linked to that at [Portable], or added a
"+Portable" to the main download link.

Onto the list!

Productivity

- *Foxit Reader <http://www.foxitsoftware.com/pdf/rd_intro.php>* - Opens,
save, and prints PDFs much faster and lighter than Adobe's official reader,
whether on your desktop or through your browser, and it won't nag you every
two hours to update it or its "components." There are some down-sides, like
how it asks to install a browser toolbar during installation, and some
reported difficulties with multiple monitors. But if a document absolutely
won't work with anything but Adobe-sanctioned Reader, try Adobe Reader
Lite<http://www.softpedia.com/get/Office-tools/PDF/Adobe-Reader-Lite.shtml>,
which cuts out all the "Maybe You'll Also Like" add-ons and extras out of
Adobe's product and leaves just its basic rendering intact.
[Download<http://www.foxitsoftware.com/pdf/reader/download.php>]
[LH post<http://lifehacker.com/software/pdf/download-of-the-day-foxit-reader-20-windows-20
0988.php>
]
-
- *Notepad++ <http://notepad-plus.sourceforge.net/uk/site.htm>* - If you
just want to write, save, and edit text, it's hard to go wrong with
Notepad++. This freebie offers tabbed file views, syntax coloring for those
working in HTML or other code, and, as the name implies, does a whole lot of
what most people wish Notepad did. If you want a free office suite that
offers *most* of what Microsoft's Office suite does, try
OpenOffice.org<http://openoffice.org/>.
If you love working in the constantly-backed-up cloud, try the
Zoho<http://zoho.com/>or Google
Docs <http://docs.google.com/> suites.
[Download<http://sourceforge.net/project/showfiles.php?group_id=95717&package_id=102072>]
[LH Post <http://lifehacker.com/385929/best-text-editors>]
[Portable<http://portableapps.com/apps/development/notepadpp_portable>
]
-
- *Texter <http://lifehacker.com/238306/lifehacker-code-texter-windows>*-
Whether you write code, write out the same address repeatedly, or
constantly misspell a certain word, Lifehacker's own text replacement app
wakes up whenever you type certain phrases and then springs into action,
saving you serious time and helping you avoid burdensome busy work. [
Download <http://lifehacker.com/238306/lifehacker-code-texter-windows>(+Portable)]
-

Internet/Communication

- *Firefox <http://www.mozilla.com/en-US/firefox/personal.html>* - All
debates about security, memory use, or compatibility amongst the web
browsers aside, Firefox can adapt to nearly anyone's browsing habits through
a range of adaptations. Whether that's an extension/add-on (and here are our
top 10
picks<http://lifehacker.com/5205629/top-10-must+have-firefox-extensions-2009-edition>),
a Greasemonkey script (again, our
10<http://lifehacker.com/5245938/top-10-greasemonkey-user-scripts-2009-edition>),

or some deep-down about:config
tweaks<http://lifehacker.com/5041335/useful-firefox-3-configuration-tweaks>,
Firefox can probably be what you want it to be. Put down the Internet
Explorer and slowly back away into a better web life.
[Download<http://www.mozilla.com/en-US/firefox/all.html>]

-
- *Pidgin <http://www.pidgin.im/>* - Do you ever use AOL/AIM, Google
Talk, MSN, Yahoo, ICQ, Jabber, or even old-school IRC to chat online? Pidgin
has you covered, and it's got plenty of recommendable
plug-ins<http://lifehacker.com/356291/ten-must+have-plug+ins-to-power-up-pidgin>.
It can tab your chats in a single window, update you on new emails, and work
inside most any smiley system out there (which has, oddly enough, become a
notable issue). And while the up-and-coming IM app and-then-some Digsby has
garnered a lot of users, its large footprint and questionable installation
choices (it's got a really unfriendly installer that tries installing a lot
of adware) keep us firmly in the Pidgin camp for now.
[Download<http://pidgin.im/download/>]
[LH Post<http://lifehacker.com/363182/chat-across-im-platforms-with-pidgin-24>]
[Portable <http://portableapps.com/apps/internet/pidgin_portable>]
-
- *Postbox <http://postbox-inc.com/>* - If you're not using your email's
web interface, use this. It's basically
Thunderbird<http://www.mozillamessaging.com/thunderbird/>,
the open-source email client we'd previously included in our Lifehacker
pack, but remixed with stronger, almost Gmail-like powers. It finds and
indexes all the attachments in your email account, groups together
conversations with similar subject chains with the "Gather" command (like
Gmail's conversations), offers tabbed inbox and message views, and lets you
organize emails under your own chosen "Topics." It's also got built-in easy
setup steps for Gmail and other webmail systems—in other words, everything
we're waiting to see Thunderbird implement.

-

Utilities

- *7-Zip <http://www.7-zip.org/>* - The fix-all archiving/un-zipping
program. It basically fills in all the gaps in your system's compression
abilities. Multi-file RAR packages, Mac-formatted archives, and even ISO
images can all be opened, and the right-click integration makes it all too
easy to do so. [Download <http://7-zip.org/download.html>] [LH
Post<http://lifehacker.com/5066712/hive-five-winner-for-best-file-compression-tool-7+zip>]
[Portable <http://portableapps.com/apps/utilities/7-zip_portable>]
-
- *Everything <http://www.voidtools.com/>* - Does what you really want
when you hit "Search" in Windows. It's really tiny, doesn't need to be

installed if you don't want, and searches for files across your system with the speed of a jackrabbit gone rogue on old-school cold medicine. Faster than that, really, and it makes finding and deleting file types<http://lifehacker.com/5202601/how-do-i-find-and-delete-files-of-a-certain-type>, digging through your browser cache, and any other file search task far faster. We used to recommend Google Desktop for a system-wide search tool, and it certainly has its merits—including some neat gadgets for Gmail<http://lifehacker.com/5100649/gmail-google-desktop-gadget-now-available>and Google Calendar<http://lifehacker.com/5135993/google-calendar-desktop-gadget-released>—but, in most cases, you're not going to need to find a single word out of every single document on your system. You just want that apples.doc thing, wherever it is, and Everything finds it as fast as you can type it. [Download <http://www.voidtools.com/download.php> (+Portable)] [LH Post<http://lifehacker.com/5054669/everything-finds-windows-files-as-you-type>]

-

- *µTorrent <http://www.utorrent.com/>* - Also known as uTorrent. If you're a complete newcomer to BitTorrent, uTorrent makes it easy. Install it, and any torrent file you click on is automatically handled and grabbed by uTorrent, and saved in your Downloads folder, making a seemingly nerd-core activity as easy as opening an MP3.If you're a BitTorrent pro, you should know that uTorrent's features—remote control and download starting from the web<http://lifehacker.com/260393/remote-control-your-torrents-with-utorrents-webui>, a phone<http://lifehacker.com/282875/control-bittorrent-downloads-from-your-mobile-phone-with-utorrent-mui>, or using Dropbox<http://lifehacker.com/5175362/start-bittorrent-downloads-at-home-from-any-computer-with-dropbox>—truly set it apart. [Download <http://www.utorrent.com/downloads/>] [LH Post<http://lifehacker.com/400201/>]

-

- *Revo Uninstaller <http://revouninstaller/>* - Windows doesn't always remove everything that a program leaves behind—file folders, Start menu items, menu entries, you name it. Revo Uninstaller does. It runs a standard uninstaller, then it searches your system for everything the program changed or touched while it was installing. If you don't know the name of a program you want to kill off, or don't see it offered when Revo starts up, choose "Hunter Mode" and click on a window or message from that program. Got annoying programs that start up with your computer without permission? Yeah, Revo handles them too. It's like the software equivalent of bleach. [Download<http://www.revouninstaller.com/revo_uninstaller_free_download.html>(+Portable)] [LH Post<http://lifehacker.com/282337/completely-remove-programs-with-revo-uninstaller>]

-

- *TeraCopy <http://www.codesector.com/teracopy.php>* - Windows is slow, and occasionally fails, at copying large files, or just big batches of them. TeraCopy copies things between destinations faster, with more options on

what to replace or skip based on file dates, and can actually be (gasp!)
paused if you need to do something else while The Complete Works of Woody
Allen are being transferred.
[Download<http://www.codesector.com/download.php>(+Portable)] [LH
Post<http://lifehacker.com/software/featured-windows-download/speed-up-file-copying-with-teracopy-263492.php>
]
-
- *ImgBurn <http://www.imgburn.com/>* - It does just about everything you
can possibly do with a CD, DVD, Blu-Ray or HD-DVD disc, and the image files
that make them. Use this instead of the software that came with your system
or add-on disc drive, because it can make music discs, data backups, video
DVDs, and other projects with grace and speed, and all for free. [

Post<http://lifehacker.com/software/burn/download-of-the-day-imgburn-windows-233085.php>
]

Photos & Video

- *Picasa <http://picasa.google.com/>* - One of the few software
recommendations that this editor's wife, parents, and other relatives
actually stick with after installation. Google's free software indexes your
computer's pictures and makes them a snap to flick through, lightly edit
without a Photoshop
degree<http://lifehacker.com/268714/edit-your-digital-photos-with-picasa>,
and share through email or uploading to Picasa Web Albums (or an add-on
button<http://lifehacker.com/264834/upload-picasa-pics-to-flickr-with-picasa2flickr>).
Most important of all, it makes importing pictures from any digital camera a
lot more intuitive than Windows' own process.
[Download<http://picasa.google.com/>]
[LH Post <http://lifehacker.com/5059302/picasa-3-betas-new-features>]
-
- *VLC <http://videolan.org/vlc>* - Got a video or audio file to play?
VLC probably plays it. Don't like how naggy and heavy-running Windows Media
Player is? VLC is lighter. Want it free, working on any system, and have it
show album art from your tracks? Done and done.
[Download<http://www.videolan.org/vlc/download-windows.html>]

-

Music

- *If you own an iPod or iPhone—iTunes<http://www.apple.com/itunes/overview/>
* - For seamless syncing between your iPhone or iPod devices and your
music collection, it's hard to beat iTunes—which is, of course, Apple's
intended outcome. There are other iPod-to-computer
solutions<http://lifehacker.com/394046/copy-music-from-your-iphone-or-ipod-to-your-computer-for-free>,
but none are really worry-free and seamlessly integrated with everything an
iPod can do, including updates, album art transfers, and, in the case of

iPhones and iPod touch models, backups. It's not that bad a music manager, either, especially if you've got a huge collection or compatible Apple devices, like AirTunes-capable speakers. If you need it to do more, check out our picks for the 23 best iTunes add-ons<http://lifehacker.com/332251/the-23-best-itunes-add+ons>. [Download <http://www.apple.com/itunes/download/>] [LH Post<http://lifehacker.com/software/itunes/geek-to-live--itunes-power-tips-219765.php>]
-
- *No iPhone or iPod—Songbird <http://songbirdnest.com/>* - Like iTunes, except open-source, open to killer add-ons<http://lifehacker.com/5108978/killer-add+ons-make-songbird-so-much-better>, and much more web-savvy—point it at a web page full of music, and it plays it like it's just really fancy playlist. It can, in fact, play Apple-formatted tracks with a (default) add-on, including any older, copy-protected songs you bought from iTunes, and manages non-iPhone/touch iPods fairly well, but you'll still need iTunes for restoring, upgrading, and backing up your device. For music in general, though, Songbird is a nice midway point between iTunes' big, big tent and a tight little open-source player. [Download <http://getsongbird.com/download/>] [LH Post<http://lifehacker.com/5100579/songbird-10-release-official-fixes-bugs-plays-itunes-purchases>
]
-

File Backups/Syncing

- *Dropbox <http://getdropbox.com/>* - Put simply, Dropbox makes synchronizing your files across Windows, Mac, or Linux systems a very simple, almost magical process. Put a copy of what you're working on or want saved in your Dropbox folder, and it's synchronized to your account, which has 2GB to start with, and gets bigger if you recommend friends. When you're at another one of your own computers, your Dropbox updates and grabs those files. If you're at someone else's system or on a smartphone, head to Dropbox's mobile-friendly site and grab what you need. It's not quite a backup tool, but it is one of those utilities that makes a lot of old habits—thumb drive copying, CD burning, multi-email self-mailing—seem unnecessary. [Download <http://www.getdropbox.com/install>] [LH Post<http://lifehacker.com/397778/dropbox-syncs-and-backs-up-files-between-computers-instantaneously>
]
-
- *Mozy <http://mozy.com/>* - If Dropbox is where you stash the stuff you're working on or enjoying at the moment, Mozy is the backup service that saves everything for when your system goes black on bootup. The free accounts for PCs (and Macs) offer 2GB of free online space, and with the really smart filtering tools, you can have Mozy crawl your whole system and back up financial documents, Excel sheets, and any file with "Rick" in it. If you spring for a monthly unlimited plan, Mozy is a smart whole-system saver, one that doesn't eat bandwidth when you're using it, and works when you're not working. [Download <https://mozy.com/registration/free>] [LH

Post<http://lifehacker.com/software/backup-utilities/backup-files-with-mozy-136475.php>
]
-

Security

- *KeePass <http://keepass.info/>* - It's where you keep your passwords,
and create one password to track them
all<http://lifehacker.com/184774/geek-to-live--securely-track-your-passwords>.
It has lots of great
plug-ins<http://lifehacker.com/5046988/eight-best-keepass-plug+ins-to-master-your-password
s>for
your browser, other programs, and cool functionality. And it's
available
for every platform, so you never have to fear losing all the secrecy you
pour into its secure little well.
[Download<http://keepass.info/download.html>]
[LH Post<http://lifehacker.com/software/feature/geek-to-live--securely-track-your-password
s-184774.php>]
[Portable <http://portableapps.com/apps/utilities/keepass_portable>]
-
- *AVG Free <http://free.grisoft.com/>* - We actually prefer versions of
this free anti-virus app earlier than 8.0 for their, shall we say, more
quiet and subtle operation. But it still does a good job of keeping up to
date on the latest virus threats and protecting against them, when needed. [
Download <http://free.avg.com/download?prd=afe>] [LH
Post<http://lifehacker.com/386806/avg-free-anti+virus-2008-released-much-improved>
]
-
- *Spybot Search &
Destroy<http://www.safer-networking.org/en/spybotsd/index.html>
* - Just read through the list of what Spybot protects
against—trackerware, info-tracking cookies, homepage hijackers, trojans,
pop-up producers, keyloggers, advertising controllers—and you'll want to
stop thinking about what a trip around the net leaves inside your system.
Spybot is a tested and true veteran of the net annoyance wars, and has a
support network of enthusiastic updaters.
[Download<http://www.safer-networking.org/en/download/index.html>]
[LH Post<http://lifehacker.com/software/notag/spybot-search-and-destroy-crushes-evil-31732
.php>
]
-
- *Ad-Aware <http://www.lavasoft.com/>* - It somewhat crosses over with
Spybot's protection, but if you (or a friend/relative) have a system that's
regularly filled with mysterious, malicious stuff, it's never a bad idea to
let Ad-Aware comb through and safely clean the cruft out.
[Download<http://www.lavasoft.com/single/trialpay.php>]

Want to grab some or all of these applications at once to save a little time? We've created a Lifehacker Pack bundle<http://cache.gawker.com/assets/images/lifehacker/2009/06/lifehacker_pack.zip>that combines Phil Crosby <http://www.ninjahacking.com/>'s excellent InstallPad<http://installpad.com/>app and our own Lifehacker Pack as its default installation list.

To use it, *download the Lifehacker Pack bundle<http://cache.gawker.com/assets/images/lifehacker/2009/06/lifehacker_pack.zip>*, extract the two files from it into a folder or onto your desktop, and then run the InstallPad app; you'll see our must-have list ready to download and install in a snap. You can un-check the apps you already have or don't want, install apps individually, or mass install everything you've got checked with one click. We included everything in the InstallPad list except iTunes, Songbird, and the Mozy backup software; the former two because they're somewhat of an either/or choice (at least in our list), and the latter because it requires a sign-up and registration to really install and use properly.

If you're intrigued by InstallPad or want to customize your own pack, check out Gina's feature on automatic InstallPad installation lists<http://lifehacker.com/211373/geek-to-live--automatically-download-and-install-your-favorite-software>.

We're certainly open to suggestions on what makes for the ultimate list of Windows freeware for anyone looking to get ahead on their computer. Give us your verdict on our list, and your own suggestions for a must-install list, in the comments. Happy downloading!

425. "NIghtlight Law"

Yahoo group: Queen_Creek_Hams
Date: 2009-06-21 15:16:01 UTC
From: William Munsil
Topic: 425 Message: 425

Channels 3 and 5 here in Phoenix are taking advantage of the Nightlight Law by remaining on their analog channels for one month past the conversion date to digital:

http://www.broadcastingcable.com/article/161235-DTV_Nightlight_Bill_Becomes_Law.php

Perhaps channels 4 and/or 6 in Tucson will be doing likewise.

Bil
K1ATV HAM TV
Hams should be seen as well as heard.
Mesa AZ

PS - Check the analog channels in your area to see if any of them is doing likewise.

426. Coming to a baby monitor near you - NASA Video

Yahoo group: Queen_Creek_Hams
Date: 2009-06-26 23:43:28 UTC
From: William Munsil
Topic: 426 Message: 426

In 2007 a housewife in Palatine IL was surprised to see astronauts on a spacewalk on her baby monitor.

Turns out the Motorola ARC in Schaumburg IL was retransmitting it on their 40 watt 910.25 MHz HAM TV transmitter.

Well, now they have a 400 watt transmitter!

On their website they mention that it will be seen by a lot more baby monitors next time. hi.

Topic: 427 Message: 427

Queen Creek plans for Fourth of July traffic
Posted Date: 6/29/2009

The annual Fourth of July fireworks event will be held at Schnepf Farms <http://www.schnepffarms.com/>in Queen Creek, beginning at 5 p.m. Heavy traffic is expected in the area of Schnepf Farms. Motorists not planning to attend the event are advised to use alternate routes of travel and avoid the following areas:

- Rittenhouse Road between Ocotillo and Combs/Riggs roads
- Cloud Road between Ellsworth and Rittenhouse roads
- Combs Road between Rittenhouse and Gantzel/Ironwood roads
- Empire Blvd. between Ellsworth and Gary roads
- Gary Road between Combs Road and Empire Blvd.

Motorists are advised not to park along the shoulders or stop in the street in these areas to view the fireworks at any time. Sheriff's deputies will be patrolling these areas and directing motorists to move their vehicles. Anyone wishing to view the fireworks should park in designated areas within the event venue.

Motorists are cautioned to obey all signing and directions from law enforcement, and to be patient before and after the event.

If you have questions regarding July 4 traffic, contact the Town of Queen Creek Traffic Hotline at 480-358-3132 or traffic@....

- Queen Creek plans for Fourth of July traffic<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5338>

I have passed by that station many times, as I live just a couple miles south of Gateway and frequently spend time at the airport.

I do not know KA7BGY nor see an email for him on QRZ.COM. But I would be very glad to discuss this with him and see what can be done. Such a facility should not just fade away.

I doubt I can make it to their next meeting. So if someone knows how to contact him, please have him call/email me.

Jim, KF7E

Jim,

I tried to locate an email address - anywhere!- for KA7BGY. Nothing!

Also, his QRZ home address does not show up on any search results either.

Hopefully, Bil can get some contact information for you, regards,

I've forwarded your messages to Larry WB7C (formerly WB7CRK), the editor of the Superstition ARC newsletter.

Here is the return address: wb7tjd0 "at" gotti.surpasshosting.com and the character after the wb7tjd callsign is a zero.

Bil

434. Queen Creek: Traffic Alerts - June July 6-10

Yahoo group: Queen_Creek_Hams
Date: 2009-07-10 21:49:03 UTC
From: Joe Sammartino
Topic: 434 Message: 434

It looks like the dates are goofy and the map looks lame, but here you go.....

Traffic Alerts - June July 6-10
Posted Date: 7/10/2009

- Traffic Alerts Map - June 9<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5410>

1. Rittenhouse Road/Ellsworth Loop Road: The east and westbound left lanes will be closed for utility installation.
2. Ellsworth Road/Empire Boulevard: The west shoulder north of Empire Boulevard will be closed within the Town limits for utility relocation in advance of the street widening project. Other restrictions will be in place within Pinal County.

Motorists are cautioned to drive with care when in areas impacted by construction and maintenance operations, and to obey all reduced speed limits, warning signs, directions from flaggers and off-duty deputies.

435. Queen Creek: Traffic Alerts - July 16-23

Yahoo group: Queen_Creek_Hams

Friday funeral necessitates road closures and delays
Posted Date: 8/5/2009

Memorial services will be held for Queen Creek Fire Captain Eric Tinkham <http://Memorial%20services%20will%20be%20held%20for%20Queen%20Creek%20Fire%20Captain%20Eric%20Tinkham%20on%20Friday,%20Aug.%207.%20As%20part%20of%20the%20ceremonies,%20a%20procession%20will%20take%20place%20from%20noon%20to%20approximately%201%20p.m.%20between%20the%20Love%20of%20Christ%20Lutheran%20Church%20in%20Mesa%20and%20the%20Queen%20Creek%20Library%20in%20Queen%20Creek.>on Friday, Aug. 7. As part of the ceremonies, a procession will take place from noon to approximately 1 p.m. between the Love of Christ Lutheran Church <http://www.loveofchristchurch.net/>in Mesa and the Queen Creek Library<http://www.queencreek.org/Index.aspx?page=712>in Queen Creek.

From noon to 3 p.m., drivers should expect delays along the following roads:

- Power Road from Brown Road to University Drive
- University Drive from Power to Ellsworth roads
- Ellsworth Road from University Drive to Ellsworth Loop Road
- Ellsworth Loop Road from Ellsworth to Ocotillo roads

Also of note, northbound lanes of Ellsworth Loop Road will be closed from Ocotillo Road to Victoria Lane from 11 a.m. to 4 p.m. Victoria Lane will also be closed from Ellsworth Loop Road to Ellsworth Road from 11 a.m. to 4 p.m.

More information about the memorial services is available on the Town's Web site at www.queencreek.org or by calling 480-358-3399.

I don't have an opinion on this but maybe some of you do! Joe

---

Resident feedback sought on alternatives for Riggs Road crossing at Sonoqui Wash
Posted Date: 8/17/2009

Queen Creek residents and trail enthusiasts are being asked to give their input on the type of crossing they would like to see at Riggs Road where it crosses the Sonoqui Wash. Phase II of the Sonoqui Wash Channelization project, currently under design, will improve the existing wash between Chandler Heights Road and Riggs Road, and construct a new channel eastward to Crismon Road along the south side of Riggs Road. The Town of Queen Creek, the Maricopa County Department of Transportation (MCDOT) and the Maricopa County Flood Control District are partnering in this project, as well as the completed Phase I and the future Phase III.

The design alternatives being offered are either a post-tensioned cast-in-place box girder bridge or a 12-foot box culvert. MCDOT will make a decision soon and is urgently seeking input from residents.

Design drawings of the alternatives, a printable copy of the comment form and information about the project are available at www.queencreek.org. The comment form may be printed and mailed to Nariman Zadeh at: MCDOT, 2901 W. Durango St., Phoenix AZ 85009. A form may also be accessed by contacting MCDOT's project manager, Nariman Zadeh at 602-506-8623 or NarimanZadeh@.... Forms should be received by the end of August to be considered.

- Resident feedback sought on alternatives for Riggs Road crossing at Sonoqui Wash<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5622>

439. Queen Creek: Traffic Alerts Aug 20-27

Yahoo group: Queen_Creek_Hams
Date: 2009-08-21 22:10:36 UTC
From: Joe Sammartino
Topic: 439 Message: 439

- Traffic Alerts Aug 20-27<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5671>

1. Ocotillo Road - Hawes Road to 205th Place:
Drivers will encounter lane closures and traffic shifts both east and westbound on Ocotillo Road in this area while crews install sidewalk and complete median work.

2. Ellsworth Road between Cloud Road and Empire Boulevard
Utility relocations continue along Ellsworth Road - drivers can expect to encounter lane closures, traffic shifts, flaggers and off-duty deputies controlling traffic while crews complete their work.

Restrictions will also affect the following intersecting roadways in this area - Cloud Road; Riggs Road; Mewes Road; San Tan Boulevard; Pegasus Parkway; and Empire Boulevard.

3. Ellsworth Loop Road/Ocotillo Road
Utility work will necessitate a disruption in power to the traffic signal at this intersection. Drivers will encounter lane closures and off-duty deputies controlling traffic while crews complete their work.

4. Crismon Road north of Ocotillo Road
Crews will be completing utility work in this area - traffic on Crismon Road will be shifted to the east.

440. How to avoid damaging paint on a new car?

Yahoo group: Queen_Creek_Hams
Date: 2009-08-24 20:55:06 UTC
From: ars_k1atv
Topic: 440 Message: 440

We took advantage of the "Cash for Clunkers" program and turned the 1999 Ford minivan in for a brand new Hyundai with less than 100 miles on it.

I would like to put my mag mount antennas on the roof but am afraid I'll damage the paint.

Any suggestions?

Bil

My wife and I had bought a new car and had the same concern. We learned that if you remove the dust from the spot where you want to place the mag mount first, you will prevent paint damage. Also, when you remove the mag mount, do not twist the mount. Instead, simply lean the mount in order to remove it. If you attempt to pull it straight up, it often will end up twisting anyway, thus scratching the paint. So far, the techniques I have described above have worked well for us on both of our vehicles.

A couple of other ideas that you probably already know about but may have forgotten, place your mag mount in such a position that the antenna line helps hold the mag mount in place during high speeds. Also, you can get relatively inexpensive trunk mounts where the antenna line is small enough that you don't have to worry about it messing up your rubber seals on the trunk. Just a couple of things to consider.

Hi, Bil.

I tried to turn in my 1995 Chevy 3/4 ton van for a new Honda Odyssey. They didn't qualify! The 1995 van got the same gas mileage as my 1980 Chevy van. The 2009/2010 Honda with almost 1/2 the engine size and a lot less weight, only got 3 MPG better than the Chevvies. What's wrong with this picture?

About the mag mounts - been there. How about felt glued to the bottom of the mounts?

You can also use very thin (1 or 2 mils) Kapton tape between the mag mount and paint. The adhesive on it will not affect most paint jobs (I have never had a trouble wih it in 3 different vehicles over 15 years). And it will withstand much AZ sunshine.

Why do you worry about the paint? The best way to install an antenna is to bore a 3/4" hole and insert a NMO mount (no scratches on the paint). If you keep the car for 3-4 years it will not have any affect on the sale price. Any one worrying about the antenna mount on a used car has screwed up priorities one should be more concerned with transmission, brakes etc. Mag mounts have their own set of problems, as the wire sits in the door or window seal it mashes the wire which can put an impeadance bump in the wire. I've never recommended them for permanent use even though I use them myself for temporary use.

There might be a justified concern with a leased car but Bil did not specify purchase or lease.

If you have to use mag mount, select a door or window seal that does not get too much use.

I use a mag mount and it is a pain in terms of maintenance - not to the car paint, but to the coax, antenna base, etc.

If it's the paint you are most concerned with, all the advice to date - tape, felt, etc. - is right on the money.

Let us know what you end up doing and how it works out for you.

Regards,

Joe, N2QOJ

Queen Creek Traffic Alerts - Sept. 10-17
Posted Date: 9/10/2009

- Traffic Alerts Map - Sept. 10-17<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5774>

1. Ellsworth Road/Ocotillo Road: Drivers will be shifted through the intersection in all directions. Left turns will be restricted in all directions as well as northbound to eastbound right turns while crews repair a broken utility line. Traffic restrictions are expected to remain in place between 8:30 a.m. and 4 p.m. through Friday, Sept. 11.

2. Ocotillo Road - Hawes Road to 205th Place: Drivers will encounter an eastbound right lane closure on Ocotillo Road in this area while crews complete street and sidewalk improvements.

3. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road - drivers can expect to encounter lane closures, traffic shifts, flaggers and off-duty deputies controlling traffic while crews complete their work.

Restrictions will also affect the following intersecting roadways in this area - Cloud Road; Riggs Road; Mews Road; San Tan Boulevard; Pegasus Parkway; and Empire Boulevard.

450. AZ Worked All Counties

Topic: 450 Message: 450

I got this from my ARRL email and thought others might be interested:

ARIZONA WORKED ALL COUNTIES

After twelve years of drought, Arizona once again has an Arizona Worked All Counties Award.

AZ-WAC, sponsored by the Yavapai Amateur Radio Club in Prescott, Arizona, is honored to be sponsoring this award.

AZ-WAC begins October 1, 2009 and is ongoing. Rules are listed at: http://www.w7yrc.org/az-wac.htm

For an application, send an email to AZ-WAC@... Subject Line: Application.

Make a contact with each of the 15 counties in Arizona, have your logs verified by two non related, general class or above hams and send your application to

Yavapai Amateur Radio Club
ATTN: AZ-WAC
PO Box 11994
Prescott, Az. 86304-1994

Your serialized award will be emailed to you in .pdf format for you to print.

If you prefer a hard copy, please include $5.00 US dollars to the above address and a copy will be sent to you.

Question are to be directed to AZ-WAC@...

The honor system will govern -- good luck and have fun. 73

ARRL Arizona Section
Section Manager: Thomas J. Fagan, K7DF
k7df@...

451. Queen Creek: Traffic Alerts - Sept. 17-24

Traffic Alerts - Sept. 17-24
Posted Date: 9/17/2009

- Traffic Alerts Map - Sept. 17-24<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5837>

1. *Ocotillo Road - Hawes Road to Ellsworth Loop Road
*Drivers will encounter an eastbound right lane closure and shoulder work on Ocotillo Road in this area while crews complete street and sidewalk improvements.

2. *Ellsworth Road between Cloud Road and Empire Boulevard
*Utility relocations continue along Ellsworth Road - drivers can expect to encounter lane closures, traffic shifts, flaggers and off-duty deputies controlling traffic while crews complete their work.

Restrictions will also affect the following intersecting roadways in this area - Cloud Road; Riggs Road; Mews Road; San Tan Boulevard; Pegasus Parkway; and Empire Boulevard.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

452. Sunday, September 20th 2009 Scouts' Electronicfest

2009 National Intelligence Strategy Unveiled
<http://www.cpipsource-email.com/l.jsp?d=142.7787.924.6e-GtRlfAQJHH7qBwm5_-tA..A>
The Director of National Intelligence Dennis C. Blair unveiled the 2009 National Intelligence Strategy – the blueprint that will drive the priorities for the nation’s 16 intelligence agencies over the next 4 years. The National Intelligence Strategy (NIS) is one of the most important documents for the Intelligence Community (IC) as it lays out the strategic environment, sets priorities and objectives, and guides current and future decisions on budgets, acquisitions, and operations.

Mandate*<http://www.cpipsource-email.com/l.jsp?d=142.7790.924.6e-GtRlfAQJHH7qBwm5_-tA..A>
The Transportation Security Administration (TSA) today announced an Interim
Final Rule (IFR) implementing the Certified Cargo Screening Program (CCSP) -
a system TSA will use to fulfill the air cargo security requirements of the
Implementing Recommendations of the 9/11 Commission Act of 2007 (9/11 Act)
that mandates screening of 50 percent of cargo transported on passenger
aircraft by February 2009 and 100 percent by August 2010.

Overcoming The Maritime Domain Awareness Challenge
*<http://www.cpipsource-email.com/l.jsp?d=142.7791.924.6e-GtRlfAQJHH7qBwm5_-tA..A>
According to US Customs and Border Protection and the Department of Homeland
Security, more than 11 million maritime containers arrive in United States
seaports each year -- an average of 32,000 a day. Only a fraction of these
containers are ever inspected, presenting terrorists with tens of thousands
of opportunities each day to smuggle weapons of mass destruction into the
country. Bottom line: the organizations charged with managing the security
of our ports and borders lack the necessary data to screen the cargo,
personnel, businesses, vessels, and infrastructure involved in the global
maritime supply chain for potential threats to our security.

*Long After 9/11, Stadiums Still On The
Defensive*<http://www.cpipsource-email.com/l.jsp?d=142.7792.924.6e-GtRlfAQJHH7qBwm5_-tA..A
>
Federal counterterrorism officials issued a bulletin to police departments
across the country this week notifying them that sports stadiums,
entertainment centers and hotels remain possible targets of terrorist
attacks.

Movers and Shakers:

*Dawn Meyerriecks Named Director of National Intelligence for Acquisition

454. Queen Creek: Town and Chamber of Commerce to offer free business workshops

Yahoo group: Queen_Creek_Hams
Date: 2009-09-23 18:34:32 UTC
From: Joe Sammartino
Topic: 454 Message: 454

I thought this notice might be of interest to our Group members who may be business owners in the community.

Regards,

Joe
==========

Town and Chamber of Commerce to offer free business workshops
Posted Date: 9/23/2009

Local business leaders are invited to a free, four-part workshop entitled "Starting and Staying in Business" beginning Oct. 7. The Town'sEconomic Development Department <http://www.queencreek.org/Index.aspx?page=119>, in partnership with the Queen Creek Chamber of Commerce<http://www.queencreekchamber.org/>, has designed this program for small business owners, entrepreneurs or someone thinking about opening a business.

Scheduled for Wednesday evenings in October (Oct. 7, 14, 21 and 28) from 6-8 p.m., the program is free for Queen Creek businesses and residents. Workshops will be held at the Development Services Building at Town Hall, 22358 S. Ellsworth Road, and pre-registration is highly encouraged as class size is limited.

The program is offered through the Arizona Small Business Development Center<http://www.sba.gov/>, an innovative partnership between the state's 10 community college districts and the U.S. Small Business Administration.

Workshop topics include:
• Business Planning
• Management Planning
• Marketing Planning
• Financial Planning

If you are interested in participating or would like additional information, please call 480-358-3522 or e-mail doreen.cott@....

- Town and Chamber of Commerce to offer free business workshops<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5878>

455. Queen Creek: Traffic Alerts - Sept. 24 - Oct. 1

Traffic Alerts - Sept. 24 - Oct. 1
Posted Date: 9/24/2009

- Traffic Map Sept. 24 - Oct. 1<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5880>

1. Ocotillo Road - Hawes Road to Ellsworth Loop Road: Drivers will encounter an eastbound right lane closure and shoulder work on Ocotillo Road in this area while crews complete street and sidewalk improvements.

2. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road; drivers can expect to encounter lane closures, traffic shifts, flaggers and off-duty deputies controlling traffic while crews complete their work.

3. Rittenhouse Road/Cloud Road: Crews will begin work to widen the intersection. Drivers can expect to encounter lane shifts, flaggers and off-duty deputies controlling traffic while crews complete their work. This work may create added congestion near the intersection - drivers are encouraged to utilize alternate routes while traveling through the area.

Restrictions will also affect the following intersecting roadways in this area - Cloud Road; Riggs Road; Mews Road; San Tan Boulevard; Pegasus Parkway; and Empire Boulevard.

OK, so this is a bit off topic!!!

Does anyone on the Group know where I can purchase replacement Caps for my Carrier AC units? They haven't failed but are trending out of marked spec.

There must be some parts houses around. I would assume a large plumbing/HVAC parts house that sells to the public should carry these replacement units.

I will check Home Depot since I have to make a run there later but I would be surprised if they have these.

I had an HVAC company come out for my low cost inspection of the three units that I have. You probably know the drill - after inspection they try to sell a huge contract that would absorb the first service issues - in my case totally over $1000 in parts, R410, and service. One of my units is only putting out only a 10 degree split so it definitely needs a major recharge. I'll probably have to pop for this recharge since I'm no HVAC wiz.

Preferably, someone can recommend someplace here in the SE valley but traveling to Tempe or such is no big deal.

Thanks in advance,

Joe, N2QOJ

It would be helpful to have 1) the A/C model number, or better, 2) the cap rating.

Can you get us that?

Jim

From: Joe Sammartino
Topic: 456 Message: 458

Sure...

I have 3 units - Carrier - 5 ton, 3 ton, 2/12 ton

The 5 ton cap is a GE Capacitor, as noted:

97F9895 - 45 uF +/- 6% 50/60 Hz 370 VACs
Protected P968
S10000AFC Dielecktrol V1
HC98JA046D

The other caps are basically the same except for 15 uF and 10 uF,
respectively. [image: 2009-09-26
11.53.47.jpg]<?ui=2&ik=866227c853&view=att&th=123f7bec0a78c136&attid=0.1&disp=inline&reala
ttid=1314905269526782132-1&zw>

They quoted about $400 for these installed - what a laugh.

Thanks for your help,

Joe

Actually, I think the caps are dual caps, i.e. they have two internal caps...

OK here you go:

http://www.galco.com/scripts/cgiip.exe/WA/WCat/itemdtl.htm?pnum=97F9895-GECP&source=AdWords&gclid=CNqpg86ekJ0CFSYoawodi3au_g

or

http://www.galco.com

Under $40.

You can buy us breakfast with all the money you save.

ALso, I'll bet someone at Lowes or HomeDepot can tell you a local source to get one 'now' if mail order is too slow.

Gotta keep your cool.......... :-)

KF7E

Sure...

I have 3 units - Carrier - 5 ton, 3 ton, 2/12 ton

The 5 ton cap is a GE Capacitor, as noted:

97F9895 - 45 uF +/- 6% 50/60 Hz 370 VACs
Protected P968
S10000AFC Dielecktrol V1
HC98JA046D

The other caps are basically the same except for 15 uF and 10 uF, respectively.

They quoted about $400 for these installed - what a laugh.

Thanks for your help,

Joe

OK, so this is a bit off topic!!!

Does anyone on the Group know where I can purchase replacement Caps for my Carrier AC units? They haven't failed but are trending out of marked spec.

There must be some parts houses around. I would assume a large plumbing/HVAC parts house that sells to the public should carry these replacement units.

I will check Home Depot since I have to make a run there later but I would be surprised if they have these.

I had an HVAC company come out for my low cost inspection of the three units that I have. You probably know the drill - after inspection they try to sell a huge contract that would absorb the first service issues - in my case totally over $1000 in parts, R410, and service. One of my units is only putting out only a 10 degree split so it definitely needs a major recharge. I'll probably have to pop for this recharge since I'm no HVAC wiz.

Preferably, someone can recommend someplace here in the SE valley but traveling to Tempe or such is no big deal.

Thanks in advance,

Joe, N2QOJ

Thanks, Jim--

I didn't even try the online route yet so this is a great timesaver!

I will take your advice and probe the Home Depot androids...errr, I mean associates.

462. Interesting Video

Yahoo group: Queen_Creek_Hams
Date: 2009-09-27 19:34:05 UTC
From: terrypen
Topic: 462 Message: 462

I found this while surfing around on ARRL's website <http://arrl.org> ,
it is a video about Bob Heil
<http://www.youtube.com/watch?v=vc19UqLK5Pg> and thought some might
find it interesting.

463. VHF/?UHF/HF EMAIL - A sound card solution with PACTOR I and PACTOR II Performance is Coming.

Yahoo group: Queen_Creek_Hams

From: Joe Sammartino
Topic: 463 Message: 463

I know that some of our members our involved in emergency communicationss. You may have heard about this exciting development from your DEC, ARES, ARES, MARS, or other emcom organization.

Some of you may be familiar with WinLink, Airmail and Paclink utilizing expensive SCS PACTOR modem for communication on the high seas and emergency operations.

Well, KN6KB and his team at WinLink have released RMS Express, a beta test version of an email client utilizing a sound card based protocol called WINMOR. It's been in development for some time now. Keep in mind that this is not a new digital mode, but a software based protocol using sound card hardware.

This beta version is only a peer-to-peer client that is being heavily tested now. The beta version that will include RMS server connects for true worldwide email traffic will be coming shortly.

You can learn more about this advancement at www.winlink.org and also at the YAHOO support Group, http://groups.yahoo.com/group/WINMOR/.

This is truly a technical advancement that will allow a much lower cost entry into the world of reliable email in the RF world.

I just finished watching the Youtube video of Bob Heil.

It was great - thanks, Terry.

As an aside, several years ago, I had the good fortune to exchange a couple of emails with Joe Walsh of the Eagles regarding some ham radio music videos that I had come across. He was very cordial and open.

I love this hobby!

Topic: 466 Message: 466

Traffic Alerts - Oct. 1-8
Posted Date: 10/1/2009

- Traffic Alerts Map - Oct. 1-8<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=5902>

1. Ocotillo Road - Hawes Road to Ellsworth Loop Road
Drivers will encounter an eastbound right lane closure and shoulder work on Ocotillo Road in this area while crews complete street and sidewalk improvements.

2. Ellsworth Road between Cloud Road and Empire Boulevard
Utility relocations continue along Ellsworth Road - drivers can expect to encounter lane closures, traffic shifts, flaggers and off-duty deputies controlling traffic while crews complete their work.

Restrictions will also affect the following intersecting roadways in this area - Cloud Road; Riggs Road; Mews Road; San Tan Boulevard; Pegasus Parkway; and Empire Boulevard.

3. Rittenhouse Road/Cloud Road
Crews will begin work to widen the intersection. Drivers can expect to encounter lane shifts, flaggers and off-duty deputies controlling traffic while crews complete their work.

This work may create added congestion near the intersection - drivers are encouraged to use alternate routes while traveling through the area.

467. Booster rocket to slam the moon

471. Queen Creek: Maricopa County Public Health & Community Partners to Hold H1N1Flu Vaccine Clinics on Saturday, Oct. 24

Yahoo group: Queen_Creek_Hams
Date: 2009-10-24 03:33:28 UTC
From: Joe Sammartino
Topic: 471 Message: 471

Maricopa County Public Health & Community Partners to Hold H1N1Flu Vaccine Clinics on Saturday, Oct. 24
Posted Date: 10/23/2009
The Maricopa County Department of Public Health (MCDPH), Mollen Immunization Clinics, CIGNA and the Scottsdale Healthcare pediatric immunization program are conducing H1N1 influenza vaccine clinics for HIGH RISK individuals only, Saturday, Oct. 24 at several valley locations (see list of locations below). Please bring all immunization records with you when attending this event. The location closest to Queen Creek is at Albertsons, 8454 S. Power Road, Gilbert 85297.

"We need to put those most at risk first," said Dr. Bob England, director of the Maricopa County Department of Public Health. "Given the limited amount of vaccine received to date, we're seeing incredible cooperation with partners who are sharing their supply to put the most vulnerable of the higher at-risk groups first." England specifically cited Mollen Clinics, which has contributed vaccine originally identified for use at upcoming school-based clinics for this event, and generously shared it with the other private partners involved. With less than a day's notice, CIGNA agreed to use some of their clinic sites and have called in staff who were not scheduled to work on Saturday. Scottsdale Healthcare was the first to commit to opening a public clinic despite limited vaccine supplies.

"I am really proud of these private providers and their commitment to our community," England said.

The H1N1 flu has been in the valley since last April, and has been rapidly spreading in the past few weeks. MCPDH and other valley healthcare partners have been working hard to get the word out to our community about the seriousness of infection, especially for young children, pregnant women, and children who have underlying chronic health conditions.

The Centers for Disease Control and Prevention (CDC) has identified pregnant women, those who live and care for infants younger than 6 months old, children age 6 months through four years of age, and those up to age 18 with specific underlying conditions such as lung disease including asthma, diabetes, neurological disorders and those with other immune-compromising conditions to be the first in line for this vaccine. Dr. England explained "we are asking those with these conditions to please make arrangements and get vaccinated first...Now.

We are also asking those who do not fit these categories to please step aside and help those most at risk get vaccinated first. This means waiting until these folks have a chance to get vaccinated first. Please."

"During times of crisis, the community comes together to help each other," England said. "I am confident that people will step aside to allow the most vulnerable of vulnerable to be protected first. We're all going to do the right thing."

Priority HIGH RISK groups to receive vaccine Saturday:
* Pregnant
* Caregivers of and people who live with infants under 6 months old
* Children aged 6 months though four years
* Children 5 up to 18 years with one or more underlying conditions listed below:
Chronic lung disease including asthma
Diabetes and other disorders of metabolism
Neurological disorders (e.g. seizures, cerebral palsy, paralysis and neuromuscular disease)
Other immune compromising conditions

***Injectable vaccine and Flu Mist will be available at all locations. Health children age 2-4 years of age and healthy people who live with and/or care for infants younger than 6 months of age may receive Flu Mist.

For more information call the Flu Hotline at 1-877-764-2670 (bilingual) or visit www.fluaz.org.

Traffic Alerts - Oct. 26 - Nov. 5
Posted Date: 10/29/2009

- Traffic Alerts Map - Oct. 26-Nov. 5<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=6071>

1. *Signal Butte Road north of Ocotillo Road: *Widening a portion of Signal Butte Road on the north side of Ocotillo Road. This will necessitate a closure of northbound Signal Butte Road from Ocotillo Road north 1,000 feet (southbound will remain open). Closure will be between 8 a.m. to 5 p.m. During non-working hours, Signal Butte Road will remain fully open. The closure is anticipated to be in place through Tuesday, Nov. 3.

2.* Combs Road east of Rittenhouse Road: *Crews will be removing and replacing a portion of the roadway on Combs Road. Flaggers will control traffic between 8:30 a.m. to 4 p.m.

3. *Ocotillo Road: 205th Place to Ellsworth Loop Road: *Drivers will encounter east and westbound lane closures while crews complete work to widen a portion of Ocotillo Road in this area.

4.* 205th Place south of Ocotillo Road: *205th Place south of Ocotillo Road will be closed while crews complete widening work.

5.* Ellsworth Road between Cloud Road and Empire Boulevard: *Utility relocations along Ellsworth Road. Traffic will encounter lane closures, traffic shifts, flaggers, and off-duty deputies controlling traffic while work is completed. Restrictions will affect Cloud Road, Riggs Road, Mews Road, San Tan Boulevard, Pegasus Parkway, and Empire Boulevard.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

473. New Post Office

Yahoo group: Queen_Creek_Hams
Date: 2009-10-30 02:20:05 UTC
From: Joe Sammartino
Topic: 473 Message: 473

I needed to mail a priority package today so I stopped by the new PO.

I thought I would file this "New Post Office Report":

New building - check
Same long line to the door - check
No automation - check
Parking lot - one way around, if you park near the entrance, when you pull out anyone coming into the lot has to wait forcing their car's rear end into Ellsworth Loop - not too safe.

I asked why there wasn't any automated letter/package machine.

The answer was they were supposed to get two of them but they are "hard to get". No ETA offered.

Typical....

Regards,

Joe

I stopped by the new PO last week at about 4:15 PM last week. What a CROCK!

The line had 30 people in it and some said they had been there for an hour. Only one employee was at the 3-station counter. Later, another showed up. I only had to pick up my mail which I thought I would have held and save the postperson the trouble of shlepping it out the day we returned from Vacation. Bad choice!

I waited in the shorter line at the Door to the Inner Sanctum for about 10 minutes. The Supervisor would open the door a crack, look around and make like she was going to shut it if the "customer" at the door didn't speak up quickly. After about 10 minutes, it was my turn. I asked if I could pick up my mail from her. She said, "No, you have to wait in line with everyone else." I asked her if the Postmistress was in residence. She said, "Yes, but she is really busy." I asked why they didn't bring in temps to help. She said that everyone who could work was working. Bull!

45 minutes later I got to the counter and collected my stack of mail. By that time, they had three postal employees at the counter, chatting away with customers and taking their time.

I don't know what anyone can do about such crappy "service." If enough people get fed up and don't go there, they won't have such long lines. For sure the "service" can't be expected to get better!

73's,

Kenn, WB7OSR

Regds,

Kenn

Traffic Alerts - Nov. 5-12
Posted Date: 11/5/2009

- Traffic Alerts Map: Nov. 5-12<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=6139>

1. Signal Butte Road north of Ocotillo Road: Crews will be widening a portion of Signal Butte Road on the north side of Ocotillo Road. This work will necessitate the closure of northbound Signal Butte Road from Ocotillo Road north about 1,000 feet, while the southbound lane of Signal Butte Road will remain open. The closure will be in place between the hours of 8 a.m. and 5 p.m. Signal Butte Road will remain fully open during non-working hours. The closure is anticipated to be in place through Thursday, Nov. 12.

2. Ocotillo Road - 205th Place to Ellsworth Loop Road: Drivers will encounter east and westbound lane closures while crews complete work to widen a portion of Ocotillo Road in this area.

3. 205th Place south of Ocotillo Road: 205th Place south of Ocotillo Road will be closed while crews complete widening work.

4. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road; drivers can expect to encounter lane closures, traffic shifts, flaggers and off-duty deputies controlling traffic while crews complete their work. Restrictions will also affect the following intersecting roadways in this area - Cloud Road; Riggs Road; Mews Road; San Tan Boulevard; Pegasus Parkway; and Empire Boulevard.

Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

Sorry, Jim -- I don't have it.

I can tell you from my travels that most larger hotels have multi-media equipmen on hand for events/meetings. Maybe you have a connection. Also, put out a SOS also on the Azhams Yahoo Group or hit up a couple of the popular 2 meter repeaters.

Good luck, Joe

484. Portable Vs. Mobile operation

Yahoo group: Queen_Creek_Hams
Date: 2009-12-02 05:35:05 UTC
From: bam_merch
Topic: 484 Message: 484

From: Cris, KB7QXQ

This is taken from the WRRL Newsletter "Emcomm.org":

BACK TO BASICS

Improper use of the terms "mobile" and "portable" continue to be commonplace.

While the FCC rules (Part 97) no longer require an amateur operator to identify if they are operating as a fixed, mobile or portable station, doing so is a mark of good operating, and it is also important in public service nets. Saying "mobile" or "portable" after a call sign is proper and helpful. The NCS may ask you to take a turn in net before others since there is no guarantee that a signal will continue to be received.

If mobile or portable is not stated, it is assumed that the operator is at his fixed (home) location. (In Morse, a SLANT BAR followed by M or P may be used....e.g. K6SOJ/M) In addition, it is important to state your location correctly and accurately. (See: "What is your Location?" in the December 2008 EM at: www.emcomm.org/em/2008/dec2008.htm or the Fall 2009 issue of CQ VHF magazine. This informs the NCS and others in a net your current location, in case there is any traffic for, or queries about that area. (E,g, - weather and/or road conditions.)

The terms mobile and portable have nothing to do with the size or type of radio you are using. If you are at your home location (the location stated on you FCC license), you cannot be mobile, even if you are operating from your car parked in your yard or driveway or parked on the street in front of your house. If you are using a handie-talkie in your home back yard, you are not "portable" even though HTs are often used for portable or mobile operation.

Here's the "straight scoop:"

Fixed operation: Radio communications conducted from a specific geographical land location shown on the station license. Normally, this is your home shack.

Portable operation: Radio communications conducted from a specific, definable, geographic location, other than what is shown on the station license. E.g. - a temporary field assignment, or a vacation home or campsite. Even if you are using a 200 lb. vintage "boat anchor" transmitter, you are still portable! A portable station may even include numerous antennas and several transmitters running up to full legal power with a 12 kW diesel generator on a truck or trailer!

Mobile operation: Radio communications conducted while in motion or during stops at unspecified locations. E.g. - Using a VHF or UHF rig while driving your car, truck, RV or a hand-held transceiver while jogging or while backpacking.

"Maritime mobile" and "aeronautical mobile" are appropriate. Definitive terms such as: "pedestrian mobile", "wheel chair mobile", "bicycle mobile", "equestrian mobile", "railroad mobile", are also interesting to hear and acceptable.

485. Portable

Yahoo group: Queen_Creek_Hams
Date: 2009-12-02 14:32:15 UTC
From: Thomas Miller
Topic: 485 Message: 485

Excellent! Excellent!
I try to teach this in my classes' since so many make up their own definitions of portable, mobile and fixed (in part 97 there is no such thing as Base it's probably a CB carryover term.) Also Maritime mobile usually refers to international water and marine mobile is used for territorial water.

Features

*Dial A for Apps<http://www.cpipsource-email.com/l.jsp?d=374.24852.924.4v9whdyhz>
*A NASA a researcher at the space agency has developed a postage stamp-sized device that plugs into the iPhone and senses chemicals in the air; when it detects something like ammonia or chlorine gas, it can relay that information via WiFi or the phone network to first responders. Other Apps show the device's great potential for keeping chaos at bay.

<http://www.cpipsource-email.com/l.jsp?d=374.24853.924.4v9whdyhz>*Trouble At The TSA: A Web Site Breach Shows Why The Agency Needs A Leader Right Now<http://www.cpipsource-email.com/l.jsp?d=374.24854.924.4v9whdyhz>
*In March the TSA issued a request for proposal for an agency screening partnership program. This called for an outdated and redacted version of an air passenger screening manual to be posted at the Federal Business Opportunities Web site. It wasn't until Sunday -- nine months later -- that it was revealed that the hidden information was recoverable. None of it was classified. But there was a trove of potentially useful tidbits for al-Qaeda and other terrorist groups.

Opinion

*Americans Don't Trust Government on Personal Information Protection: A CISCO's Recommendation<http://www.cpipsource-email.com/l.jsp?d=374.24855.924.4v9whdyhz>
*Public opinion, a powerful force for change in the United States, may prove instrumental in helping to transform our national approach to cyber security. A recent Unisys Security Index points to both growing fear among US citizens around the security of personal information as well as increased openness to new technologies that can afford greater protection. Both trends can prove helpful to the Obama administration as it tackles our nation's growing cyber security threats.

<http://www.cpipsource-email.com/l.jsp?d=374.24856.924.4v9whdyhz> *The man Who Stopped the 20th Hijacker (Book Review)<http://www.cpipsource-email.com/l.jsp?d=374.24857.924.4v9whdyhz>
*Political commentator, talk show host, television personality and author, Smerconish has written a nifty little book about, primarily, immigration inspector Jose Melendez-Perez, the man who refused to admit Mohamed al-Kahtani into the US one month before 9/11. Lots of good general information presented in a reader-friendly format. A book to be enjoyed by homeland security professionals and the general reader alike. Buy and pass it around to friends and co-workers.

Movers & Shakers

DHS Needs Cyberspecialists<http://www.cpipsource-email.com/l.jsp?d=374.24858.924.4v9whdyhz>
DHS is using special hiring authorities to fill up to 1,000 skilled cyber

specialists positions over three years across many Department components. Expertise is needed in the following: Cyber Incident Response, Vulnerability, Detection and Assessment, Networks and Systems, Engineering, Cyber Risk and Strategic Analysis and Intelligence and Investigation.

*ODNI to Offer 2nd Annual Summer Seminar for College Students Interested in IC Careers <http://www.cpipsource-email.com/l.jsp?d=374.24859.924.4v9whdyhz>
*The Office of the Director of National Intelligence announced today that it will again offer about 40 highly motivated graduate students and college seniors an opportunity to study with currently serving intelligence analysts and other experts. The National Security Analysis & Intelligence Summer Seminar, a reprise of the first such program the ODNI held last summer, is planned for July 13 through July 24 in Washington, D.C.

Traffic Alerts: Dec. 17-24
Posted Date: 12/17/2009

- Traffic Alerts Map - Dec. 17-24
<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=6353>

Please note that the Queen Creek School District winter school break will be from Dec. 21 - 31. Please drive with extra caution and watch for children.

1. Ellsworth Loop Road/Ocotillo Road: Crews will be working to upgrade utilities in the area. This work will necessitate the closure of the southbound right travel lane as well as the eastbound right turn lane for approximately two weeks.

2. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road; drivers can expect to encounter lane closures, traffic shifts, flaggers and off-duty deputies controlling traffic while crews complete their work.

Restrictions will also affect the following intersecting roadways in this area - Cloud Road; Riggs Road; Mews Road; San Tan Boulevard; Pegasus Parkway; and Empire Boulevard. Drivers can expect to see flaggers and off-duty deputies controlling traffic along Ellsworth Road while the work continues.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

490. Queen Creek: Christmas tree disposal options for Queen Creek residents

Christmas tree disposal options for Queen Creek residents
Posted Date: 12/28/2009

Queen Creek residents can dispose of their cut Christmas trees <http://www.queencreek.org/index.aspx?page=824>at any of the following Town of Gilbert <http://www.ci.gilbert.az.us/>drop-off locations. For safety reasons, please remove all stands, nails, lights and decorations. Please do not dispose of trees at any public site in Queen Creek.

From Dec. 26 through Jan. 4, trees may be dropped off at:
• A-Z Equipment Rentals (near Dicks Sporting Goods in the San Tan Village Mall)
1313 E. Baseline Road
Gilbert, AZ 85295

From Dec. 26 through Jan. 18, trees may be dropped off at:
• Nichols Park (Higley and Guadalupe roads)
700 N. Higley Road
Gilbert, 85234

• Hetchler Park/Gilbert Soccer Complex (Germann and Greenfield roads)
4260 S. Greenfield Road
Gilbert, 85297

Date: 2010-01-14 20:55:25 UTC
From: Joe Sammartino
Topic: 497 Message: 497

QC Library: Introduction to Computers
Computers
Date: 1/21/2010 10:00 AM - 11:00 AM
Location: Queen Creek Branch Library
21802 S. Ellsworth Road
Queen Creek, Arizona 85242

The very basics! This introductory course begins by describing some very simple computer procedures, such as how to open and shut down Windows. Also, some basic terms and techniques will be reviewed. For instance, what is a hard drive? What are gigabytes? And how to get what you want out of a mouse & keyboard. Library Conference Room.

For information visit the Maricopa County Library
District's<http://www.mcldaz.org/>Web site or call 602-652-3000.

QC Library: Introduction to the Internet
Computers
Date: 1/21/2010 11:00 AM - 12:00 PM
Location: Queen Creek Branch Library
21802 S. Ellsworth Road
Queen Creek, Arizona 85242

Explore the Internet with a hands-on guided tour. Visit Web sites, starting with the library's own, and explore onward with the google search engine. This course offers a brief description of how the Internet works and includes walkthroughs on setting up "favorites" & "homepages". Also, the importance of firewalls, spyware & virus protection subscriptions will be discussed. Library Conference Room.

For information visit the Maricopa County Library
District's<http://www.mcldaz.org/>Web site or call 602-652-3000.

499. Fw: 910.25 MHz TV

Yahoo group: Queen_Creek_Hams
Date: 2010-01-15 01:36:51 UTC
From: Bil Munsil
Topic: 499 Message: 499

----- Original Message -----
From: "Bil Munsil" <wmunsil@...>
To: "ARCA Freq Coord" <coordinators@...>
Sent: Thursday, January 14, 2010 10:40 AM
Subject: 900 MHz TV

I have been advised by a longtime HAM TV guy that I should put my 910.25 MHz HAM TV transmitter back on the air from my QTH here in East Mesa to preserve the allocation.

It will be operating as an ATV beacon showing a screen with K1ATV Mesa AZ
There will be no audio for now.

It is a PC Electronics 1 watt transmitter feeding 50 ft of LMR-400 up to
a stainless steel J-pole antenna about 20 ft in the air.

The other currently allocated channel is not far enough away in frequency to support an inband HAM TV repeater. Separation must be at least 12 MHz for an inband repeater.

To my knowledge there is no other HAM TV currently in operation on the 33 cm band.

If you have receive capability turn your 900 MHz vertically polarized beam antenna towards the intersection of Sossaman and Southern.

Bil Munsil
K1ATV HAM TV
Hams should be seen as well as heard.
Mesa AZ

PS - I am monitoring the video with my IC-R3 audio/video scanner.

Sand bags offered at Queen Creek Fire Department stations
Posted Date: 1/19/2010

As the rain continues, sand bags are offered to area residents to prevent flooding on personal property. Sand and bags are available for free at both of the Queen Creek Fire Department stations<http://www.queencreek.org/Index.aspx?page=160>located at 22407 S. Ellsworth Road and 24787 S. Sossaman Road. There are a limited number of shovels that will be on hand for use in filling bags.

Fire fighters are available to assist residents with filling and loading sand bags into vehicles. Sand will continue to be available as weather conditions warrant.

For more information about the Town of Queen Creek, please visit www.queencreek.org or www.facebook.com/queencreek.

From my Mensa ham radio SIG:

I worked at Radio Shack for awhile and a girl came in and asked what it would take to get her cable from the living room to the bedroom. I explained about cable ready TVs and how she wouldn't need to get another box unless she wanted premium channels, etc.
As we were walking over to the roll of RG-6 cable I asked her how long it was from the living room to the bedroom. She said, "About 20 minutes if you're lucky."

- Traffic Alerts - Jan 28- Feb 4<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=6628>

*1. Ellsworth Road between Cloud Road and Empire Boulevard: *Utility relocations continue along Ellsworth Road. Drivers can expect to encounter lane closures, traffic shifts, flaggers, and off-duty deputies controlling traffic while crews complete their work. Restrictions will also affect the following intersecting roadways in this area: Cloud Road, Riggs Road, Mews Road, San Tan Boulevard, Pegasus Parkway and Empire Boulevard.

*2. Sossaman Road/Queen Creek Road: *Crews will be in the area widening Sossaman Road and 188th Street north and south of Queen Creek Road, as well as some work along Queen Creek Road. Restrictions for this work will include lane closures east and westbound on Queen Creek Road, as well as lane closures and other restrictions on Sossaman Road both north and south of Queen Creek Road.

*3. Combs Road east of Rittenhouse Road: *Crews will be working in the area completing road widening. Drivers can expect some traffic restrictions to be in place while the work progresses.

4. Cloud Road east of Ellsworth Road: Crews will be installing utilities for a new subdivision. All work is scheduled to be taking place on the north shoulder of existing Cloud Road, however workers and equipment will be operating close to traffic at times, and drivers are advised to use extra caution in the area.

*5. Empire Boulevard between Ellsworth Road and Gary Road: *Empire Boulevard will be closed between Ellsworth Road and Gary Road starting at 6 a.m. on Saturday, Jan. 30, and is expected to reopen by 11 a.m. the same day. The closure will be in place for the London's Run special event. Local access for residential areas will be maintained from either Ellsworth Road or Gary Road.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

Sossaman Road closed between Rittenhouse and Pecos roads Feb 17-18
Posted Date: 2/10/2010

Sossaman Road between Rittenhouse and Pecos roads is scheduled to close at 6 a.m. Wednesday, Feb. 17. and reopen at approximately 6 p.m. Thursday, Feb. 18. Due to the nature of the work, the reopening time for Sossaman Road may vary and is subject to change without prior notice.

During the closure, local traffic can travel from Pecos Road to Germann Road, but will be detoured east on Germann Road. Motorists are strongly encouraged to use alternate routes during the closure.

Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that may be controlling traffic in areas affected by construction and maintenance operations.

Posted Date: 2/11/2010

- Traffic Alert Map - Feb 11-18<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=6748>

*1. Sossaman Road Rittenhouse Road to Germann Road (at railroad crossing): *Sossaman
Road will close to through traffic between Rittenhouse and Germann roads starting Wednesday, Feb. 17 at approximately 5 a.m. and is scheduled to reopen on Thursday, Feb. 18 at approximately 6 p.m. Crews will be replacing the track and track bed at the at-grade crossing with Sossaman Road.

A marked detour will be in place during the closure, and drivers are strongly encouraged to utilize alternate routes during this time.

*2. Via Del Jardin west of Sossaman Road: *Crews will be working in the area making street repairs.

*3. Ellsworth Road between Cloud Road and Empire Boulevard: *Utility relocations continue along Ellsworth Road*.* Drivers can expect to encounter lane closures, traffic shifts, flaggers, and off-duty deputies controlling traffic while crews complete their work. Restrictions will also affect the following intersecting roadways in this area - Cloud Road, Riggs Road, Mews Road, San Tan Boulevard, Pegasus Parkway and Empire Boulevard.

*4. Cloud Road east of Ellsworth Road: *Crews will be installing utilities for a new subdivision. All work is scheduled to take place on the north shoulder of existing Cloud Road, however workers and equipment will be operating close to traffic at times and drivers are advised to use extra caution in the area.

5. Cloud Road between Ellsworth Road and Rittenhouse Road: Crews will be crack sealing Cloud Road in this area during the day. Flaggers and off-duty deputies will be controlling traffic in the area.

6. Ellsworth Road between Ocotillo and Ellsworth Loop roads: Crews will be crack sealing Cloud Road in this area during the day. Flaggers and off-duty deputies will be controlling traffic in the area.

7. Chandler Heights Road between Ellsworth and Hawes roads: Crews will be crack sealing Cloud Road in this area during the day. Flaggers and off-duty deputies will be controlling traffic in the area.

*8. Ocotillo Road between Ellsworth and Meridian roads: *Crews will be crack sealing Cloud Road in this area during the day - flaggers and off-duty deputies will be controlling traffic in the area.

*9. Ellsworth Loop Road between Queen Creek and Chandler Heights roads: *There will be intermittent lane closures both north and southbound on Ellsworth Loop Road while crews complete improvements to traffic signals in the Town Center area.

*10. Rittenhouse Road between Ocotillo and Ellsworth Loop roads: *There will be intermittent lane closures on Rittenhouse Road in both directions while crews complete improvements to traffic signals in the Town Center area.

*NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

Via del Jardin closed between Sossaman Road and Via del Arroyo Feb. 22-25
Posted Date: 2/16/2010

Road closures keep construction on schedule and improve safety for both motorists and construction crews. The following road closure will affect drivers in the Queen Creek area:

Via del Jardin is scheduled to be closed from Sossaman Road to Via del Arroyo from Monday, Feb. 22 to Thursday, Feb. 25. The closure is from 8 a.m. to 4 p.m. each day. Access to the residential properties that front onto Via del Jardin will be maintained during the closure.

The road project will mill and overlay the existing street. After completion of that phase, rubber speed cushions will be installed in place of the existing asphalt speed humps.

Construction restricts traffic March 4 at Ellsworth and Ocotillo roads
Posted Date: 3/2/2010

Traffic restrictions will affect the intersection of Ellsworth and Ocotillo roads on Wednesday March 4, between 9 p.m. and 2 a.m. Crews will be working in and around the intersection for several hours, which will necessitate some traffic restrictions.

Drivers are advised pay careful attention to all posted construction signing, as well as directions from flaggers and off-duty deputies that may be controlling traffic.

For more information on traffic restrictions contact the Town of Queen Creek Traffic Hotline at 480-358-3132 or e-mail traffic@.... To sign up for updated traffic alerts visit queencreek.org<http://www.queencreek.org/Index.aspx?page=126>.

Save Your Audio Settings - Windows
PC<http://toolsntipsbyjoe.blogspot.com/2010/03/save-your-audio-settings-windows-pc.html>
Do
you find that your recording and player settings get changed from time to
time?

Lots of applications, like SKYPE, take over control of your mic and output
settings. When you are finished using SKYPE, your settings may be completely
changed for your music player or other sound application. Also, if you have
hobbies like amateur radio, podcasting, videography, etc., this can be a
huge time drain to re-set the audio mixer every time.

There is a solution to managing your audio mixer settings:
QuickMix<http://www.ptpart.co.uk/quickmix/>

QuickMix <http://www.ptpart.co.uk/quickmix/> is a simple applet that allows
you to store all or part of the current state of your audio mixer in a
settings file, and to restore the mixer to that state whenever you want. And,
it's free.....It works on WIN 9X, WIN NT, WIN XP, and WIN 2000. It does not
work on VISTA or Win 7.

The nice feature is the ability to setup the audio mixer to your liking and
then save a "profile" of those settings. So, if you have different settings
for different applications, just setup the audio mixer setting for each
scenario and save a suitably named profile. Then, all you have to do is load
that profile from QuickMix <http://www.ptpart.co.uk/quickmix/> and all your
settings are automatically setup as needed.

You can visit the website here: http://www.ptpart.co.uk/quickmix/

You can download here, QuickMix<http://www.msaxon.com/quickmix/QuickMixIn.EXE>
.

Feedback is always welcome, Joe

524. Queen Creek: Left turn restrictions to affect intersection of Sossaman and Queen Creek roads

Yahoo group: Queen_Creek_Hams

Topic: 524 Message: 524

Left turn restrictions to affect intersection of Sossaman and Queen Creek roads
Posted Date: 3/8/2010

Beginning Tuesday, March 9 at approximately 7 a.m., restrictions will be in place prohibiting left turns from Sossaman Road onto Queen Creek Road in the north and southbound direction. This is necessary due to road widening that will be occurring on Sossaman Road. The restrictions are expected to remain in place until end of day on Friday. April 2.

Drivers are advised pay careful attention to all posted construction signing, as well as directions from flaggers and off-duty deputies that may be controlling traffic.

For more information on traffic restrictions contact the Town of Queen Creek Traffic Hotline at 480-358-3132 or e-mail traffic@.... To sign up for updated traffic alerts visit queencreek.org<http://www.queencreek.org/Index.aspx?page=126>.

525. This was sent to me by my ARRL director and is important to us hams in HOA's

Yahoo group: Queen_Creek_Hams
Date: 2010-03-13 05:31:31 UTC
From: k8pnw
Topic: 525 Message: 525

Dear fellow ARRL member,

You may recall that the US Senate passed bill S. 1755 unanimously and sent it to the US House of Representative for further action. This bill is the first step toward overriding CC&Rs that prevent so many amateurs from installing antennas on their own property. There seems to be little doubt that S. 1755 will be adopted by the US House of Representative provided the House Committee on Energy and Commerce forwards it to the floor of the House for a vote.

Here is where you come in. We need every member possible to send two fax messages in support of the bill. One message is to Committee Chairman Henry Waxman and and the other is to Committee Minority leader Joe Burton urging them to release the bill from Committee. In this strategy, we are not asking you to write to your Representative at this time. Our intent is to get the bill out of committee.

I strongly believe our goal will be accomplished provided every ARRL member who can get to a fax machine will help us fill the offices of the Committee leaders with fax messages.

Please copy the following message, add your personal information and make any other changes you may wish, and send the two faxes within the coming day or two.

The fax number for Chairman Waxman is: 202-225-2525
The fax number for Congressman Barton is: 202-225-1919

With your help and the help of any others you may be able to get to join in our effort, we will take the first step toward having a Federal PRB-1 law that covers all restrictions against antennas.

If possible, please also e-mail or USPS mail copies of your letters to Great Lakes Division Legislative Action Chairman John Meyers, NB4K (nb4k@...), 218 Cory Ln., Butler, KY 41006. John will collect these letters and letters we receive from other sources and forward them to John Chwat, our Washington lobbyist, to use when he visits Mr. Waxman and Mr. Barton. The main thing, though, is to fax letters to Congressmen Waxman and Barton.

The letter follows.

73, tnx,

Jim

PS to Club officers: Helping members generate letters would be a great and beneficial project for a club meeting. All that would be needed is a laptop and printer.

Jim Weaver, K8JE, Director
ARRL Great Lakes Division
5065 Bethany Rd.
Mason, OH 45040
E-mail: k8je@..., Tel.: 513-459-1661
ARRL - The national association for Amateur Radio

Representative Henry A. Waxman
Chairman, House Energy and Commerce Committee
United States House of Representatives
2125 Rayburn House Office Building
Washington, DC 20515

Representative Joe Barton
Ranking Member
House Energy and Commerce Committee
United States House of Representatives
2322A Rayburn House Office Building
Washington, DC 20515

March 9, 2010

Dear Chairman Waxman and Ranking Member Barton:

As one of more than 680,000 Amateur Radio licensees throughout the United States, I urge your support for passage of S.1755, the "Amateur Radio Emergency Communications Enhancement Act," which is pending in your Committee. This bill directs the Department of Homeland Security to undertake a study on the uses and capabilities of Amateur Radio communications in emergencies and disaster relief.

S. 1755, a bipartisan bill sponsored by both Chairman Lieberman and Ranking Member Collins, passed without opposition in the Senate Homeland Security and Governmental Affairs Committee on November 4, 2009. On December 14 it passed by unanimous consent on the Senate floor. It was referred to your Committee on the following day.

This bill promotes and encourages the valuable public service, disaster relief, and emergency communications provided on a volunteer basis by licensees of the Federal Communications Commission in the Amateur Radio Service, by undertaking a study of the uses of Amateur Radio for emergency and disaster relief communications, by identifying unnecessary or unreasonable impediments to the deployment of Amateur Radio emergency and disaster relief communications, and by making recommendations for relief of such unreasonable restrictions so as to expand the uses of Amateur Radio communications in Homeland Security planning and response.

Please pass S.1755 and send it to the House floor and to President Obama for signature.

If you or your staff have any questions, please feel free to contact John Chwat, the Washington, D.C. representative of the American Radio Relay League, Inc., 703-684-7703 or by e-mail to john.chwat@... <mailto:john.chwat@...> .

Sincerely,

[name, address]

From: Jim Henderson
Topic: 526 Message: 526

In addition, we have been working on legislation here in Arizona, and
House Bill 2615 is
presently slates to go through the Committee of the Whole (COW) process.

Representative Nancy McLain has been working on this one for the past 3
sessions, and
it is looking better this year than at any time before.

The Bill can be found on-line if anyone is interested in the language.

Regards,

Jim, KF7E

527. Queen Creek: Ocotillo Road to close between Sossaman and Hawes roads March 22-April 12

Yahoo group: Queen_Creek_Hams
Date: 2010-03-17 19:17:01 UTC
From: Joe Sammartino
Topic: 527 Message: 527

Ocotillo Road to close between Sossaman and Hawes roads March 22-April 12
Posted Date: 3/17/2010

Road closures keep construction on schedule and improve safety for both motorists and construction crews. The following road closure will affect drivers in the Queen Creek area:

- Repair work to the Gilbert CAP (Central Arizona Project) Waterline will require the closure of Ocotillo Road from Sossaman Road to Hawes Road, starting 6 a.m. on Monday, March 22 and lasting approximately three weeks. During the closure, local access to homes that front onto Ocotillo Road in this area, as well as residential neighborhoods whose only access is from Ocotillo Road, will be maintained from Sossaman and Hawes roads. Drivers will want to avoid the area between Sossaman Road and 196th St., as the majority of the construction activity related to this work will be occurring in that area.

Non-local traffic will need to utilize the marked detour routes that will be in place to guide through traffic around the closed area.

The closure will remain in place 24 hours a day during the project and work is anticipated to be complete by approximately April 12.

Questions regarding the closure can be directed to the project hotline at 480-898-4090, or to the Town of Queen Creek's Traffic Hotline at 480-358-3132, or by email to traffic@....

Ryan Road to close between Ellsworth Road and 204th St. March 22-25
Posted Date: 3/17/2010

Road closures keep construction on schedule and improve safety for both motorists and construction crews. The following road closure will affect drivers in the Queen Creek area:

- Starting 6 a.m. Monday, March 22, Ryan Road will close between Ellsworth Road and 204th St. Road construction will require the closure of Ryan Road just west of Ellsworth Road for a distance of approximately 100 feet. During the closure, local traffic will not have access to or from Ellsworth Road at Ryan Road. Local traffic can access the Ellsworth Mini-Farms subdivision from three alternative points: Germann Road at 204th St.; Hawes Road; or Ellsworth Road at Superstition Drive.

The closure will remain in place 24 hours a day through 4 p.m. Thursday, March 25.

Questions regarding the closure can be directed to the Town of Queen Creek's Traffic Hotline at 480-358-3132, or by email to traffic@... .

To keep updated on Town news and happenings, follow www.facebook.com/queencreek or www.twitter.com/TOQC_official

529. News about the White Tanks HAM TV repeater

Yahoo group: Queen_Creek_Hams
Date: 2010-03-22 07:02:52 UTC
From: ars_k1atv
Topic: 529 Message: 529

The White Tanks HAM TV repeater has a new call sign and a new lease on life.

Now to be known as WA6SVT/R the parts to fix it are now on Mike Collis' bench in Southern California.

He plans to have the transmitter repaired within the next two weeks and then will schedule a trip to Phoenix to re-install the 1.2 GHz transmitter.

It has been off the air for many moons and it will be good to have it back on the air.

From: W5NRA
Topic: 530 Message: 530

I purchased an AL-811 not the H. It was listed as "UPS dropped it and broke two tubes", I've ordered 3 replacements and I'll give it a good once-over once it gets here.

Now I am in the market for a decent transmatch, but I want to get a legal limit in the event I upgrade the amp later to a legal limit amp. Any ideas? I've been considering building one, but to buy the variable caps and roller inductor I would have almost as much in that as if I were to buy an MFJ model.

So I am looking for ideas on which direction to go. I might be going to more hamfests trying to scrounge up those items.

Terry

531. CARE AND FEEDING OF YOUR PET HAM

From: ars_k1atv
Topic: 531 Message: 531

CARE AND FEEDING OF YOUR PET HAM

Pet hams are so intelligent they often seem human, but they can be difficult to raise. Only someone with great patience should attempt it. In case you do, here is a guide to the basics.

Living Area -- A pet ham needs a private nest area, an entire room where it will not be disturbed. Your pet ham will spend many happy hours alone there with its treasures. -- boxes, wires, bits of metal, glass, paper, etc. that it will bring home whenever it ventures out. You will want to encourage your pet ham to confine its activity to this room to prevent the entire house from being subjected to noise, clutter and the boring of holes in the walls.

Expenses -- Keeping a pet ham is expensive, but, unlike most common pets, a pet ham can be trained to work outside the home for a few hours each day. It may even bring in enough money to offset its expenses.

Feeding -- A well-behaved pet ham will eat with the family occasionally, but it will feed more comfortable and secure taking its meals in the nest room. You must be sure your pet ham is well supplied with food and drink during the long periods it spends alone in there, even if it does not beg or whine.

Obedience Training -- A pet ham can be trained to perform simple tricks, the easiest and most common being "sit" and "speak" Do not be alarmed if it practices them for hours at a time in the nest room.

Health Problems -- The pet ham typically suffers lower back pain and minor throat irritations from too much sitting and speaking, but health maintenance costs tend to be minimal.

Travel -- Your ham pet will gladly travel with your family by car or even by air, if allowed to bring along certain familiar items from the nest room. Most pet hams enjoy trips to places where they can meet pet hams from other families.

Breeding -- If you plan to breed your pet ham, you should do so as soon as possible after you get it. As a pet ham matures, it becomes increasingly reluctant to engage in activities not associated with its nest room collection.

From the Yahoo Arizona Ham Web Site.

532. Queen Creek: Ryan Road closure at Ellsworth Road and 204th St. extended to March 26

Ryan Road closure at Ellsworth Road and 204th St. extended to March 26
Posted Date: 3/24/2010
Road closures keep construction on schedule and improve safety for both motorists and construction crews. The following road closure has been extended one day due to the rain delay this week:

Starting Monday, March 22, Ryan Road was closed between Ellsworth Road and 204th St. Construction requires the closure of Ryan Road just west of Ellsworth Road for a distance of approximately 100 feet. During the closure, local traffic will not have access to or from Ellsworth Road at Ryan Road. Local traffic can access the Ellsworth Mini-Farms subdivision from three alternative points: Germann Road at 204th St.; Hawes Road; or Ellsworth Road at Superstition Drive.

The closure will remain in place 24 hours a day through 4 p.m. Friday, March 26.

Questions regarding the closure can be directed to the Town of Queen Creek's Traffic Hotline at 480-358-3132, or by email to traffic@... . To keep updated on Town news and happenings, follow www.facebook.com/queencreek or www.twitter.com/TOQC_official

533. Queen Creek: Traffic Alert Map Mar 25 - April 1

From: Joe Sammartino
Topic: 533 Message: 533

Traffic Alert Map Mar 25 - April 1
Posted Date: 3/25/2010

- Traffic Alert Map Mar 25-April 1<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7004>

1. Ocotillo Road - Sossaman Road to Hawes Road: Ocotillo Road remains closed to through traffic so that repairs can be made to the settling of the Gilbert CAP waterline in the area.

During the closure, local access to homes that front onto Ocotillo Road in this area, as well as residential neighborhoods whose only access is from Ocotillo Road, will be maintained from Sossaman and Hawes roads. If possible, drivers will want to avoid the area between Sossaman Road and 196th St. as the majority of the construction activity related to this work will be occurring in that area.

Non-local traffic will need to utilize the marked detour routes that will be in place to guide through traffic around the closed area. This closure will remain in place 24-hours a day for a period of approximately three weeks.

2. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Rd. Though activity has slowed down in the area, crews will be returning within the next week or so to pull electrical cabling.

*3. Cloud Road east of Ellsworth Road: *Crews will be installing utilities for a new subdivision. All work is scheduled to take place on the north shoulder of existing Cloud Road, however workers and equipment will be operating close to traffic at times and drivers are advised to use extra caution in the area.

*4. Ellsworth Loop Road between Queen Creek Road and Chandler Heights Road: *There will be intermittent lane closures both north and southbound on Ellsworth Loop Road while crews complete improvements to traffic signals in the Town Center area.

5. Rittenhouse Road between Ocotillo Road and Ellsworth Loop Road: There will be intermittent lane closures on Rittenhouse Road in both directions while crews complete improvements to traffic signals in the Town Center area.

*6. Combs Road east of Rittenhouse Road: *Traffic restrictions remain in place while street improvements are being completed.

*7. Sossaman Road and Queen Creek Road: *Crews will be working to widen Sossaman Road both north and south of Queen Creek Road. Expect left turn

restrictions on Sossaman Road both north and southbound during the construction.

8. Ellsworth Road and Riggs Road: Utility work continues on the west side of Ellsworth Road at the intersection.

*9. Hawes Road north of Riggs Road: *Flaggers will be controlling traffic on Hawes Road while utility relocations take place.
*
NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

*

7:30am sounds good to me.

Anyone interested in setting this breakfast, once a month? or every 5th Saturday of the month? (that appears about 4 times a year)
Just a thought...
Does the Yahoo group have a calendar? I thought it used to have one.

Yes, we have a calendar. I've scheduled this for Saturday. We can discuss the "frequency" of these breakfasts during breakfast.

Reminders for this Saturday's breakfast meeting will automatically be sent 3 days and 1 day in advance. A map link is included in the reminder in case you want to share it with someone else.

See you then,

Joe, N2QOJ

Well, I enjoyed the breakfast eyeball as usual. We do need to get these scheduled so they can happen a bit more frequent.
Jim, who was the guy that came over on Saturday? I am so lousy with remembering names.. Kevin I think it was.. and Matt?

Also, good to meeting Norm and geez.. was it Paul? and Jon,N7AZ

and of course our regulars Joe, N2QOJ and Jim, KF7E

Hope to see you all again in the nearer future!

I couldn't agree more with Terry - It was thoroughly enjoyable.

I only wish I had more time to talk to everyone!

Our new guests were, Norman - AA7OO, Paul - N9MWH, and Jon - N7AZ (note name spelling).

Returning guest, Kevin - AK7M with his son Matt.

I will tentatively schedule the fourth Saturday of every month for this breakfast event. I would appreciate input from everyone on the best Saturday of the month moving forward.

Kevin is not yet on our Group distribution, so I ask that Jim keep him informed until he can sign up.

Best regards to all,

Joe, N2QOJ

I enjoyed the get together. Everyone is a ham, the introductions were interesting and entertaining! There was never a slow moment with the informal chit chat on every subject imaginable that went around the table.

Last Saturday of the month has a better ring than 1st, 2nd, 3rd, 4th, or 5th to me. Same place too, seemed to work.

Subject: Re: [Queen_Creek_Hams] Re: Breakfast, 4/3/2010, 7:30 am

I couldn't agree more with Terry - It was thoroughly enjoyable.

I only wish I had more time to talk to everyone!

Our new guests were, Norman - AA7OO, Paul - N9MWH, and Jon - N7AZ (note name spelling).

Returning guest, Kevin - AK7M with his son Matt.

I will tentatively schedule the fourth Saturday of every month for this breakfast event. I would appreciate input from everyone on the best Saturday of the month moving forward.

Kevin is not yet on our Group distribution, so I ask that Jim keep him informed until he can sign up.

Best regards to all,

Joe, N2QOJ

Well, I enjoyed the breakfast eyeball as usual. We do need to get these scheduled so they can happen a bit more frequent.
Jim, who was the guy that came over on Saturday? I am so lousy with remembering names.. Kevin I think it was.. and Matt?

Also, good to meeting Norm and geez.. was it Paul? and Jon,N7AZ

and of course our regulars Joe, N2QOJ and Jim, KF7E

Hope to see you all again in the nearer future!

Terry, W5NRA

QC Library: Introduction to the Internet
Computers
Date: 4/15/2010 11:00 AM - 12:00 PM
Location: Queen Creek Branch Library
21802 S. Ellsworth Road
Queen Creek, Arizona 85242

Explore the Internet with a hands-on guided tour. Visit Web sites, starting with the library's own, and explore onward with the Google search engine. This course offers a brief description of how the Internet works and includes walk-throughs on setting up "favorites" & "homepages". Also, the importance of firewalls, spyware & virus protection subscriptions will be discussed. A simple working knowledge of computer use is neded for this course---attendance in "Introduction to Computers" will suffice. Registration needed. Library Conference Room.

For information visit the Maricopa County Library
District's<http://www.mcldaz.org/>Web site or call 602-652-3000.

555. Queen Creek: Traffic Alerts - April 8-15

Traffic Alerts - April 8-15
Posted Date: 4/8/2010

- Traffic Alert Map - April 8-15<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7081>

1. Ocotillo Road - Sossaman Road to Hawes Road: Ocotillo Road remains closed to through traffic so that repairs can be made to the settling of the Gilbert CAP waterline in the area. During the closure local access to homes that front onto Ocotillo Road in this area, as well as residential neighborhoods whose only access is from Ocotillo Road, will be maintained from Sossaman and Hawes roads. If possible, drivers will want to avoid the area between Sossaman Road and 196th St. as the majority of the construction activity related to this work will be occurring in that area.

Non-local traffic will need to utilize the marked detour routes that will be in place to guide through traffic around the closed area. This closure will remain in place 24-hours a day for approximately three weeks.

*2. Ellsworth Road between Cloud Road and Empire Boulevard: *Utility relocations continue along Ellsworth Road. Though activity has slowed down in the area, crews will be returning within the next week to pull electrical cabling.

*3. Ellsworth Loop Road between Queen Creek Road and Chandler Heights Road: *There will be intermittent lane closures both north and southbound on Ellsworth Loop Road while crews complete improvements to traffic signals in the Town Center area.

*4. Rittenhouse Road between Ocotillo Road and Ellsworth Loop Road: *There will be intermittent lane closures on Rittenhouse Road in both directions while crews complete improvements to traffic signals in the Town Center area.

*5. Sossaman Road and Queen Creek Road: *Crews will be working to widen Sossaman Road north and south of Queen Creek Road. Expect left turn restrictions on Sossaman Road both north and southbound during the construction.

6. Ellsworth Road and Riggs Road: Utility work continues on the west side of Ellsworth Road at the intersection.

*NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations

*

You must know George, W7SAZ, ???

I've spoken with George several times. He also operates GMRS repeater at Pinnacle Peak along with coordinated GMRS repeaters at Usury Pass and Queen Creek.

The GMRS repeaters are open to HAMs with GMRS license.

I tried raising George on 146.52 Mhz but he must have his hands full with the recovery.

Good stuff...

Thanks --- Good info for our Group...

I am familiar with the website - interesting stuff.

I've dialed in but not picking up anything via hand-held at home QTH.

I wish I was up earlier while they were in flight.

Hope everybody is having a great day today.

Regards,

Joe, N2QOJ

From: Joe Sammartino
Topic: 563 Message: 563

Traffic Alert Map April 15-22
Posted Date: 4/15/2010

- Traffic Alert Map April 15-22<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7115>

*1. Ocotillo and Ellsworth roads Intersection: *The intersection of Ocotillo and Ellsworth roads will close nightly, starting on Monday, April 19, between 7 p.m. and 5 a.m. The closure is expected to last five to seven nights. Crews from two utility companies will be working within the intersection to relocate existing utilities. During the closure, through traffic should use the marked detour route that will include Rittenhouse and Ellsworth Loop roads.

2. Ocotillo Road - Sossaman Road to Hawes Road: Ocotillo Road remains closed to through traffic so that repairs can be made to the settling of the Gilbert CAP waterline in the area. The work is nearing completion and should be finished by the middle of the week of April 19. During the closure, local access to homes that front onto Ocotillo Road in this area, as well as residential neighborhoods whose only access is from Ocotillo Road, will be maintained from Sossaman and Hawes roads. If possible, drivers will want to avoid the area between Sossaman Road and 196th Street as the majority of the construction activity related to this work will be occurring in that area. Non-local traffic will need to utilize the marked detour routes that will be in place to guide through traffic around the closed area. This closure will remain in place 24 hours a day for a period of approximately three weeks.

3. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road. Though activity has slowed down in the area, crews will be returning within the next week to pull electrical cabling.

*4. Ellsworth Loop Road between Queen Creek and Chandler Heights roads: *There will be intermittent lane closures both north and southbound on Ellsworth Loop Road while crews complete improvements to traffic signals in the Town Center area.

5. Rittenhouse Road between Ocotillo and Ellsworth Loop roads: There will be intermittent lane closures on Rittenhouse Road in both directions while crews complete improvements to traffic signals in the Town Center area.

*6. Sossaman Road and Queen Creek Road: *Crews will be working to widen Sossaman Road north and south of Queen Creek Road. Expect left turn restrictions on Sossaman Road both north and southbound during the construction.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

564. Queen Creek: Ellsworth/Ocotillo intersection to be closed nights April 19-25

From: Joe Sammartino
Topic: 564 Message: 564

Ellsworth/Ocotillo intersection to be closed nights April 19-25
Posted Date: 4/15/2010

Road closures keep construction on schedule and improve safety for both motorists and construction crews. The following road closure will affect drivers in the Queen Creek area:

The intersection of Ellsworth and Ocotillo roads will be closed nightly, from 7 p.m. to 5 a.m., starting Monday, April 19 and lasting five to seven nights. Crews will be relocating utilities in preparation for Ellsworth Road improvements. Local access will be provided up to the intersection as traffic approaches from each direction; access to all businesses and residences will be maintained at all times during the closure.

Through traffic is strongly encouraged to avoid the intersection by using Rittenhouse Road for east-west travel or Ellsworth Loop Road for north-south travel. Drivers are encouraged to obey all posted speed limits as well as directions from flaggers and off-duty law enforcement.

More information on this closure, as well as upcoming traffic restrictions can be found on the Town's Web site at www.queencreek.org<http://www.queencreek.org/Index.aspx?page=295>.
If you have specific questions regarding traffic restrictions or closures, contact the Traffic Hotline by calling 480-358-3132, or by e-mail at traffic@... .. To keep updated on traffic announcements,
subscribe to Traffic Alerts using the E-news feature of the Town's Web site, www.queencreek.org <http://www.queencreek.org/Index.aspx?page=126>, or follow www.facebook.com/queencreek or www.twitter.com/TOQC_official .

567. Queen Creek: Traffic Alerts Map April 22-29

Yahoo group: Queen_Creek_Hams
Date: 2010-04-22 21:23:26 UTC
From: Joe Sammartino
Topic: 567 Message: 567

Traffic Alerts Map April 22-29
Posted Date: 4/22/2010

- Traffic Alerts April
22-29<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7166>

*1. Ocotillo Road and Ellsworth Road - Intersection: *The intersection of Ocotillo and Ellsworth roads will close nightly, starting on Monday, April 19 between 7 p.m. and 5 a.m. The closure is expected to last five to seven nights. Crews from two utility companies will be working within the intersection to relocate existing utilities. During the closure, through traffic should use the marked detour route that will include Rittenhouse and Ellsworth Loop roads.

*2. Ocotillo Road - Sossaman Road to Hawes Road: *Ocotillo Road remains closed to through traffic so that repairs can be made to the settling of the Gilbert CAP waterline in the area. The work is nearing completion and should be finished by April 27.

During the closure, local access to homes that front onto Ocotillo Road in this area, as well as residential neighborhoods whose only access is from Ocotillo Road, will be maintained from Sossaman and Hawes roads. If possible, drivers will want to avoid the area between Sossaman Road and 196th Street as the majority of the construction activity related to this work will be occurring in that area.

Non-local traffic will need to utilize the marked detour routes that will be in place to guide through traffic around the closed area. This closure will remain in place 24 hours a day for a period of approximately three weeks.

3. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road. Though activity has slowed down in the area, crews will be returning within the next week to pull electrical cabling.

*4. Ellsworth Loop Road between Queen Creek Road and Chandler Heights Road:*There will be intermittent lane closures both north and
southbound on
Ellsworth Loop Road while crews complete improvements to traffic signals in the Town Center area.

5. Rittenhouse Road between Ocotillo Road and Ellsworth Loop Road: There will be intermittent lane closures on Rittenhouse Road in both directions while crews complete improvements to traffic signals in the Town Center area.

*6. Sossaman Road and Queen Creek Road: *Crews will be working to widen Sossaman Road north and south of Queen Creek Road. Expect left turn restrictions on Sossaman Road both north and southbound during construction.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

575. Queen Creek: Ocotillo Road to close between Sossam and and Hawes roads

Yahoo group: Queen_Creek_Hams
Date: 2010-04-26 23:27:10 UTC
From: Joe Sammartino
Topic: 575 Message: 575

Ocotillo Road to close between Sossamand and Hawes roads
Posted Date: 4/26/2010

Ocotillo Road will close on Wednesday, April 28 between 5 a.m. and 4 p.m. for completion of road work.* *The closure is intended for Wednesday only.

During the closure, only local traffic (those either living or having business in the area where access is only maintained from Ocotillo Road) will be allowed to travel on Ocotillo Road in the closed area. Non-local traffic will need to utilize the marked detour routes that will be in place to guide through traffic around the closed area.

Road closures keep construction on schedule and improve safety for both motorists and construction crews.

576. ANSR balloon launch May 1st

Yahoo group: Queen_Creek_Hams
Date: 2010-04-27 14:18:40 UTC
From: W5NRA
Topic: 576 Message: 576

Just in case someone is interested in the balloon group that was mentioned recently.

ANSR <http://ansr.org> announced their next balloon launch on their Yahoo group page, Ballooning <http://groups.yahoo.com/group/Ballooning>

Arizona Near Space Research (ANSR) is proud to announce the flight of ANSR-56. This high altitude balloon flight will take place on Saturday, May 1, 2010 at 9:00 A.M. The primary launch site will be the University of Arizona Maricopa Agricultural Center, near Maricopa, AZ (33 deg 04.42 min, 111 deg 58.97 min. The secondary (high upper winds) site will be the Gila Bend High School in Gila Bend, AZ. The final launch site choice will depend on the predicted winds aloft. Watch for additional announcements on Friday prior to launch day.

The balloon will be a 3000-gram weather balloon, filled with helium. The expected burst altitude will be 90,000 feet or more. The flight is anticipated to last about 2.5 hours from launch to touchdown.

The balloon will carry student-built payload packages containing a variety of scientific apparatus as well as digital cameras to photo-document the flight. This will be the Spring 2010 semester flight of the Arizona Space Grant Consortium Changes in Altitudes program. This project involves eight middle and high schools from across Arizona. We thank AZ Space Grant and Northern Arizona University for helping us fulfill our goal of "Promoting Science and Education through Amateur Radio and High Altitude Balloons."

APRS Beacons will transmit position information as follows:

KA7NSR-11 on 445.950 MHz

N7ERU-12 on 445.925 MHz

The ANSR Cross-Band Repeater will operate with an input frequency of 145.56 MHz with a 162.2 Hz tone, and an output of 445.525 MHz. While contacts (especially DX) are welcome, please give priority to chase team members.

Attempts will be made to place the repeater on IRLP node 9255.

Our mobile cross band Digipeaters will repeat the beacon(s) APRS data to the 144.390 MHz standard APRS frequency and subsequently will be I-GATED to the Internet for out-of-area trackers. You can track the flight using the following link:

http://aprs.fi/?call=n7eru-12 <http://aprs.fi/?call=n7eru-12> and http://aprs.fi/?call=ka7nsr-11 <http://aprs.fi/?call=ka7nsr-11>

Be sure to check http://groups.yahoo.com/group/Ballooning for updates
to this announcement prior to the flight.

Jack Crabtree, W7JLC

ANSR/AZ Space Grant Liaison

QST QST, The White Tank ATV repeater is back in service for the Phoenix area. Output is 1253.25 MHz VSB modulation, inputs 434.0 MHz VSB or AM and 2441.5 MHz FM with audio subcarrier on 6.0 MHz. The repeater is open to all amateurs. The repeater is part of Amateur TV Network, with plans for linking into Mt. Lemmon W7ATN and then connecting to other areas.

Enjoy!,
73s,
Mike Collis WA6SVT trustee

NOTE: It's operating in beacon mode which means it's transmitting all the time.

TNX Joe

I was looking mostly for public service but I had forgotten how many, esp. large metro) have gone to P25.

Since this a ham radio group.I'm not familiar with the 2M or 440 repeaters in this state. Gadzukes, http://www.azfreqcoord.org/arca_dir.pdf this site has 25 pages of repeaters in AZ. KF7E will tell me I need to be on 147.32. What other local repeaters? Isn't there a linked system where I could communicate from here to the South Rim (I make frequent trips in the summer to GC)

Hi Jon, yes there are a bunch of them. haha

ARA's linked repeaters <http://www.w7ara.org/Web/AraFreq.htm>

It's been a while since I looked at the 2M and 70cm repeaters
The link that you sent also has an "L" in the notes are linked but the
ARA link shows the 147.36 link with several called RimLink

TNX Joe

I was looking mostly for public service but I had forgotten how many, esp. large metro) have gone to P25.

Since this a ham radio group.I'm not familiar with the 2M or 440 repeaters in this state. Gadzukes, http://www.azfreqcoord.org/arca_dir.pdf this site has 25 pages of repeaters in AZ. KF7E will tell me I need to be on 147.32. What other local repeaters? Isn't there a linked system where I could communicate from here to the South Rim (I make frequent trips in the summer to GC)

Check the "files" section of the online Group in the "Scanner Frequencies" folder.

I've added several lists of Pinal County frequencies.

590. Fast Foods radios?

Yahoo group: Queen_Creek_Hams
Date: 2010-05-03 15:15:12 UTC
From: ars_k1atv
Topic: 590 Message: 590

I'm looking for a list of the radio frequencies that the fast food restaurants use for their drive-through radios.

I'd like to surprise the Krispee Kreme guys when I go into their store.

Bil
K1ATV HAM TV

PS - I apologize for listing the QST twice.

Traffic Alert Map May 6-13
Posted Date: 5/6/2010

- Traffic Alert Map May 6-13<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7243>

1. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road. Though activity has slowed down in the area, crews will be returning within the next week to pull electrical cabling.

*2. Sossaman Road and Queen Creek Road: *Crews will be working to widen Sossaman Road north and south of Queen Creek Road. Expect left turn restrictions on Sossaman Road both north and southbound during the construction.

*3. Ellsworth Road and Chandler Heights Road: *The southbound right lane on Ellsworth Road will be closed north and south of Chandler Heights Road while crews work to repair existing utilities in the area.
*
NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.*

594. Ready to concrete tower base

Yahoo group: Queen_Creek_Hams
Date: 2010-05-10 04:31:27 UTC
From: n9mwh
Topic: 594 Message: 594

Does anyone have any concrete experience?? I have the hole dug, the rebar cage made, the tower base anchor bold template made, I just need to pour. I have been calling contractors and they have been quoting me 200-400 just to come out and make sure the concrete is poured in the hole correctly, and maybe trowel the top smooth. The cost of the concrete is not included.

I used Behive Concrete, a small family biz in Apache Junction. So did a couple other hams here, and I think all were very pleased.

Suggest you ask them to come out and eyeball it for a quote on the work you want done.
I recall mine was about $400 for the concrete and delivery, but Behive did the forms, pumping,
troweling, and cleanup for $175.

480 225 7867.

This course will provide an open forum for new and advanced users alike. Please come prepared to ask questions, whether they are about creating a resume or how to download pictures from your digital camera. If you plan to bring your own laptop or electronic device, make sure that you have the proper equipment and material--so that we have something to work with! *Eight Maricopa County laptops will be provided. The Queen Creek Library cannot be responsible for any damaged or lost material, thanks. Registration needed. Library Conference Room.

For information visit the Maricopa County Library
District's<http://www.mcldaz.org/>Web site or call 602-652-3000.

599. D-ATV on the ISS

Yahoo group: Queen_Creek_Hams
Date: 2010-05-17 00:29:35 UTC
From: ars_k1atv
Topic: 599 Message: 599

Amateur Radio ☐ Columbus (ARCOL) Working Group, first assembled to get the two L- and S-band patch antennas mounted on the exterior of the Columbus Module, is currently proposing the flight of a digital amateur television (DATV) system to downlink TV on S-band. US team members Mark Severance, Mark Steiner, Lou McFadin, Kenneth Ransom, Rosalie White, and Carol Jackson are assisting. ESA is in the process of considering this proposal for a December installation. The biggest technical challenge is the obtaining of a suitable power supply, and Gaston is working with ESA to make this happen.

While this will open up an exciting new capability for education contacts, it will require a more capable ground station to receive S-band DATV signals. This has implications for the existing telebridge stations, including how the DATV images would be routed to the event sites.

600. Visible ISS pass tonight

Yahoo group: Queen_Creek_Hams
Date: 2010-05-17 00:44:47 UTC
From: Jim Henderson
Topic: 600 Message: 600

Not radio-related, unless maybe you hear the ISS packet station on, but there should be a simply spectacular pass over Phoenix tonight of the ISS/Atlantis.

At 20:29 local look to the northwest as the ISS will rise to a peak of 76 degrees elevation at 20:33:30 as you look mostly up and slightly to the southwest. It will disappear to the southeast at 20:38 local.

Here is the data from my STSPlus program (in UTC date/time):

17 MAY 10 03:28:26 312.9 03:33:22 76 227.4 03:38:18 138.5 0:09:52 *

There will be another one on the 18th at 19:41 to 19:51 local. Email me for the scoop if interested.

Seen the info on the big screen as one of the trivia questions.

The Capitol Tower

The blinking light atop the tower spells out the word
"Hollywood" in Morse code. In 1992 it was changed to read
"Capitol 50" in honor of the label's fiftieth anniversary. It
has since returned to spelling "Hollywood."

Found this on Wikipedia <http://en.wikipedia.org/wiki/Capitol_Records>

607. Queen Creek: Traffic Alert Map May 27-June 3

Yahoo group: Queen_Creek_Hams
Date: 2010-05-27 17:17:13 UTC
From: Joe Sammartino
Topic: 607 Message: 607

Traffic Alert Map May 27-June 3
Posted Date: 5/27/2010

- Traffic Alert Map May 27-June 3<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7390>

*1. Cloud Road east of Ellsworth Road: *Crews will be beginning work to widen Cloud Road east of Ellsworth Road. Drivers should expect closures to the shoulder and shifting of travel lanes for the next several months as work progresses.

2. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road. Though activity has slowed in the area, crews will be returning within the next week to pull electrical cabling.

3. Sossaman and Queen Creek roads: Crews will be working to widen Sossaman Road north and south of Queen Creek Road. Expect left turn restrictions on Sossaman Road both north and southbound during the construction.

*4. Ocotillo Road and Signal Butte Road: *Crews will be working to install a new traffic signal at this intersection. Traffic restrictions are not anticipated at this time.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

609. RE: [Queen_Creek_Hams] Breakfast, 5/29/2010, 7:30 am

Yahoo group: Queen_Creek_Hams
Date: 2010-05-28 17:32:36 UTC
From: Norm
Topic: 606 Message: 609

I missed the last breakfast and would like to come to this one, but White Tanks is calling. My DStar system had some power issues last weekend. It appears the APC UPS may be causing a Dell server to scramble its auto-start logic and lockup in a cold OFF state; requiring a manual button start. So I'm going up there to reconfigure the remote power control devices and cause different AC sources (UPS and commercial power) that are out of phase and out of sync; one to each of the 2 power supplies. We'll see if breaking up the timing of the applied power to the power supplies will clear the logic scramble with the auto start. I have an extra remote AC control unit to install. I do have capability of remotely turning off AC to either or both power supplies, but without auto start logic working, cycling the AC doesn't do anything to the server.

And then to back up all the software and digital logic theory, I'm adding an old fashion modification to the server's manual start switch; and wire it to a set of dry contacts on a relay in a remote DC power control unit (remote control "finger" to initiate a cold boot).

Enjoy the breakfast and think about me up there on the mountain, in the sun, without any trees, or shade; actually there is shade in the shelter with all those heat generating repeaters and fans just a screaming away. The view is great, I can see San Tan Valley and Queen Creek from there ...

That sounds like a very interesting activity in lieu of breakfast at Rudy's.

If you want to review some interesting items that allow for remote cold boot
of a/c controlled devices, take a look here:

http://www.geeks.com/details.asp?invtid=9258T-PING&cpc=SCH

These devices can remotely cold boot by Internet or Cell Phone/WAP access.
Very interesting stuff.

Regards,

Joe, N2QOJ

Joe, Interesting …. Try this http://www.digital-loggers.com/din.html

I currently have in the configuration a AC Digital Logger for all the AC stuff and a DC Digital Logger for the -48vdc repeaters. The neat thing about Digital Logger is on power up, each relay can be a individual timed event allowing sequenced activation to prevent power surges; And they can be recycled with individual timing parameters. Cycling is necessary when you want to power cycle things that are in the network path such as 5Ghz link radios for internet or routers etc.

While up at the site we managed to deplete the UPS batteries and have the server shutdown smoothly ….. the server failed to auto start! First time we actually had this fail with all the testing in the lab and on site for the past 3 years. Hard to fix something when you can't duplicate the problem. We found the problem to be the UPS shutdown command plus the timing of the shutdown sequence in the UPS not matching the timing in the server! Yep, its software. We did some code changes to the UPS and server and got things to shutdown and auto start but ….. the filesystem "sometimes" doesn't close prior to actual power OFF !! not good. But we now know where the problem is and parameters to work on. So the next step is to build up an exact match server and UPS in the garage and load the exact config parameter …. And start the process of fine tuning. Linux doesn't like shutting down when the filesystem is open …. So the race is on to build the second server with another set of mirrored disks ….

The old standby of wiring the ON button to the DC Digital Logger would work, but it would require a complete tear down of the server to access the front panel circuit board, not something to do on site late in the afternoon. Even thought of using an irrigation valve relay (I had one in the truck) and duck tape it to the ON button, then power cycle it ON with 48vdc through the Digital Logger J …. It would work, but the sun does heat up the shack a bit up there and the duck tape would probably (most likely) get soft and gooey …… or maybe it was us getting a tad warm ….. Not clear which.

Now that we know the problem is not the two power supplies in the server being powered by the same source, UPS during its startup sequence, we decided to hold off adding the 2nd AC controller. The only advantage would be if the UPS failed HARD, which none of us have ever experienced ….. except once …. But that's another story over a Saturday breakfast & coffee.

Subject: Re: [Queen_Creek_Hams] Breakfast, 5/29/2010, 7:30 am

That sounds like a very interesting activity in lieu of breakfast at Rudy's.

If you want to review some interesting items that allow for remote cold boot of a/c controlled devices, take a look here:

http://www.geeks.com/details.asp?invtid=9258T-PING
<http://www.geeks.com/details.asp?invtid=9258T-PING&cpc=SCH> &cpc=SCH

These devices can remotely cold boot by Internet or Cell Phone/WAP access. Very interesting stuff.

Regards,

Joe, N2QOJ

On Fri, May 28, 2010 at 10:32 AM, Norm <aa7oo.az@...> wrote:

I missed the last breakfast and would like to come to this one, but White Tanks is calling. My DStar system had some power issues last weekend. It appears the APC UPS may be causing a Dell server to scramble its auto-start logic and lockup in a cold OFF state; requiring a manual button start. So I'm going up there to reconfigure the remote power control devices and cause different AC sources (UPS and commercial power) that are out of phase and out of sync; one to each of the 2 power supplies. We'll see if breaking up the timing of the applied power to the power supplies will clear the logic scramble with the auto start. I have an extra remote AC control unit to install. I do have capability of remotely turning off AC to either or both power supplies, but without auto start logic working, cycling the AC doesn't do anything to the server.

And then to back up all the software and digital logic theory, I'm adding an old fashion modification to the server's manual start switch; and wire it to a set of dry contacts on a relay in a remote DC power control unit (remote control "finger" to initiate a cold boot).

Enjoy the breakfast and think about me up there on the mountain, in the sun, without any trees, or shade; actually there is shade in the shelter with all those heat generating repeaters and fans just a screaming away. The view is great, I can see San Tan Valley and Queen Creek from there …..

Traffic Alerts: June 3-10
Posted Date: 6/3/2010

- Traffic Alerts Map: June 3-10<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7446>

*1. Cloud Road east of Ellsworth Road: *Crews will begin work to widen Cloud Road east of Ellsworth Road. Drivers should expect closures to the shoulder and shifting of travel lanes for the next several months as work progresses.

2. Ellsworth Road between Cloud Road and Empire Boulevard: Utility relocations continue along Ellsworth Road. Though activity has slowed down in the area, crews will be returning within the next week or so to pull electrical cabling.

*3. Sossaman Road and Queen Creek Road: *Crews will be working to widen Sossaman Road north and south of Queen Creek Road. Expect left-turn restrictions on Sossaman Road both north and southbound during the construction.

*4. Ocotillo Road and Signal Butte Road: *Crews will be installing a new traffic signal at this intersection. Traffic restrictions are not anticipated at this time.

5. Sossaman Road between Rittenhouse Road and Germann Road: Sossaman Road will be closed at the Union Pacific Railroad beginning Thursday, June 17 and will remain closed through Friday, June 18. Specific detour routes and details about the closure will be released as they are available.

*NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

Traffic Alert Map June 10-17
Posted Date: 6/10/2010

- Traffic Alert Map June 10-17<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7482>

1. Cloud Road east of Ellsworth Road: Crews will continue work to widen Cloud Road east of Ellsworth Road. Traffic will be shifted south with eastbound traffic driving partially on the shoulder from the intersection at Ellsworth Road and continuing for approximately a half-mile.

2. Sossaman Road and Queen Creek Road: The paving has been completed on the north side of Queen Creek Road. Temporary traffic control will remain in place through the week of June 13 when crews return to complete the pavement markings on the new asphalt.

*3. Ocotillo and Signal Butte roads: *Crews are working to install a new traffic signal at this intersection. Traffic restrictions are not anticipated at this time.

*4. Sossaman Road between Rittenhouse Road and Germann Road: *Sossaman Road will be closed at the Union Pacific Railroad beginning Thursday, June 17 at 5 a.m. and will remain closed through Friday, June 18 at 7 p.m. Traffic traveling north on Sossaman Road will be detoured west on Rittenhouse Road to Power Road; traffic traveling south on Sossaman Road will be detoured east on Pecos Road to Ellsworth Road or west to Power Road with local traffic allowed as far south as Germann Road where they will be detoured east to Ellsworth Road. A marked detour route will guide both north and southbound traffic around the closure.

5. Ellsworth Loop and Queen Creek roads: Northbound Ellsworth Loop Road and westbound Queen Creek Road will be restricted so that repairs can be made to existing water and sewer lines. The northbound right lane and the westbound left turn lane will be restricted starting Wednesday, June 16 at 5 a.m. and will continue until Friday, June 18 at 5 p.m. Turn restrictions at the intersection are not expected at this time.

6. Ellsworth Road between Rittenhouse Road and Barnes Parkway: Ellsworth Road will be closed at the Union Pacific Railroad beginning Monday, June 21 and will remain closed through Tuesday, June 22.
*
NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Last evening using borrowed equipment KD7OIW and KG6IIE transmitted almost snow-free video into the White Tanks HAM TV repeater - 55 miles away!

It doesn't hurt that KG6IIE lives in a third floor apartment at 96st St and Southern - that's 212th St in the Phoenix numbering system - and that he can physically see the White Tanks from his balcony.

4th of July Traffic Alerts
Posted Date: 6/23/2010

- 4th of July Traffic Alerts<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7556>

*4th of July event: *The Kiwanis Club of Queen Creek will be holding its annual 4th of July fireworks show at Schnepf Farms on Sunday July 4. Heavier than normal traffic is anticipated in the areas below:

- Rittenhouse Road south of Ocotillo Road to Empire Boulevard
- Cloud Road between Ellsworth Road and Rittenhouse Road
- Empire Boulevard between Ellsworth Road and Gary Road in Pinal County
- Combs Road between Rittenhouse Road and Gantzel Road in Pinal County

Traffic levels are expected to become heavy starting around 4 p.m. and continuing until approximately 11 p.m. Non-event traffic should consider using alternate routes.

Traffic Alert Map July 1-8
Posted Date: 7/1/2010

- Traffic Alert Map July 1-8<http://www.queencreek.org/modules/ShowDocument.aspx?documentid=7586>

1. Cloud Road east of Ellsworth Road: Base course paving has been completed and temporary traffic control will remain in place until completion of paving. There are no restrictions at this time.

2. Ocotillo Road and Signal Butte Road: Crews are working to install a new traffic signal at this intersection. Traffic restrictions are not anticipated at this time.

3. Ocotillo Road and Ellsworth Road: July 5 through July 26, eastbound and westbound Ocotillo Road will be restricted so the water line and storm drain construction can take place. Westbound traffic will be utilizing the westbound and eastbound left turn lanes with no turn restrictions expected at this time.

4. Ellsworth Loop Road and Rittenhouse Road:

- July 5 through August 5, northbound and southbound Ellsworth Loop Road will be restricted so that repairs can be made to the railroad overpass. No turn restrictions are expected at this time.
- Between the hours of 8:30 a.m. and 4:30 p.m., northbound and southbound Ellsworth Loop Road will be restricted to one lane of through traffic.
- Between the hours of 4:30 p.m. and 8:30 a.m., northbound and southbound Ellsworth Loop Road will be restricted to two lanes of through traffic.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

Traffic Alerts: July 8-15
Posted Date: 7/8/2010

- <http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7601>Traffic Alerts Map - July 8<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7601>

1. Combs Road and east Rittenhouse Road: This is an American Recovery and Reinvestment Act (ARRA) project and is being led by the Arizona Department of Transportation (ADOT). Work is scheduled to begin on Monday, July 12 to mill and overlay Combs Road from Rittenhouse Road east for approximately 5,000 feet. Flaggers will be controlling traffic during working hours from 5 a.m. to 7 p.m. Motorists should exercise care and reduce their speed while driving in this area; motorists are encouraged to use alternate routes as much as possible to avoid delays due to construction activity.

2. Cloud Road east of Ellsworth Road: Base course paving has been completed, and temporary traffic control will remain in place until completion of paving. There are no restrictions at this time.

3. Ocotillo Road and Signal Butte Road: Crews are working to install a new traffic signal at this intersection. Traffic restrictions are not anticipated at this time.

4. Ocotillo Road and Ellsworth Road: Beginning July 5, eastbound and westbound Ocotillo Road will be restricted so that water line and storm drain construction may take place. Westbound traffic will be using the westbound and eastbound left turn lanes, which will restrict left turns in both directions at the intersection. These restrictions are expected to be in place through July 26.

*5. Ellsworth Loop Road and Rittenhouse Road: *Work on the railroad overpass that was scheduled to begin on July 5 has been postponed. Updates will be posted as a new information is received.
6. Sossaman Road north and south of Queen Creek Road: The right through lane and southbound Sossaman Road north and south of Queen Creek Road will be restricted as road construction south of the intersection takes place. No turn restrictions are anticipated at this time. These restrictions are expected to be in place through July 30.

*NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

From: Joe Sammartino
Topic: 632 Message: 632

Traffic restrictions on Combs Road east of Rittenhouse Road
Posted Date: 7/8/2010

*Traffic restrictions on Combs Road east of Rittenhouse Road *

Beginning Monday, July 12 and continuing until Sept. 17, street maintenance operations will restrict portions of Combs Road between Rittenhouse and Gantzel roads from 5 a.m. to 5 p.m., Monday through Friday. Flaggers and off-duty sheriff's deputies will be controlling traffic on Combs Road in the area where the work is taking place.

This work is part of a larger overall project to mill and overlay portions of Combs Road as well as Rittenhouse Road east and west of Hawes Road and Rittenhouse Road between North Village Loop and Cloud roads.

Further news releases may be issued as the locations change.

Drivers should plan alternate routes for commuting on these days and avoid using Combs or Rittenhouse roads in the above listed areas during peak travel times. As always, drivers should obey all posted speed limits as well as all directions by flaggers or law enforcement.

Questions regarding the closure can be directed to the Town of Queen Creek's Traffic Hotline at 480-358-3132, or by e-mail to traffic@....

Posted Date: 7/15/2010

- Traffic Alerts Map - July 15-22<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7623>

1. Combs Road east of Rittenhouse Road: Operations staff will continue to mill and overlay Combs Road from Rittenhouse Road east for approximately 5,000 feet. Flaggers will be controlling traffic from 5 a.m. until 7 p.m. *
*

*2. Cloud Road east of Ellsworth Road: *Temporary traffic control will remain in place until completion of paving. There are no restrictions at this time. *
*

*3. Ocotillo Road and Ellsworth Road: *All westbound traffic is using the westbound and eastbound left turn lanes at the intersection. These restrictions are expected to be in place through July 26.

4. Sossaman Road north and south of Queen Creek Road: The left through lane of southbound Sossaman Road, north and south of Queen Creek Road, will be restricted. Northbound Sossaman Road will be shifted west from Appleby Road to just north of Twin Acres Road. Restrictions are expected to be in place through July 30.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

From: Joe Sammartino
Topic: 634 Message: 634

Ellsworth and Ocotillo intersection closed on Monday, July 26
Posted Date: 7/25/2010

Due to rainfall in the area, the intersection of Ellsworth and Ocotillo roads in Town Center will be closed on Monday, July 26. Rainfall has caused delays for the project, which was previously scheduled for closure only during nighttime hours in the week (7 p.m. to 5 a.m.).

The intersection is anticipated to reopen at 5 a.m. on Tuesday, July 27. Should that timeframe change, notification will be posted to the Town's website, Facebook and Twitter pages.

Workers will be installing new water lines and storm drains on Ocotillo Road through the intersection of Ellsworth Road, as well as removing the existing asphalt and repaving the entire intersection.

Local traffic will be allowed to travel in the area, but will not be able to access the intersection. Access to local businesses will be maintained at all times, but routes for accessing those businesses may be different than normal. Motorists are advised to watch for detour signage and plan their routes accordingly, and perhaps even check with the business they plan to visit in advance to determine the best way to gain access.

Motorists are advised to avoid the area if possible, use caution when driving in the area, and obey all warning signs and reduced speeds, as well as directions from flaggers and law enforcement personnel.

For further information, as well as updated detour information, visit the Traffic
Alerts <http://www.queencreek.org/Index.aspx?page=295> website or contact the Queen Creek Traffic Hotline at 480-358-3132 or by e-mail at traffic@...<traffic@...%22+style%3D%22color:+rgb%2896%2C+110%2C+31%29%3B+text-decoration:+underline;>

To keep updated on traffic announcements, subscribe to Traffic Alerts using the E-news feature of the Town's Web site, queencreek.org<http://www.queencreek.org/Index.aspx?page=126>, or follow facebook.com/queencreek <http://www.facebook.com/queencreek> or twitter.com/TOQC_official <http://www.twitter.com/TOQC_official>.

I can't make it either this Saturday.

We head out to Nevada for my brother-in-law's memorial service tomorrow and
won't be back till Saturday night.

Good luck on the moving stuff, Terry.

Jon,

That's a Bummer! Who would have guessed?

I was one of the three at last month's Breakfast; hoped to make it today but couldn't; same with Jim, KF7E.

So, I guess we regroup and try harder next month!

73's,

Kenn, WB7OSR

From: Joe Sammartino
Topic: 646 Message: 646

Traffic Alerts August 5-12
Posted Date: 8/5/2010

- Traffic Alert Map Aug.
5-12<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7694>

1. *Ocotillo and Ellsworth roads*
Water line and storm drain construction is continuing in
this area. The intersection will be closed beginning
August 6 at 7 p.m. through August 9 at 5 a.m. Local traffic
will be allowed to travel in the area, but will not be
able to access the intersection. Although access to local
businesses will be maintained at all times, routes for
accessing those businesses may be different than normal.
Motorists are advised to avoid the area if possible. If
travel in this area is required, motorists are advised to
use caution and obey all warning signs and reduced
speeds, as well as directions from flaggers and law
enforcement personnel.

2. *Hawes Road north of Riggs Road
* Beginning August 3, approximately 800 feet of the west
shoulder of Hawes Road will be closed starting at
approximately 1,600 feet north of Riggs Road.
Traffic restrictions are not anticipated at this time. This
shoulder closure is expected to be in place through August
17.

3. *Ocotillo and Signal Butte roads
* Crews are working to install a new traffic signal at this
intersection. Traffic restrictions are not anticipated at
this time.

Traffic Alerts: August 12-19
Posted Date: 8/12/2010

- Traffic Alerts Map - August 12-19<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7732>

1.

Hawes Road north of Riggs Road: From now until August 17, approximately 800 feet of the west shoulder of Hawes Road, starting at approximately 1,600 feet north of Riggs Road, will be closed. Traffic restrictions are not anticipated at this time.**
2.

Queen Creek Road west of Sossaman Road: The eastbound and westbound right lanes will be restricted for street light installation.**
3.

Sossaman Road north of Queen Creek Road: The southbound right lane will be restricted from the intersection to about 900 feet north for street light installation. Turn restrictions are not anticipated at this time.

Note: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement and/or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

648. East Valley ATV Meeting

From: ars_k1atv
Topic: 648 Message: 648

On 29 August there will be a meeting of current and former HAM TV operators here in the East Valley.

Several years ago there was an ATV repeater on Usery but for lack of financial support it was taken off the air and sold.

All interested persons are encouraged to attend.

For more information contact me, K1ATV at my QRZ.COM email address.

Bil Munsil
K1ATV HAM TV
Mesa AZ

Topic: 649 Message: 649

Traffic Alerts
August 19-26
Posted Date: 8/19/2010

- Traffic Alerts Map: August
19-26<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7765>

*1. Queen Creek Road west of Sossaman Road *
The eastbound and westbound right lanes will be restricted for street light installation. *
*

*2. Sossaman Road north of Queen Creek Road *
The southbound right lane will be restricted from the intersection to about 900 feet north for street light installation. *
*

*3. Ocotillo Road and Ellsworth Road *
Storm drain construction and cleanup is continuing in this area. All westbound traffic is utilizing the westbound and eastbound left turn lanes at the intersection. No left turn restrictions are in place at this time. These restrictions are expected to be in place through August 23.

*NOTE:
Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations *

651. Queen Creek: Traffic Alerts

Yahoo group: Queen_Creek_Hams
Date: 2010-08-27 00:39:56 UTC
From: Joe Sammartino
Topic: 649 Message: 651

Traffic Alerts
August 26 - Sept. 2
Posted Date: 8/26/2010

- Traffic Alerts Map: August 26 - Sept. 2<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=7819>

1. *Queen Creek Road west of Sossaman Road:* The eastbound and westbound right lanes will be restricted for street light installation.

2. *Sossaman Road north of Queen Creek Road:* The southbound right lane will be restricted from the intersection to about 900 feet north for street light installation.

3. *Ocotillo Road and Ellsworth Road:* Storm drain construction and clean up is continuing in this area. All westbound traffic is utilizing the westbound and eastbound left-turn lanes at the intersection. Work at this intersection is anticipated to be complete by Friday, Aug. 27.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

658. How to Record Streaming Audio

Yahoo group: Queen_Creek_Hams
Date: 2010-09-04 09:16:30 UTC
From: Joe Sammartino
Topic: 658 Message: 658

This article can be a good guide for SWLs, hams, etc.... Regards, Joe - N2QOJ
How to Record Streaming AudioFrom PC World - http://www.pcworld.com/article/204664/how_to_record_streaming_audio.html?tk=rss_howto

Want to revisit your favorite Internet-radio memories? Here’s how to record streaming audio on your PC.

Patrick Miller, PC World <http://www.pcworld.com/>

Want to capture a song from an Internet radio station, grab a line from the latest viral YouTube clip, or make a mashup of Windows system sounds? We're not here to judge--we're here to show you how. Follow these easy steps to record any audio that plays through your PC.
1. Find a Male-to-Male Audio Cable

[image: Male-to-male audio cable]<http://www.pcworld.com/zoom?id=204664&page=1&zoomIdx=1>

Before you start recording anything, you need to find a male-to-male 1/8-inch audio cable<http://www.pcworld.com/article/194073-2/pcworlds_audiovideo_cable_guide.html>. If you don't have one, you can buy one for less than a buck from MonoPrice.com. If you have external speakers for your PC, the cable that connects the speakers to your system's headphone jack may work.
2. Download Audacity and LAME

Next, download and install Audacity<http://www.pcworld.com/downloads/file/fid,156992/description.html>, a free open-source audio editor. While you're waiting for that to download, grab LAME for Audacity <http://lame.buanzo.com.ar/> if you don't have it already; you'll need it if you want to save your files as MP3s. (Having problems installing LAME? Read the installation instructions<http://audacity.sourceforge.net/help/faq?s=install&item=lame-mp3>.)
3. Set Your Input and Output Devices in Audacity

Open Audacity, select the *Edit *menu, and choose *Preferences*. Under the *Devices *tab, choose your microphone jack (it's called 'Microsoft Sound Mapper - Input' on my PC) for the recording device, as well as whichever audio source you want to record from as the playback device. If you're on a PC with a built-in Webcam (usually an all-in-one computer<http://www.pcworld.com/reviews/collection/1648/top_5_all_in_one_pcs_20_inches_or_larger.html>or a laptop<http://www.pcworld.com/reviews/collection/1657/top_10_allpurpose_laptops.html>),

make sure not to select your Webcam's mic as the recording device, because it won't sound very good.

[image: Setting playback and recording devices in Audacity]<http://www.pcworld.com/zoom?id=204664&page=1&zoomIdx=2>

Plug one end of the male-to-male 1/8-inch audio cable into the microphone jack, and the other end into the headphone jack. This way, your PC can record directly from the audio-out source without as much background noise or distortion. You can do without the cable, but the results won't turn out as well.
4. Record

Click the *Record* button in Audacity and start playing the source. If the reading in Audacity looks like a full solid bar, the volume levels are too high, and the recording will sound heavily distorted. While recording audio from YouTube videos, I found that I got the best results when I set the system volume, the YouTube volume, and the Audacity levels all to about 25 percent or so. Experiment with the volume settings before recording the version you want to keep.

[image: This recording is much too loud. You can adjust the recording volume with the -/+ slider on the left.]<http://www.pcworld.com/zoom?id=204664&page=1&zoomIdx=3>

This recording is much too loud. You can adjust the recording volume with the -/+ slider on the left.

Once you've finished recording, go to the *File *menu, choose *Export*, and select *MP3 *from the 'Save as type' drop-down menu. If Audacity asks you to locate lame_enc.dll, it should be in the LAME for Audacity package you downloaded and unzipped.

[image: Exporting as MP3 in Audacity]<http://www.pcworld.com/zoom?id=204664&page=1&zoomIdx=4>

That's all! Feel free to share your audio-recording tips in the comments.

I am inundated with Facebook, I can't keep up with it. I see a long list of requests, most of whom
I don't know and have names vaguely reminescent of Russian Mafia or Nigerian scammers...

And today I woke up to Birthday reminders from Terry and several others.. My secret is out...

Jim

666. APRS via Android phone

Yahoo group: Queen_Creek_Hams
Date: 2010-09-13 02:59:19 UTC
From: Joe
Topic: 666 Message: 666

If anyone is running an Android phone and would like to experiment with an APRS app, I've placed the one-and-only APRS app called APRSdroid into the "Files" section.

You will need an APRS-IS passcode. If you don't have one, you may want to register a copy of the 32 bit version of UI-View, which will also get you an APRS-IS passcode.

Enjoy,

Joe, N2QOJ

667. Queen Creek: Queen Creek Traffic Alerts

Yahoo group: Queen_Creek_Hams
Date: 2010-09-17 01:58:17 UTC
From: Joe Sammartino

I'd like to meet with you guys. I'm afraid I won't be able to join you for breakfast. I'm training for El Tour De Tucson (109 mile bicycle race) and need to be out on the road on Saturday mornings.

The town of Queen Creek is making progress on its emergency management committee and part of the project includes recruiting amateur radio operators providing emergency communications for the town. I wonder if I could meet with one or two of the Queen Creek Hams some other time. I'd like to meet you and see if there is an area of mutual interest. I never met a ham that didn't have a volunteer orientation.

Please let me know. Phone number is below.

Regards,
Bruce Barnes

Bruce, this breakfast represents one of the best chances to meet local hams.

Maybe this weekend is not as likely to be well attended, so your bike race is likely a better deal.

I think we should plan to meet in October for the breakfast, to get acquainted.

We have several hams in the Q.C. administrative area, although it might be hard to meet us all at one time.

And you are correct: hams like to be useful in a pinch. Some of us already have some significant 'bona fides'.

Please come get to know us.

Cordially,

Jim KF7E

Folks,

Don't miss the opportunity to download a really good book that was originally released in 1997 by TJ "Skip" Aery, N2EI, entitled "Radio Monitoring: The How-To Guide."

It's now available free at this link:

http://naswa.net/areybook.html The download is only about 6.3 Mbytes.

Some of the material is dated, but overall, it's an excellent guide for anyone interested in radio monitoring.

Regards,

Joe, N2QOJ

684. Queen Creek: Queen Creek Traffic Alerts: Oct. 7-14

Yahoo group: Queen_Creek_Hams
Date: 2010-10-08 01:52:46 UTC
From: Joe Sammartino
Topic: 684 Message: 684

Queen Creek Traffic Alerts: Oct. 7-14
Posted Date: 10/7/2010

- Traffic Alerts Map: Oct. 7-14<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8038>

1. Ellsworth Loop Road and Rittenhouse Road: Work on the bridge pier under the Union Pacific Railroad will necessitate the closure of several travel lanes on Ellsworth Loop Road near the intersection of Rittenhouse Road. Start times/days for lane closures will vary depending on the safety needs of the crew. Drivers can expect northbound lane restrictions, with one or two travel lanes closed, as well as a southbound left-lane closure approaching Rittenhouse Road between 1 a.m. and 4 p.m. Monday, Oct. 11 - Friday, Oct. 22. Southbound left turning traffic will be using a single left-turn lane during this time. Drivers are encouraged to use alternate routes. *
*

2. Ellsworth Road - Cloud Road to Empire Boulevard: The widening of Ellsworth Road is in progress. Construction information and traffic alerts can be found at www.southellsworthroad.com<http://www.southellsworthroad.com>
.

*3. Ellsworth Road - Cloud Road to Chandler Heights Road: *Crews will be installing utility connections for new residential development on the east side of Ellsworth Road in this area. This will require immediate northbound travel lane closures during the week of Oct. 4, which will remain in place during construction activity. Lane restrictions will close two of the three northbound lanes at a time.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

685. Queen Creek: Bridge work at Ellsworth Loop and Rittenhouse roads to begin Oct. 11

Yahoo group: Queen_Creek_Hams

Topic: 685 Message: 685

Bridge work at Ellsworth Loop and Rittenhouse roads to begin Oct. 11
Posted Date: 10/7/2010

Work on the bridge pier under the Union Pacific
Railroad<http://www.up.com/>will require the closure of multiple
travel lanes on Ellsworth Loop Road
near the intersection of Rittenhouse Road. Start times and days for lane
closures will vary depending on the safety needs of the crew.

Drivers can expect northbound lane restrictions, with one or two travel
lanes closed, as well as a southbound left-lane closure approaching
Rittenhouse Road between 1 a.m. and 4 p.m. beginning Monday, Oct. 11 and
continuing through Friday, Oct. 22. Southbound left-turning traffic will be
using a single left turn lane during this time.

Drivers are encouraged to use alternate routes during these times.

For more information on traffic alerts, visit
queencreek.org<http://www.queencreek.org/Index.aspx?page=295>,
and click on Traffic Alerts at the bottom of the page. For more information
on traffic restrictions, contact the Town of Queen Creek Traffic Hotline at
480-358-3132 or e-mail traffic@....

Queen Creek Traffic Alerts: Oct. 14 - 21
Posted Date: 10/14/2010

- Traffic Alerts Map: Oct. 14 -
21<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8086>

1. Ellsworth Loop Road and Rittenhouse Road:

Work on the bridge pier under the Union Pacific Railroad will necessitate the closure of several travel lanes on Ellsworth Loop Road near the intersection of Rittenhouse Road. Lane closure start times/days will vary depending on the safety needs of the crew. Drivers can expect northbound lane restrictions, with one or two travel lanes closed, as well as a southbound left-lane closure approaching Rittenhouse Road between 1 a.m. and 4 p.m. on Monday, Oct. 11 through Friday, Oct. 22. Southbound left turning traffic will use a single left-turn lane during this time. Drivers are encouraged to use alternate routes.

2. Ellsworth Road - Cloud Road to Empire Boulevard:

The widening of Ellsworth Road is in progress. Beginning Monday, Oct. 18, for approximately one week, Mewes Road will be closed at Ellsworth Road (on the east side of Ellsworth Road only). This is necessary for the MCDOT contractor to install a sewer line across Mewes and to do curb and gutter work. Construction information and traffic alerts are available at www.southellsworthroad.com.

3. Ellsworth Road - Cloud Road to Chandler Heights Road:

Crews will be installing utility connections for new residential development on the east side of Ellsworth Road in this area. This will require immediate northbound travel lane closures during the week of Oct. 4, which will remain in place during construction activity. Lane restrictions will close two of the three northbound lanes at a time.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

687. Breakfast

Yahoo group: Queen_Creek_Hams

Queen Creek Safety Fair quickly approaching
Posted Date: 10/21/2010

Mark your calendar! Queen Creek residents are invited to the Queen Creek Safety Fair Saturday, Nov. 6 from 10 a.m. to 1 p.m. at Queen Creek Marketplace on the southwest corner of Rittenhouse and Ellsworth Loop roads. The Queen Creek Fire Department, Maricopa County Sheriff's Office<http://www.mcso.org/>(MCSO), Arizona Volunteers Foundation <http://www.azvolunteers.org/>and Queen Creek Marketplace <http://www.queencreekmarketplace.com/> are sponsoring the free event, which will include activities for all ages to learn about staying safe.

Activities include:
• Live home fire sprinkler demo by Queen Creek Fire Department, including a side-by-side room display, one with automatic fire sprinklers and one without.
• Car extrication demo by Queen Creek Fire Department
• Demonstrations by MCSO
• Air-Evac medical helicopter on site
• Public Safety vehicles
• Infant car seat checks
• Displays by Queen Creek Marketplace tenants

Queen Creek Traffic Alerts: Oct. 28 - Nov. 4
Posted Date: 10/28/2010
Traffic Alerts Map: Oct. 28 - Nov. 4<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8142>

*1. **Ocotillo Road/220th Street & Ocotillo Road/222nd Street: *Crews will be installing utility connections on the north side of Ocotillo Road. Traffic restrictions are not planned at this time.

2. Ellsworth Road - Cloud Road to Empire Boulevard: The widening of Ellsworth Road is in progress. Construction information and traffic alerts can be found at www.southellsworthroad.com. *
*

*3. Ellsworth Road - Cloud Road to Chandler Heights Road: *Crews will be installing utility connections for new residential development on the east side of Ellsworth Road in this area. This requires immediate northbound travel lane closures, which started the week of Oct. 4 and will remain in place during construction activity. Lane restrictions will close two of the three northbound lanes at a time.

*4. **Ellsworth Loop Road and Rittenhouse Road:* The first phase of work on the bridge under the Union Pacific Railroad has been completed. Crews will return in approximately 30 days to complete the project. There are no lane closures scheduled for this work until crews return. * *

**

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

691. Mesa ARC Fox Hunt

Yahoo group: Queen_Creek_Hams
Date: 2010-10-31 09:08:23 UTC
From: ars_k1atv
Topic: 691 Message: 691

The new Mesa ARC is considering having a combination fox hunt and pot luck picnic on Dec 12th.

I will probably be the fox lost somewhere in West Mesa.

There may be a possibility that this will be a VIDEO fox hunt so check out your 440 antennas and cable-ready portable TV sets. Bring along 2-meters for talk back.

Contact Vinnie Chapman, n1lqj@... for further updates.

Bil Munsil
K1ATV HAM TV
Mesa AZ
Hams should be seen as well as heard.

From: ars_k1atv
Topic: 691 Message: 692

Has anybody ever done a T-hunt?

What questions should be asked ahead of time?

Bil

Queen Creek recognizes Community Emergency Response Team graduates
Posted Date: 11/4/2010

At its Nov. 3 meeting the Queen Creek Town Council<http://www.queencreek.org/Index.aspx?page=36>honored 12 graduates from the Community Emergency Response Team <http://www.queencreek.org/Index.aspx?page=159>(CERT) program. The graduates are now qualified to assist public safety personnel in responding to local accidents, natural disasters, fires and rescues.

This group was the thirteenth class to graduate from the program. The graduating class included David Bond, Jamie Cancel, Nathan Gowin, Ed Horton, Alexander Kolski, Amanda Nemec, Benjamin Noland, Derek Robinson, Christina Rowden, Ernie Talavera, Trudy Talavera, Jean-Louis Vanhie.

CERT is a program that helps prepare individuals to respond to emergency situations in the community. Training sessions include disaster preparedness, fire suppression, basic disaster medical operations, shelter operations, and team operations.

To register for the next session beginning in late March 2011, visit queencreek.org <http://www.queencreek.org/Index.aspx?page=159> or e-mail joe.lafortune@.... Class sizes are limited to 25 participants. Anyone is welcome to apply, however Town residents<http://www.queencreek.org/Index.aspx?page=226>will be given priority over non-residents. The program is a 20-hour course given over a seven-week period.

To keep up-to-date on public safety and Fire Department activities, "like" us on www.facebook.com/qcfire.

Hi Joe,

Is there any chance we can get together in the next couple of weeks? I'd
like to update you on what the town of QC is doing vis-a-vis ham radio.

Thanks,
Bruce Barnes

696. Use Your UPS to Gracefully Shut Down Your PC During Power Outages

Yahoo group: Queen_Creek_Hams
Date: 2010-11-05 17:20:44 UTC
From: Joe Sammartino
Topic: 696 Message: 696

I decided to post this article from How-To Geek in our ham radio Group because a lot of us are using computers in our hobby in unattended mode more often. Whether it's for an APRS station, RMS PACTOR, VHF/UHF packet/RMS, remote operation, etc. there are more opportunities for us to become victims of uncontrolled shutdown during a power loss. The following is a lengthy article and speaks to APC's UPS and software control offerings, but it should generally apply to any modern UPS setup.

Enjoy, Joe - N2QOJ

Use Your UPS to Gracefully Shut Down Your PC During Power Outages<http://www.howtogeek.com/howto/33776/powerchute-makes-managing-your-apc-ups-easier-during-power-outages/>

[image: image]

If you live in an area that has a lot of blackouts, brownouts, and spikes in your electricity, it’s important to have a UPS *(Uninterruptable Power Supply)* to protect your investment. Here’s how your APC UPS can shut down your PC gracefully.

A UPS isn’t just for IT infrastructures and should be part of your desktop PC and home network protection strategy—especially if you have a home media server. In a power outage, it provides emergency power via battery, allows you to safely save your data, and power down your machine properly.

Photo by Aaron Landry <http://www.flickr.com/photos/s4xton/2387838853/>
What You’ll Need

For the purposes of today’s article, we’re covering how to use an APC brand UPS, though most other brands of UPS will provide a similar software package that works the same way. Here’s what you’ll need:

- An APC UPS with a Data Port<http://www.amazon.com/gp/product/B0019804U8?ie=UTF8&tag=hotoge-20&linkCode=as2&camp=1789&creative=390957&creativeASIN=B0019804U8>
- RJ45 Male to USB Male Data Cable<http://www.amazon.com/gp/product/B0002WYJSU?ie=UTF8&tag=hotoge-20&linkCode=as2&camp=1789&creative=390957&creativeASIN=B0002WYJSU>
(this
should be included with your UPS)
- PowerChute Personal Edition software – *Included with the UPS*

*For this article we’re using an APC ES 550 Model<http://www.amazon.com/gp/product/B0019804U8?ie=UTF8&tag=hotoge-20&linkCode=as2&camp=1789&creative=390957&creativeASIN=B0019804U8>.
Features may vary based on your model and operating system.*

[image: sshot-2010-10-31-[22-38-17]]<http://www.amazon.com/gp/product/B0019804U8?ie=UTF8&tag=hotoge-20&linkCode=as2&camp=1789&creative=390957&creativeASIN=B0019804U8>
Installing and Setting Up PowerChute

Your APC UPS should come with a version of PowerChute included, although by the time you purchase it, you might want to check to see if there is an update. Ours came with version 2.1.1 and after we registered our UPS, we found Version 3 on their site.

If you have an older version already installed on your machine, you'll need to manually uninstall it, if you want to make sure it's a clean uninstall you might want to use Revo Uninstaller Pro<http://www.howtogeek.com/reviews/revo-uninstaller-pro/> or the free version.

[image: sshot-2010-10-31-[19-18-30]]

Make sure your data cable is plugged in before installing the software, otherwise you'll get the following message.

[image: sshot-2010-10-21-[19-25-25]]

Installation is quick and easy following the wizard and accepting the defaults.

[image: sshot-2010-10-31-[16-02-49]]

A couple of the options you might want to select is software update notifications, and sending power quality info for your location. You can change these settings later after it's installed too.

[image: sshot-2010-10-31-[19-37-43]]

When the installer finishes for 2.1 or 3.0 you'll have the opportunity to register your UPS right away. It opens your default browser to the APC site.

[image: sshot-2010-10-21-[20-17-44]]
Using PowerChute

PowerChute lives in the Taskbar and monitors your UPS in the background and monitors your UPS and power outages.

[image: sshot-2010-10-21-[20-24-47]]

Launch PowerChute and you can begin configuring your power backup options.

[image: sshot-2010-10-31-[19-48-19]]

Configure your UPS how you want it to run when the power goes out. You can set it to preserve battery power or keep it running longer. Keep in mind if you set it to run longer, it will take up more of the battery power.

[image: sshot-2010-10-31-[19-50-00]]

PowerChute allows you to check past performance of the UPS. Like in this example, we show it kicked on on Halloween at 9:30 PM due to a blackout.

[image: sshot-2010-10-31-[22-26-37]]

Earlier we mentioned that you can turn off Data Collection is you want to. Go into Configuration Options and uncheck the Data collection options and save the selection.

[image: sshot-2010-10-31-[19-07-29]]

Under Notification you can configure the way you get notifications during power events.

[image: sshot-2010-10-31-[19-50-42]]
When the Power Goes Out

When the power goes out you'll get a notification on your screen, and should have plenty of time to wrap up some quick work, save it, and shut down your machine properly.

[image: sshot-2010-10-31-[21-31-42]]

If you're away from your computer, the cool thing is it will put your machine in Hibernate mode after the time you specify.

[image: sshot-2010-10-31-[23-36-11]]

When the power is restored, under Current Status you'll see the batter power has been reduced, it's charging, and what caused the issue…where in this instance it was a blackout.

[image: sshot-2010-10-31-[21-54-34]]

Another cool feature is the Energy Management Settings. If you enable this feature, other components you have plugged into your UPS can be put in a low power state or turned off when not in use. These would be the devices that aren't connected to the battery backup side of your UPS like printers, speakers, or extra monitors.

[image: sshot-2010-10-31-[22-02-18]]

If you're serious about protecting your computer equipment against power outages and surges, using an APC UPS along with PowerChute Personal Edition is an important part of your protection strategy. Of course if you're using a Laptop or Netbook it's not quite as important to use a UPS, as the battery is your backup power.

But, if you have a small network with Desktop computers – especially a server, having a UPS and software such as PowerChute installed, it can protect your investment, save a lot of hassles, and give you piece of mind.

Download & Learn More About
PowerChute<http://www.apc.com/products/family/index.cfm?id=129>

PowerChute Version 3.0 is compatible with XP SP3, Vista (SP2), Windows 7, and Windows Home Server Power Pack 1 and higher.

Hi Bruce,

Email is probably a bit to slow for us to connect to plan a meeting.

On my return next Friday from NJ, I will give you a call on your cell phone
to connect and setup a meeting time and place.

Till then, have a great week and I look forward to meeting you soon.

Regards,

Joe Sammartino

700. Sea water antenna

Yahoo group: Queen_Creek_Hams
Date: 2010-11-09 18:04:08 UTC
From: ars_k1atv
Topic: 700 Message: 700

I had read of this, but this is the first I have seen of a demonstration and near the end there is a closed system that could really be interesting for many of us.

http://www.wired.com/gadgetlab/2010/11/seawater-antenna-squirts-radio-signals/

Adjust the SWR by controlling the height of the stream and with the closed system, no evaporation or contamination of the surrounding area with salt deposits. In the right setting, it could even be nearly invisible. All we need is a guide to making the RF coupling to the stream.

Road Closure Advisory: Empire Boulevard at Ellsworth Road (east side only)
Posted Date: 11/9/2010

Beginning at 5 a.m. on Monday, Nov. 15, the Maricopa County Department of Transportation <http://www.mcdot.maricopa.gov/>(MCDOT) contractor will temporarily close Empire Boulevard on the east side of Ellsworth Road to install a sewer line. During this time, only left or right turns will be permitted from eastbound Empire Boulevard onto Ellsworth Road. Please note right and left turns will not be permitted from Ellsworth Road for eastbound travel onto Empire Boulevard. Please use Gary Road, Rittenhouse Road or Hunt Highway as alternate routes. The roadway will reopen by 5 p.m. on Sunday, Nov. 21.

For more information about the Ellsworth Road Improvement Project visit southellsworthroad.com <http://www.southellsworthroad.com/> or call MCDOT's 24-hour Construction Hotline at 480-350-9288.

711. Top 10 Misconceptions about Photography and the Law

Yahoo group: Queen_Creek_Hams
Date: 2010-11-13 17:59:32 UTC
From: Joe Sammartino
Topic: 711 Message: 711

This article comes from the Blog, "Better Digital Photography" at
http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html
. <http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html>
I've met a lot of hams that also are photography buffs ("say cheese"). So, while off-topic, I still wanted to post this article here. Regards, Joe.
A Conversation with Attorney Carolyn E. Wright Top 10 Misconceptions about Photography and the Law<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html>
By Martha Blanchfield
[image: Carolyn E. Wright]
Carolyn Wright is an avid photographer, attorney and author of www.photoattorney.com, a rich resource Web site that covers a wide range of issues and topics of interest to photographers. In her 18 years' work as an attorney she has worked on hundreds of cases—most of which have been resolved without formal litigation. The most common matter she handles is the unauthorized use of her clients' photographs.
"Photographers have many misconceptions about copyright laws and intellectual property rights based on conversations they have had with colleagues and/or inaccurate information<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html#> obtained from the Internet. My Top 10 List came about as a way to combat the spread of this misinformation," Wright shares, whose areas of practice deal with intellectual property, including copyright and trademark law, rights of privacy and publicity, and contracts and licensing.
"Unfortunately, the services of an attorney<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html#> are sometimes required to enforce ownership rights, but a photographer should do all that is possible in advance of engaging legal counsel," she notes. "One of the most important things is to register the copyright to all of his or her images that have been distributed to others (especially those on the Internet) with the U.S. Copyright Office. A second task for photographers seeking to make money with their photography is to really learn how to run and proactively manage a business<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html#>
."
Top 10 Misconceptions
*

**1. You don’t need permission to photograph a work of art that is in a public area.*
This rule is based on copyright law. United States Copyright Law<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html#>
grants
exclusive rights to the copyright owner of a creative work, including the rights to: reproduce the copyrighted work; prepare derivative works based on the copyrighted work; distribute copies of the copyrighted work to the public; and/or display the image. (See 17 USC §106.)
When those rights are infringed the copyright owner is entitled to recover damages suffered as a result of the infringement. (See 17 USC §504). So even when a creative work is in a public area you may photograph it only if the work is in the public domain or your photograph makes a fair use of the work.

<http://www.photoattorney.com/?p=1158>
2. A news publication may use your photograph without your permission because it is fair use.
The answer is not so easy. Wright notes that some individuals claim that use of a photograph for educational or newsworthy purposes is okay under “fair use.” The doctrine of fair use means that copying will not infringe a copyright when it is “for purposes such as criticism, comment, news reporting, teaching, scholarship or research.”
Four factors are considered to determine whether the use of a photograph qualifies for fair use:

- The purpose and character of the use, including whether such use is of a commercial nature or is for non-profit or educational purposes.
- The nature of the copyrighted work.
- The amount and substantiality of the copyrighted material that is used.
- The effect of the use upon the potential market for or value of the copyrighted work.

3. You need a model release to use a photograph of a person on a book cover.
In general, the use of a person’s image on a book cover was considered to be an editorial use that would not need a model release. Recently, however, a New York court determined that a model release was needed for a cover of a fiction book. While this ruling has created an anomaly, it’s always safest to obtain a signed model release.
4. If you make money from a print, it is a commercial use.
Just selling a print or licensing a photo does not make the transaction a commercial use of a photograph. Instead, a commercial use of a photograph generally occurs when the photo is used for advertising, endorsement or trade.
5. You need a property release to use a photograph of a house for a commercial use.
No court or state has established a law—either by statute or through court rulings—creating a right to protect or prevent property from being photographed from a public area, or from that photograph being used

editorially or commercially. Thus, no legal reason exists for a “property release,” except perhaps when photographing other copyrighted works or trademarks. Note that some stock agencies require a property release for fear of being sued.

6. You have no copyright protection for your photos until you register them.

Copyright exists in your photographs at the moment you click the shutter. While you do not have to register your photos with the U.S. Copyright Office for them to be protected by copyright, there are many reasons to register them. When a photo is not registered with the U.S. Copyright Office prior to an infringement (or within three months of the first publication of the photo), a copyright owner may recover only “actual damages” for the infringement (pursuant to 17 U.S.C. 504 (b)), instead of statutory damages. Courts usually calculate actual damages based on your normal license fees and/or standard licensing fees, plus profits derived from the infringement, if not too speculative.

Note also that to file a lawsuit in the U.S. for copyright infringement, the photo must be registered.

The U.S. Copyright Office now allows for registration of certain copyrighted works online using the eCO system. Currently, you may use eCO to register any number of unpublished images, a single published image and multiple images that were all first published in the same “unit of publication.” Registrations of a group of separately published photographs at this time must be submitted on Form VA only, with optional use of continuation sheet Form GR/PPh/CON. The Copyright Office expects that these group registrations will be allowed using the eCO system soon.

7. Statues and other works of art on federal or state property are in the public domain.

Works in the “public domain” are creative works that are not protected by copyright. Works are in public domain either because: (1) the author failed to satisfy statutory formalities to perfect the copyright; (2) it is a work of the U.S. Government; or (3) the term of copyright for the work has expired.

Item (1) refers to work published prior to March 1, 1989. The copyright notice had to be affixed to the work or it immediately lost protection (the copyright protection for some foreign works has been restored even if they were published without notice before that time). Works published without the copyright notice between 1/1/78 and 3/1/89, the effective date of the Berne Convention<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html#>

Implementation

Act, retained copyright only if efforts to correct the accidental omission of notice was made within five years—such as by placing notice on unsold copies. The law has changed so that works published after that time do not need the copyright notice for protection, but it’s a good idea to use it anyway.

Item (2) provides that works of government employees, such as maps, charts and surveys are in the public domain from the date of creation.

Item (3) allows a certain time of copyright protection for the benefit of the creator. The time for that protection has changed several times over the

years, so it’s difficult to explain when works fall into the public domain. The chart found atwww.unc.edu/~unclng/public-d.htm is helpful to determine dates.

Sometimes, however, copyrighted works are created by non-government personnel for the government, such as when the government commissions a piece of art. The artist later transfers the copyright to the government. The “government works exception” then allows the federal government to hold the copyrights for those works transferred to it by assignment.

Some have argued that the government is using this exception unfairly and as a workaround for copyright law. So far, it has been used to prevent the copying or creation of derivative works from items such as a film series on early Supreme Court cases to the Sacagawea coin.

The Vietnam Women’s Memorial Foundation, Inc. (VWMF) has used the exception as a basis to sue those who have sold photographs of the Vietnam Women’s Memorial. The Memorial is a bronze sculpture created by Glenna Goodacre of Santa Fe, NM. It resides on the grounds of the Vietnam Veterans Memorial in Washington, D.C., and depicts three women and a wounded soldier. Goodacre reportedly transferred the copyright for the sculpture to the VWMF, which has sued various entities that allegedly sold photographs of the sculpture.

*8. Photographs of works in the public domain also are in the public domain. *

Unless the photos are exact copies (often referred to as “slavish copies”) of the creative works that are in the public domain, they are entitled to protection under copyright law (see response to #1).

9. If a stock agency requires a model or property release, then it must be legally required.

In general, you may photograph people when they are in public. The use of those photographs, however, can be restricted due to certain privacy rights. Privacy rights are recognized in most states, but are different for each state. Since it’s tricky to know what you can do, the safest approach to follow is the most restrictive one.

One right of privacy—also known as the right of publicity—is the commercial appropriation of someone’s name or likeness. This happens when the name or likeness of someone is used without consent to gain commercial<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html#> benefit, such as when a photograph of a person is used in an advertisement<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html#> without the person’s permission. You don’t need a model release to use a photograph of a person for editorial purposes. Since it’s sometimes difficult to tell whether a use of a photograph is commercial or editorial use, it’s best to get a model release. Further, since stock agencies want to avoid lawsuits, they may require a model or property release in an abundance of caution, even when they are not needed.

*10. If you take a photograph while working, the copyright to the photograph always belongs to the employer. *

Section 101 of the copyright law includes one of the definitions of a “work

made for hire" as: (1) a work prepared by an
employee<http://betterdigitalphotography.blogspot.com/2010/11/top-10-misconceptions-about-photography.html#>
within
the scope of his or her employment. Thus, while you may take a photo while
on the job, if photography is not within your job description, then you, not
your employer, own the copyright to the image. When the copyright belongs to
your employer, it is as if you never took it and you may not use it for any
purposes unless authorized by the employer or the law (such as a fair use).
For more reading consider: http://www.photoattorney.com/?p=282 and

712. When is a TV station NOT a TV station?

Yahoo group: Queen_Creek_Hams
Date: 2010-11-14 03:39:02 UTC
From: ars_k1atv
Topic: 150 Message: 712

FCC rule 47 CFR 73.653 reads:

§ 73.653 Operation of TV aural and visual transmitters.

The aural and visual transmitters may be operated independently of each other or, if operated simultaneously, may be used with different and unrelated program material.

This has been interpreted to mean that low power analog TV stations on Channel 6 can operate as FM radio stations and there are several of them in the US. The audio frequency is 87.75 MHz so can be picked up on many FM radio receivers at 87.7.

The only requirement is that they must have SOME kind of video signal.

Curious, whot?

Bil Munsil
K1ATV HAM TV
Mesa AZ
Hams should be seen as well as heard.

713. Queen Creek: Queen Creek Traffic Alerts: Week of Nov. 15 - Nov. 18

Yahoo group: Queen_Creek_Hams
Date: 2010-11-15 18:33:38 UTC
From: Joe Sammartino
Topic: 713 Message: 713

Queen Creek Traffic Alerts: Week of Nov. 15 - Nov. 18
Posted Date: 11/11/2010
Traffic Alerts Map: Nov.
11-18<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8240>

Ellsworth Road - Cloud Road to Empire Boulevard
Beginning Monday, Nov. 15 at 5 a.m., Empire Boulevard will be closed between Ellsworth and Gary roads for the installation of a new sewer line. Traffic traveling eastbound on Empire Boulevard west of Ellsworth Road will not be allowed to travel east beyond Ellsworth Road. Northbound right turns and southbound left turns will be restricted at the intersection during construction.

During the closure, local traffic access for the residential areas east of Ellsworth Road will be from the Rittenhouse and Gary roads intersection.

Detour routes for traffic traveling through this area will be Rittenhouse Road, Gary Road or Hunt Highway.

Construction information and traffic alerts can be found at www.southellsworthroad.com.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers that are controlling traffic in areas affected by construction and maintenance operations.

Topic: 715 Message: 715

Do you want to know large tower altitudes and such?

Do what pilots do - try this very cool site: http://skyvector.com/

From: Joe Sammartino
Topic: 721 Message: 721

Hi folks,

Recently, I posted a file listing local nets and Bil contributed the ATV net as well.

If you would like to have these nets noted on our Group Calender with reminders, please let me know. I don't want to fill your inbox with net announcements needlessly.

I will put them on our calendar but want to know if automatic reminders are of interest to our members.

Just give me a quick response....I'd prefer to consider the Group consensus.

Thanks,

Joe, N2QOJ

722. Road closures to occur in Queen Creek Town Center Dec. 3 and 4

Yahoo group: Queen_Creek_Hams
Date: 2010-12-01 23:28:08 UTC
From: Joe Sammartino
Topic: 722 Message: 722

Road closures to occur in Queen Creek Town Center Dec. 3 and 4
Posted Date: 11/29/2010

Two events will close Ellsworth Road in Town Center this weekend. On Friday, Dec. 3, beginning at noon, Ellsworth Road between Ocotillo and Rittenhouse roads will be closed for the Hometown Christmas<http://www.queencreek.org/Index.aspx?page=631>event at the Queen Creek Library. <http://www.queencreek.org/Index.aspx?page=712>

Local traffic will be able to use Ellsworth Road south of Rittenhouse Road as far south as Victoria Lane. Northbound traffic from Ocotillo Road will be allowed to access businesses in the area, but will not be able to access the library or event site. Traffic traveling to the event can enter the library parking lot from either Ocotillo Road or Ellsworth Loop Road or can park in the lot north of the library, entering from Victoria Lane between Ellsworth and Ellsworth Loop roads.

Ellsworth Road in this area is expected to reopen at approximately 11 p.m.

On Saturday, Dec. 4, from 7-9 a.m., the following roads will be closed for the 2010 Holiday Parade <http://www.facebook.com/QCParade>:

- Ellsworth Road between Ellsworth Loop Road (South) and Rittenhouse Road

- Victoria Lane between Ellsworth Loop Road and Ellsworth Road
- Heritage Loop Road between Ellsworth Road and Ocotillo Road
- Ocotillo Road between Ellsworth Loop Road and Rittenhouse Road
- 209th Way (Aldecoa Road) between Ocotillo Road and Ellsworth Road

Beginning on the afternoon of Friday, Dec. 3, temporary "No Parking" signs will be installed on Ellsworth Road between Sierra Park Boulevard and Maya Road. Drivers are advised to obey all posted signs on public streets.

For more information on traffic restrictions, contact the Town of Queen Creek Traffic Hotline at 480-358-3132 or e-mail traffic@.... To sign up for updated traffic alerts visit www.queencreek.org<http://www.queencreek.org/Index.aspx?page=1><http://www.queencreek.org/Index.aspx?page=1>and click on "e-news <http://www.queencreek.org/Index.aspx?page=126>." To keep updated on Town news and happenings, follow facebook.com/queencreek<http://www.facebook.com/queencreek>or twitter.com/TOQC_official <http://www.twitter.com/TOQC_official>.

- Road closures to occur in Queen Creek Town Center Dec. 3 and 4<http://www.queencreek.org/modules/ShowDocument.aspx?documentid=8334>

723. Queen Creek: Queen Creek Traffic Alerts: Dec. 2-9

Yahoo group: Queen_Creek_Hams
Date: 2010-12-02 17:09:11 UTC
From: Joe Sammartino
Topic: 723 Message: 723

Queen Creek Traffic Alerts: Dec. 2-9
Posted Date: 12/2/2010
Traffic Alerts Map:
Dec.2-9<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8363>

1. *Ellsworth Road - Cloud Road to Empire Boulevard*: Construction is ongoing in this area. Information and traffic alerts can be found at www.southellsworthroad.com.

2. *Ellsworth Road - Ocotillo Road to Rittenhouse Road*: The annual Queen Creek Hometown Christmas <http://www.queencreek.org/Index.aspx?page=631>event will take place at the Queen Creek Library <http://www.queencreek.org/Index.aspx?page=712><http://www.queencreek.org/Index.aspx?page=712>on Friday, Dec. 3. This event will necessitate the closure of Ellsworth Road between Ocotillo and Rittenhouse roads. Local traffic will be allowed in the area; however, through traffic will not be permitted on Ellsworth Road in front of the library. The closure of Ellsworth Road will begin at noon and will continue until 11 p.m. Drivers are encouraged to use Ellsworth Loop Road or Rittenhouse Road as alternates.

3. *Ellsworth Road - Ellsworth Loop Road to Rittenhouse Road*: The annual Queen Creek Holiday Parade & Festival <http://www.facebook.com/QCParade>will take place on Saturday, Dec. 4. The parade route will close Ellsworth Road between Sierra Park Boulevard and Maya Road, Ocotillo Road east and west of Ellsworth Road, Victoria Lane between Ellsworth Loop and Ellsworth roads, and Heritage Loop Road between Ellsworth Road and the Cornerstone Shopping Center entrance. Outlying closures for the parade (while still allowing through and local travel) will begin around 8 a.m.; all streets should be closed at 9 a.m., including those restricting traffic in the Town Center area. After the parade has ended, all closures will be removed with the exception of Ellsworth Road between Ocotillo and Maya roads, Victoria Lane between Ellsworth Loop and Ellsworth roads, and Heritage Loop Road between Ellsworth Road and the Cornerstone Shopping Center entrance. These remaining closures will be in place until approximately 6 p.m.

NOTE: Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers controlling traffic.

724. Breakfast on Saturday, 12/11

732. There's a "new" club in town

Yahoo group: Queen_Creek_Hams
Date: 2010-12-05 21:39:04 UTC
From: ars_k1atv
Topic: 732 Message: 732

The Amateur Television Network - Arizona (ATN-AZ) is reforming after many years of inactivity due to the absence of the White Tanks and Mt Lemmon HAM TV repeaters.

Peter Petrotta, KD7OIW, is the new president and is requesting ideas from all amateurs as to how the HAM TV can be used.

My participation will be limited due to my family and financial situation.

My dream has always been to be able to offer "professional" video to the major public service and emergency communications groups where appropriate.

Peter has being doing just that for many years in AZ and even more years in CA before that.

He has the video equipment for most bands up to and including 10 GHz - and perhaps even higher - PLUS the professional expertize to operate it.

As I understand it the two ATN-AZ repeaters will be linked at least temporarily before the end of December 2010 - with two-way video and audio.

Currently the nets are being held on the AATV Shaw Butte HAM TV repeater twice a week on Sunday and Wednesday evenings with the White Tanks output being retransmitted. It is also being streamed to the Internet for those that not see the Shaw Butte repeater directly.

There are a half dozen or so new ATVers in the Tucson area that check in by FM voice. Once the video and audio links are complete they will also be able to check in with video.

Membership in ATN-AZ is not mandatory to use our repeaters but for those that wish to belong the dues are $50.00 a year to help cover the site rent and equipment costs - most of which are now being borne by a single individual.

Peter can be reached at ppetrotta@... or on his cell phone at 602-616-9686.

Bil Munsil

734. Tuesday night conference call

Yahoo group: Queen_Creek_Hams
Date: 2010-12-06 16:39:39 UTC
From: Joe
Topic: 734 Message: 734

Folks,

I'm planning on a SKYPE conference call tomorrow night to discuss our Town's disaster management initiative in advance of our breakfast meeting on Saturday.

SKYPE Conference call: Tuesday, 7:30 PM

Bruce Barnes (KF6EZT) of the Queen Creek Disaster Committee and Fire Chief Van Summers will be attending our breakfast meeting Saturday.

I'd like to share with our interested members that project's mission and status to date and what role our Group may play.

So far, I have Jim's SKYPE name confirmed but would like to hear from the rest of you that can attend the conference call.

SKYPE is free for VoIP calls and I can initiate a multi-person conference call.

My SKYPE name is "joesammartino".

Jim's - KF7E - SKYPE name is "jimkf7e".

Terry's - W5NRA - Skype name is "terrypen64", please confirm.

Bruce's - KF6EZT - SKYPE name is "brucekbarnes", please confirm.

The day and time of the SKYPE conference call can change if it is a conflict with the majority of those attending.

So, please let me know if you can make this call and pass on your SKYPE name to all of us so we can add it to our SKYPE accounts.

Thank you all,

Joe, N2QOJ

Folks,

Who can make this breakfast?

I ask because this breakfast will be an opportunity to discuss our town's activities in disaster management planning.

I'd like to get an idea of our potential turn out.

Please let me know asap if you can attend.

Thanks,

Joe, N2QOJ

Subject: [Queen_Creek_Hams] Tuesday night conference call

Folks,

I'm planning on a SKYPE conference call tomorrow night to discuss our Town's disaster management initiative in advance of our breakfast meeting on Saturday.

SKYPE Conference call: Tuesday, 7:30 PM

Bruce Barnes (KF6EZT) of the Queen Creek Disaster Committee and Fire Chief Van Summers will be attending our breakfast meeting Saturday.

I'd like to share with our interested members that project's mission and status to date and what role our Group may play.

So far, I have Jim's SKYPE name confirmed but would like to hear from the rest of you that can attend the conference call.

SKYPE is free for VoIP calls and I can initiate a multi-person conference call.

My SKYPE name is "joesammartino".

Jim's - KF7E - SKYPE name is "jimkf7e".

Terry's - W5NRA - Skype name is "terrypen64", please confirm.

Bruce's - KF6EZT - SKYPE name is "brucekbarnes", please confirm.

The day and time of the SKYPE conference call can change if it is a conflict with the majority of those attending.

So, please let me know if you can make this call and pass on your SKYPE name to all of us so we can add it to our SKYPE accounts.

Thank you all,

Joe, N2QOJ

Sorry folks, I can't make it to breakfast on Saturday...

I came to Mercy Gilbert at 4 Am and they are now admitting me. They will remove a blockage from a couple of large kidney stones later today. I expect to be resting for several days.

Regards,

Joe, N2QOJ

We could always bring you a doggie bag and have the meeting in your room!

Gilbert Mercy is good. I had my shoulder work done there, and got to enjoy their ER staff the next day....

Best wishes.

Jim

Thanks for the good thoughts...well its a work in progress, they inserted a stent between kidney and bladder to get the ureter more dialated. They did get a 12mm stone laser broken and out....but I have 4 more that need removal next week. Morphine is kicking in now...this catheter is a pain, literally...

I have a used 2324-LYRM 1.2 GHz Directive Systems loop yagi for sale.

It's 6 feet long, has 24 elements and has a 17 dBi gain.

Brand new it sold for $125.00.

Due to years of being a perch for birds the loops are horribly misshapen but none of them is broken and it still works fine.

It originally came from Ft Collins, CO where it was used to relay the Denver ATV repeater into Ft Collins.

For shipping to me the boom was divided into two 3-foot sections.

Pick it up here at my house in East Mesa for $50 - or best reasonable offer.

I would imagine that the loops can be recircularized and realigned by feeding a piece of plastic pipe through them.

Bil

Traffic Alerts Map Dec. 16-23
Traffic Alerts Map Dec. 16-23
Posted Date: 12/16/2010

- Traffic Alerts Map Dec.
16-23<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8438>

1. *Ocotillo Road and 222nd Street*
Utility line installation will require east and westbound
traffic on Ocotillo Road to be shifted while work is taking
place. Traffic restrictions will be in place for all hours of
the day, as will a reduced speed limit through Friday,
December 31.

2. *Ellsworth Road and Empire Blvd.*
Installation of new box culverts will require the intersection to
be closed - construction activities will require the
closure to remain in place through Tuesday, March 11, 2011.
Further information on the intersection closure and
project updates can be found at www.southellsworthroad.com, or by
calling the MCDOT 24-hour Construction
hotline at 480-350-9288.

769. PC Repair Rip-Offs: Don't Get Gouged by Fix-It Services

Yahoo group: Queen_Creek_Hams
Date: 2010-12-29 02:46:08 UTC
From: Joe Sammartino
Topic: 769 Message: 769

From PCWorld:
http://www.pcworld.com/article/214366/pc_repair_ripoffs.html?tk=rss_howto PC Repair Rip-Offs: Don't Get Gouged by Fix-It Services When your PC needs a tune-up, upgrade, or overhaul, don't fall prey to the tech shop's worst deals. Here's the truth about computer repair services.

By Robert Strohmeyer <http://www.pcworld.com/author/Robert%20Strohmeyer>, PCWorld <http://www.pcworld.com/> Dec 27, 2010 2:30 pm

Computers don't always work as they should. Components fail, and operating systems fill up with crap that hinders performance and occasionally brings the whole machine to a halt. Savvy users know that they can fix most PC problems<http://www.pcworld.com/article/210898/5minute_fixes_for_windows_pcs.html> themselves,
and use sites like PCWorld.com to find solutions to their tech problems. Those who lack confidence in their tech skills, however, often fall prey to the rapacious tactics of online and local repair shops.

Lest your local geeks-for-hire take you for a ride (or fleece someone you love), we've rounded up a representative sampling of typical repair-shop services to help you sort the rip-offs from the reasonable deals.

[image: Laptop]In this article, I'll explore some of the most common offerings you'll find at repair shops large and small. These aren't scams, to be sure--as far as we know, these are all legitimate services from legitimate businesses. But the actual value of these services--relative to the work involved and the likely benefit to the consumer--can be highly questionable in many cases.
PC Tune-Ups

Just about every repair shop I've encountered offers some kind of "tune-up" service that promises to improve your PC's performance by deleting temporary files, defragmenting your hard drive, removing unused applications, running Windows Update, and (in many cases) cleaning the Windows Registry. These services often cost $50 to $100, but generally they don't do anything useful that you couldn't do yourself with a free download and some utilities that come with your PC.

Before you shell out a hundred bucks, think about what this service entails: Windows comes with a utility called Disk Cleanup that will delete temporary files for you with a few measly mouse clicks. Disk Defragmenter--another built-in Windows tool--typically runs automatically on a weekly basis, but you can launch it yourself by going to *Accessories, Utilities* and clicking *Defragment Disk*. Windows Update also runs automatically by default, but you can click *Start*, type Windows Update in the search field, and run it yourself on command.

If you have a bunch of programs you don't use, launch the 'Programs and Features' utility from the Control Panel and weed them out by clicking on them and selecting *Uninstall* from the menu above the main window. Or download Revo Uninstaller<http://www.pcworld.com/downloads/file/fid,66703/description.html>, a proven freebie that does a bang-up job of pulling out all the detritus that Windows' uninstaller often leaves behind.

As for Registry cleaners, we recommend avoiding them entirely. Although the premise that removing unneeded Registry entries can speed up your PC is basically sound, there's little evidence that it works in practice, and you can easily do more harm than good when you go mucking about in the Registry.

Not counting the time you'll spend waiting for Disk Defragmenter and Windows Update to automatically do their thing, the total amount of time a relative novice should take to perform all these tune-up tasks is about 15 minutes. So save your money, and check out "Speed Up Everything<http://www.pcworld.com/article/181579/speed_up_everything.html>," our easy guide to giving a computer a performance boost without paying for dubious services.

Setup Services

[image: Printer]$150 to help install this OVER THE PHONE? That's just crazy.Buying a new PC, printer, or monitor? Most major retailers will now happily offer to take as much as $200 off your hands to come to your house, pull the machine out of the box, plug it in, and load the setup disc (if indeed one exists). One well-known national chain charges $150 to help you set up your new printer *over the phone*. That's highway robbery.

Unless you're physically unable to lift the hardware onto your desk, don't even think about paying good money for 10 minutes of cable connecting and menu surfing. Most new displays and printers will simply start working in Windows just moments after you plug them in, even without installing their setup discs. And a new PC will walk you through the registration and Internet-connection process with such careful hand-holding that it's inconceivable you'd require a pro's help.

When you buy a new PC, many stores will offer to transfer all your data from your old machine to the new one--for as much as $100. But if you're moving from Windows XP or Vista to Windows 7, Microsoft's free Windows Easy Transfer<http://www.pcworld.com/businesscenter/article/190053/streamline_the_move_to_windows_7_with_easy_transfer.html> utility can make the job a no-brainer for any DIYer. If a shop offers to transfer your data for less than the cost of a $20 Easy Transfer cable, go for it. Otherwise, consider doing it at home.

If you do feel like you need a hand, just about any neighbor kid over the age of 10 will be able to do the job, and will probably accept a 10-spot for the trouble.

Hardware Upgrades

For someone who has never opened their system's case, contemplating a RAM, hard drive, or graphics card upgrade can be intimidating. Although we make the process pretty foolproof with our guides to upgrading desktops<http://www.pcworld.com/article/181579/speed_up_everything.html>, laptops<http://www.pcworld.com/article/148945/stepbystep_5_laptop_upgrades_you_can_do_yourself.html>, and netbooks<http://www.pcworld.com/businesscenter/article/170695/ten_ways_to_upgrade_your_netbook.html>, we would never blame a novice for seeking an expert's help in upgrading a PC's internal components. Just don't let the repair shop gouge you.

While we encourage anyone to at least consider installing new RAM on their own (it's insanely easy--the modules just snap right in), the most we can imagine paying for such a service is about $20. Of course, many major shops now charge a flat rate of $50 to $60 for any component installation, so a 2-minute RAM installation will cost as much as a 20-minute graphics card installation.

[image: Overpriced RAM (click to view full-size image)]<http://www.pcworld.com/zoom?id=214366&page=1&zoomIdx=1>The biggest thing to watch for with hardware upgrades is overpriced hardware. Before you go down to the shop, check prices online for the hardware you're buying. For instance, 4GB of RAM shouldn't cost more than $70, and 8GB goes for less than $150. So when you see a store charging $600 for an 8GB RAM upgrade, you'd do well to shop around a little more.

Data Recovery

Hard drives can fail. Houses can burn down. Human error can result in lost data. When these things happen, you may find yourself weeping over the loss of all your digital photos, your music collection, essential business information, and more.

Professional data-recovery companies can typically get all of your lost data back for you (even from a fire-damaged hard drive), but you can expect to pay in the thousands for the service. It may sound like a rip-off, but these companies use advanced computer forensics systems that are wildly expensive in their own right and require deep technical expertise that you won't find at the tech shop down the street.

The best way to avoid finding yourself at the mercy of data-recovery services is to back up your PC often, using a cloud-based service such as BackBlaze <http://www.backblaze.com/>, Mozy <http://mozy.com/>, or Trend Micro SafeSync <http://www.trendmicro.com/safesync>. By frequently backing up to a remote service, you'll always have a recent copy of all your data in a secure location. If your hard drive fails, your computer burns up in a fire, or someone runs off with your laptop, you can get every bit of data back all by yourself. Compared with the cost of professional data recovery, $60 a year for online backup<http://www.pcworld.com/businesscenter/article/161628/how_to_choose_an_online_backup_provider.html> is a bargain.

The Breaking Point

Depending on the age and value of your PC, it may not be worthwhile to upgrade or repair anything at all. If your machine is more than three years old, we generally don't recommend spending more than a hundred bucks for RAM and a new hard drive. And once you reach the $200 price range, you're probably spending more than your computer is worth. With good budget desktops<http://www.pcworld.com/reviews/collection/1646/top_10_value_desktop_pcs.html> now selling for as little as $500, it's reasonable to at least consider replacing your old system before spending good money on any upgrade or repair.

Joe, I have to shoot another Gymkhana (equestrian event) that morning at 9:00, perhaps I could swing by for a quick bite before I have to leave.

This actually got sent out by the Town today.....

Queen Creek Traffic Alerts: Jan. 6-13
Posted Date: 1/6/2011
Traffic Alerts Map: Jan.
6-13<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8510>

1. *Ellsworth Road and Empire Boulevard: *Installation of new box culverts will require the intersection of Ellsworth Road and Empire Boulevard to be restricted through Tuesday, March 15. Traffic approaching the intersection from any direction will not be able to travel straight through the intersection, but will be detoured with either a right or left turn. Motorists are advised to check traffic restrictions regularly at www.SouthEllsworthRoad.com <http://www.southellsworthroad.com/> or by calling the MCDOT 24-hour construction hotline at 480-350-9288.
2. *Ellsworth Loop and Aldecoa roads*: Intermittent north and southbound right-lane closures are expected during installation of the traffic signal.

Please Note: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement or flaggers controlling traffic in areas affected by construction and maintenance operations.

777. Queen Creek: Queen Creek Traffic Alerts: Jan. 13-20

Queen Creek Traffic Alerts: Jan. 13-20
Posted Date: 1/13/2011

- Traffic Alerts Map: Jan.
13-20<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8522>

1. *Ellsworth Road and Empire Boulevard*
Installation of new box culverts will require the intersection of
Ellsworth Road and Empire Boulevard to be restricted through Tuesday, March
15. Traffic approaching the intersection from any direction will not be able
to travel straight through the intersection but will be detoured with either
a right or left turn. Motorists are advised to check traffic restrictions
regularly at
www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>or by
calling the MCDOT 24-hour construction hotline at 480-350-9288.

2. *Ellsworth Loop and Aldecoa roads*
Intermittent north and southbound right-lane closures are expected during
installation of the traffic signal.

3. *Ocotillo Road and 222nd Street/Ocotillo and Signal Butte roads*
Traffic will be restricted on Ocotillo Road between Signal Butte Road and
220th Street as well as at the Ocotillo and Signal Butte roads intersection
while street improvements are made in the area.

*NOTE: Due to the nature of the work, days and times are subject to change
without prior notice. Motorists are encouraged to obey all posted signs,
traffic control devices and directions from law enforcement or flaggers that
are controlling traffic in areas affected by construction and maintenance
operations.*

Posted Date: 1/20/2011

- Traffic Alerts Map: Jan. 20-27<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8552>

1. *Ellsworth Road: Cloud Road to Empire Boulevard*
Street improvements are ongoing. Motorists are advised to check traffic restrictions regularly at www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>or by calling the MCDOT 24-hour construction hotline at 48-350-9288.

2. *Ocotillo and Signal Butte roads*
Traffic restrictions are in place. Traffic has been shifted to the east due to ongoing street improvements.

3. *Ocotillo Road: Signal Butte Road to 220th Street*
Traffic restrictions are in place. Traffic has been shifted to the south due to ongoing street improvements.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers that are controlling traffic.

779. Antenna Party and Field Day

Yahoo group: Queen_Creek_Hams
Date: 2011-01-22 23:46:37 UTC
From: Kenn
Topic: 779 Message: 779

We're going to meet for an antenna building party and ham radio get together on Jan 29, starting at 8:00am.

Place: Monterey Park, 7125 E. Monterey Avenue in Mesa.

Directions: Exit US 60 at Power Road, go South past Baseline, turn East on Monterry Avenue.

The park is next to an elementary school on the South side of the street.

Here is a link to a Google Map:

http://maps.google.com/maps?f=q&source=s_q&hl=en&geocode=&q=7125+E+Monterey+Ave,+Mesa,+Arizona+85209&aq=&sll=33.370302,-111.681175&sspn=0.013476,0.016351&ie=UTF8&hq=&hnear=7125+E+Monterey+Ave,+Mesa,+Maricopa,+Arizona+85209&ll=33.376233,-111.675897&spn=0.02695,0.032701&z=15

Several people plan to build a copy of the Arrow dual-band aluminum J-pole.

Others are going to bring portable radios and antennas and set up in the park to enjoy using their radios outdoors in nice weather and exchange ideas on portable, mobile and emergency communications.

Come join us!

If you want to build the antenna, contact Gary Goetz right away so that he can get the materials for you.

Dual Band J-pole Building Party - Saturday, January 29 - 8:30 AM

We will be building a duplicate of the excellent $40 aluminum jpole from Arrow Antennas (see http://www.arrowantennas.com/osj/j-pole.html)

Material cost - $15 - $20, depending on number of people participating.
Gary Goetz will buy the materials and bring the equipment necessary to build the antenna. Send him a check for $20 to reserve your space. He will refund any amount that the actual cost is less than $20.

Gary Goetz
4624 E Cabazon Rd
Gilbert AZ 85297

782. Queen Creek: Ellsworth Road Improvement Project Update

Yahoo group: Queen_Creek_Hams
Date: 2011-01-27 21:24:54 UTC
From: Joe Sammartino
Topic: 782 Message: 782

Some additional information about local road enhancements:

Ellsworth Road Improvement Project Update
Posted Date: 1/27/2011

[image: Maricopa County Department of Transportation]

*Riggs Road at Ellsworth Road (West side only)
*1/31/11 through 2/5/11
Beginning at 5:00 a.m. on Monday, January 31, 2011, the Maricopa County Department of Transportation <http://www.mcdot.maricopa.gov/> (MCDOT) contractor will temporarily close Riggs Road from the west side of Ellsworth Road to the east side of 204th Street for installation of asphalt pavement. Two-way traffic will be maintained on Ellsworth Road during this closure. However, left and right turns will not be permitted from Ellsworth Road onto Riggs Road. Access to Horseshoe Park and Equestrian Centre will be maintained via Hawes Road. During the closure, San Tan Boulevard or Hawes Road may be used as alternate routes. Riggs Road will reopen by 5:00 p.m. Saturday, February 5.

*Traffic Restrictions through 3/15/11
*Ellsworth Road & Empire Boulevard Intersection
The intersection at Empire Boulevard and Ellsworth Road is temporarily restricted and closed to through traffic for the installation of a drainage culvert. During this activity, only right turns will be permitted from eastbound and westbound Empire Boulevard onto Ellsworth Road. In addition, only left turns will be permitted from northbound and southbound Ellsworth Road onto Empire Boulevard. Through traffic should use Gary Road, Rittenhouse Road or Hunt Highway as alternate routes. The intersection will reopen by 5:00 p.m. on Tuesday, March 15, 2011.

During this construction activity, local businesses will remain open and business access will be maintained via signed detour routes. Please continue to patronize local businesses during this roadway construction project.

*About the Project
*The Maricopa County Department of Transportation (MCDOT), in partnership with the Town of Queen Creek and Pinal County, is improving Ellsworth Road from approximately 1250-feet south of Empire Boulevard to Cloud Road. Improvements include widening the existing two-lane roadway to six lanes (three travel lanes in each direction),the installation of curb and gutter, raised center median, bike lanes, intersection and drainage improvements at San Tan Boulevard, Riggs Road (including the installation of a traffic signal) and Cloud Road.

This project also includes the installation of conduit for the future deployment of Intelligent Transportation Systems (ITS) traffic management

technologies including fiber connections that will transmit traffic conditions and traffic signal coordination commands instantaneously along the Ellsworth Road Corridor. In the future, "Real Time" traffic information will be transmitted to Traffic Management Centers throughout Maricopa County using a combination of dynamic message signs, closed-circuit cameras, traffic detection devices and traffic signal synchronization, all interacting to improve traffic flow while reducing traveler delay, traffic congestion and auto emissions.

From: Joe Sammartino
Topic: 783 Message: 783

If you would like an excellent DVD copy program with decryption, then link to www.giveawayoftheday.com and grab your free copy of DVDFab's DVD COPY.

You have until 12 Midnight EST tonight to install and register this program. The registration will allow one full year of use of the DVD COPY program.

The DVD HD decrypter license is lifetime. I use these products and they are great.

Enjoy,

Joe

784. Queen Creek: Gateway Aviation Day

Yahoo group: Queen_Creek_Hams
Date: 2011-01-31 18:29:56 UTC
From: Joe Sammartino
Topic: 784 Message: 784

I hope they have the helicopter rides as in the past.....Joe

Gateway Aviation Day
Hosted by the Phoenix-Mesa Gateway Airport
Date: 3/12/2011 9:00 AM - 2:00 PM
Cost: Free
Location: Phoenix-Mesa Gateway Airport
5803 S. Sossaman Road
Mesa, Arizona 85212

Phoenix-Mesa Gateway Airport will be hosting Gateway Aviation Day on Saturday, March 12 from 9 a.m. to 2 p.m. The event, last held in November 2008, returns after two years of significant passenger service growth.

"Gateway Airport is currently the 60th busiest airport in the United States and has an annual economic impact of $685 million," said Airport Executive Director, Lynn Kusy. "In addition to offering non-stop travel to 28 destinations via discount airline Allegiant Air, there is much to see and experience. We're excited to open the Airport to the public."

The family event gives kids an opportunity to crawl around the cockpits of planes, helicopters, and municipal vehicles - and the public a glimpse of the recent development projects at the bustling airport.

Admission and parking are free. Canned food donations will be accepted at the gate, benefitting United Food Bank.

Gateway Aviation Day activities will include:
• Aircraft displays - over 30 aircraft will be on display
• Aviation exhibits
• Kids' Zone
• Food

The event's entrance is located at the Airport's park located at 5803 South Sossaman Road.

Hi Scott,

Breakfast is on our Group Calendar for every second Saturday of the month - February 12th for this month.

As to the second part of your question, folks typically respond on their participation when the calendar reminders are received.

Reminders for breakfast are automatically sent out by the Group 3 days and 1 day before the scheduled breakfast event.

Regards,

Joe, N2QOJ

Terry,

If you're headed East, you will need more than breakfast.

Attach a chuck wagon to your rig - you may need it considering recent
weather conditions and vehicles stranded on I95 for hours to days at a time.

Regards,

Joe

Yes, quite a nice collection of 'foreign' callsigns... A 9, an 8, a 0, a 6, with two 7's :-)

Glad to meet you, Bob, and see Tom and Bruce again.

Sorry Terry is out who knows where, truckin'. Also Joe was missing.

Sorry to have missed you all....

I won't bother with the details but my plan to attend was ruined by an unexpected effect from a urological procedure performed on Friday morning.

That should make you cringe, it does for me....

So far, it looks like my issues are behind me (well they were in front, sort of) and looking forward to breakfast and more activity.

My wife is no longer working weekends so I expect to be out and about on day rides across much of the region over the next year with radio, APRS, and shooting along the way. I really look forward to some excursions for some remote hamming too. hopefully, I can get some input from some of you who have done the same. Well, that's my wish list.

Again, sorry to have missed you all and hope to talk with you all soon.

Regards,

Joe, N2QOJ

802. Queen Creek: Traffic Alerts: Feb. 17-24

Yahoo group: Queen_Creek_Hams
Date: 2011-02-18 03:54:10 UTC
From: Joe Sammartino
Topic: 802 Message: 802

Traffic Alerts: Feb. 17-24
Posted Date: 2/17/2011

- Traffic Alerts Map: Feb. 17-24<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8719>

1. *Ellsworth Road: Cloud Road to Empire Boulevard*
Traffic restrictions remain in place while work to widen Ellsworth Road is completed. Check the project website at www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>for the latest information on closures and restrictions.

2. *Ocotillo and Signal Butte roads*
Traffic restrictions remain in place at the intersection. Traffic on Signal Butte Road remains shifted to the east while the contractor completes street widening operations. Restrictions began on Ocotillo Road between Signal Butte and 220th Street this week so that the contractor can widen the north half of Ocotillo Road and complete other improvements in and near the street.

Note: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement officers or flaggers who are controlling traffic.

803. up close and personal with a Black Hawk

Yahoo group: Queen_Creek_Hams
Date: 2011-02-18 18:40:10 UTC
From: Joe Sammartino
Topic: 803 Message: 803

If anyone would like the pleasure of getting up close to a Black Hawk helicopter today, you are in luck.

At about 1:30 PM today, a Black Hawk will be arriving and landing at the Cortina Elementary School on 188th Street in the Cortina Development.

I believe you will also be able to look inside and get a talk on it from the crew members. This is part of a Jog-A-Thon with Heroes event today at the school.

I hear that the ASU Cheerleader squad is supposed to be there also.

Hi Bruce,

Nice pictures....so sorry about the time mix up. I thought the helicopter would land at 1:30 PM and I just found out that it came at 9 AM.

The picture of the principal is great too....my wife is the registrar at the school and loved the photos.

Thanks,

Joe

No worries Joe. I think the departure was probably more dramatic than then landing anyway.

809. Mic Repair

Yahoo group: Queen_Creek_Hams
Date: 2011-02-19 14:08:38 UTC
From: Scott Moran
Topic: 809 Message: 809

Hello,

This is Scott KB9JTN, I have a mic that I need a cord replaced on.
I don't trust my soldering skills. I have the new cord from Kenwood
all I need is to find someone to do the soldering for me. If you could
help with this, please contact me either here or direct at
kb9jtn@....

Thanks & 73,
Scott-KB9JTN

Give me a call at 480 861 1219 this morning, and lets work out a time
you can bring it over here.
About 1 mile west or Rudy's... easy!

Jim, KF7E

811. HR-607

Yahoo group: Queen_Creek_Hams
Date: 2011-02-22 18:47:59 UTC
From: ars_k1atv
Topic: 811 Message: 811

My email to Representative King:

My name is William Munsil and I am an amateur radio operator, licensed by the FCC with call sign K1ATV (which I had to pay for).

In HR-607 you propose to auction off the 420-440 MHz portion of the radio spectrum.

Quoting the Amateur Radio Relay League:

"The inclusion of most of the Amateur 70-cm spectrum as one of the replacement bands is a major problem. The 420-440 MHz band is not Public Safety spectrum and should not be included in any spectrum swap of Public Safety allocations."

This band is also used by the US military.

There are in excess of 75 amateur television repeaters in the US and Canada, including the Amateur Television Network based in California (http://atn-tv.org/) which operates about ten HAM TV repeaters linked full time.

I have been operating amateur TV for close to 30 years now and I have no idea how much money I have spent on HAM TV equipment during those years all of which would be wasted if your proposed bill becomes law.

Here are two videos made about my operations:

http://hambrief.tv/episodes/28
http://hambrief.tv/episodes/33

Amateur radio operators are the epitome of "first responders". During the 9-11 disaster when the various public service agencies had no intercommunication it was the ham operators, with their own personal equipment which allowed that intercommunication.

I respectfully request that the 420-440 MHz portion of your bill be stricken.

I'm not an expert but I play one - on amateur TV.

William Munsil
K1ATV HAM TV
Mesa AZ
Hams should be SEEN as well as heard!

From: Joe Sammartino
Topic: 815 Message: 815

Queen Creek Traffic Alerts: Feb. 24-March 3
Posted Date: 2/24/2011
Traffic Alerts Map: Feb. 24-March
3<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8771>

1. *Ellsworth Road: Cloud Road to Empire Boulevard*
Traffic restrictions remain in place while work to widen Ellsworth Road
is completed. Check the project website at
www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>for the
latest information on closures and restrictions.

2. *Ocotillo and Signal Butte roads*
Lane restrictions remain in place through March 12 while the contractor
completes the work to widen the road.

*NOTE: Due to the nature of the work, days and times are subject to change
without prior notice. Motorists are encouraged to obey all posted signs,
traffic control devices, and directions from law enforcement officers or
flaggers who are controlling traffic.*

816. Queen Creek: Traffic restrictions at Ocotillo Road and 222nd St. from March 6-8

Yahoo group: Queen_Creek_Hams
Date: 2011-03-03 00:32:26 UTC
From: Joe Sammartino
Topic: 816 Message: 816

Traffic restrictions at Ocotillo Road and 222nd St. from March 6-8
Posted Date: 3/2/2011

The Town of Queen Creek <http://www.queencreek.org/>will be completing work on the traffic signal at the intersection of Ocotillo Road and 222nd Street (entrance to Queen Creek High School <http://www.qchs.qcusd.org/>), causing lane and turn restrictions. Beginning the afternoon of Sunday, March 6, all traffic will be shifted south and will be limited to a single lane of travel for each direction. The temporary traffic control will also necessitate the removal of the left turn lane into Queen Creek High School on Monday, March 7 and Tuesday, March 8, while allowing left turns from the westbound through lane.

Beginning at 8:30 a.m. on Monday, an off-duty deputy will be assisting with traffic control during periods of heavier traffic. On Tuesday morning, beginning at approximately 8:30 a.m., the traffic signal will be taken out of service with an off-duty deputy controlling traffic throughout the day. By Tuesday evening the signal should be back in full operation.

It is important to note that there is active construction in this same area to widen Ocotillo Road between Signal Butte Road and 220th Street. This work requires additional traffic restrictions on Ocotillo Road. Drivers are advised to use alternate routes during this time. Rittenhouse Road from Combs Road north and Signal Butte Road north of Ocotillo Road will both remain open.

Questions regarding the closure can be directed to the project hotline at 480-898-4090, or to the Town of Queen Creek's Traffic Hotline at 480-358-3132, or by e-mail to traffic@.... To keep updated on Town news and happenings, follow www.facebook.com/queencreek or www.twitter.com/TOQC_official.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Aviation Day at Phoenix Mesa Airport
Saturday March 12, 2011
9:00 am - 2:00 pm
(The next reminder for this event will be sent in 4 days, 23 hours, 57 minutes.)
Location: Phoenix-Mesa Gateway Airport

Notes:
Gateway Aviation Day
Hosted by the Phoenix-Mesa Gateway Airport
Date: 3/12/2011 9:00 AM - 2:00 PM
Cost: Free
Location: Phoenix-Mesa Gateway Airport
5803 S. Sossaman Road
Mesa, Arizona 85212
Phoenix-Mesa Gateway Airport will be hosting Gateway Aviation Day on Saturday, March 12 from 9 a.m. to 2 p.m. The event, last held in November 2008, returns after two years of significant passenger service growth.

"Gateway Airport is currently the 60th busiest airport in the United States and has an annual economic impact of $685 million," said Airport Executive Director, Lynn Kusy. "In addition to offering non-stop travel to 28 destinations via discount airline Allegiant Air, there is much to see and experience. We're excited to open the Airport to the public."

The family event gives kids an opportunity to crawl around the cockpits of planes, helicopters, and municipal vehicles - and the public a glimpse of the recent development projects at the bustling airport.

Admission and parking are free. Canned food donations will be accepted at the gate, benefitting United Food Bank.

Gateway Aviation Day activities will include:
• Aircraft displays - over 30 aircraft will be on display
- Aviation exhibits
- Kids' Zone
- Food

Queen Creek Fire Department offers weather safety class
Posted Date: 3/7/2011

The Queen Creek Fire Department<http://www.queencreek.org/Index.aspx?page=160>, in conjunction with the National Weather Service <http://www.weather.gov/>, is offering residents of all ages the opportunity to learn how to identify and report severe weather. Participants will learn about thunderstorms, cloud features associated with microbursts and tornadoes, estimating wind speeds and how local weather spotters can assist the National Weather Service issue warnings and advisories.

This free class will be offered Saturday, April 2 at 10 a.m. in the Queen Creek Library <http://www.queencreek.org/Index.aspx?page=712>, Zane Gray Conference Room located at 21802 S. Ellsworth Road. Seating is limited to 50 participants. To register, contact Jon Spezzacatena<jon.spezz@...>at 480-358-3028.

To keep updated with the Queen Creek Fire Department visit queencreek.org<http://www.queencreek.org/Index.aspx?page=160>or join us at facebook.com/qcfire <http://www.facebook.com/qcfire>.

From: Joe Sammartino
Topic: 821 Message: 821

Queen Creek is now accepting applications for Community Emergency Response Team
Posted Date: 3/9/2011

Knowing how to respond in an emergency situation can mean the difference between life and death. To teach residents to be better prepared, the Town of Queen Creek hosts Community Emergency Response Team<http://www.queencreek.org/Index.aspx?page=700>(CERT) trainings. Applications are currently being accepted for the classes beginning on March 31. Registration forms are available at Town offices or on the Town's website<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8646>.

The Queen Creek CERT program is a free, seven-week course, training individuals to prepare for and respond to emergency situations in the community. The program is provided every fall and spring through the Queen Creek Fire Department <http://www.queencreek.org/Index.aspx?page=160>, and covers aspects of disaster preparedness, including fire suppression, medical care, first-aid, and light search and rescue techniques. Participants are educated in giving critical support to first responders, providing immediate assistance to victims and organizing volunteers at a disaster site

For more information about CERT, visit www.queencreek.org or call the Queen Creek Fire Department at 480-358-3360. To keep up-to-date on Fire Department happenings, join us at www.facebook.com/qcfire.

Queen Creek Traffic Alerts: March 10-17
Posted Date: 3/10/2011
Traffic Alerts Map: March
10-17<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=8881>

1. *Ellsworth Road: Signal Butte Road to 220th Street*
Ocotillo Road will be restricted to a single lane in each direction, and all traffic will be shifted to the south side of the street while construction activities take place to complete the road widening. Off-duty deputies may be directing traffic near the entrance to Queen Creek High School during heavier travel times. Left-turn restrictions have been added in the area to aid in the flow of trafflc. All westbound school traffic on Ocotillo Road will need to enter the school at the easternmost driveway.

2. *Riggs Road: Ellsworth Road to Hawes Road*
Construction will close Riggs Road on Thursday, March 17. During the closure, access to Horseshoe Park & Equestrian Centre will be maintained from Hawes Road. Information signs will be located on Ellsworth Road and will detour traffic across Chandler Heights Road and San Tan Boulevard to Hawes Road.

3. *San Tan Boulevard: Ellsworth Road to Hawes Road*
Construction will close San Tan Boulevard on Friday, March 18. Information signs will be located on Ellsworth Road and wil detour traffic across Empire Boulevard/Hunt Highway and Chandler Heights Road to Hawes Road.

4. *Ellsworth Road: Cloud Road to Empire Boulevard*
Traffic restrictions remain in place while work to wide Ellsworth Road is completed. Check the project website at www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>for the latest information on closures and restrictions.

***Note: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement officers or flaggers who are controlling traffic.*

829. APRS on Android

Yahoo group: Queen_Creek_Hams
Date: 2011-03-26 18:53:49 UTC
From: Joe
Topic: 829 Message: 829

Folks,
For any of you out there that are using Android smartphones, a new APRS app is getting some great reviews - by me too.
U2APRS, http://aobajoke.no-ip.org/~ja7ude/japanese/U2APRS10/indexe.html <http://aobajoke.no-ip.org/~ja7ude/japanese/U2APRS10/indexe.html>
It is very good - in addition to APRS tracking, it has mapping display (including built-in Aprs.fi) and 2-way aprs messaging with text-to-speech. The tracking has more features than APRSdroid - it allows for beaconing and position reporting based on time, distance - and degree of turn. The messaging is very good.
It is not available in Android Market. It is now in our Files section.
Version 0.4.8 is the latest.
Regards,
Joe, N2QOJ

830. Queen Creek Traffic Alerts: March 31-April 7

Yahoo group: Queen_Creek_Hams
Date: 2011-03-31 20:13:47 UTC
From: Joe Sammartino
Topic: 830 Message: 830

Queen Creek Traffic Alerts: March 31-April 7
Posted Date: 3/31/2011
Traffic Alerts Map: March 31-April 7

Ocotillo Road: Signal Butte Road to 220th Street
East and westbound traffic on Ocotillo Road will be shifted (eastbound to the far south side of Ocotillo Road, and westbound to the far north side of Ocotillo Road) so that work can continue to the center of Ocotillo Road in this area. During this time, westbound left turns will remain restricted at the two driveways to Queen Creek High School. All westbound left-turn access will occur at the traffic signal at 222nd Street/Bulldog Boulevard. Left turns out of the center driveway at the high school will be restricted.

Ocotillo Road and Signal Butte Road
Work in the intersection will require flaggers and off-duty deputies to control traffic approaching the intersection beginning Monday, April 4 and continuing through Thursday, April 7. Flaggers should be in place approximately 8:30 a.m. to 4:30 p.m. daily. Drivers are advised to use alternate routes if possible during these times.

Hawes Road north of Riggs Road
Traffic will be shifted west prior to crossing the wash. This restriction will remain in place through May 15 while work continues on improvements to the wash.

Ellsworth Road: Cloud Road to Empire Boulevard
For the most up-to-date traffic restriction information regarding this project, check the project website at www.SouthEllsworthRoad.com.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

832. Queen Creek: Queen Creek Traffic Alerts: April 7-14

Yahoo group: Queen_Creek_Hams
Date: 2011-04-08 04:23:07 UTC
From: Joe Sammartino
Topic: 832 Message: 832

Queen Creek Traffic Alerts: April 7-14
Posted Date: 4/7/2011
Traffic Alerts Map: April
7-14<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9003>

1. *Ocotillo and Signal Butte roads*
Beginning Monday, April 11 through Thursday, April 14, Signal Butte Road will be closed at Ocotillo Road while crews complete work within the intersection. Road closure signs for this work will extend to the intersection of Queen Creek and Crismon roads, where local traffic will be allowed to travel east on Queen Creek Road, then south on Signal Butte Road to Appleby Road. Traffic on Ocotillo Road will not be able to access Signal Butte Road during the closure.

2. *Ellsworth Road: Cloud Road to Empire Boulevard*
For the most up-to-date traffic restriction information regarding this project, check the project website at www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>
.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement or flaggers who are controlling traffic.

Hello Conrad,

I'm glad it is working well for you. Let me know if the default "-1" APRS registration is ok for you or if you would like an assigned APRS registration that would allow you to send messages.

Of course, if you already have it, great.

Regards,

Joe, N2QOJ

We found the place I was told about, the New Mexico Grill. NE corner of Lindsay and Pecos. Not a big place, but good stuff.
Anyway, just noted in case Rudy's eveer closes, although obviously is is not in Q.C.

The Gateway airport cafe is also closed Sundays. I have to work Monday, but maybe a 0730 or 0800 breakfast would fit in. Terry, your call.

Queen Creek Traffic Alerts: April 21-28
Posted Date: 4/21/2011
Traffic Alerts Map: April
21-28<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9061>

1. *Ocotillo Road: Signal Butte Road to 220th Street*
Construction to widen parts of Ocotillo and Signal Butte roads is
ongoing. Traffic restrictions on both Ocotillo Road and Signal Butte Road
will remain in place through the end of April.

2. *Hawes Road north of Riggs Road*
Construction to install a new box culvert at this location is ongoing.
Traffic restrictions will remain in place through Sunday, May 15.

3. *Ellsworth Road: Cloud Road to Empire Boulevard*
Construction to widen Ellsworth Road is ongoing. For the most up-to-date
traffic restriction information regarding this project, check the project
website at www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>
.

*NOTE: Due to the nature of the work, days and times are subject to change
without prior notice. Motorists are encouraged to obey all posted signs,
traffic control devices and directions from law enforcement officers or
flaggers who are controlling traffic.*

854. Queen Creek: Queen Creek Traffic Alerts: May 5-12

Queen Creek Traffic Alerts: May 5-12
Posted Date: 5/5/2011
Traffic Alerts Map: May
5-12<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9135>

1. *Hawes Road and Queen Creek Road*
Work is continuing to widen a section of Hawes Road to create a left-turn lane for northbound traffic on Hawes Road. The east shoulder will remain closed until striping work is completed at the intersection.

2. *Ellsworth Road north to Rittenhouse Road*
Work to widen the west side of Ellsworth Road south of Barnes Parkway has begun. Flaggers will be present during parts of the day to control traffic while construction operations are underway.

3. *Sossaman Road - Riggs Road to Chandler Heights Road*
Work has begun in the area, which will necessitate closure of the shoulders on both sides of Sossaman Road. The contractor will be hauling material out of this area north toward the airport property and will be using Sossaman Road as a haul route.

4. *Hawes Road north of Riggs Road*
Work to construct a new crossing at the wash continues. Traffic is being shifted west around the work area.

5. *Ellsworth Road: Cloud Road to Empire Boulevard*
Construction to widen Ellsworth Road is ongoing. For the most up-to-date traffic restriction information regarding this project, check the project website at www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>
.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

857. Queen Creek: Ocotillo Road to close between Power and Sossaman roads May 16 - June 10

Yahoo group: Queen_Creek_Hams
Date: 2011-05-11 21:53:53 UTC
From: Joe Sammartino
Topic: 857 Message: 857

Ocotillo Road to close between Power and Sossaman roads May 16 - June 10
Posted Date: 5/10/2011

Road closures and traffic restrictions keep construction on schedule and improve safety for both motorists and construction crews. The following traffic restriction will affect drivers in the Queen Creek area:

Ocotillo Road between Power and Sossaman roads will be closed to through-traffic from Monday, May 16 to Friday, June 10 for installation of a gas line. Local access will be available, but other drivers are advised to use alternate routes during this time. Message boards advising the public will be placed prior to closure. As always, drivers should obey all posted speed limits as well as all directions by flaggers and law enforcement.

Questions regarding the closure can be directed to the project hotline at 480-898-4090 or by e-mail to traffic@.... To keep updated on Town news and happenings, follow www.facebook.com/queencreek or www.twitter.com/TOQC_official.

From: ScottM
Topic: 862 Message: 862

Hi to all,

I have been licensed since 1995 but decided that I would try something new (PSK-31). Anyway I went and got a SignaLink USB, Downloaded digipan 2.0 but something isn't right. Is there anyone that would be willing to help me get this up and running correctly? Or show me what I'm doing wrong. I am willing to bring my radio and everything else to your location or you could come here. QTH is out in San Tan Valley (about 6 miles south of Queen Creek)If you are willing to help please let me know.

Thanks, Scott-KB9JTN

864. Queen Creek: Traffic Alerts Map May 26 - June 2

Yahoo group: Queen_Creek_Hams
Date: 2011-05-26 20:30:53 UTC
From: Joe Sammartino
Topic: 864 Message: 864

Traffic Alerts Map May 26 - June 2
Traffic Alerts Map May 26 - June 2
Posted Date: 5/26/2011
Traffic Alerts Map May 26-June
2<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9226>

1. *Ocotillo Road: Power to Sossaman roads*
Ocotillo Road remains closed in this area while crews from Southwest
Gas install a new high pressure gas line.
The closure is anticipated to last through June 10. Access for local
traffic will be maintained from Power Road to
186th Place. Local and thru traffic will not be permitted east of
186th Place.

2. *Sossaman Road: Cloud to Queen Creek roads*
Trucks will be hauling material along Sossaman Road to just south of
Queen Creek Road beginning Thursday,
May 26, and continuing through mid-July.

3. *Ocotillo Road: 222nd Street to Signal Butte Road*
The westbound right lane will be closed between 8:30 am and 4 pm
while utility crews work on existing poles on the
north side of Ocotillo Road. The work is anticipated to last through
June 7.

4. *Sossaman Road: Cloud to Chandler Heights roads*
Drivers can expect some restrictions at the intersection of Sossaman
and Chandler Heights roads with off-duty
deputies controlling traffic. Other restrictions are possible in the
area as crews work on the wash project.
Restrictions in the area are anticipated to last through August 31.

5. *Ellsworth Road: Cloud Road to Empire Blvd.*
Construction to widen Ellsworth Road is ongoing. For the most
up-to-date traffic restriction information regarding
this project, check the project website at
www.SouthEllsworthRoad.com <http://www.southellsworthroad.com/>.

*NOTE Due to the nature of the work, days and times are subject to change
without prior notice. Motorists are encouraged to obey all posted signs,
traffic control devices, and directions from law enforcement officers or
flaggers who are controlling traffic.*

866. Queen Creek: Traffic Alerts Map June 2-9

Yahoo group: Queen_Creek_Hams
Date: 2011-06-02 15:54:35 UTC
From: Joe Sammartino
Topic: 866 Message: 866

Traffic Alerts Map June 2-9
Traffic Alerts Map June 2-9
Posted Date: 6/2/2011
Traffic Alerts Map June
2-9<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9255>

1. *Ocotillo Road - Power to Sossaman roads*
Ocotillo Road remains closed in this area while Southwest Gas crews
install a new high pressure gas line within
Ocotillo Road. Through traffic using Ocotillo Road is advised to use
the marked detour route, as only local traffic
will be allowed east of Power Road.

2. *Power and Riggs roads*
The Maricopa County Department of Transportation will be closing the
intersection beginning at 7 p.m. Friday, June 10
with plans to re-open the intersection at 5 a.m. on Monday, June 13.
The intersection will be closed so that crews
can remove and replace the existing asphalt and underlying material.

3. *Ocotillo Road: 222nd Street to Signal Butte Road*
The westbound right travel lane will be closed between 8:30 a.m. and
4 p.m. weekdays as work continues on the
north side of Ocotillo Road. The work is anticipated to last through
June 7.

4. *Sossaman Road: Cloud to Chandler Heights roads*
Work continues along Sossaman Road. Drivers can expect flaggers
controlling traffic and work on the shoulders in
this area. A truck haul will be moving material north on Sossaman
Road from the wash area over the next couple
of weeks as the project progresses.

5. *Hawes Road north of Riggs Road*
Work to construct a new bridge over the wash is continuing. All
traffic will continue to use the paved diversion
road that shifts traffic to the west around the work area.

6. *Ellsworth Road: Cloud Road to Empire Blvd.*
Construction to widen Ellsworth Road is ongoing. For the most
up-to-date traffic restriction information regarding
this project, check the project website at
www.SouthEllsworthRoad.com <http://www.southellsworthroad.com/>.

*NOTE: Due to the nature of the work, days and times are subject to change
without prior notice. Motorists are encouraged to obey all posted signs,
traffic control devices, and directions from law enforcement or flaggers who

are controlling traffic.*

867. DATV Group - Brand new

Yahoo group: Queen_Creek_Hams

Is anyone interested in moving breakfast to the Flight Deck Cafe?

They have a breakfast buffet.

Regards,

Joe

And it is a good one. We should try it, maybe alternate. I also liked The New Mexico Cafe, but smaller and not as
close.

Salud.

Jim

From: ScottM
Topic: 687 Message: 876

Hi Guys, I plan on coming just please let me know where for sure. I also sent the reminder out to a few other people in the area who are hams. Not sure if they are coming or not..... So with that being said maybe the flightdeck should be next month???? Just my opinion. Either way let me know.

Well I can be at either place. I was expecting Flight Deck, which will be a nice change. But also, Rudy's will shut down for their usual month off 'in the middle of July', I am told, so likely the August breakfast will be at Flight Deck, regardless.

Can you remember who you sent those reminders to and redirect them? If not, I guess we can remain at Rudy's this Saturday. Let Joe know so he can poet ther final-final announcement in time.

PS I never heard if you got your PSK up and running last weekend?

KF7E

I strongly agree with Jim's recommendation, Scott. Consider sending out an update announcement with the new location of Flight Deck Cafe at Phoenix Mesa Gateway Airport.

This will give you the opportunity to also ask for some confirmation. I believe our next three meetings will be at Flight Deck Cafe given Rudy's summer closing. The automated meeting reminders will be updated.

Regards,

Joe, N2QOJ

Hi Jim,
     First off let me say I'm sorry for not informing you that I did finally get the PSK-31up and running, but have since put it back in the box in the closet. Until I can figure out a way to 1 either get a better attic antenna or 2 try and hide something outside for 20 Meters only. I was making contacts just not that many. I was calling CQ for about 3 to 4 hours a day but if I was luck only 1 person would reply. Yet I could go online to a website that shows where your signal was heard by monitors and other reporting station and it would show I was all over the US. Maybe just band condtions?? I do remember who I sent the notices to but I need to let them know ASAP if it is in fact going to be at Mesa Gateway's Flightdeck.

Well I can be at either place. I was expecting Flight Deck, which will
be a nice change. But also, Rudy's will shut down for their usual month off
'in the middle of July', I am told, so likely the August breakfast will be
at Flight Deck, regardless.

Can you remember who you sent those reminders to and redirect them? If
not, I guess we can remain at Rudy's this Saturday. Let Joe know so he can
poet ther final-final announcement in time.

PS I never heard if you got your PSK up and running last weekend?

I strongly agree with Jim's recommendation, Scott. Consider sending out an update announcement with the new location of Flight Deck Cafe at Phoenix Mesa Gateway Airport.

This will give you the opportunity to also ask for some confirmation. I believe our next three meetings will be at Flight Deck Cafe given Rudy's summer closing. The automated meeting reminders will be updated.

Regards,

Joe, N2QOJ

883. Queen Creek: Traffic Alerts Map June 9-16

Yahoo group: Queen_Creek_Hams
Date: 2011-06-09 22:02:31 UTC
From: Joe Sammartino
Topic: 883 Message: 883

Traffic Alerts Map June 9-16
Traffic Alerts Map June 9-16
Posted Date: 6/9/2011
Traffic Alerts Map June
9-16<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9277>

1. *Ocotillo Road: Signal Butte to Meridian roads*
Crews will be working on the shoulder of Ocotillo Road in this segment, which will necessitate the closure of only the shoulder.

2. *Sossaman and Cloud Roads*
Crews continue to work on the wash project in this area. Flaggers will be controlling traffic to allow trucks involved in the material haul to enter Sossaman Road.

3. *Hawes Road north of Riggs Road*
Crews continue to work on the crossing at the wash. Traffic will be diverted west on a temporary road while work continues.

4. *Ellsworth Road: Cloud Road to Empire Blvd.*
The widening of Ellsworth Road continues. For the most current information regarding traffic restrictions, go to www.SouthEllsworthRoad.com<http://www.southellsworthroad.com/>
.

5. *Power Road and Riggs Road Intersection
*Beginning at 7 p.m., Friday, June 10, the Maricopa County Department of Transportation (MCDOT) contractor will temporarily close the intersection of Power Road and Riggs Road. During the temporary roadway closure, crews will remove and replace the asphalt pavement followed by the installation of new pavement markings. Please use Chandler Heights Road, San Tan Boulevard or Sossaman Road as an alternate route. The roadway is scheduled to reopen by 5 a.m., Monday, June 13. During the closure, crews will work extended hours and over the weekend to expedite construction.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

Folks,

If there is anyone in this Group that is (1) a member of the Queen Creek community and (2) is interested in supporting the Town by providing communications support in times of emergency, special events, drills, etc., then please join us this week for an introductory meeting.

Bruce Barnes, KF6EZT, of the QC Disaster Management Committee, and Fire Chief Van Summers, will be on hand to discuss the project details and how interested QC hams can assist with this effort.

Here is the meeting information:

Time: 6:30 PM
Date: Wednesday, June 22

Where: QC Employee Development Center. This building is located in Founders' Park, across from Town Hall and just south of the Fire Station. It is a small, white modular structure that is next to the skate park area. It is the larger of the two buildings buildings adjacent to the skate park. http://goo.gl/maps/ysU6

I have attached a picture of the local area and building for you.

If any of you should have any questions, please feel free to give Bruce (480.567.8422) or me a call.

Also, if your are planning to attend, please let me know as soon as possible so we have some idea of how many folks to expect. You can call me, reply on the Group, or send me a private email.

Thanks,

Joe, N2QOJ

It screws into a folding mount that is attached to a luggage rack on top of
the Suburban.

It screws into a folding mount that is attached to a luggage rack on top of the Suburban.

899. Wouxun radio

Yahoo group: Queen_Creek_Hams
Date: 2011-06-23 14:56:09 UTC
From: Bruce Barnes
Topic: 899 Message: 899

I heard from my buddy in SoCal (WB6DNX) and he is sending me a Wouxun radio to check out. Apparently we're pronouncing the name wrong, it's pronounced, “Oh Sheng”). Dick will send a speaker mic and programming cable; I asked him to send a BNC and SO-239 adapter so we can hook it up to a variety of antenna options (it comes with a female SMA antenna adapter).

Here's an article from the November QST magazine: http://www.powerwerx.com/download/WouxunQSTReview.pdf.

Dick is offering us OC RACES pricing on the radio and quantity discounts. I'm not sure what the price will be, but I will find out soon. I'll let you know when I get it.

Cheers,

MSRP of U$D 107; wow! But, that's without any goodies.

The Club is being offered a heck of a deal @ U$D 118!

I'm an Old Guy and not very familiar with the Web. It took me a couple of seconds at http://gmbmg.com/ to find some reviews of the "Oh-Sheng" radios -- on eHam.Net where I happen to have an account. See

http://www.eham.net/reviews/detail/9242

73's,

Kenn

I am having the mechanic meet me at 7AM to help me fix my exploded Jeep radiator.

Come by after to laugh/commiserate/supervise.

Jim

Terry,

I'll be there at 7:29 AM.

Good luck with the Jeep, Jim.

Regards,

Joe

911. Another Review of a Wouxun radio

Yahoo group: Queen_Creek_Hams
Date: 2011-06-25 03:43:59 UTC
From: Kenn
Topic: 911 Message: 911

(From an e-mail) ...

Kenn,

A similar radio was reviewed last November in the ARRL's QST magazine. The family of Chinese radios reviewed in QST is sold by Powerwerx in California (see http://www.powerwerx.com/wouxun-radios/). Powerwerx are the folks who sell Anderson powerpole connectors.

All Chinese HT's, so far, seem to be based on the same general transmitter, receiver and firmware design with a few updates and variations in features. The antenna on many of these radios uses an unusual sma connector (i.e. the radio case has a male sma connector). This means you need an adapter to perform the common ham practice of replacing the rubber duck with a better whip antenna (such antennas tend to also come with male sma connectors).

I recently purchased the Powerwerx dual-bander and found the radio receiver to be surprisingly sensitive, audio quality surprisingly good and audio volume surprisingly strong. Powerwerx offers an optional AA battery box for their models (similar to one offered by Yaesu for their FT-60).

If you decide to purchase a Chinese dual-bander, be sure to also get a programming cable and software, if available. The Chinese memory channel management scheme is not intuitive and can be frustrating -- you need quick fingers and good coordination to successfully complete the key presses required to enter each frequency into memory.

You will also find that, mostly out of necessity, you use the memory channels quite a lot. These radios have NO built-in, automatic repeater offset. So, each time you move between +600, -600 (repeater) and zero (simplex) offsets, the corresponding menu entry must be reset. This "feature" often makes casual keyboard or knob turning vfo frequency tuning a bit inconvenient.

The user is, therefore, is almost always forced to create a new memory channel for each repeater or simplex frequency he wishes to use. However, there are lots of memory channels to fill and the computer software is reported to make it simple, though I haven't had a chance to try it, myself, as yet. When all your favorite frequencies (and offsets) are finally stored in memory, they are easy to select and the radio becomes a lot of fun to use.

Powerwerx Wouxun models cost a little more, but ship from California, come with a U.S. warranty and support, and include free programming software.

73,

Mike W3DIF

It's my understanding from my buddy Dick Bremer (WB6DNX) that PowerWerx is owned by another friend of mine, Ken Mirabella (KM6YH) who is (at least when I was in Brea RACES) an officer in Orange County RACES. Ken's a good guy (as most hams are) and I'm sure runs a reputable shop. I can vouch for him.

I should have this radio early next week. Dick shipped it yesterday. I'll put a note out when I get it. If someone falls in love with this radio, it can be purchased, or if not, I'll send it back to Dick after we've wrung it out. If need be, he'll send us more, at the RACES pricing. I think I sent that out a few days ago.

Hard to believe this little radio is causing this much interest.

Cheers,
Bruce

913. RACES; City of Glendale Radio Club (COGRC)

Yahoo group: Queen_Creek_Hams
Date: 2011-06-26 03:26:00 UTC
From: Kenn
Topic: 913 Message: 913

I was browsing the RACES (Radio Amateur Civil Emergency Service [under U.S. FEMA] site (http://qsl.net/races/ <http://qsl.net/races/>) and found several links in AZ. One of them was the COGRC (http://www.glendaleaz.com/hamradio/ <http://www.glendaleaz.com/hamradio/>). I think it's worth a look as we might get some good ideas from the Glendale people.

I've posted this link before but it's worth posting again as the Web page lists the three Wouxun radios available in the U.S. and several accessories, including the popular AA battery pack.

http://www.powerwerx.com/wouxun-radios/
<http://www.powerwerx.com/wouxun-radios/>

Diamond, Comet and MFJ all offer HT antennas with either BNC or (male) SMA connectors. Powerwerx sells an appropriate SMA to BNC connector, which allows Wouxun HT users to replace their duckies with a higher gain BNC whip. An example of a whip with an SMA connector is the Diamond RH77CA @ http://www.universal-radio.com/catalog/scanants/2368.html
<http://www.universal-radio.com/catalog/scanants/2368.html>

Ref: http://www.eham.net/reviews/detail/9242?page=2
<http://http://www.eham.net/reviews/detail/9242?page=2>

Here's another review of the Wouxun. This one has information that other reviews did not. As far as I am concerned, there is virtually no difference between the performance of 1300 mah and 1700 mah batteries; 2700 mah AA batteries are available from China at very reasonable prices and fit right into the optional Wouxun AA battery case, WXAAB, for folks who want higher rated batteries.

WB7OR, Kenn
---\

I purchased the KG-UVD2 HT from www.wouxun.us for $107.00 (US Dealer for Wouxum radios) on Nov. 19, 2010.

I received the radio and accessories in about 4 working days.

The two batteries (1300 mah included, 1700 mah extra) were fully charged on arrival.

I down loaded the programming software from the web site and loaded my list of frequencies + tones and the radio worked great.

---- Some high lights -----

1. The radio comes with the voice announcement turned on. This is really a nice feature when driving - you don't have to look at the radio to see which channel you have selected. A very nice safety feature.

2. The FM radio (music) is really handy when there is no activity on the ham bands. As soon as a ham signal appears the FM music is muted and your incoming signal is what you hear. When the conversation is finished the FM music returns. Really nice in the mobile operation. This feature can be turned on and off with one button press.

3. I would strongly recommend the computer programming cable and software to set up your phone if you are using many channels. The keyboard menu programming works well but is best used to modify your frequency plan on the fly rather than trying to set up a lot of channels from the keyboard.

4. The phone appears to have 30 different menu functions which are covered well in the "Shortcut Operation Sheet". They were easy to bring up and change with my only problem being the ability to remembering which menu does what. This gets better with usage.

5. The user's manual seem to cover most operational items well.

6. I wanted to buy an external power supply to use for the HT in the ham shack. I did not find the current and voltage requirement in the manual so I contacted Ed Griffin W4KMA the US Wouxum Representative at New London, NC - www.wouxun.us . With in 1/2 hour I had the answer (This was on Sat night at 10 PM).

7. Using a 5/7dbi antenna on both my house and car the radio gets great signal reports. I live in Raleigh NC which has many repeaters plus linked systems and the 5 watt radio works remarkable well and allows me to go out as far as 35 miles away and still get back in to the systems with reasonable signal quality.

In summary the Wouxum KG-UVD2 radio is one of the best buys I have found. It is easy to use, good instruction manual, small and light weight, good assortment of low priced accessories, excellent support service from Ed Griffin W4KMA, and it works great.

919. Comprehensive Review of Dual Band" Wouxun KG-UVD1P

Yahoo group: Queen_Creek_Hams
Date: 2011-06-27 12:48:52 UTC
From: Kenn
Topic: 919 Message: 919

http://n9ewo.angelfire.com/kguvd1p.html
<http://n9ewo.angelfire.com/kguvd1p.html>

Many "low cost" Chinese VHF and UHF handheld transceivers can be found these days around the internet.

The quality and performance are on the bottom end of the scale for the most part.
However , the "Dual Band" Wouxun KG-UVD1P pars better for "Amateur Radio" use, but it's no where near perfect either.

I have provided an easy to understand "menu" chart on the bottom of this page.

NOTE : Also sold as the (relabeled) Midland CT790, Dynascan DB-48 , Albrecht DB-270, Team TeCom DB and Navcomm TK-890.

Two similar variants : The KG-UV2D and KG-UV3D

Queen Creek Fire Department to provide free blood pressure checks
Posted Date: 6/28/2011

On the first Wednesday of each month, Queen Creek firefighters<http://www.queencreek.org/Index.aspx?page=160>provide free blood pressure checks. Stop by the Library Recreation Annex at 21802 S. Ellsworth Road from 9-11 a.m. to receive yours. The next date for blood pressure checks is Wednesday July 6.

According to the Center for Disease Control <http://www.cdc.gov/>, high blood pressure increases your risk for heart disease and stroke, which are the first and third leading causes of death in the United States.

*High Blood Pressure Facts *

- About one out of three U.S. adults-31.3%-has high blood pressure.
- High blood pressure is a major risk factor for heart disease, stroke, congestive heart failure, and kidney disease.
- High blood pressure was listed as a primary or contributing cause of death for 326,000 Americans in 2006.
- About 70% of those with high blood pressure and took medication had their high blood pressure controlled. The control rate was 46.6% among all hypertensive patients.
- 25% of American adults have prehypertension-blood pressure numbers that are higher than normal, but not yet in the high blood pressure range. Prehypertension raises your risk for high blood pressure.

*Prevention Tips *

- Eat a healthy diet.
- Maintain a healthy weight.
- Be physically active.
- Don't smoke.
- Limit alcohol use.

High blood pressure is called the "silent killer" because many people don't realize they have it. Have yours checked today.

For the latest news and information about the Queen Creek Fire Department visit queencreek.org <http://www.queencreek.org/Index.aspx?page=160> or follow us at www.facebook.com/qcfire.

923. Repeater Propagation

Yahoo group: Queen_Creek_Hams
Date: 2011-06-28 23:04:09 UTC
From: Scott Moran
Topic: 923 Message: 923

After looking at the simulations of the repeater propagation it looks as if the San Tan Heights, Morning Sun Farms, Skyline Ranch housing additions are going to be outside of the area. I worry that this will hurt in trying to get the Hams in these areas just to the south of QC to join in to the QC Emergency Response Teams. Don't know if that is going to be a problem or not.

I have talked to guy who was thinking about joining but after seeing the coverage area he is rethinking his idea. His mind is not totally made up, but he is taking the wait and see attitude. I do know he said it wouldn't benefit him to get a HT, if it was even on the fringe. Just my thoughts.

Good points, Scott --

However, simulation pics need drilling down. Look at the attached zoom-in
to those neighborhoods and let us know if that helps. I didn't have time to
actually locate those neighborhoods on the picture so let me know if I need
to adjust the area.

There will always be RF shadows from those nearby mountain elevations. I
think the repeater would have to be East by South East of that area to
remove the RF shadows completely.

The attached simulations estimates received signal strength over 3db for the
green areas.

WOW,

I thought I would turn on my HT and monitor the 2M calling frequency just in case Bruce popped on checking out the Wouxun in simplex mode.

I have been listening for about an 50 minutes and the same couple of guys are just sitting on the frequency in QSO - actually just signing off as I type this. So much for the calling frequency.

Maybe I'm old school and not plugged into the Valley yet. Is this the way people handle the 2M calling frequency out here?

Regards,

Joe, N2QOJ

No. A few of the old bastards like me still politely call people like that and remind them that it is not called the National Ratchet Jaw Frequency (or more diplomatic terminology), and ask them to QSY.

In case anyone forgot, 146.52 (or, "520") is the "National Simplex
Calling Frequency" on 2 meters, according to the ARRL bandplan.

http://146520.com/ <http://146520.com/> (2M emergency antenna)

On UHF, 446.000 is the accepted calling frequency on 70cm.

WB7OSR, Kenn

I'd have to agree, Jon.

According to what I copied, they sounded like decent guys. It worries me that they probably don't have a clue about the intent of the calling frequency and proper procedures to use it.

When I got back into ham radio in 1991 after a long hiatus (since 1979 and only worked HF), I must have listened to the local 2 meter repeaters and simplex for about 3 weeks before I hit the PTT.

I don't think people realize that listening for a while might be productive.

I'm with ya Joe.

Before I became a ham, I had listened to 2 meters on police scanner for
months. I did somewhat the same thing before I ever TX on HF.
Everyone on 2M should know that .52 is calling freq. When I drove OTR, if I
seen a ham plate with a 2M antenna, I could almost everytime, talk to them
on .52 as they were monitoring it.

In the 'good old days', one could not be a Novice forever, but had to upgrade in 1 or 2 years before the license expired. Also, there was a requirement for Amateur Extra that stipulated being a ham for 2 years (Conditional, Technician, General, or Advanced). The purpose was to try to 'season' the operator's skill set before giving him full privileges.

I daily hear practices on the radio that lead me to believe this would be an excellent idea to reimpose.

Jim,

That would ready be a game changer.

Unfortunately, focus has shifted away from skill set so I don't think we will ever see that condition applied again.

936. Antenna question

Yahoo group: Queen_Creek_Hams
Date: 2011-06-30 04:28:51 UTC
From: Bruce Barnes
Topic: 936 Message: 936
Attachments: 1 described; binary payloads are missing from this source WARC

Hi guys,

I need your thoughts on mounting an antenna.

The town's plan calls for purchasing 440 radios for installation at all the designated shelters in town. That will be the LDS churches and some of the schools.

I was at one of the church buildings this evening and talked with the facilities management guy. He's cooperating nicely and mentioned an unused mast high in the roof and the possibility of installing the antenna in the building's attic. Another option is in the steeple, but it's made of aluminum and I don't think that's a good option.

Turns out the mast is at the wrong end of the building. We'd need to run a couple hundred feet of coax to terminate it in the room we wanted to use for radios. Is that too far to consider? Also, there is a single mast and we'll need to mount a VHF and UHF antenna - any way to do that on one mast?

Another option is to put up antennas in the attic. I'm told there's probably 8 feet of space up there. The roof tiles are concrete and about 1 inch thick. They don't seem to be solidly 1 inch, but to have recessed areas with ridges for lighter weight while retaining strength. I've attached a photo.

Do you think putting antennas in the attic will be effective? Will UHF and VHF penetrate the concrete or will that kill the signal?

Thanks guys,
Cheers - Bruce

P.S. Who wants the Chinese radio first? I'm ready to pass it around.

Ni Hao ma:

Maybe we should have breakfast Saturday and all look at the radio?

As for the antenna/coax problem:

1) inside an aluminum steeple is not going to work.

2) 200 feet of even low loss coax such as Belden 9913 has a
lot of loss. at 450 MHz, Belden 9813F (with connectors)
will have no less than 7 dB; hardlinf like LDF4-50 will have
about 3 dB but costs a lot more.

3) The attentuation causes by the tiles and any metal flashing
is hard to estimate, but if just stone, might have about
2-4. Maybe more.

4) Someone mentioned a portable mast installation, perhaps that
would be easier to locate near the radio room? Might involve
wall penetration, but much shorter coax run, and as long as
the mast put the antenna a few feet higher than the main roof,
would no doubt give better performance that anything shielded
behind stons or aluminum.

Off to work now.

Jim

938. Re: [Queen_Creek_Hams] Antenna question

Yahoo group: Queen_Creek_Hams
Date: 2011-06-30 15:30:18 UTC
From: Scott Moran
Topic: 936 Message: 938

Hi Guys,

Well here is my thoughts and questions.
1) Is the town purchasing just 440 radios or are they buying dual band for all the shelters?
2) As for antennas that would depend on the answer to question number 1.
3) Has a decision been made as to what Antenna is going to be used for the repeater?
If not then may I suggest they look into these Companies, Comet, Cushcraft, and Diamond. Unless someone know of any better ideas.

Staying on the subject of antennas. I have a home brew 2 meter dipole in my attic I am able to hit quite a few repeaters in the area. But with that being said, remember that is 2 meters,
and 440 isn't as good as far as distance is concerned in my opinion.... Some others might agree
and other may not, but in my experience 440 doesn't seem to reach out as far as 2 meters. As it
has been stated before, spend the money on a good antenna, and I'm sure others will agree to that.

If they buy dual band antennas for the shelters, that solves the problem of mounting more than one
antenna on the same mast. Also the question on the run of coax I'm sure there will
be losses in that
length, how many dbs, it is better asked of someone more technical than ME.

I personally have used both Cushcraft (ARX-2B Ringo Ranger for 2 meter FM) and I currently have a Comet GP-15 (2m, 440 and 6 meter vertical). I have had good reports with both antennas.
The Radio Club that I belonged to back in Indiana has a 440 Repeater and they were using a Cushcraft
AR-450 because of cost, but because of storm damage to that antenna, they have changed to the
Cushcraft ARX-450B (theARX-450B has a gain of 7db, compared to the AR-450 which only had 3db)
which seems to give them better coverage under adverse conditions. As I've said before just my thoughts.

Gracias amigo,

I'll suggest that Joe call a breakfast meeting to look at the radio. I'm happy to let anyone take it home though, we are not in a hurry to return it.

As for the antenna, I came to the same conclusion (using Occam's razor). I'm going to see if we can put an outlet through the exterior wall.

You want me to bring this radio over for in dept eval? I'd also like to bring my Freq counter by some time so you can tell me what all it does...

Cheers,
Bruce

I'm leaning toward pushing for a connection box in the exterior wall with 2
BNC connectors. We'll home brew some push up antenna masts for UHF and VHF.
UHF shelter radio will be MaxTrac, VHF will be whatever HT the operator in
the shelter brings. No money in the budget for VHF or dual banders at the
shelters. We'll need to have a nice supply of antenna adapters
to accommodate various antenna mounts.

Traffic Alerts Map June 30-July 7
Traffic Alerts Map June 30-July 7
Posted Date: 6/30/2011
Traffic Alerts Map June 30-July
7<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9400>

1. *Ellsworth Road north of Rittenhouse Road*
The west shoulder remains closed as crews work on improvements at the Queen Creek School District Transportation Building.

2. *Sossaman Road: North of Riggs Road to Cloud Road*
Work continues on the drainage project north of Riggs Road to Cloud Road. Trucks will continue to haul material in this area through Friday, July 15.

3. *Victoria Lane: Ellsworth Loop to Ellsworth roads*
Victoria Lane will be closed on Friday, July 8 from 4 a.m. to 4 p.m. while crews complete paving operations. Ocotillo and Maya roads may be used as alternate routes.

NOTE: *Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement or flaggers who are controlling traffic.*

Appears the city has a vast idea with a half vast budget.

This is not a ham application it needs to have commercial quality to last. The Comet, Cushcraft, and Diamond are ham antennas designed to be replaced every few years and the ARRL won't publish db ratings in any of the advertisements or tests of antennas because they are totally unreliable. Usually the ratings are based on the best theoretical calculation they can find. They aren't field tested. DB products makes some good antennas as well as Cell-Wave (formerly Phelps Dodge), and Austin. Names who hams seldom hear because they don't court the amateur market.

I use a Phelps Dodge PD-455 on the repeater and it has performed to spec for 25 Years. If you want advice from someone who has the experience you need, I would contact WB7TUJ. He maintains several amateur repeaters in the valley as well as the commercial sites.

As for coax, hams rarely experience long feed lines and don't notice that even 1/2" hardline will have at loss of at least 4db for 200 feet and RG-8 will be 12 db! Can you say good by signal?
All of the radios in the Oakland County Michigan Hospitals, EOC, Etc. are dual band VHF/UHF with cross band repeat which I would guess the the city has never heard of even though it's an enhancement used here. All of the radios are in locked boxes with keys held by the hams. Every month at one of the regular weekly nets a ham opens the box and checks into he net. The use of locked boxes was learned over years of experience with amateur radio systems in non-amateur shacks

Not having 144.39 eliminates APRS which is gaining ground here in the NOAA Skywarn nets. Looks like the general ham comunity will need to cover for the inadequacy of the QC system which is nothing more than glorified GMRS.

Remember that the 1st class radio technician is not licensed to work on a amateur transmitter without an Amateur license (check the rules.)

Thank you Tom, for your your observations.

But I think we are in a good position because we have official support and funding for a nacient group, whereas
many cases established groups can get neither.

We like to think positive.

You don't think there are some of us that do have both the Commercial and Amateur paperwork?

Stay safe, you are closer to all the bad storms so far. But remember last Ocrober Arizona had
one day with a record 7 tornados. So....

" Be Prepared"- Lord Baden-Powell (pretty good words, especially for a non-ham!)

945. Chinese radio update

Yahoo group: Queen_Creek_Hams
Date: 2011-07-02 17:59:39 UTC
From: Joe Sammartino
Topic: 945 Message: 945

Hello folks,

I got my grubby Western hands on this piece of Occidental communications gear a couple of days ago.

I'll give you my thoughts by starting with my one word summary - VALUE.

It is an absolute value of function, features, and fit. Maybe we all have been "programmed" for far too long that a good dual band handheld has to be $300 plus and come with a big three badge - Kenwood, Icom, or Yaesu.

Well, I learned a long time ago that there are disruptive product offerings out there. Because of my longtime association with 220 MHz, I became aware of Alinco. They too provide exceptional value in both handheld and mobile form factors.

It was just a matter of time before these Chinese manufacturers attacked the job-site and LMR market with their offerings. With a little h/w programming tweak by their designers - BINGO - Amateur Radio handhelds are born, benefiting from established models and extensive offerings of accessories.

Does it compare favorably with my tri-band Kenwood TH-F6A - yes. Is it meant to be a 100% match, absolutely not. But when you compare with a standard run-of-the-mill dual bander, the Wouxun KG-UV3D is a stand-out. This specific model is offered by Powerwerx.

People focus on price for these radios and one can understand that - it is the kind of positive sticker shock that we don't get to experience very often. But that focus on price alone is not really fair. The Wouxun has all the features you need in a handheld - VFO mode, Memory mode, dual receivers, both CTCSS and DPL/DCS, DTMF, 128 memories, voice prompting, battery voltage indicator, progammability (keypad, computer, and clone cable), and lots more.

Here is the full list:

- Dual band monitor (VHF/UHF, VHF/VHF, UHF/UHF)
- Dual alpha numeric, backlit display with channel name edit
- Selectable high/low power settings (VHF: 5W high/1W low) (UHF: 4W high/1W low)
- Includes extended life 1700 mAh high capacity li-ion battery as standard
- Includes intelligent desktop 3-4 hour rapid charger
- Loud speaker audio output (500 mW)
- Bright flashlight illumination function
- Meets IP55 waterproof rating
- English female voice prompts enable non-sighted operation (can be

turned off)
- 128 memory channels (shared)
- VOX Function
- Digital FM radio (76-108MHz) with automatic tuning and storing, radio
frequency display, 18 FM memories in 2 banks
- Wide/narrow bandwidth selection (25 or 12.5 kHz)
- Power on display: show battery voltage, 6-character customizable
welcome message, or display test

- Windows PC programmable, free software available for download. Optional
low cost cable (SKU:
WXUSB<https://www.powerwerx.com/wouxun-radios/wouxun-2-pin-usb-programming-cable.html>
or
WXSER<https://www.powerwerx.com/wouxun-radios/wouxun-2-pin-serial-programming-cable.html>)
required.
- Radio to radio cloning with optional cable (SKU:
WXCLN<https://www.powerwerx.com/wouxun-radios/wouxun-cloning-cable-2-pin-dual-pin.html>
)
- Same channel: VHF TX & UHF RX or UHF TX & VHF RX available
- 105 groups DCS/50 groups CTCSS
- DTMF encoding (includes ABCD tones, continuous with button press
duration)
- CTCSS encode/Decode (no decode delay)
- Stopwatch function
- SOS function
- Low-voltage voice prompt
- Busy channel lockout
- Selectable transmit over timer (from 15 to 600 seconds)
- Selectable step sizes of 5, 6.25, 10, 12.5, 25, 50 or 100 kHz
- Multiple scan modes including priority scan
- Keypad lock (auto or manual)
- Programmable by computer or keypad
- High contrast white backlit keypad. All keys are backlit (except A/B &
TDR)

Here's the list of what you get:

- Dual band radio
- Dual band antenna
- Extended life 1700 mAh high capacity li-ion battery pack (about 13
hours operating time)
- Intelligent desktop 3-4 hour rapid charger
- Desktop charger AC power cord
- Belt clip
- Wrist strap
- English user manual (Also
downloadable<https://www.powerwerx.com/download/KG-UV3D-UserManual.pdf>
)
- Powerwerx quick start reference sheet (Free
Download<https://www.powerwerx.com/download/PowerwerxQuickStartReferenceSheet.pdf>
)

- Programming software (Free Download<https://www.powerwerx.com/download/SetupKGUV3D.exe>)

It has a built-in LED flashlight that, at first, I thought was kind of a novelty. Then I thought back on my 25-30 years of radio activities....hmmm...that little feature could make a difference under the right conditions. I felt the same about the built-in FM radio coverage - useful.

Audio output on receive is outstanding - just the right amount of level and very good tone and frequency response. Transmitted audio is very good - as good or better than any of the big three and on par with Alinco handhelds which are well known to provide exceptionally good transmitted audio.

My limited experimentation can't speak to selectivity and deeper characteristics but that was not my intent. I really wanted to operate this device as an appliance and from a new-to-ham radio perspective. The manual is an easy read! Shocking, isn't it, from China? I think the Powerwerx or some other stateside folks have something to do with that.

I think anyone would who understands the features to begin with, reads the manual, and then practices with the radio, would not have any trouble at all in becoming proficient within a day or so.

I got the radio with several basic frequencies loaded. I will be putting in a bunch of local 2 Meter and 440 frequencies for the next testers to try out for some real radio checks.

I don't have to remind anyone that this review is my opinion, do I? Who else's opinion would it be?

It's not expert testimony and it is not biased by some bad Chinese food I ate in Detroit in in 1978 so don't expect me to entertain any back and forth debate.

Regards,

Joe, N2QOJ

From: Kenn
Topic: 945 Message: 946

Thanks, Joe.

I don't know if you had the time to read some of the links I posted but there have been a lot of reviews of the UVD1P, UV2D & UV3D Wouxuns; virtually all of them are very positive. I've tried to note the few minor "weaknesses" that the radio has so our reviewers are aware of them before they discover them themselves.

I thinks it's a perfect selection for our purposes. It's too bad it was made in China and comes with that SMA connector...

There are lots of videos on YouTube showing the Wouxuns. Here's a Brit with a UV2D lovin' his "WOXUN" (gutta love those Brits).

http://www.youtube.com/watch?v=loijFRxboJ0
<http://www.youtube.com/watch?v=loijFRxboJ0>

There are even features for the hackers ... I understand the radios can easily be unlocked by uploading modified firmware .

I can see that we're going to have a lot of FUN with these radios!

Regds,

Kenn

Topic: 945 Message: 947

Hi Kenn,

I've read and watched most anything to do with Wouxun by now. I've known about these radios for a long time.

I researched sourcing my own 220 HH and mobile products from China a few years ago so I became familiar with these manufacturers.

Out of band, or the infamous "MARS" excuse, is very easy to do with the radio. Just a simple execution of dedicated code.

Who wants the radio next?

Thanks,

Joe, N2QOJ

No, Terry, nice try....

I can't bring it to you. I'm not allowed to leave the state.

Besides, an American truck driver with a Chinese radio is like Stevie Wonder with new binoculars - it won't stand up under questioning.

Regards,

Joe, N2QOJ

No, Terry, nice try....

I can't bring it to you. I'm not allowed to leave the state.

Besides, an American truck driver with a Chinese radio is like Stevie Wonder
with new binoculars - it won't stand up under questioning.

Regards,

Joe, N2QOJ

952. some additional frequencies for the Wouxun

Yahoo group: Queen_Creek_Hams
Date: 2011-07-02 22:20:16 UTC
From: Joe Sammartino
Topic: 952 Message: 952

Folks,

I've programmed a few more frequencies into the Wouxun dual bander.

I did find out a few interesting things:

- the dual jacks of the Wouxun is the same as the Kenwood TH-F6A. So speaker/mics are interchangeable.
- the USB programming cable that is made for the Wouxun works fine for the Kenwood
- the serial port programming cable that I have for my Kenwood TH-F6A works just fine for the Wouxun.

I'll list all contents here. *Let me know if you want anything else in there.*

#	Name	RX Freq	TX Freq	Decode	Encode	TX Pwr	Scan	TX Dev	Busy Lck

953. What do you guys think about a member from Johnson Ranch ?

Yahoo group: Queen_Creek_Hams
Date: 2011-07-03 00:49:38 UTC
From: Conrad Sheldon
Topic: 953 Message: 953

Good Afternoon All ;

I have been following the email reflector for some time. I would like to become an active part of the group, but what I was wondering about is whether you all would consider someone that resides in Johnson Ranch, part of what is now called San Tan Valley within you area?

I am also thinking about going to your breakfast, which I believe will be next Saturday.

Thanks and 73
Conrad K1EC

Hi Conrad,

That sounds great to me. We have several members from your neck of the woods.

I think the Queen Creek ham community extends beyond the Town limits in spirit.

I look forward to meeting you in person.

Regards,

Joe, N2QOJ

SOunds great, although I am not sure if we meet at Rudys of the FLight
Deck
(At Gateway airport). These breakfasts are open to any ham that can put up
with us... We have a STV member already, come meet him.

Jim, KF7E

956. One Page Product Reference for Wouxun KG-UV3D

Yahoo group: Queen_Creek_Hams
Date: 2011-07-03 17:26:29 UTC
From: Joe Sammartino
Topic: 956 Message: 956
Attachments: 1 described; binary payloads are missing from this source WARC

Please find attached a one page PDF that describes the Wouxun dual bander and all available accessories.

I thought it would be convenient to have all the information on one page.

Regards,

Joe, N2QOJ

Hi, Conrad.

Welcome to the Queen Creek Radio Club. Since Johnson Ranch and San Tan Valley are still officially part of Queen Creek, and since our bylaws don't define the boundaries of the Club anyway, I believe you are certainly eligible to join the Club. The final decision will have to come from the Membership Committee which should convene at the next Breakfast which Joe Sammartino should announce PSN (Pretty Soon Now).

73s,

Kenn, WB7OSR

From: Joe Sammartino
Topic: 962 Message: 962

Traffic Alerts Map July 14-21
Traffic Alerts Map July 14-21
Posted Date: 7/14/2011
Traffic Alerts Map July
14-21<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9440>

1. *Ellsworth Road - Barnes Parkway to Rittenhouse Road*
Work continues on the widening of Ellsworth Road in front of the new school transportation builidng on north Ellsworth Road. Crews will be starting the street improvements, which will require that all traffic on Ellsworth Road in this area be shifted to the east. Flaggers and/or off-duty deputies may be controlling traffic during work hours.

2. *Sossaman Road north of Chandler Heights Road
*Crews will be working on both the east and west shoulders of Sossaman Road in this area. Traffic Restrictions are not anticipated at this time.

3a and 3 b. *Sossaman Road north of Riggs Road to Cloud Road*
Construction operations remain ongoing for the wash project with an active material haul from the site to Sossaman Road, north of Queen Creek Road. Flaggers will be controlling traffic at two locations on Sossaman Road: north of Riggs Road and north of Queen Creek Road, both for northbound traffic.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement officers or flaggers who are controlling traffic.

963. 440 base antenna needed for testing

Yahoo group: Queen_Creek_Hams
Date: 2011-07-16 16:26:50 UTC
From: Joe Sammartino
Topic: 963 Message: 963

Folks,

We are looking for a 440 base antenna - with a vertical height less than 6 feet - that we can use to test signal strength from the first Church location, in our Town project, to outlying areas for HT and mobile operation. A dual band 2m/440 is fine also as long as the vertical height meets our needs.

We would only need it for about 2 or 3 hours next Saturday.

If you have such an antenna available, please let me know asap.

Thanks,

Joe, N2QOJ

Hi Joe ;

Sorry I couldnt make it to last Breakfast ... Something last minute came up
that I had to take care of.

I was wondering if you could let me know when you are doing a test, so that
I can help. I live in Johnson Ranch, so that should be a good test.

Thanks
Conrad K1EC

Hi Conrad,

Thanks for the offer. We'll be doing some testing next Saturday. I'll announce the frequencies and estimated times in advance.

Conrad has a great idea. Anyone on the Group that would like to help us out with some signal reports, please let us know.

Be sure check your email as well since I'll be updating our frequency use in real time via the YAHOO Group.

Regards to all,

Joe, N2QOJ

967. Fwd: [QCComTeam] Signal testing from church building - this Saturday

Yahoo group: Queen_Creek_Hams
Date: 2011-07-22 06:54:44 UTC
From: Joe Sammartino
Topic: 967 Message: 967

********** Hey Folks, this is a QST from Bruce, KF6EZT **********

Greetings,

This Saturday morning at 10:00 a couple of us will be testing propagation strength from one of the church buildings in town. We have access to the building attic and permission to mount antennas there on a permanent basis. We want to test how the building's concrete roof tiles will affect our transmission signal. To do this we'll mount antennas (440 and 2M) temporarily in the attic and remove them after the test.

We'll attempt to hit one or two 440 repeaters at some distance away. We'll also test 2M simplex propagation by communicating from the church to an HT in the field (rubber ducky antenna). We'll move the HT farther and farther from the building in order to determine what the outer range is for the HT to be heard by the church radio.

We'll probably try the 440 repeater test after installing the antenna and setting up the radio. If we start at 10:00 at the building, we'll probably be on the air with the 440 repeater test around 10:30 or so. After hitting a few repeaters, we'll start the 2M simplex testing. I'm guessing that will start around 10:45-ish. If you'd like to participate, you'll find us at 146.46 and if that frequency is in use then our secondary frequency will be 145.33. We'd love to have anyone interested give us a signal report and more importantly we'd be quite interested in determining how well we can hear you on a base, mobile, or more importantly your HT. Most of the new recruits we get will probably be using a new HT with original equipment rubber ducky antenna. That's what we're trying to simulate in the test. If anyone is willing to get in the car and drive out away from the church building (right next to the Queen Creek high school on Ocotillo), that will help establish outer perimeter of communications.

It's really a very simple test. No meters, no computers, just listening to see how well we can hear each other.

Thanks all,
Bruce
KF6EZT

968. today's testing

Yahoo group: Queen_Creek_Hams
Date: 2011-07-23 23:29:47 UTC
From: Joe Sammartino
Topic: 968 Message: 968

Thank you all for your participation in the vhf/uhf signal testing at the church site today:

KF6EZT, KF6RSM, KF7E, KB9JTN, and WB7OSR

I think we learned what we needed to know concerning transmitting and receiving characteristics from that site, and specifically, in the attic.

I'm sure we'll be discussing today's events in more detail in the coming days.

Thanks again for the turnout and great work.

Regards,

Joe, N2QOJ

From: Kenn Burnell
Topic: 970 Message: 970

When we were testing the 440/2M equipment today, we used the EVRP group's repeater on 449.825, located at the Mercy Gilbert Hospital, and received assistance from KC7CPJ, Casey Baldwin. Casey suggested we consider becoming members of the Group, based in Gilbert, so we can be aware of what they do to support e-Comms at the Chandler Regional Mercy Gilbert Hospitals. They also interface with ARES (http://www.arrl.org/ares), MCECG (http://mcecg.net/), and CERT (http://www.citizencorps.gov/cert/).

The EVRP URL is http://eastvalleyrg.ning.com/

Traffic Alerts Map Aug. 4-11
Posted Date: 8/4/2011

- Traffic Alerts Map Aug.
4-11<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9522>

1. *Sossaman and Chandler Heights roads*
Crews will begin work to install a new storm drain across Chandler Heights Road on the west side of Sossaman Road. Drivers can expect flaggers and off-duty deputies to be controlling traffic during working hours. When crews are not actively working at the intersection, the traffic signal will remain in *all red flash* and portable stop signs will be installed. The intersection will remain an all-way stop until the work has been completed at the intersection, which is expeted to last through Thursday, August 18.

1a. *Sossaman Road between Chandler Heights Road and just north of Queen Creek Road
*Trucks will be hauling material out of the area north on Sossaman Road to just north of Queen Creek Road. Drivers can expect to encounter flaggers, as well as street sweepers and large equipment in these areas while work continues.

NOTE:
DUE TO THE NATURE OF THE WORK, DAYS AND TIMES ARE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE. MOTORISTS ARE ENCOURAGED TO OBEY ALL POSTED SIGNS, TRAFFIC CONTROL DEVICES, AND DIRECTIONS FROM LAW ENFORCEMENT OR FLAGGERS WHO ARE CONTROLLING TRAFFIC.

Town offers multiple ways to watch Town Council meetings
Posted Date: 8/8/2011

The Town of Queen Creek is now offering residents and business owners multiple ways to view Town Council meetings<http://www.queencreek.org/Index.aspx?page=536>. Broadcast live on the Town's website beginning at 7 p.m. on the first and third Wednesdays of each month, the meetings may also now be viewed live and in archived form from smartphones and Facebook.<http://www.facebook.com/queencreek?ref=ts#!/queencreek?sk=app_196506863720166>

"Giving residents an opportunity to watch the discussion that takes place is an important part of knowing how decisions get made," said Queen Creek Mayor Gail Barney <http://www.queencreek.org/index.aspx?page=38>. "The issues facing our community deserve to be examined and discussed to make sure the right decisions are made. By increasing the ease of accessing this information, we're opening the doors to resident participation in the process and encouraging everyone to speak up and let their thoughts be known."

To view the Town Council <http://www.queencreek.org/Index.aspx?page=36>discussions and decisions, residents may log on to queencreek.org<http://www.queencreek.org/Index.aspx?page=536>to view any meeting from June 2008 to the present, including a live broadcast of meetings as they take place.

The Town is also using the broadcast website, www.ustream.tv to make it easy for residents to watch Town Council meetings on iPhone, Android and WindowsMobile smartphones, as well as the iPad and Android tablet devices. An embedded USTREAM video-feed is easily accessible from the Town's Facebook page, www.facebook.com/queencreek.

To keep up-to-date on Town events and happenings, join the Town of Queen Creek's official Facebook page at www.facebook.com/queencreek.

984. Queen Creek: NOTICE: Traffic Signal Changes at Chandler Heights and Sossaman roads intersection

Yahoo group: Queen_Creek_Hams
Date: 2011-08-08 20:41:27 UTC
From: Joe Sammartino
Topic: 984 Message: 984

NOTICE: Traffic Signal Changes at Chandler Heights and Sossaman roads intersection
Posted Date: 8/8/2011

Traffic Signal Changes at Chandler Heights and Sossaman roads intersection

Starting Thursday, Aug. 4, work on the Cloud Road Basin - Sossaman Road Drainage Project necessitates setting the traffic signal at the Sossaman and Chandler Heights intersection to *flashing red mode*. During construction work hours, an off-duty officer and flaggers will be on-site to assist in managing traffic; however, during off-work hours this intersection should be treated as a four-way stop. The traffic signals will revert to normal operation once the new pavement in that area is installed, tentatively scheduled for Thursday, Aug. 18.

Beginning Friday, Aug. 5, for approximately two to three work days, installation of the storm drain pipe will take place across Chandler Heights Road, on the west side of Sossaman Road. Work will be covered with steel plates during the evening hours and also on the weekend. The intersection will NOT be closed while construction operations are taking place, but flaggers and off-duty officers will direct traffic one direction at a time during working hours. In addition, the contractor will excavate, iinstall and backfill the first storm drain pipe, and then complete this same process for the second storm draine pipe, essentially crossing Chandler Heights Road on the west side of the intersection twice. Repaving is tentatively scheduled to take place by Wednesday, Aug. 17.

Please be prepared for traffic barricades and construction activity at this intersection. Thank you for your continued patience during this construction. Should you have questions or comments regarding this project, please visit www.SossamanRoadDrainage.com<http://www.sossamanroaddrainage.com/>or call
480-898-4100.

The Cloud Road Basin - Sossaman Road Drainage Project includes excavation of a detention basin south of Cloud Road on the east side of Sossaman Road, and installation of two 48" storm drain pipes on the west side of Sossaman Road from Cloud Road to the Sonoqui Wash (north of Chandler Heights Road). Contractor crews have begun installing storm drain pipe, beginning at the Sonoqui Wash, and moving in a southerly direction.

Traffic information is available on the Town of Queen Creek's Traffic Hotline at 480-358-3132 or by e-mail to traffic@.... To keep updated on Town news and happenings, follow www.facebook.com/queencreek or www.twitter.com/TOQC_official.

Time for another EVRG net.

We are going to try last week's topic again. Last week we only had 3 check ins so I passed on using the topic " Why do HAMs hold nets". I would like to have 5 or more check ins before I run any topic during the net. I think this topic has some really good info that should be of interest to the group. I will run the program tonight because I need a first run somewhere before I present this to the Gilbert CERT group on the 17th. If you have time stop by the net and join in.

I need to put up an Antenna! When we moved from Sossamon and Chandler Heights over to east-of-Ellsworth, I lost a lot of Signal Strength on my mobile antennas. Now I must get something up on the house! These cottin-pickin roof overhangs and tile roofs make antenna setup a real challenge; I think I found a way oround the HOA restrictions so I won't worry about those ...

When you come up with an attachment to steady your mast at the eaves, let me know. That's all that's keeping me from installing an antenna along the house in the back yard.

I am not sure it has not been already mentioned, but the Ventenna was designed for just such HOA problems.

Of course, it requires the liberal application of dollars.

Doug Pelley is coming by Wednesday afternoon. I'm going to have him take a look and see what he comes up with.

I sat through the net last night, a little over an hour. Nice bunch of guys.

Cheers,
Bruce

Kenn sent me a link last week to a supplier of antenna mounting supplies.

Take a look here for some ideas regarding eaves support:

http://www.solidsignal.com/cview.asp?mc=03&d=over-the-air-tv-antennas-supplies&m=&c=Mounting%20Supplies&page=2

994. Re: [Queen_Creek_Hams] APRS tutorial video

Yahoo group: Queen_Creek_Hams
Date: 2011-08-09 19:30:45 UTC
From: Bruce Barnes
Topic: 980 Message: 994

Thanks for the link Joe. It's a nice introductory.

I have a couple of questions for you and APRS.

1 - You demonstrated how to track multiple stations. I hadn't thought about that. Is there a way to store a list of call signs which can be loaded as needed? For example, we store a list of all the hams in the Queen Creek Emergency Communications Team and then in a drill or activation, load that file so we can quickly display everyone on the team.

2 - I didn't know why you had me add the -9 to my call sign. I figured that out. Sometimes I'd like to be KF6EZT-4 when I'm on the bike. Do I need to set up a separate account for that or is there a way to switch from one designation to another?

3 - Looks like there are a few HT's with APRS and GPS. The only two I spotted were the Yaesu VX-8R and Kenwood TH-D72A . I suspect there are others. To make APRS work for us in the field, we'll either need smart phones, APRS/GPS HT's or add-on gadgets. Not sure how convenient it will be to connect HT's with GPS and APRS gadgets. Am I thinking right on this?

4 - When I start up APRS on my 'Droid, it comes up in "manual" mode (lower left corner). I have assumed this should be switched to "Auto" mode. Is that right? If so, is there a configuration switch to make that happen automatically?

Thanks,
Bruce

The vents on my TILED room are low down from the peek. I am not keen on the idea of "walking" on that roof.

What I was thinking of was a pole, maybe 5' long, held on a ("standard") two-bracket perpendicular mount with 8"standoffs to clear the roof overhang.

As for the HOA, the FCC said in it's rules, that an HOA can't regulate a TV antenna that is put up to receive Long Distance Stations. Heh, heh!! Now all I have to do is find out where I put those regs, find the proper section and make a copy for the HOA's Architectural Review Committee!

This can be done only if you are running APRS software on your computer -
not the web service from APRS.fi. I can demo this for you on one of my
machines.

No, you can just set the call sign suffix to -4 and change the "Station
Symbol" to "/b"

If you go the HT route, it has to be 100% self-contained or it becomes a
night-mare. But this is big bugs. There are dedicated APRS trackers just
for this purpose: http://www.byonics.com/microtrak/

Not cheap, but perfect for the job.

No setting for startup - but this is not for tracking, this is just for the
"beacon" function. The app will report position based on distance traveled
and/or direction change automatically.

I am very biased toward UI-View 32. The author of the program died and forbid the source code to be released.

http://www.ui-view.org/

But it is feature rich and rock solid.

Regards,

Joe

999. Bit of trivia

Yahoo group: Queen_Creek_Hams
Date: 2011-08-09 20:51:43 UTC
From: Bruce Barnes
Topic: 999 Message: 999

From the pages of the ARRL website.

The traditional expression "73" goes right back to the beginning of the landline telegraph days. It is found in some of the earliest editions of the numerical codes, each with a different definition, but each with the same idea in mind--it indicated that the end, or signature, was coming up. But there are no data to prove that any of these were used.

The first authentic use of 73 is in the publication The National Telegraph Review and Operators' Guide, first published in April 1857. At that time, 73 meant "My love to you!" Succeeding issues of this publication continued to use this definition of the term. Curiously enough, some of the other numerals then used have the same definition now that they had then, but within a short time, the use of 73 began to change.

In the National Telegraph Convention, the numeral was changed from the Valentine-type sentiment to a vague sign of fraternalism. Here, 73 was a greeting, a friendly "word" between operators and it was so used on all wires.

In 1859, the Western Union Company set up the standard "92 Code". A list of numerals from one to 92 was compiled to indicate a series of prepared phrases for use by the operators on the wires. Here, in the 92 Code, 73 changes from a fraternal sign to a very flowery "accept my compliments," which was in keeping with the florid language of that era.

Over the years from 1859 to 1900, the many manuals of telegraphy show variations of this meaning. Dodge's The Telegraph Instructor shows it merely as "compliments." The Twentieth Century Manual of Railway and Commercial Telegraphy defines it two ways, one listing as "my compliments to you;" but in the glossary of abbreviations it is merely "compliments." Theodore A. Edison's Telegraphy Self-Taught shows a return to "accept my compliments." By 1908, however, a later edition of the Dodge Manual gives us today's definition of "best regards" with a backward look at the older meaning in another part of the work where it also lists it as "compliments."

*"Best regards" has remained ever since as the "put-it-down-in-black-and-white" meaning of 73 but it has acquired overtones of much warmer meaning. Today, amateurs use it more in the manner that James Reid had intended that it be used --a "friendly word between operators." *

73,
Bruce

Also the proper way to say it is not the number "73" but to say each number separately - "7" and then "3".

And it is never 73s, 73's, or any form of pluralization.

That is why I sign some emails or posts like this...

From: Joe Sammartino
Topic: 1001 Message: 1001

How to Build a Computer from Scratch: The Complete Guide<http://lifehacker.com/5828747/how-to-build-a-computer-from-scratch-the-complete-guide>

Last week, we showed you how to build your own custom PC, from picking the parts, to putting it together and installing your OS. Here's the complete guide, along with a printable PDF version that you can use as a reference.

Note: Click the lesson title to view the lesson—it's a link!

[image: How to Build a Computer from Scratch: The Complete Guide]
Lesson 1: Hardware Basics<http://lifehacker.com/5826509/how-to-build-a-computer-from-scratch-lesson-1-hardware-basics>

Building a computer from scratch gives you the perfect machine for your needs, but it can be daunting the first time around. For our first lesson in building your own PC, we start with a little computer hardware basics.

[image: How to Build a Computer from Scratch: The Complete Guide]
Lesson 2: Choose and Buy Your Parts<http://lifehacker.com/5827145/how-to-build-a-computer-from-scratch-lesson-2-choose-and-buy-your-parts>

In this lesson, we'll show you how to most effectively pick out and shop for your parts.

[image: How to Build a Computer from Scratch: The Complete Guide]
Lesson 3: Building the Computer<http://lifehacker.com/5827491/how-to-build-a-computer-from-scratch-lesson-3-building-the-computer>

Assembling your computer can seem daunting, but it's actually pretty easy. In lesson 3, we show you step-by-step how to put everything together.

[image: How to Build a Computer from Scratch: The Complete Guide]
Lesson 4: Installing Your Operating System<http://lifehacker.com/5827928/how-to-build-a-computer-from-scratch-lesson-4-installing-your-operating-system>

Once you've put it together, you're past the difficult portion. Lesson 4 deals with installing your operating system and get everything up and running.

[image: How to Build a Computer from Scratch: The Complete Guide]
Lesson 5: Further Resources<http://lifehacker.com/5828286/how-to-build-a-computer-from-scratch-lesson-5-further-resources>

There's a lot more computer-building info out there than we can fit into one Night School. In our final lesson, we share some other resources that should help you in both the building and post-building steps.

If you'd like all of these lessons in a printable PDF file, click here to download one<http://edge-cache.lifehacker.com/lifehacker/pdfs/PC-Building-Night-School.pdf>. That way you can take it with you to the store, to your workbench, or anywhere else you may need it. Thanks for learning with us this week!

You can contact Whitson Gordon, the author of this post, at whitson@.... You can also find him on Twitter<http://twitter.com/WhitsonGordon>, Facebook <http://www.facebook.com/WhitsonGordonFanPage>, and lurking around our #tips <http://lifehacker.com/tips/forum> page.

1004. HAM TV net tonight (Wednesday)

Yahoo group: Queen_Creek_Hams
Date: 2011-08-10 15:29:15 UTC
From: ars_k1atv
Topic: 1004 Message: 1004

The regularly scheduled HAM TV nets are tonight - Wednesday - at 6:30 and 7:30.

You may watch online if you wish - and check in by video SKYPE.

Here are the instructions:

The URL is batc.tv (as in British Amateur Television Club dot television.

Click on ATV repeaters
Highlight W7ATV
Click on View Stream

You can also enter the chat by typing /nick and then an ID.

That's forward slash, the word nick (no space in between), a space and then an ID. Some of us also append our first names.

For example. I enter /nick K1ATVBil.

We are also on Sunday nights - same time, same place.

Bil

Great point, Bil --

I forgot about that one....

Bruce, thanks for posting that ARRL article. It's a great reminder that our hobby has a very rich legacy and it's up to all of us to preserve the terminology, customs, and best practices as best we can or we'll end up like the movie Idiocracy predicts - a dumbed down shell of our former selves.

I bet there is a list somewhere on the net that lists the most often misused, misspoken, or mishandled amateur radio jargon and practices. If I find it, I will share it.

Regards,

Joe, N2QOJ

Traffic Alerts Map Aug. 11-18
Posted Date: 8/11/2011
Traffic Alerts Map
Aug.11-18<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9553>

1. *Sossaman and Chandler Heights roads*
Crews will begin work to install a new storm drain across Chandler Heights Road on the west side of Sossaman Road. Drivers can expect flaggers and off-duty deputies to be controlling traffic during working hours. When crews are actively working at the intersection, the traffic signal will remain in *all red flash* and portable signs will be installed. The intersection will remain an all-way stop until the work has been completed at the intersection, which is expected to last through Thursday, August 18.

1a. *Sossaman Road between Riggs and Chandler Heights roads*
Work continues on the Cloud Road Basin located along Sossaman Road between Riggs Road and just north of Chandler Heights Road. Drivers can expect to see the shoulders closed in the area while work progresses.

2. *Riggs Road west of Ellsworth Road*
Maricopa County has begun work for a new crossing for Riggs Road at the Sonoqui Wash. Flaggers will be present during working hours to allow equipment to cross from the north to the south.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

Hi Folks,

Great breakfast today at the Flight Deck Cafe. I got that feeling when I realized I was getting up to leave at 12:15 PM - a 3 1/2 breakfast must be good, if not great.

It was nice to meet Conrad, K1EC and to once again break bread with Scott, Jim, and Bruce.

As usual, topics were many and varied.

I wanted to share a few websites and other info that I find useful.

If you would like to sign up for FREE automatic notification of breaking weather, homeland alerts, and more, visit www.emergencye.com. Note the special spelling.

I've been using this service for years and love it. The weather mapping is great. It's free, give it a try - you won't be disappointed.

If you haven't heard, Ham Nation, a ham radio program hosted by Bob Heil, is having a nice successful run at TWIT.tv.

Check it out at: http://twit.tv/hn

They are on live every Tuesday night but you can view the episodes at the website anytime. They have twelve episodes in the can now. Gordon West is a regular and guests like Carole Perry show up as well. George Thomas of AmateurLogic.TV - another great ham radio video pod cast - has been a regular lately delivering hands-on demos of soldering, radio projects, etc.

If you want to see some really good amateur radio videos, visit www.amateurlogic.tv. I was even mentioned in some of the first episodes regarding my email comments and suggestions. Some of my favorite episodes are their multi-part installments visiting the MFJ factory.

7 3,

Joe, N2QOJ

1011. Ham Nation, Episode 12

Thanks, Bil.

Ham Nation is, indeed, a nice program. It's nice to see that the This Week in Tech (TwiT) Web site (http://twit.tv/ <http://twit.tv/>) features past Ham Nation broadcasts in both audio and video (high and low def) and includes the Ham Nation episodes (http://twit.tv/hn <http://twit.tv/hn>). I would rather watch those on my PC than "stuff" on local TV. It's also nice to see/hear Leo Laporte. I missed his Saturday radio show when the local radio station dropped him several years ago.

73,

Kenn, WB7OSR

1013. The 9 Eternal Rules of Teamwork

Yahoo group: Queen_Creek_Hams
Date: 2011-08-15 22:55:46 UTC
From: Joe Sammartino
Topic: 1013 Message: 1013

I thought this was a great article and speaks to our recent and future efforts..... Joe

The 9 Eternal Rules of Teamwork<http://www.bnet.com/blog/salesmachine/the-9-eternal-rules-of-teamwork/17195?tag=content;drawer-container>
By Geoffrey James <http://www.bnet.com/search?q=geoffrey+james> | August 15, 2011

- <http://www.bnet.com/blog/salesmachine/the-9-eternal-rules-of-teamwork/17195?tag=content;drawer-container><http://www.bnet.com/blog/salesmachine/the-9-eternal-rules-of-teamwork/17195?tag=content;drawer-container>

Teamwork is a universally acknowledged to be a desirable business attribute, but few organizations have a clear definition of what teamwork actually means or how to achieve it. This post provides nine rules defining teamwork, based on a conversation with Phil Geldart, author of the classic In Your Hands: the Behaviors of a World Class Leader.<http://www.amazon.com/your-hands-behaviors-world-class-leader/dp/0968567703/ref=sr_1_1?ie=UTF8&qid=1313434526&sr=8-1>

- *RULE #1. A team must have a leader.* In most sales groups the leader is the sale manager and the team members are that manager's direct reports. However, there are many cases when teams consist of people from different organizations, in which case, there still needs to be a team leader. The team leader is responsible for delivering the outcome that the team is expected to achieve, even though the leader will need to depend upon the team to deliver the result.
- *RULE #2. The team must have unanimous focus on a quantifiable goal. *Teamwork is impossible if team members do not have a very clear idea of what they're trying to achieve. Teamwork requires that every member of the team understand exactly what the team is tasked with achieving. That sense of exactness is only possible when the team's goal can be measured in an objective way. Goals must therefore be quantifiable rather than vague and amorphous. Example: "Build better customer relationships" is unquantifiable and thus meaningless; "Convert 50 percent of qualified prospects to customers" is precise and measurable.
- *RULE #3. The team must have clearly defined roles.* Every member of the team needs to know exactly what he or she must do, on a day-to-day basis to make sure that the team achieves its goals. Without that clarity, team-member will work at cross-purpose and trip over each other. Note that large teams may be broken up into small sub-teams, which must also have clearly defined roles. All of this must be thought through carefully and continually refined as the team moves forward.
- *RULE #4. The team must be willing to share its resources.*Team members

must be willing to share whatever resources they control that are required for the team to achieve its goal. These resources come in two varieties. The first are physical resources: money, materials, office space, computers, and so forth. The second are mental and emotional resources: ideas, suggestions, encouragement, and enthusiasm. If team members hoard either variety of resources, it detracts from the ability of team members to work together.
- *RULE #5. The team must have frequent, effective communication.* The easy part of this principle is the frequency. Depending upon the goals and time frame, teams should meet at least once a week, more often if necessary. Effectiveness is more difficult. A communication is effective if and only if it is meaningful to the recipient. If the communication is taking place in such a way that even a single team member isn't "getting it" the team must keep retooling the communication until everybody is on board.
- *RULE #6. The team must have consistent, united and enthusiastic effort.* A team cannot function effectively if everyone on the team isn't 100 percent committed to achieving the goals of the team. This kind of commitment expresses itself through consistency in behavior and doing what needs to be done in order to achieve the team's goals. Please note that this does not mean that team members should be sacrificing their private lives for the team. On the contrary, it's impossible for a team member to remain consistently enthusiastic while experiencing a life that's out of balance.
- *RULE #7. Team members must periodically suppress their own egos.* A strong ego is a good thing, especially for sales professionals. However, for the team to function effectively, individuals on the team must hold their own egos in check and make the team, and the achieving of the team's goals, more important than the individual contributions of any one member. If the team members don't do this, grandstanding and prima-donna attitudes will frustrate the ability of the team to achieve its goals.
- *RULE #8: The team must be introspective. *The team must figure out, as a team, where it is falling short. To do this, at every third team meeting, have each member state an area (i.e. one of the principles) where that member thinks the team needs work, and why. That's two sentences per team member, which means that even a large team should be able to self-diagnose within five to ten minutes. During this process, the team leader should look for patterns and repetitions that indicate a generic problem inside the team, and problems that an individual inside the team is experiencing that other members aren't experiencing.
- *RULE #9: The team must be capable of self-correction.* For problems that are generic to the team, the team leader must either work with the team or with the surrounding environment to improve that principle. For problems that are specific to an individual, the team leader must work privately with that individual to make it possible for that individual to integrate better into the team and to perform the assigned role. Example: During several meetings an individual sales rep expresses intense dislike of the CRM system. The team leader meets with that individual privately to explain why the CRM system is essential to the team's performance and obtains a commitment from the complaining rep to do what's necessary to support the team.

NOTE: In Phil’s system the first 7 rules are called “principles” and the 8th and 9th are “how to” methods to implement the 7 principles. For the purposes of clarity, I’ve made them into 9 rules, which I think makes the concepts easier to understand.

From: Jim Henderson
Topic: 1016 Message: 1016

Thanks Joe. I have all these links, but the best warning was listening to the TV news choppers on VHF.

Better descriptions than the color maps!

Channel 15 TV had first aerial pix, just about as the cloud passed over my house. News says it is particularly ugly near Johnson Ranch and west in Eloy to Maricopa.

The choppers have headed for their safety, and I am listening to the Phoenix ATC deal with the mess of planes holding or diverting...

J

And I was in Phoenix and misses it. Nice to see salubrious used in a sentence though.

1021. HAM TV makes the big time.

Yahoo group: Queen_Creek_Hams
Date: 2011-08-19 21:02:38 UTC
From: ars_k1atv
Topic: 1021 Message: 1021

"They call him the Captain Video of the East Coast, and he is a star ... in his way."

So begins the four page article in the Aug 27 - Sep 2, 1988 issue of the national TV Guide magazine.

Another excerpt:

"from the basement of his home ... amid hanging laundry and dusty shelves of canned tomatoes and split-pea soup Ron Cohen is on TV almost every night."

"K3AFK, K3AFK, this is K3ZKO," he says, "Beam me up."

Bil Munsil
K1ATV HAM TV
Mesa AZ

PS - the article can be found on his personal website.

1022. Who was the first HAM TV operator?

Yahoo group: Queen_Creek_Hams
Date: 2011-08-20 01:28:51 UTC
From: ars_k1atv
Topic: 1022 Message: 1022

Who was the first HAM TV operator?

Well, we know that W1BHD, Melvin Dunbrack was authorized by the FCC to sign W1BHD-TV in the early 1930's - arguably the only amateur station ever to be allowed to use the -TV suffix - which is only authorized for television stations to use. Even today HAM TV operators are not legally allowed to use it.

We know that W5AGO, Truett Kimzey, was broadcasting mechanical TV in 1934 at the time that television was still experimental and all TV stations had the letter X (for experimental) as the first letter in the suffix of their call signs.

According to my sources the first experimental TV station licensed was 3XN in 1927.

In the late 1920's and early 1930's mechanical television broadcasts were only allowed between 2.0 and 2.1 MHz - a 100 KHz band width.

Because they were in the HF band their broadcasts could be received hundreds - if not thousands - of miles away.

1025. Arizona Emergency Net - Maricopa, 8/22/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-08-22 02:55:52 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1025 Message: 1025

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday August 22, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 4 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Traffic Alerts Map Aug. 25-Sept.
1<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9612>

1. *Rittenhouse Road at Canyon State Academy
*Crews will be working on the north and south shoulder of Rittenhouse Road at the driveway for Canyon State Academy. No traffic restrictions are anticipated at this time.

2. *Sossaman Road: Riggs Road to Chandler Heights Road*
Traffic will be shifted to the east while crews work to complete underground work in the area.

3. *Ellsworth Road north of Rittenhouse Road*
The southbound right turn lane will be closed north of the railroad tracks while crews complete utility work in the area.

NOTE: *Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement officers or flaggers who are controlling traffic due to construction and road maintenance.*

FYI:

The Yaesu FT60R dual band (2-m/70-cm) with a number of nice features
[whatever THAT means. Kenn] has been DISCOUNTED for a while at about
$189.

Currently the price has been reduced by Yaesu and the prices are:

HRO: (hamradio.com) $159.95
R and L Electronics (randl.com) $149.95
https://www.hamcity.com/store/pc/viewPrd.asp?idcategory=0&idproduct=908
<https://www.hamcity.com/store/pc/viewPrd.asp?idcategory=0&idproduct=908\
> $146.95

What is unknown is how long these prices will remain in effect.

We will be looking for you on the AZ/NV/NM Mercury net next week at 0700
if you can make it and the
ERC net to follow - all on 3.990 mHz.

Thank you for being available as you are.

The southbound right-turn lane will be closed while crews complete utility work.

2. *Sossaman Road: Riggs Road to Chandler Heights Road*
Crews continue to work on the drainage project in the area. Traffic will be shifted east through portions of the project area, and drivers may encounter flaggers and/or off-duty law enforcement officers controlling traffic throughout the area.

3. *Village Loop Road south of 219th Street*
Crews will be working in the area completing utility work. No traffic restrictions are anticipated at this time.

4. *Sossaman and Cloud roads*
Flaggers and off-duty law enforcement officers will be controlling traffic between 6 a.m. and 3:30 p.m. weekdays while crews complete a pipe crossing through the intersection.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic due to construction and maintenance operations.

1037. Arizona Emergency Net - Maricopa, 9/5/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-09-05 02:56:12 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1037 Message: 1037

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday September 5, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 3 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1039. 2 Meter simplex

Yahoo group: Queen_Creek_Hams
Date: 2011-09-05 21:52:49 UTC
From: Joe Sammartino
Topic: 1039 Message: 1039

Folks,

I'm spending the next couple of hours checking out a bunch of used commercial radios that Bruce got for us to use with the town disaster plan.

I'll be listening to 146.52 Mhz most of this afternoon during this activity. Give me a call.

Thanks,

Joe, N2QOJ

1047. ATV wedding - from qrz.com

Yahoo group: Queen_Creek_Hams
Date: 2011-09-10 17:50:01 UTC
From: ars_k1atv
Topic: 1047 Message: 1047

ATV world first - Hams wedding outside broadcast planned

In what is believed to be a worldwide first, a group of Amateur television enthusiasts will be conducting a live broadcast of the wedding of 2 members of Australia's Eastern and Mountain District Radio Club (EMDRC) through the VK3RTV repeater.

Matthew VK3EVL and Emily VK3FEGL will be getting married on Saturday the 17th of September 2011 with the broadcast commencing around 3pm (AEST). [10 PM Saturday night, Arizona time.]

Anyone anywhere in the world can watch the proceedings via the BATC streaming website (AEST is plus 10 hours UTC).

For further details and links to a guestbook, please visit the EMDRC website at http://www.emdrc.com.au

For those around the world intending to watch, you can do so via the British Amateur Television Club (BATC) streaming website.
Visit http://www.batc.tv/ch_live.php?ch=2 select VK3RTV-1 and view stream.

☐ Listen to this week's WIA National News broadcast, which features an interview with Matthew and Emily. The wedding story is the first item in the newscast.

From: Kenn
Topic: 1049 Message: 1049

FYI::>

With the storms raging in about Maricopa County and northward this evening, AZ Skywarn (http://www.wrh.noaa.gov/psr/general/skywarn/index.php <http://www.wrh.noaa.gov/psr/general/skywarn/index.php>) was activated on 146.740 and 442.800 this evening. They were supported by MCECG (ARIZONA EMERGENCY NET - MARICOPA) (http://www.mcecg.net/index.php <http://www.mcecg.net/index.php>) on the Mt. Ord and Shaw Butte linked 2M repeaters at 146.920 (- offset) and 147.240 (+), 162.2 Hz tone for both. The 147.240 repeater on Shaw Butte Mountain is part of the linked ARA repeaters run by the Arizona Repeater Association (http://azrepeaters.net/pmwiki.php?n=RepeaterMaps.Maricopa2Meters) <http://azrepeaters.net/pmwiki.php?n=RepeaterMaps.Maricopa2Meters> who run and support repeaters on six (6) bands in Arizona.

Quite a show last night.

I am not. But I do know what rain looks and feels like... although I do not want to see a funnel cloud up close.

I disconnected all aerials last nite at about 6:15 PM -- right after I copied the official NOAA Tornado warning at 6:10 PM, and promulgated this warning on 2 local email reflectors for ham clubs, as well as on one of the local DX 'Clusters'.

I knew the well-prepared QC Hams were already aware of the situation, and where to participate on the air.

This makes 2 nights in a row that the lightning intensity dictated a complete disconnecting of all radios - including headphones/speakers/keyers and ground straps.
The works.

Jim

I am a member of Skywarn, but have not been real active especially now.
Steve Sipple works for the National Weather Service in Phoenix and is also a ham, although I can't recall his campaign at the moment. He lives near Queen Creek and is usually the one that activates the net for Eastern Maricopa County/Final county for our area. They get on the Signal Peak repeater in Pinal county and don't remember the freq. either. Lol

1054. Arizona Emergency Net - Maricopa, 9/12/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-09-12 02:56:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1054 Message: 1054

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday September 12, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 4 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Thanks Terry,

Stop in for breakfast one of these days. I read that there may be a Skywarn class later this year in the east valley.

Cheers,
Bruce

1058. Skywarn Sector 2 has been activated

Yahoo group: Queen_Creek_Hams
Date: 2011-09-12 21:43:52 UTC
From: W5NRA
Topic: 1058 Message: 1058

Thought I'd cross post this as some might be interested in listening to the net.

Here is the "azskywarn" yahoo group main page that has some other info on it about the classes and criteria.

Arizona Skywarn discussion group covers Sector 2 (Maricopa and Northern Pinal Counties) Sector 6 (Gila and Southern Pinal Counties and all other Sectors around the state.

The Skywarn Spotter Training Classes are complete 2011. Watch http://weather.gov/phoenix/general/spotter/index.php <http://weather.gov/phoenix/general/spotter/index.php> for 2012 Training Class details.

The Sector 2 General Information NET is held every Wednesday night at 8pm on the frequencies of 442.800 + 100.0 South Mountain Linked to 442.850 + 100.0 Shaw Butte. Our back up repeater is 147.080 + 162.2 Thompson Peak. The Sector 6 General Information NET is held every Tuesday night at 8pm on the frequency of 147.200 + 162.2. Skywarn ACTIVATIONS are on these frequencies!

CRITERIA CRITERIA CRITERIA CRITERIA

The following criteria are what spotters should look for when phoning in their reports or contacting net control. They should always call the responsible Weather Service Office when any of the below are noted:

1. TORNADO (on the ground) or FUNNEL CLOUD (tail not touching the ground)
2. ROTATING WALL CLOUD
3. WIND (estimated or measured at 40 mph or more)
4. MICROBURST (visually identified)
5. RAINFALL (1/2 inch (.50) or more in 30 minutes)
6. FLOODING (of any kind)
7. DAMAGE and/or DEATHS and/or INJURIES due to the weather event
8. HAIL (of any size)
9. VISIBILITY (less than 1/2 mile due to fog, dust, blowing snow or ash)
10. SNOWFALL (accumulating at a rate of 1 inch or more per hour.

Link to NWS Storm Criteria Page:
http://www.wrh.noaa.gov/psr/general/skywarn/index.php?wfo=psr <http://www.wrh.noaa.gov/psr/general/skywarn/index.php?wfo=psr>

Subject: GE MVS Professional Mobile/Base 2 METER Radios

Hi Kevin,

I am selling some GE MVS radios for the Communications Posse. Can you
pass
this on to your ham/EMCOMM circles and let me know if there is any
interest?

Thanks buddy!

Justin

GE MVS Professional Mobile/Base 2 METER Radios

PROFESSIONAL MOBILE/BASE 2 METER RADIOS AS LOW AS $40

Professional/Commercial radios that have been re-programmed into the 2
meter

band.
They are 30+ watt 16 channel radios programmed for 146.52 National Call
plus
mountain
top 2 meter repeaters in AZ.# They are PC programmable.# These are used
but
well
made commercial/professional grade radios.# The GE MVS is proven to be
very
rugged
and reliable and they are priced to sell:

1 for $50
3 for $125
5 for $200

Includes radio, microphone, fused power cord with ignition sense and a
mounting bracket.

Each radio has been tested on a service monitor for RX Sensitivity, TX
Power
and Audio Quality.

This is backed by a free replacement 30 day guarantee!
########
Buy them for:
- A dedicated radio for National Call Frequency.
- An emergency backup radio.
- Install in a vehicle and not worry if it is stolen.
- Use a TinyTrak and program for 144.390 MHz for an automatic power
on
APRS beacon.
- Give them away to new hams as a starter radio.
- Tell your friends if they get their ticket you will give them a#
radio!
- Support the Maricopa County Sheriff's Office Communications Posse.

Wow, what a great deal!

Actually, Bruce bought 20 of them two weeks ago for the town project.

They work very well. I've been testing them and cleaning them up.

Here's a link to a short video of one of the radios while I am in QSO with
Jim, KF7E:

Hi Bruce,

Kenn kept me company on the simplex frequency. He picked up his own GE MVS and it sounded great.

I was working on the PC Headset Adapter. It's coming along nicely. Another session or two and it should be read to demo. Pics of progress attached.

Regards,

Joe

Hi Bruce,

Not complicated, just a little bit of a time drain to get it all scoped out, proto-typed and then checked out.

But time well spent up front yields good results.

Regards,

Joe

1067. HAM TV makes it to the top of the world!

Yahoo group: Queen_Creek_Hams
Date: 2011-09-19 16:12:53 UTC
From: ars_k1atv
Topic: 1067 Message: 1067

This just in from W6ORG of PC Electronics, manufacturer of HAM TV equipment since 1965. It happened sometime in the late 1970's or early 1980's.

A Canadian expedition bought a special packaged transmitter and sent video from the 22,000 ft base camp down to Katmandu. There it went by satellite to the TV show Nightline. There was a crevass two people fell into and the TX was lost.

Bil

1069. Arizona Emergency Net - Maricopa, 9/19/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-09-19 20:55:09 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1062 Message: 1069

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday September 19, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Subject: WB7TUJ - Radios in the Park
To: Cris McBride <vandcmcbride@...>
Cc: rdjorg@yahoo.com, Bruce Barnes <brucekbarnes@...>, Steve Petrie
K7DAD <spetrie@cox.net>

Cris,****

** **

Russ N7TWG, myself and a few others are planning on doing what we call
“Radios in the Park”.****

We did this several times last year; when we had that activity behind the
stake center in Tempe, during the j-pole building party, and a couple times
with just Russ, his son Eric & I.****

We plan on doing this activity a number of times during the good outdoor
weather this fall, this coming winter and next spring.****

** **

“Radios in the Park” is what we call a Saturday afternoon where Russ & I
take our “Hamshack in a Suitcase” throw & go HF radio / 2 meter / 440 radio,
battery powered packages that we have put together, along with portable
antennas & masts out to a city park or other outdoor location that is an
open area that’s fairly close to our homes.****

We set them up and get on the air and just have fun.****

** **

We’re talking to other emergency preparedness groups in the East Valley
about joining us.****

And ideally joining us NOT at the same park with us, but at other parks that
are close to their homes.****

This way we can communicate with each other via 2 m / 440 simplex freqs,
play with NVIS on 40 & 75m as well as make contacts with whomever we wish to
or find on the air.****

** **

We think that this informal activity is an excellent way for all hams, regardless of their level of experience to have a number of opportunities to take their portable equipment literally to the “field” and “burn the cobwebs off of the heat sinks”, really “wring em out”….. unlike making one “check in” transmission as is done with the formal nets. That accomplishes all but nothing when it comes to testing equipment & improving skills!****

Thus those who are serious about wanting to gain experience in setting up in the field during an emergency will have an opportunity to drill and really test their equipment and improve their skills.****

Plus….. it’ll be a lot of plain ol FUN!!!****

** **

** **

We would like to do a “Radios in the Park” at least once a month during the months from Oct through April.****

** **

It’s like a “Field Day” every month during the good weather in AZ…… minus the contest!****

** **

Every “Radios in the Park” activity will be 100% informal, with the exception of establishing a Saturday afternoon date and time each month.****

And to coordinate some common freqs to use so different groups in different locations can contact each other.****

It would not be conducted as a net. It’s just “show up when you get set up” and “shut down & pack up” when you’ve had enough.****

** **

The talk would be simply testing, such as trying different rigs, power settings, antennas, etc.****

Rag chewing, sharing ideas about what you’re doing and what equipment you have etc. ****

Technical discussion, etc. ****

Whatever comes along to educate, gain experience and have fun.****

** **

See how far you can talk simplex. ****

Play with cross band repeating.****

See what remote repeaters you can get in to. ****

See how well 40 & 75m works close in. Do some DX too if you with…… whatever makes you happy.****

** **

See how long your battery system will last, or how long a tank of fuel will run your generator.****

Play with your solar panels.****

Experiment with running 12v power from a car’s battery a good number of feet to the table your rig is set up at.****

Experiment with different modes, such as some of the digital modes.****

Etc, etc, etc. ….. whatever comes along that someone wants to try for the purpose of having fun, learning & preparing for a real field set up during a real emergency.****

** **

** **

** **

Cris,****

Do you think this idea has some merit?****

Do you think there would be additional interest that could spread across the state?****

Would you be interested in spreading the word of this on the various nets that you participate in?****

** **

Russ, Steve, Bruce…… your comments.****

Let me know what you think.****

Please “Reply to All”.****

** **

73,****

** **

Check out the ARPOG Yahoo group for this type operation.

There is also a group of hams that meet EVERY Thursday at the Red Mountain Park in East Mesa.

Would you believe pizza pan antennas and lawn chairs at 30 feet?

Description
The Amateur Radio in the Park Project is back.... with a new name!!! We are now the Amateur Radio Portable Operations Group (ARPOG). The Amateur Radio in the Park Project was a group of hams in the Tucson (AZ) area that set up radio demonstrations in the city parks for the purpose of promoting Amateur Radio. ARPOG will continue that mission.. both in Tucson, and (hopefully) nation-wide. Come join us for discussion on how to set up and operate portable stations, both for demo purposes, and for fun (I enjoy just getting out and operating once in a while... just for the fun of it).

LISTEN FOR US ON THE AIR THIS UPCOMING WEEK (SEPTEMBER 26TH-30TH), USING THE KC7DVF CALLSIGN. WE WILL BE ON THE AIR FROM VARIOUS PLACES AROUND TUCSON AND SOUTHERN ARIZONA.

Cris,

Russ N7TWG, myself and a few others are planning on doing what we call “Radios in the Park”.

We did this several times last year; when we had that activity behind the stake center in Tempe, during the j-pole building party, and a couple times with just Russ, his son Eric & I.

We plan on doing this activity a number of times during the good outdoor weather this fall, this coming winter and next spring.

“Radios in the Park” is what we call a Saturday afternoon where Russ & I take our “Hamshack in a Suitcase” throw & go HF radio / 2 meter / 440 radio, battery powered packages that we have put together, along with portable antennas & masts out to a city park or other outdoor location that is an open area that’s fairly close to our homes.

We set them up and get on the air and just have fun.

We’re talking to other emergency preparedness groups in the East Valley about joining us.

And ideally joining us NOT at the same park with us, but at other parks that are close to their homes.

This way we can communicate with each other via 2 m / 440 simplex freqs, play with NVIS on 40 & 75m as well as make contacts with whomever we wish to or find on the air.

We think that this informal activity is an excellent way for all hams, regardless of their level of experience to have a number of opportunities to take their portable equipment literally to the “field” and “burn the cobwebs off of the heat sinks”, really “wring em out”….. unlike making one “check in” transmission as is done with the formal nets. That accomplishes all but nothing when it comes to testing equipment & improving skills!

Thus those who are serious about wanting to gain experience in setting up in the field during an emergency will have an opportunity to drill and really test their equipment and improve their skills.

Plus….. it’ll be a lot of plain ol FUN!!!

We would like to do a “Radios in the Park” at least once a month during the months from Oct through April.

It’s like a “Field Day” every month during the good weather in AZ…… minus the contest!

Every “Radios in the Park” activity will be 100% informal, with the exception of establishing a Saturday afternoon date and time each month.

And to coordinate some common freqs to use so different groups in different locations can contact each other.

It would not be conducted as a net. It’s just “show up when you get set up” and “shut down & pack up” when you’ve had enough.

The talk would be simply testing, such as trying different rigs, power settings, antennas, etc.

Rag chewing, sharing ideas about what you’re doing and what equipment you have etc.

Technical discussion, etc.

Whatever comes along to educate, gain experience and have fun.

See how far you can talk simplex.

Play with cross band repeating.

See what remote repeaters you can get in to.

See how well 40 & 75m works close in. Do some DX too if you with…… whatever makes you happy.

See how long your battery system will last, or how long a tank of fuel will run your generator.

Play with your solar panels.

Experiment with running 12v power from a car’s battery a good number of feet to the table your rig is set up at.

Experiment with different modes, such as some of the digital modes.

Etc, etc, etc. ….. whatever comes along that someone wants to try for the purpose of having fun, learning & preparing for a real field set up during a real emergency.

Cris,

Do you think this idea has some merit?

Do you think there would be additional interest that could spread across the state?

Would you be interested in spreading the word of this on the various nets that you participate in?

Russ, Steve, Bruce…… your comments.

Let me know what you think.

Please “Reply to All”.

73,

Doug WB7TUJ

1078. Repeater in the San Tans?

Yahoo group: Queen_Creek_Hams

From: Bruce Barnes
Topic: 1078 Message: 1078

Hey all,

A church group of kids will be hiking through San Tan Regional Park next spring. They want to use hams for comms. I don't know how effective they'll be in the hills there of the park. Does anyone know if there are any repeaters out that way that cover the San Tan Mountains?

Thanks,
Bruce

From: jhenders@swlink.net
Topic: 1078 Message: 1080

I used to do a lot of hiking and geocaching there.

Depending on which side, they may be able to use one that favors that side (such as Pinal Peak on the east side, several on the north Phoenix/Mesa side, but I have never had much luck on the south and west sides). Standing on a peak is one thing, but the canyons are deep and shadowed.

I never tried 440 or 220 in there, all 2m.

Jim

Thanks Jim,

I may have to go walk the trail to scout photo angles etc. I can take an HT to see what works out there. I'm not real optimistic about some of the low places.

Cheers - Bruce

1085. Arizona Emergency Net - Maricopa, 9/26/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-09-26 02:56:11 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1085 Message: 1085

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday September 26, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 3 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1087. 9 year old Amateur Extra on D-STAR

Yahoo group: Queen_Creek_Hams
Date: 2011-09-29 04:04:13 UTC
From: ars_k1atv
Topic: 1087 Message: 1087

Mikaila is 9 years old and earned her Amateur Extra license when she was 8. Her vanity call is KI4DS.

She lives in Deltona FL.

Bil
K1ATV

Hi Everyone:

Asking for help to see if you can post or help spread the word about a new net on DStar Reflector 12-C, Friday Nights starting October 7, 2011.

Can you please make an announcement that I will be starting a Kids In Amateur Radio NET on the PAPA SYSTEM.

The NET will be held every Friday night at 9:00pm edt on DStar Reflector 12C, Starting on 7-Oct-2011.
I will be discussing a lot of things, but mostly around getting youth interested in Amateur Radio and getting their license.

The NET as I understand will be on the Radio Reference dot com site also for those who want to listen but don't have a DSTAR radio. (They can check in by Email)

http://www.papasys.com/index.php?pageid=dstar

73, Mikaila

1088. Queen Creek: Traffic Alerts Map Sept. 29 - Oct. 6

Traffic Alerts Map Sept. 29 - Oct. 6
Posted Date: 9/29/2011

1. *Combs/Rittenhouse Road at Meridian Road*
Flaggers will be present controlling westbound traffic on Combs Road at Meridian Road for an ongoing material haul in the area.

2. *Ellsworth Road/Ocotillo Road*
Utility work will close the sidewalk and adjacent parking lane on the east side of Ellsworth Road between Aldecoa and Ocotillo roads during the day the week of Oct. 10. Pedestrians will be directed to the west side of Ellsworth at both Aldecoa and Ocotillo when the sidewalk is closed.
Traffic Alerts Map Sept. 29 - Oct 6<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9766>

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices and directions from law enforcement officers or flaggers who are controlling traffic due to construction or maintenance operations.

1090. Arizona Emergency Net - Maricopa, 10/3/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-10-03 02:56:24 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1090 Message: 1090

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday October 3, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 3 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1091. Going away breakfast... October 15th

Yahoo group: Queen_Creek_Hams
Date: 2011-10-03 14:00:40 UTC
From: W5NRA
Topic: 1091 Message: 1091

Ok, just in case the subject wasn't real clear. I am done with trucking, at least long haul, and we are moving to Oregon. My wife's brother and parents live in Rainier, OR, so we are moving up there so she can be closer to her ailing father.
I will be back in town on the 13th and jumping right in to prepare for the "exit stage left!" I would like to do a quick breakfast on Saturday the 15th at 8am(late time for Jim! haha) Quick because my brother is getting married on Saturday and my parents and daughter will be in town. Just want to get together and say 'Hi and Bye.'

Terry

P.S. name someplace... cheap.. I won't have a job!!! haha

1) Rudy's - for the nostalgia

2) Flight Deck Cafe - for the views

3) New Mexico Cafe - for the chilie & such...

I'll buy your meal.

1097. Traffic Alerts Map Oct. 6-13

Yahoo group: Queen_Creek_Hams
Date: 2011-10-06 21:06:39 UTC
From: Joe Sammartino
Topic: 1097 Message: 1097

Traffic Alerts Map Oct. 6-13
Posted Date: 10/6/2011

TRAFFIC RESTRICTIONS

1. *Combs and Rittenhouse roads at Meridan Road*
Flaggers will be present controlling westbound traffic on Combs Road at Meridian Road for an ongoing material haul in the area. Flaggers should be present weekdays between 8:30 a.m. and 4 p.m.

2. *Ellsworth and Ocotillo roads*
Utility work will close the sidewalk and adjacent parking lane on the east side of Ellsworth Road between Aldecoa and Ocotillo roads during the day the week of October 10. Pedestrians will be directed to the west side of Ellsworth at Aldecoa and Ocotillo when the sidewalk is closed.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic due to construction and maintenance operations.

1102. Happy Thanksgiving to the Canadians among us.

Yahoo group: Queen_Creek_Hams
Date: 2011-10-09 08:29:56 UTC
From: ars_k1atv
Topic: 1102 Message: 1102

Why do I say that?

What we in the US call Columbus Day the Canadians call Thanksgiving Day.

1105. Re: Arizona Ham Clubs and Associations

Yahoo group: Queen_Creek_Hams
Date: 2011-10-09 17:29:28 UTC
From: ars_k1atv
Topic: 1103 Message: 1105

Amateur Television Network - Arizona.
A branch of Amateur Television Network - California. http://atn-tv.org/

Sponsors two amateur television repeaters WA6SVT, White Tanks and W7ATN, Mt Lemmon.

On-air video and audio meetings Wed and Sun at 6:30 PM - with SKYPE video check ins accepted. Meetings are streamed to the Internet.

Contact K1ATV for more info
wmunsil "at" cox.net

Hams should be SEEN as well as heard.

1106. Arizona Emergency Net - Maricopa, 10/10/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-10-10 03:56:40 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1106 Message: 1106

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday October 10, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 3 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1117. Fwd: Radios in the Park - Emergency Preparedness Communications Practice

Yahoo group: Queen_Creek_Hams
Date: 2011-10-15 02:47:47 UTC
From: Bruce Barnes
Topic: 1117 Message: 1117
Attachments: 1 described; binary payloads are missing from this source WARC

Wanna do this?

Bruce

---------- Forwarded message ----------
From: Doug WB7TUJ <wb7tuj@...>
Date: Thu, Oct 13, 2011 at 11:20 PM
Subject: Radios in the Park - Emergency Preparedness Communications Practice
To: Cris McBride <vandcmcbride@...>, Russell D Jorgensen <
rdjorg@...>, Steve Petrie K7DAD <spetrie@...>, Bruce Barnes <
brucekbarnes@...>, Gary Goetz K7WZX <K7WZX@...>, Ron McKee AJ7T <
aj7t@...>, Terry Starks KE7LPG <KE7LPG@...>

A “Radios in the Park” event is planned for Saturday, 29 October 2011.****

****

This will co-inside with Tempe South Stake’s Emergency Preparedness Fair on this date from 10:00 – 14:00 MST this date only.****

Hereafter it may or may not co-inside with another event.****

****

To participate in Radios in the Park:****

Take your portable equipment that you would use for communications during times of emergency to your local city park, school field, picnic area, etc and set it up.****

Plan on powering your equipment from generators, solar panels, car batteries (in or out of cars), other portable batteries, hand cranks, etc.****

Erect your antennas using your home made or store bought masts, tripods etc, a mag mount atop a picnic area with a metal roof, an antenna tied to a lighter than air balloon, etc, etc, etc. ****

****

The only formality of this event is to set up a 2 meter portable station connected to an antenna atop a portable push up mast of some type to get the antenna at least 15’ above the ground in a fairly open, clear area.****

Feel free to use a cross band set up or remote controlled base station for this purpose if you wish to and have one available.****

Program your 2 meter transceiver to 146.460 MHz SIMPLEX (no offset) and *program your PL tone encoder to 77.0 Hz.****

*For those who have transceivers with PL tone decoders, this will make it possible for you to have your receivers in the decode mode and they will remain quiet should others not participating in our activity get on the freq for a rag chew.****

This will prevent you from being distracted and turning your volume down and forgetting to turn it back up should someone else get on the freq & have a QSO. ****

You will not hear them, thus you can leave your volume up so someone who is participating in our activity, transmitting with the tone will come through and be heard.****

You will have to turn your PL decoder OFF or look at your signal strength meter to confirm there's no one co-channeling with you before you initiate a call.****

****

****

Feel free to set up early and stay late or set up and take down whenever you wish to.****

Set up more than one portable 2 meter stations at your location. ****

Thus you can monitor 146.460 for coordinating experiments etc with other groups in other parks, as well as simultaneously operate on other 2 meter simplex freqs & repeater pairs. ****

If you don't know callsigns of others at other parks (locations), just get on 146.460 with 77.0 PL tone and call out to "Anyone participating in Radios in the Park" followed by your callsign.****

Once contact is made, QSY to another simplex freq or repeater pair , ideally with a second transceiver to carry on your conversation.****

This will keep 146.460 quiet for other participating groups to use and no one will have to turn their volume down and then forget to turn it back up. ****

****

Set up one or more 220Mhz, 440Mhz, 900Mhz, 1200Mhz, 6 Mtrs, HF stations (especially 75 & 40Mtrs with NVIS antennas). ****

Set up whatever you have!****

****

Do whatever you wish on your own; try to see what distant repeaters you can get in to. See how far you can operate simplex, etc.****

** **

Find out how long it takes to get a portable station on the air in case of emergency. ****

Find out how long your generator will run on a tank of fuel.****

Find out how long your battery(s) will last.****

Find out low far you can run a 12 volt power cable from a car battery.****

Etc, etc, etc, etc…….****

** **

Cook a picnic lunch using emergency powered appliances.****

Experiment, practice and play. Make it a fun experience that you'll want to do often.****

Find out what you need to improve your system, then put your improvements to practical use during future Radios in the Park events.****

****

Our goal is to do this on Saturday late mornings through afternoons an average of 4 to 6 times per year from the months of October through April, when the weather in the AZ desert is too beautiful to not want to be outdoors.****

** **

Radios in the Park is being initiated by WB7TUJ & N7TWG.

** **

Please pass this on to others who head emergency communications groups as well as individuals who you know would have sincere interest in this event.*

Sure, count me in.

Lessee, what can I contribute? I have a J-Pole dual band antenna, a portable battery pack, a 115 VAC/12VDC 7 amp Astron PS, and an umbrella stand. Of course, I have a few 2M/40 Cm radios ... all "portable." Sorry, no coax, poles, etc.

1121. Arizona Emergency Net - Maricopa, 10/17/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-10-17 03:57:25 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1121 Message: 1121

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday October 17, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 2 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Bruce Barnes
Topic: 1117 Message: 1123

It's looking like I will have my photo class on 10/29. I've had a few more sign up since I last communicated with you all. I tried to kill the class, but I guess it's just too popular.

Let me know what gear I can contribute. I have lots of 5' mast sections and some antennas (2m-440).

Bruce

1124. Queen Creek: Traffic Alerts Map Oct. 20-27

Yahoo group: Queen_Creek_Hams
Date: 2011-10-21 14:42:15 UTC
From: Joe Sammartino
Topic: 1124 Message: 1124

Traffic Alerts Map Oct. 20-27
Posted Date: 10/20/2011

1. *Rittenhouse Road north of Combs Road*
Crews will be working in the area completing utility repairs. They will be working on the shoulder of the road, near traffic. No traffic restrictions are in place at this time.

2. *Ellsworth and Aldecoa roads*
Crews will be working near the north driveway of the Town Hall to repair a damaged utility line. Crews will have the parking area in front of Town Hall closed during working hours.

3. *Hawes and Chandler Heights roads*
Crews will be working on the southeast corner of the intersection completing repairs to the traffic signal. The northbound bicycle lane will be closed while crews complete the work.

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.
Traffic Alerts Map Oct.20-27<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=9839>

1125. Queen Creek: Road closures in Queen Creek Oct. 24

Yahoo group: Queen_Creek_Hams
Date: 2011-10-21 14:43:35 UTC
From: Joe Sammartino
Topic: 1125 Message: 1125

Road closures in Queen Creek Oct. 24
Posted Date: 10/20/2011

Road closures and traffic restrictions keep construction on schedule and improve safety for both motorists and construction crews. The following traffic restrictions will be in effect between 7 a.m. and 5 p.m. Monday, Oct. 24:

Victoria Lane between Ellsworth Loop Road and Ellsworth Road will be closed to all traffic while crews complete surface seal. Access to adjacent businesses will be from either Ellsworth Loop Road or Ellsworth Road or Maya Road.

195th St. north of Ocotillo Road will be closed to all but local traffic while crews complete surface seal. Local residents will still be able to access 195th St. during construction activities.

To keep updated on traffic announcements, subscribe to Traffic Alerts using the E-news feature of the Town's website, www.queencreek.org, or follow www.facebook.com/queencreek or www.twitter.com/TOQC_official.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday October 24, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 3 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

In case anyone in our Group is interested - Joe, N2QOJ

Town of Queen Creek offers surplus vehicles for purchase
Posted Date: 10/24/2011

Surplus vehicles from the Town of Queen Creek
<http://www.queencreek.org/>are currently available in a public
auction on
www.publicsurplus.com.
Auctions<http://www.publicsurplus.com/sms/queencreek,az/list/current?orgid=65704>start
at $1 and all vehicles will be listed with its condition as of last
use.

To place a bid on a vehicle, visit
publicsurplus.com<http://www.publicsurplus.com/sms/queencreek,az/list/current?orgid=65704>
and
search by region and agency to view Town equipment. The site contains
images and starting bids for each item. Items will be added for auction when
available throughout the year. All purchases are final and warranties are
not offered. Services tags are included on the items, allowing users to
track original specs.

To keep updated on Town news and happenings visit the Town's website at
queencreek.org <http://www.queencreek.org/Index.aspx?page=126>, or follow
www.facebook.com/queencreek or www.twitter.com/TOQC_official.

It's probably not the radio but the &%$#%&^$# new SMA to UHF adaptor that shipped with the radio last week. It took me a long time to figure it out.

I switched from my mobile/base radio to my HT, on the house antenna, and finally discovered why the HT has been intermittant when using an external antenna (on the house or car) - a bad (brand hew, high quality) SMA to UHF adaptor! When I manually pressed the cables into the adaptor, I got a fine signal report. When I let up, NOTHING.

I wonder how many other Hams have problems with adaptors? It can be a very, very frustrating experience!

Oh, were you copying me on *simplex*? I thought you meant on one of the 2M nets I worked this evening ... I was in the front yard and my battery is down to about 3/4 power. But, I had it on "high" power or about 3 watts output which should be plenty to reach you, I thought ...

Yeah, I meant the nets. I didn't try to listen to your direct. Should have.

My buddy in CA verified that the SMA-UHF connector was out of tolerance - the threads. I'm still waiting for a replacement - you remember the one you found as bad. I wonder if another supplier might be better than the Chinese.

Kenn, did you get that adapter from Wouxun or is it another manufacturer?

Attachments: 2 described; binary payloads are missing from this source WARC

Bruce,

The adaptor LOOKS great but has a "gap" when all the connections are made. If one tries to twist or pull on the cables, the adaptor parts move apart, slightly. I've seen this before in other UHF connectors. It results in an intermittant operation, especially on transmit. I think my SWR meter would have indicated the problem if I had it in-line.

The adaptor came from the company that I bought the Yaesu FT-60R from - HamCity, https://www.hamcity.com/store/pc/home.asp . I'm sure it was made in China, like everything else ...[?]

Hi guys,

Thanks for trying....I pulled the plug at about 9 PM or so after running into a technical snag. Also, I'm no fan of 146.46 since EVRG can turn that their link on and off at will.

As for Kenn's transmitted audio - it sounded low to me as well. At the same time, I've Qso'ed with Kenn before while he was using a GE MVS radio and the audio was fine.

Regards,

Joe, N2QOJ

1141. another experiment

Yahoo group: Queen_Creek_Hams
Date: 2011-10-27 04:22:20 UTC
From: Joe
Topic: 1141 Message: 1141

I just setup a low power cross band repeater.

input - 146.56 with PL of 131.8

output - 446.025 with PL of 141.3

Please give it a try and I'll be listening.

Thanks,

Joe

1146. Re: Repeater in the San Tans?

Yahoo group: Queen_Creek_Hams
Date: 2011-10-28 22:55:26 UTC
From: wb7osr
Topic: 1078 Message: 1146

Group,

On account of our QC Group is growing and we have 20 or so Hams that have new licenses, I am sure that there is an interest in which repeaters have the strongest signal in Queen Creek [including our friends in San Tan Valley :-)].

So, with that in mind, I am suggesting folks check out the following repeaters and get back to the Group with signal reports.

145.410 Pinal Peak
146.740 Signal Butte
146.920 Mount Ord
147.120 East Mesa
147.240 Shaw Butte
449.825 Mercy Gilbert

73,

Kenn, WB7OSR

I have attempted to try each of the repeaters listed below. My location is Johnson Ranch with a mobile vertical antenna about 10 feet above ground.

Output Name Shift PLTone
145.410 Pinal Peak (-600 KHz) 141.3 - 59+
146.740 Signal Butte (-600 KHz) 162.2 - 59+
146.920 Mount Ord (-600 KHz) 162.2 - Noisy
147.120 East Mesa (+600 KHz) 162.2 - 59+
147.240 Shaw Butte (+600 KHz) 162.2 - Noisy
449.825 Mercy Gilbert (-5 MHz) 100.0 - Could not key up repeater

Also , I just thought that I would add that there is a repeater on Pinal Peak at 147.200 that also is easily operable from here in Johnson Ranch.

Hello Conrad,

If you have the frequencies and the PL tone, and the shift set right you should be able to hit the repeater, especially the one on Pinal Peak.

If these are not set correctly, you will not be able to activate the repeater even though you may here people.

Dennis

Folks,

(1) Please sign your posts so we can address each other correctly in subsequent posts.

(2) When responding to a post, try to minimize the forwarded previous post material and quote just the relevant parts as necessary to make your point, provide an example, cite a specific item, etc..

(3) The Group is all about exchanging information. So, in your posts, please be as complete as possible and anticipate the obvious questions.

Thanks,

Joe, N2QOJ - Group Moderator

Repeater Call, Organization, location, PL, etc.....

That kind of information would be helpful to those unfamiliar with "147.36".

Thanks,

Joe, N2QOJ

And ... thanks to Thomas Miller, KN8PNW, we have another Mt. Ord repeater to add to The List -- at 147.36. I tried this one from my HT in the front yard and was able to key the repeater and get a strong signal in response.

Output Name Shift PLTone

145.410 Pinal Peak (-600 KHz) 141.3
146.740 Signal Butte (-600 KHz) 162.2
146.920 Mount Ord (-600 KHz) 162.2
147.120 East Mesa (+600 KHz) 162.2
147.200 Shaw Butte (+600 KHz) 162.2
147.240 Shaw Butte (+600 KHz) 162.2
147.360 Mount Ord (+600 KHz) 162.2
449.825 Mercy Gilbert (-5 MHz) 100.0

So, to date, we're identified eight repeaters that many of us can "work" from areas in Queen Creek/San Tan Valley -- depending. Depending on power, antenna type and height (HT, mobile, base, etc.) and location.

In the near future, I hope to put together a list of local nets that we can monitor from Queen Creek/San Tan Valley and, maybe join in if they are interesting to us.

I know of three members of the QC Ham club that are putting up antennas on their homes this week, and our club is growing.

We have radios, now we need to "exercise" them!

73,
**

Date: 2011-10-31 03:57:00 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1163 Message: 1163

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday October 31, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 3 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

I am a dope!!!

I had the setting wrong for the calendar so only I could view it.

Try again.....

Look at the home page and in the left margin where links, photos, etc., are
located.

Let me know if you have a problem.

1168. ATN-AZ Nets

Yahoo group: Queen_Creek_Hams
Date: 2011-11-02 16:32:37 UTC
From: ars_k1atv
Topic: 1168 Message: 1168

The Amateur Television Network-Arizona (ATN-AZ) nets occur every Sunday and Wednesday evening at 6:30 PM on the WA6SVT White Tanks HAM TV repeater and the W7ATV Shaw Butte HAM TV repeater and the audio is simulcast on the 146.84 MHz Shaw Butte 2-meter repeater.

You can also watch them online at batc.tv. Ask me how.

Plans are under weigh to link the White Tanks WA6SVT repeater with the Mt Lemmon W7ATN HAM TV repeater so ATVers in Southern Arizona will be able to participate fully.

Bil Munsil
K1ATV HAM TV
Mesa AZ
Hams should be SEEN as well as heard.

1169. Re: [Queen_Creek_Hams] Re: Repeater in the San Tans?

Yahoo group: Queen_Creek_Hams
Date: 2011-11-02 17:19:17 UTC
From: Bruce Barnes
Topic: 1078 Message: 1169

I checked the calendar (wow!) and spotted the 2100 net. I met the kid that runs this net sometimes - he's probably 16 years old. Here's a little more info on that net.

Daily
2100 Net

Held on the Arizona Repeater Association RimLink system every night at 9 PM. Two-meter frequencies available in the Mesa-Phoenix area are 147.36 Mt Ord (162.2 Hz, +600 Shift) and 147.20 Pinal Peak (162.2 Hz, +600 Shift). Also on Mt. Elden, Flagstaff, 147.14 and Greens Peak, Show Low, 146.72.
Procedure followed on the 2100 Net

Round One: Early check-in-and-out, followed by roll call. Follow with Late or Missed check-ins.

Round Two: Roll call of those who are checked in from Round One, and each takes a turn to comment on the day's activities, or the topic of participant's choice. Followed with Late or Missed and Visitor check-ins before closing the net.

The net runs about an hour.

There is a different Net Control each night, and each Control keeps a list independent of the others.

One addition - many HAM TV repeaters are cross band and require two sets of antennas.

1177. RE: [Queen_Creek_Hams] Re: Repeater in the San Tans?

Yahoo group: Queen_Creek_Hams
Date: 2011-11-05 17:59:20 UTC
From: Norm
Topic: 1078 Message: 1177

I've been following the group for some time; even attended a breakfast a while back. Even though the club that has formed is associated with Queen Creek, how does the San Tan Valley area play in all this? I would be interested if I understood this. Probably need to meet and chat more in person with a few. It's been difficult to schedule the Saturday Breakfasts, which I think is an excellent idea. A chat on the phone or lunch somewhere?

Back on Topic …

Another repeater to try is Chandler Regional Hospital, a close neighboring repeater which is relatively new and may not show up on some repeater lists.

Location: Dobson and Fry, 35 watts, ant at 50'.

442.975 Mhz W7MOT Chandler Hospital -5 Khz 100.0 hz

This repeater may have some shadows to those close in to the mountains, but for the most part should have line of site. I'm located near Skyline and Schneph Rd and hit the repeater using HT 4watts into a X500 ant at 20' with enough umph.

There is a net being organized by the hospital's emergency communications director to include other hospitals and services, but it's not active yet.

My interests aren't particularly in net operations but more in technical areas, experimentation, and net facilitations.

BTW, there is an ARRL FMT (Frequency Measurement Test) Wednesday 9 November at 8pm. I'll be participating if anyone is interested in participating or observing, I'll give location.

Joe, N2QOJ

Regards,

Joe

On Oct 30, 2011 7:45 PM, "Kenn Burnell" <wb7osr.kenn@...> wrote:

And ... thanks to Thomas Miller, KN8PNW, we have another Mt. Ord repeater to add to The List -- at 147.36. I tried this one from my HT in the front yard and was able to key the repeater and get a strong signal in response.

Output Name Shift PLTone

145.410 Pinal Peak (-600 KHz) 141.3
146.740 Signal Butte (-600 KHz) 162.2
146.920 Mount Ord (-600 KHz) 162.2
147.120 East Mesa (+600 KHz) 162.2

147.200 Shaw Butte (+600 KHz) 162.2

147.240 Shaw Butte (+600 KHz) 162.2

147.360 Mount Ord (+600 KHz) 162.2
449.825 Mercy Gilbert (-5 MHz) 100.0

So, to date, we're identified eight repeaters that many of us can "work" from areas in Queen Creek/San Tan Valley -- depending. Depending on power, antenna type and height (HT, mobile, base, etc.) and location.

In the near future, I hope to put together a list of local nets that we can monitor from Queen Creek/San Tan Valley and, maybe join in if they are interesting to us.

I know of three members of the QC Ham club that are putting up antennas on their homes this week, and our club is growing.

We have radios, now we need to "exercise" them!

Hello Norm (and Group),

Nice to hear from you! I remember talking your ear off at breakfast regarding Moto days.

San Tan Valley is absolutely on our radar. San Tan Valley areas are included in our QC disaster plan and we have many members in STV. We should probably adjust the name of our emerging club.

As for the repeater info....I think the shift you noted is incorrect. I'm pretty sure that the frequency is correct, 442.975 MHz, but I believe the shift is UP 5 MHz, not down, PL is 100.

Please confirm, thanks,

Joe, N2QOJ

Hi, Norm.

Of *course* you are welcome. The Club is open to any Ham, anywhere. You notice I specifically mentioned San Tan Valley in one of the messages that you referenced below.

As far as Queen Creek is concerned, the last time I saw a map, it extended east, half way to Coolidge and included communities such as Copper Basin, Johnson Ranch and San Tan Valley, all in Pinal County, which are not yet incorporated into separate "legal" communities. Please correct me if I'm wrong. [?] If memory serves, you folks have some neighbors who offered you-all sovereignty if you were willing to pay "tribute" to them. What was it, U$D ten million a year?

1181. Cloning Cable for FT060R

Yahoo group: Queen_Creek_Hams
Date: 2011-11-06 03:10:24 UTC
From: wb7osr
Topic: 1181 Message: 1181

Does anyone know where I can borrow a cloning cable that can clone an FT-60R -- for the Club meeting on Thursday, November 10? I understand that a Kenwood cloning cable might also do the job.

TIA,

Kenn, WB7OSR
WB7OSR.Kenn@Gmail.Com <mailto:WB7OSR.Kenn@...>

1183. Re: Repeater in the San Tans?

Yahoo group: Queen_Creek_Hams
Date: 2011-11-06 14:02:40 UTC
From: wb7osr
Topic: 1078 Message: 1183

Norm,

I'm sorry I neglected to respond to your suggestion that we look at the Chandler Regional Hospital's repeater. I wonder if that repeater is associated with the EVRG, that works with Chandler Regional and Mercy Gilbert hospitals and works with the hospitals' emergency communications directors. EVRG doesn't mention it on their Web site, http://eastvalleyrg.ning.com/?xg_source=msg_mes_network <http://eastvalleyrg.ning.com/?xg_source=msg_mes_network>

In any case, I could not reach that repeater from my QTH in Central Queen Creek with 50 watts on a 2M J-Pole antenna. You may have a location, further north, that is in a better position to reach that repeater or I may have too many obstructions in the way to reach it. If I can't reach it, our members in San Tan Valley wouldn't have much of a chance. So, for now, I'll keep that one on my personal repeater list but won't add it to our list of "QC Suggested Repeaters." We are particularly interested in repeaters that our members can work with HTs using various kinds of antennas.

About the ARRL Frequency Measuring Test, http://www.arrl.org/frequency-measuring-test <http://www.arrl.org/frequency-measuring-test> http://www.arrl.org/news/arrl-frequency-measuring-test-scheduled-for-tue\sday-april-12 <http://www.arrl.org/news/arrl-frequency-measuring-test-scheduled-for-tu\esday-april-12> , you may want to leave a separate message for the group on the test. I don't know how many members have or use HF or are active members of the ARRL and, therefore, would be aware of the MFT.

73,

Kenn, WB7OSR

Even though the club that has formed is associated with Queen Creek, how does the San Tan Valley area play in all this? I would be interested if I understood this. Probably need to meet and chat more in person with a few. It's been difficult to schedule the Saturday Breakfasts, which I think is an excellent idea. A chat on the phone or lunch somewhere?

1184. Repeaters Available to Members in Queen Creek

Yahoo group: Queen_Creek_Hams
Date: 2011-11-06 14:27:15 UTC
From: Kenn Burnell
Topic: 1184 Message: 1184

All,

This is my suggested list of repeaters that members in Queen Creek test with. I dropped off one repeater in Gilbert that was too far from east Queen Creek in San Tan Valley. Further testing may reduce or expand the list. There will be at least one more repeater (in Queen Creek!) coming up in the near future. Any comments or suggestions are always welcome.

Output Name Shift PLTone Comments

145.410 Pinal Peak (-600 KHz) 141.3
146.740 Signal Butte (-600 KHz) 162.2
146.920 Mount Ord (-600 KHz) 162.2 May have limited use from San Tan Valley
147.120 East Mesa (+600 KHz) 162.2

147.200 Shaw Butte (+600 KHz) 162.2

147.240 Shaw Butte (+600 KHz) 162.2 May have limited use from San Tan Valley

147.360 Mount Ord (+600 KHz) 162.2

There are on-line propogation maps that we can use to evaluate theoretical repeater coverage but they are beyond my area of knowledge for now.

From: ars_k1atv
Topic: 1078 Message: 1185

Has anyone tried the 146.84 repeater, W7ATV, on Shaw Butte?

It belongs to the AATV and simulcasts the subcarrier audio from the HAM TV repeater during nets (watch the video on CABLE channel 57 with an outdoor, vertically polarized UHF beam).

With enough power I can access 146.84 from here.

It is also a general purpose repeater.

Bil
K1ATV HAM TV
East Mesa AZ

PS - You can also watch the nets online and check in with video SKYPE.

1186. Re: Repeater in the San Tans?

Yahoo group: Queen_Creek_Hams
Date: 2011-11-06 17:25:58 UTC
From: wb7osr
Topic: 1078 Message: 1186

Hi, Bil.

I didn't know the 146.84 repeater was general purpose. Thanks for pointing it out.

I just tried it from my QTH at about Ellsworth and Chandler Heights Roads and couldn't get it to respond with my HT, or base radio (PL of 162.2) running 35 watts into a J-Pole, about 15' off the ground.

I'll put that repeater on The List to Test, along with Chandler Regional Hospital @ 442.975, after I get the "permenant" antenna up on the roof, some time in the future.

> PS - You can also watch the nets online and check in with video SKYPE.

I don't have cable or SKYPE but, I do have Internet. How do I watch the nets online? Do you mind taking this subject to a new message Topic? Repeater in the San Tans is up to about 40 messages and it's too large.

73,

Kenn

1187. 448.775 (-) PL 100.0

Yahoo group: Queen_Creek_Hams
Date: 2011-11-07 01:55:41 UTC
From: Joe, N2QOJ - ARRL VEC VE
Topic: 1187 Message: 1187

Our repeater is on-line but for testing purposes only.

Please try to use it locally and feedback any issues to me directly.

The TX coverage area should be large - in other words, you should be able to hear the output for good distances.

The RX side is purposely attenuated so we can keep it to local testing only.

Please feed back to QueenCreekARC@... or leave message at the QC Amateur Radio Club phone, 480-389-1426.

Thanks,

Joe, N2QOJ

1188. Arizona Emergency Net - Maricopa, 11/7/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-11-07 03:55:14 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1188 Message: 1188

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday November 7, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 4 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Joe, N2QOJ - ARRL VEC VE
Topic: 1187 Message: 1189

Hello folks,

The PL has been changed to 136.5 Hz. Please adjust your transmitted (encoded) PL.

Please keep transmission no longer than 1 minute for now. The transmitter is running a little hot so we don't want to stress it.

I will monitoring the repeater testing most of the time but please do not hesitate to contact me if you hear any strange transmissions or stuck transmissions.

Thanks,

Joe, N2QOJ

1190. HAM TV Nets online

Yahoo group: Queen_Creek_Hams
Date: 2011-11-07 15:57:23 UTC
From: ars_k1atv
Topic: 1190 Message: 1190

Thanks for asking.

To watch the two HAM TV nets on Wednesdays and Sunday do this:

NOTE: There are two nets both nights but most folks check into each one.

The ATN-AZ net starts at 6:30 PM and the AATV net starts at 7:30 PM.

There is usually activity before 6:30 as well for testing.

Go to

batc.tv - that stands for British Amateur Television Club.

Click on ATV Repeaters.

If W7ATV is listed in the Streaming box

Highlight it and

Click on View Stream.

You should see the WA6SVT ID screen. It may soon change to W7ATN, however.

You will be listed as Guest - some number.

To check in enter /nick a space and an ID.

For example I enter /nick K1ATVBil

Bil
K1ATV

PS - At other times of day and days of the week there may be activity on some of the other HAM TV repeaters that are streaming.

On ATV net nights you may also check in on it - as W7ATA, Arturo, and several others usually do. The ATV audio is simulcast.

From: Bruce Barnes
Topic: 1078 Message: 1192

Hi Norm,

A few of our "members" live out in San Tan Valley. I'd like to try a Saturday lunch sometime too. WB7TUJ doesn't do mornings but he does do lunch. He's been helping us with technical issues and moral support.

There are really two things going on here. First is the very comfortable and small group of long-time hams who have been organized (loosly) for some time. Second is a recruiting effort to produce new hams to support the soon-to-be-graduated corps of CERT volunteers. The CERT and ham volunteers will plug in to the town of Queen Creek's general emergency response plan.

The town's planning area is much larger than it's official boundaries so for now, we're including folks from San Tan Valley in things.

I'm the least technical of the group, but I'm the one recruiting the new hams and organizing and facilitating their education and training. Feel free to give me a call - I work from home - 480-567-8422. If Joe or Jim read this and think a Saturday lunch might work out one of these days, you may be able to drop in in addition to the elusive WB7TUJ.

Cheers,
Bruce

Joe, all, correction the frequency is 442.975 Mhz shift +5 PL 100hz. Must be a typo on my part. I did enjoy the social breakfast, would look forward to more. Norm

Subject: Re: [Queen_Creek_Hams] Re: Repeater in the San Tans?

Hello Norm (and Group),

Nice to hear from you! I remember talking your ear off at breakfast regarding Moto days.

San Tan Valley is absolutely on our radar. San Tan Valley areas are included in our QC disaster plan and we have many members in STV. We should probably adjust the name of our emerging club.

As for the repeater info....I think the shift you noted is incorrect. I'm pretty sure that the frequency is correct, 442.975 MHz, but I believe the shift is UP 5 MHz, not down, PL is 100.

Please confirm, thanks,

Joe, N2QOJ

On Sat, Nov 5, 2011 at 10:59 AM, Norm <aa7oo.az@...> wrote:

I’ve been following the group for some time; even attended a breakfast a while back. Even though the club that has formed is associated with Queen Creek, how does the San Tan Valley area play in all this? I would be interested if I understood this. Probably need to meet and chat more in person with a few. It’s been difficult to schedule the Saturday Breakfasts, which I think is an excellent idea. A chat on the phone or lunch somewhere?

Back on Topic …

Another repeater to try is Chandler Regional Hospital, a close neighboring repeater which is relatively new and may not show up on some repeater lists.

Location: Dobson and Fry, 35 watts, ant at 50’.

442.975 Mhz W7MOT Chandler Hospital -5 Khz 100.0 hz

This repeater may have some shadows to those close in to the mountains, but for the most part should have line of site. I’m located near Skyline and Schneph Rd and hit the repeater using HT 4watts into a X500 ant at 20’ with enough umph.

There is a net being organized by the hospital’s emergency communications director to include other hospitals and services, but it’s not active yet.

My interests aren’t particularly in net operations but more in technical areas, experimentation, and net facilitations.

BTW, there is an ARRL FMT (Frequency Measurement Test) Wednesday 9 November at 8pm. I’ll be participating if anyone is interested in participating or observing, I’ll give location.

And ... thanks to Thomas Miller, KN8PNW, we have another Mt. Ord repeater to add to The List -- at 147.36. I tried this one from my HT in the front yard and was able to key the repeater and get a strong signal in response.

Output Name Shift PLTone

145.410 Pinal Peak (-600 KHz) 141.3
146.740 Signal Butte (-600 KHz) 162.2
146.920 Mount Ord (-600 KHz) 162.2
147.120 East Mesa (+600 KHz) 162.2

147.200 Shaw Butte (+600 KHz) 162.2

147.240 Shaw Butte (+600 KHz) 162.2

147.360 Mount Ord (+600 KHz) 162.2
449.825 Mercy Gilbert (-5 MHz) 100.0

So, to date, we're identified eight repeaters that many of us can "work" from areas in Queen Creek/San Tan Valley -- depending. Depending on power, antenna type and height (HT, mobile, base, etc.) and location.

In the near future, I hope to put together a list of local nets that we can monitor from Queen Creek/San Tan Valley and, maybe join in if they are interesting to us.

I know of three members of the QC Ham club that are putting up antennas on their homes this week, and our club is growing.

We have radios, now we need to "exercise" them!

1194. Arizona Emergency Net - Maricopa, 11/7/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-11-07 21:56:11 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1188 Message: 1194

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday November 7, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Hi, Norm.

Of course you are welcome. The Club is open to any Ham, anywhere. You notice I specifically mentioned San Tan Valley in one of the messages that you referenced below.

As far as Queen Creek is concerned, the last time I saw a map, it extended east, half way to Coolidge and included communities such as Copper Basin, Johnson Ranch and San Tan Valley, all in Pinal County, which are not yet incorporated into separate "legal" communities. Please correct me if I'm wrong. If memory serves, you folks have some neighbors who offered you-all sovereignty if you were willing to pay "tribute" to them. What was it, U$D ten million a year?

Yes, it's a MARCA repeater. And Yes, I was involved in the installation. There is also a 900Mhz repeater collocated. There are plans for a VHF and Win Link server being installed, maybe this winter sometime.

MARCA website is www.w7mot.org .

Unless a 440 band repeater has some health elevation relative to a user located 15-30 miles with an HT with a standard antenna xmting a signal of 3-5 watts through the tree line is dicey. .. Elevating the user antenna above the tree line would solve the problem of the repeater's reception. I'm guessing, chandler's antenna altitude is too low. I know I can hit it with an HT from White Tanks and Mt Ord. Just changing the antenna to a magmount on a vehicle or even a pizza pan increases the effective signal strength.

Finding a single repeater that will work for everyone in the QC-STV area is going to be difficult. It may take multiple repeaters that are linked.

I'll start a separate thread on FMT.

Subject: [Queen_Creek_Hams] Re: Repeater in the San Tans?

Norm,

I'm sorry I neglected to respond to your suggestion that we look at the Chandler Regional Hospital's repeater. I wonder if that repeater is associated with the EVRG, that works with Chandler Regional and Mercy Gilbert hospitals and works with the hospitals' emergency communications directors. EVRG doesn't mention it on their Web site, http://eastvalleyrg.ning.com/?xg_source=msg_mes_network

In any case, I could not reach that repeater from my QTH in Central Queen Creek with 50 watts on a 2M J-Pole antenna. You may have a location, further north, that is in a better position to reach that repeater or I may have too many obstructions in the way to reach it. If I can't reach it, our members in San Tan Valley wouldn't have much of a chance. So, for now, I'll keep that one on my personal repeater list but won't add it to our list of "QC Suggested Repeaters." We are particularly interested in repeaters that our members can work with HTs using various kinds of antennas.

About the ARRL Frequency Measuring Test,
http://www.arrl.org/frequency-measuring-test
http://www.arrl.org/news/arrl-frequency-measuring-test-scheduled-for-tuesday
-april-12 , you may want to leave a separate message for the group on the
test. I don't know how many members have or use HF or are active members of
the ARRL and, therefore, would be aware of the MFT.

Subject: Re: [Queen_Creek_Hams] Re: Repeater in the San Tans?

Hi Norm,

A few of our "members" live out in San Tan Valley. I'd like to try a Saturday lunch sometime too. WB7TUJ doesn't do mornings but he does do lunch. He's been helping us with technical issues and moral support.

There are really two things going on here. First is the very comfortable and small group of long-time hams who have been organized (loosly) for some time. Second is a recruiting effort to produce new hams to support the soon-to-be-graduated corps of CERT volunteers. The CERT and ham volunteers will plug in to the town of Queen Creek's general emergency response plan.

The town's planning area is much larger than it's official boundaries so for now, we're including folks from San Tan Valley in things.

I'm the least technical of the group, but I'm the one recruiting the new hams and organizing and facilitating their education and training. Feel free to give me a call - I work from home - 480-567-8422. If Joe or Jim read this and think a Saturday lunch might work out one of these days, you may be able to drop in in addition to the elusive WB7TUJ.

Cheers,

Bruce

1198. Frequency Measurement Test

Yahoo group: Queen_Creek_Hams
Date: 2011-11-08 04:12:35 UTC
From: uniqueoperator
Topic: 1198 Message: 1198

If anyone is interested and has the time, you're invited to observe and/or participate in the ARRL FMT www.arrl.org/files/file/W1AW/Other%20FMT%20files/11092011FMT.pdf happening this Wednesday 9 November 2011. The event starts at 7:15pm local and lasts about 90 minutes. I start preparations about 5pm. If you come early, I'll explain the entire process and even let you touch the dials. All the data collected will be shared for you to review and do your own calculations of the mystery carriers and submit your results.

I'm a bit technical with the basics at times. One fundamental requirement of every Amateur is knowing what frequency they are transmitting on. WHY? We as amateurs share the limited frequency spectrum with others. Regardless of your license class, there are upper and lower band edges you are allowed to transmit. Not just The single frequency transmitted must be within the allocated band but also the modulation. The FCC "rules" were written in a time before solid state and digital radios. Those were the challenging days for Amateurs to really know their basics. With today's solid state radios, it's not to difficult to "dial" in a frequency and be fairly "close". Close being relative. Typically 3 parts per million is a spec on your digital radio ... that equates to plus or minus roughly 42 hz on 20 meters. Not to shabby. But if you're working close to the band edge of your licensed allocation, being plus ... or being minus can make the difference of being "out of the ball park" by the FCC.

There are some questions on the General and Extra class exams that can pop up. They are easy to answer because their mostly math questions and if you did your reading, you shouldn't have any problem answering correctly.

But do you know how it really works in the real world? Is your radio on the plus or minus side; is it really 3 or 2 ppm; do you know if the other guy is on frequency and in band?

The ARRL has two events per year to address frequency measurements, call FMT for short. There are groups that also do FMTs all the time.

I've been doing the ARRL FMT for several years, just for fun. There are typically 75-150 or more contestants for each event that actually send their results in for grading.

I have done this using several methods, tuning fork, stop watch, and GPS. Each method is fundamentally still measuring an RF frequency, but have different resolutions. A tuning fork is good for about 00.2 hz; a stop watch 00.1 hz; A good frequency standard plus counter 00.0001; and them GPS + a reference is all over the place but generally good to 00.00001 hz.

The ARRL FMT is generally looking for accuracy of 00.001 to be dead on, but they typically are looking for something <1hz and then <5hz . All are a piece of cake.

My Shack is open. I typically have 4-5 MARCA members attend but haven't had any confirmation for this year. I have room for 6-7 friendly hams. I'll guarantee you will learn something about the basics of RF that will stick for a long time. please contact me directly if you wish to attend and I'll provide directions and contact information.

Norm:

Sorry, at first I did not recognize the name "uniqueoperator' as AA7OO
from recent San Tan Valley / Queen Creek emails.

The FMT get better every year. Technology now surpasses the accuracy
requirements for the Amateur Service, and has now become a really
interesting competition for Amateurs with various GPS or atomic-standard
disciplined standards.

I assume you have entered this in the past, and I wonder how well you
fared? Also what analog or DSP measurement techniques you used.

This exercise is really fun for those stations suitably equipped. While
the notice is short, I will see if I can fire up my standards in time to
stabilize for this event.

Lets see who else might be interested?

From: Norm
Topic: 1198 Message: 1200

Hi Jim, yes I.ve done this for several years now. I fine using a gps & thunderbolt as a standard clocking an R2600 as the variable oscillator gives results in a clock stable to 10-12th. Measurement is done using SpectrumLab software, PC sound card for data collection. Then using some good statistical analysis tools. I used to use a Rubidium but found it had some conflicting technical issues. Gps gives a more stable clock if antenna is set up correctly.

Your welcome to come over, my clock and vfo have been warmed up for 10 plus days.

And yes these event is more fun when you have the basics understood. One can actually see the effects of doppler in the ionosphere with setup.

>> of every Amateur is knowing what frequency they are transmitting on. WHY?
>> We as amateurs share the limited frequency spectrum with others.
>> Regardless of your license class, there are upper and lower band edges you
>> are allowed to transmit. Not just The single frequency transmitted must be
>> within the allocated band but also the modulation. The FCC "rules" were
>> written in a time before solid state and digital radios. Those were the
>> challenging days for Amateurs to really know their basics. With today's
>> solid state radios, it's not to difficult to "dial" in a frequency and be
>> fairly "close". Close being relative. Typically 3 parts per million is a
>> spec on your digital radio ... that equates to plus or minus roughly 42 hz
>> on 20 meters. Not to shabby. But if you're working close to the band edge
>> of your licensed allocation, being plus ... or being minus can make the
>> difference of being "out of the ball park"!
>> by the FCC.
>>
>> There are some questions on the General and Extra class exams that can pop
>> up. They are easy to answer because their mostly math questions and if you
>> did your reading, you shouldn't have any problem answering correctly.
>>
>> But do you know how it really works in the real world? Is your radio on
>> the plus or minus side; is it really 3 or 2 ppm; do you know if the other
>> guy is on frequency and in band?
>>
>> The ARRL has two events per year to address frequency measurements, call
>> FMT for short. There are groups that also do FMTs all the time.
>>
>> I've been doing the ARRL FMT for several years, just for fun. There are
>> typically 75-150 or more contestants for each event that actually send
>> their results in for grading.
>>
>> I have done this using several methods, tuning fork, stop watch, and GPS.
>> Each method is fundamentally still measuring an RF frequency, but have
>> different resolutions. A tuning fork is good for about 00.2 hz; a stop
>> watch 00.1 hz; A good frequency standard plus counter 00.0001; and them
>> GPS + a reference is all over the place but generally good to 00.00001 hz.
>>
>> The ARRL FMT is generally looking for accuracy of 00.001 to be dead on,
>> but they typically are looking for something <1hz and then <5hz . All are
>> a piece of cake.

>>
>> My Shack is open. I typically have 4-5 MARCA members attend but haven't
>> had any confirmation for this year. I have room for 6-7 friendly hams.
>> I'll guarantee you will learn something about the basics of RF that will
>> stick for a long time. please contact me directly if you wish to attend
>> and I'll provide directions and contact information.

1201. AEN-MAR: Weekly Net; Crossband and Transmit Boost Operation

Yahoo group: Queen_Creek_Hams
Date: 2011-11-08 23:25:54 UTC
From: wb7osr
Topic: 1201 Message: 1201

This is a re-post of a post that Mike Pully, WB4ZKA, put up at the ArizonaHam Yahoo group (http://groups.yahoo.com/group/arizonaham/ <http://groups.yahoo.com/group/arizonaham/>), affiliated with www.AEN-MAR.org <http://groups.yahoo.com/group/Queen_Creek_Hams/www.AEN-MAR.org> to introduce AEN-MAR's Emergency Net to [new] hams who may not be aware of the net and/or AEN-MAR.

Last night's net included a comprehensive discussion and demonstrations of Crossband and Transmit Boost Operations of 2M and 70cm ("440") radios.

Kenn, WB7OSR
WB7OSR.Kenn@... <mailto:WB7OSR.Kenn@...>

AEN-MAR: Participate in the net - MONDAY, 9:00 PM
Posted by: "Mike Pulley" mike.j.pulley@... <mailto:mike.j.pulley@...> wb4zka
Sun Nov 6, 2011 6:56 pm (PST)

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

The focus topic this week is "TRANSMIT BOOST MODE". Many dual-band VHF/UHF mobile radios support "crossband repeat" mode. It can be a powerful boost for handie-talkie operations. But, implemented as shown in the user's manual, it causes lots of problems --operationally and legally. However, with a little reconfiguration, it can be used as "transmit boost" mode, solving those sniggling problems. Your owner's manual won't explain how it's done unless you have a Kenwood radio. For the rest of us, clever selection of receive frequency and transmit offset is all it takes. We'll demonstrate, exercise, and explain why we use transmit boost mode and how.

PREPARATION: Download an Excel configuration tool by Dave, KC7KMT, from www.AEN-MAR.org <http://www.AEN-MAR.org> , the Files section, filename Transmit_Boost_graphical_KC7KMT_20100115.xls. If you are transmit-boost capable, check in ready to activate transmit boost mode. However, pick a different UHF simplex frequency than is shown in the configuration file.

Don't use 446.000 or 446.050, either. (Experience shows that multiple stations sharing the same UHF link frequency cause trouble.)

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****, and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already .

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

EXPECTATIONS: We have fun, but that's not our primary objective. Equipment will be exercised. Mistakes will be made and corrected. Skills will be learned and improved. The net motto is...

Anything worth doing
is worth doing well.
Anything worth doing well
is worth screwing up while you're learning.

Come learn with us.

---

* MCECG - Maricopa County Emergency Communications Group, an informal collection of hams who participate in scheduled public service events as

a means to tactical radio proficiency.

** ARES - Amateur Radio Emergency Service, an ARRL-sponsored organization that promotes Amateur Radio emergency communication services to civic agencies.

*** EOC - Emergency Operations Center, a tactical civic (state, county, or municipality) emergency response organization, usually located in a fortified "war room" containing lots of communications equipment.

**** RACES - Radio Amateur Civil Emergency Service, a government-sponsored organization that promotes Amateur Radio emergency communication services to civic agencies.

From: Bruce Barnes
Topic: 1201 Message: 1202

I've been listening to these nets recently but I was unable to listen in
last night. So many nets, so little time.

East Valley Repeater Group
Monday November 14, 2011
8:00 pm - 9:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 1 day, 23 hours, 3 minutes.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

1214. East Valley Repeater Group, 11/14/2011, 8:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-11-15 01:55:39 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1210 Message: 1214

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday November 14, 2011
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Topic: 1211 Message: 1215

During my naval travels during that era, we were lucky and had 2 of these on USS Spiegel Grove. They were one of our goto receivers.

1216. Repeater changes

Yahoo group: Queen_Creek_Hams
Date: 2011-11-17 03:34:07 UTC
From: Joe Sammartino
Topic: 1216 Message: 1216

Courtesy beep has been turned off.

Hang time is now set to ONE second.

The repeater will time out after 2 minutes and 30 seconds of continuous valid carrier/PL reception.

Please report any strange repeater activity.

Thanks,

Joe, N2QOJ

Please set time-out-timers on your radios to 2 minutes or less.

Thanks for the update Joe.

A few times I've heard a beeping, sort of like multiples of the first courtesy tone you'd programmed, come over a transmission. The voice falls off during the tones, but comes back again. I don't believe that's a timeout since the person comes right back on. I'll see if I can find an example on my recordings.

Cheers,
Bruce

No need, I've heard them. Two possibilities: the controller thinks its hearing dtmf tones or its the warning before the tot kicks in. Im thinking its the false dtmf scenario.

1221. Emergency Backup Power for Small Rigs (HTs)

Yahoo group: Queen_Creek_Hams
Date: 2011-11-20 04:07:05 UTC
From: wb7osr
Topic: 1221 Message: 1221

How about a rechargeable device that may be able to start your car if the battery fails, and can power or recharge your HT -- for $22.99 ?

Jim's Ace Hardware on Power Road below Chandler Heights Road will be selling a Peak Rechargeable Cordless Jump Starter for $22.99, after rebate and taxes, from November 25-November 27. Among other things, It has a 12 volt power outlet into which one can plug a "car charger" cord for an HT, an inverter, or a battery eliminator. This battery eliminator is for an FT-60R -
http://www.ebay.com/itm/ws/eBayISAPI.dll?ViewItem&item=180544001734&ssPa\
geName=ADME:L:OU:US:1123
<http://www.ebay.com/itm/ws/eBayISAPI.dll?ViewItem&item=180544001734&ssP\
ageName=ADME:L:OU:US:1123>

[http://i.ebayimg.com/t/Battery-Eliminator-Yaesu-FT-60R-VX-170-VX-177-FT\
-60-/21/%21B7%29fUPQCGk%7E$%28KGrHqQOKnUEy0HPFSr%21BM1LtG33Q%21%7E%7E0_1\
2.JPG]

This device can power an FT-60R from a 12 volt DC source without using an internal battery; hence, it is a battery eliminator. Maybe there's a similar device for a Wouxum HT.

One can also run an FT-60R with the 110 volt charger plugged in. It will run the HT on receive but not transmit. It is not recommended to leave the FT-60R's charger plugged in to recharge the NiMH battery for more than 24 hours, continuously.

Arizona Emergency Net - Maricopa
Monday November 21, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 4 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1227. New Repeater to try

Yahoo group: Queen_Creek_Hams
Date: 2011-11-27 17:05:03 UTC
From: Joe, N2QOJ - ARRL VEC VE
Topic: 1227 Message: 1227

Hi Folks,
I just finished building a portable repeater yesterday and would appreciated lots of activity on it this week.
Its at 446.575 (-) with a PL of 141.3. The output is encoded in case you would like to decode as well.
Its located at my residence, roughly Queen Creek Road and Sossoman Rd. The antenna is up about 20 feet from my second floor patio. I think signal reception to the South and Southeast should be good while all other compass points should be ok.
Please give it a try. I'll be monitoring all day today and most of the upcoming week. I'll post some photos of it later today.
Regards,
Joe, N2QOJ

1228. Re: [Queen_Creek_Hams] New Repeater to try

Joe,

> The output is encoded *in case you would like to* decode as well.

This statement might not be clear to the new Hams. As I understand it, we won't receive the output of the repeater until/unless we decode the signal. Isn't that correct? If so, decoding is not optional as I think your statement implied.

TIA,

Kenn, WB7OSR

1229. Re: [Queen_Creek_Hams] New Repeater to try

Yahoo group: Queen_Creek_Hams
Date: 2011-11-28 02:58:55 UTC
From: Bruce Barnes
Topic: 1227 Message: 1229

Actually Kenn, decoding a repeater's output is optional. You're just setting your radio to not open the squelch unless the received carrier wave is encoded with the proper subaudible tone. We used to do that all the time in southern California. The density of repeaters was high there and it was not uncommon for coordinated repeaters to be using the same frequency pair within hearing distance of each other. In one case we could hear a not-too-distant repeater on our repeater's output. Each machine encoded the output and used a different PL so we could turn on PL decode on our radios and only hear our repeater. I do that sometimes for our repeater here so I don't hear the golf course all day long.

Arizona Emergency Net - Maricopa
Monday November 28, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 4 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1234. RE: [Queen_Creek_Hams] New Repeater to try

Yahoo group: Queen_Creek_Hams
Date: 2011-11-29 14:58:04 UTC
From: Norm
Topic: 1227 Message: 1234

Hi All,

This may be of interest to all since it's a relativity new group of old hams and mostly new. So to those brave enough to read on, take it with a little "tongue in cheek".

The Amateur community is made up of what I call generalists, technologists, and "On the Air" groups. We also come in flavors or mixtures of the three. From here we all get a little mixed and begin to define smaller more specialized. Some go into "contesting" others "DXing", yet another big group is "Emergency Service", and there are many more.

We are also a mix of young and old, all genders, from all regions of the world.

It's a complicated mix.

One thing we all have in common is we love to exercise our hobby and apply our learned skills.

One of our biggest issues is "language", not meaning English or Spanish as a language, but definitions and the choice of words that we attach the definitions to. Sometimes it take hours of friendly rag chewing sometimes Over the Air and other times Over the Coffee. We love it because it's how we communicate back and forth and came to define a very simple yet complex method of "Getting the Message Across". This is seen in how "Nets" work and it's this skill of communicating that is used in the Emergency Service Nets.

Example

As Joe was talking about the output of his repeater being encoded, many would question this because we don't actually encode they type of repeater being discussed. See, Joe, Ken and I assuming Joe was talking about an "FM" "Analog" "Duplex" repeater. In this case we assume his use of the word "encode" is a PL sub-audio tone used to "Squelch" the receiving user's radio IF it is programmed with the "Tone Squelch" feature.

Our Ham language is full of "assumptions" that can be confusing. A reason is as Joe mentioned, depending on what area or region of the world you come from, the words and definitions get attached differently. Not that it's wrong, it's like having an Accent with your language, like "Southern" or "Easterner" or "Texan" (Sorry Texans).

Us old timers in Amateur Radio have some experience in understanding and putting the correct definition with the words that are being spoken or read.

Ken's concern is well taken. We need to take care how we are using our definitions and words in a unique group as the Queen Creek Hams. We have a

large number that are new to the hobby and the language.

More training in both the basics of the Technology, Methods of Operation, and the Language.

Hopefully this gives some insight to Ken's reply, Joe's response, and why I sort of wiggled into this with a "sidebar".

Subject: Re: [Queen_Creek_Hams] New Repeater to try

Actually Kenn, decoding a repeater's output is optional. You're just setting your radio to not open the squelch unless the received carrier wave is encoded with the proper subaudible tone. We used to do that all the time in southern California. The density of repeaters was high there and it was not uncommon for coordinated repeaters to be using the same frequency pair within hearing distance of each other. In one case we could hear a not-too-distant repeater on our repeater's output. Each machine encoded the output and used a different PL so we could turn on PL decode on our radios and only hear our repeater. I do that sometimes for our repeater here so I don't hear the golf course all day long.

On Sun, Nov 27, 2011 at 7:09 PM, Kenn Burnell <wb7osr.kenn@...> wrote:

Joe,

> The output is encoded in case you would like to decode as well.

This statement might not be clear to the new Hams. As I understand it, we won't receive the output of the repeater until/unless we decode the signal. Isn't that correct? If so, decoding is not optional as I think your statement implied.

TIA,

Kenn, WB7OSR

<jsammartino@...> wrote:

Hi Folks,

I just finished building a portable repeater yesterday and would appreciated lots of activity on it this week.

Its at 446.575 (-) with a PL of 141.3. The output is encoded in case you would like to decode as well.

Its located at my residence, roughly Queen Creek Road and Sossoman Rd. The antenna is up about 20 feet from my second floor patio. I think signal reception to the South and Southeast should be good while all other compass points should be ok.

Please give it a try. I'll be monitoring all day today and most of the upcoming week. I'll post some photos of it later today.

Regards,

Joe, N2QOJ

Hi Norm and Group -

Thanks for your comments.

Two points to clarify:

1 - the response to Kenn's comments was from Bruce, KF6EZT

2 - I believe Kenn assumed that the new crop of 35 newly minted hams in QC/San Tan Valley are members of this YAHOO QC Hams Group. That is not the case at all. Of the 35 or so new hams, only 2 or maybe 3 are members of this Group. Since I manage the Group, I am very much aware of that fact so my portable repeater announcement was not directed to the new hams at all.

Regards,

Joe, N2QOJ

From: Joe Sammartino
Topic: 1236 Message: 1236

Please ignore...

I noticed that my previous message had some goofy characters, probably
because my browser was set to Western character encoding instead of Unicode.

Just wanted to see if this setting makes a difference.

Regards,

Joe

Confirmed....

Just set your browser to Unicode character encoding, AKA UTF-8, and no more goofy characters in the messages.

Joe

Date: 2011-12-05 03:55:11 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1242 Message: 1242

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday December 5, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
(The next reminder for this event will be sent in 18 hours, 4 minutes.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

East Valley Repeater Group
Monday December 5, 2011
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

If any of you use APRS and like to see what activity is going on
locally, try http://aprs.fi and navigate to Queen Creek.
Or, click on this link: http://aprs.fi/?call=a%2FQCARC&_s=ll
You should also be able to see the object "QCARC" at Founders Park.
Click on it to get more info. It will be shown only today and tonight
to help local hams see our club meeting location.
Regards,
Joe, N2QOJ

This will be an interesting and fun meeting tonight. Should be lots of participants.
We will be building 1/4 wave 440 antennas using the SO-239 chassis connector and 10 gauge wire method - with a twist.
No soldering necessary - or bolts!
I will also be bringing our newly constructed portable repeater for show and tell.
Hope to see you there,
Joe, N2QOJ

I have a cheap SWR meter that's only good to 30 Mhz so I calibrated it with a bird watt meter an found it works well beyond 450. Power isn't always correct but SWR is very good

Tom,

THANKS! What a Great Idea!

At most/many Ham fests one can often find cheap old *CB* SWR/Power/Field Strength meters for sale at about $5-$15. Those meters would be fine, especially for new hams, to use as SWR meters on 2 meters/70 cm and to recalibrate the power section to, say, 50 watts full scale to get a pretty good idea of relative power output of "small" rigs.
Kenn, WB7OSR

There was a post on Eham.net or QRZ.com a couple of days ago that explained how to perform vhf/uhf swr measurements Eva with an HF swr meter.

Regards,

Joe

East Valley Repeater Group
Monday December 12, 2011
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

1263. Arizona Emergency Net - Maricopa, 12/12/2011, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2011-12-12 15:56:50 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1263 Message: 1263

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday December 12, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

I paid $10 for one that says its a "Calrad model 65-287" at ham fest in the Valley.

Remember that the diodes in a cheap meter are non linear with respect to power which may cause the SWR to change with increased power!! The true reading is the one using the lowest power.

Topic: 1246 Message: 1266

I guess that as I approach 53 years in Amateur radio I may be con screwed as an OF.

Reversing the coaxs removes any variation as described in the reference article. I took this into account when calibrating against the bird watt meter and found no difference. The non linearity of diodes problem still exists so watch your power effects. A good club project would be to acquire a Bird Meter on loan and check everybody's old SWR bridge.

Not trying to get into a long discussion on the web, but let it be said that it is far to easy to mis-use an SWR bridge when it can be used properly to tune an antenna. High SWR does not mean that the antenna will not work.

1268. See the ISS tonight

Yahoo group: Queen_Creek_Hams
Date: 2011-12-16 00:59:24 UTC
From: Joe, N2QOJ - ARRL VEC VE
Topic: 1268 Message: 1268

If the cloudy skies subside, tonight will be a great chance to see ISS:

Pass beginning
Date/time: 12/15 18:27:20
Azimuth: 221.54° (SW)
Elevation (altitude): 0.16°
Magnitude: 1.3
Distance to satellite: 2301.8 km
In Earth's shadow (eclipsed): NO

Maximum altitude
Date/time: 12/15 18:32:35
Azimuth: 143.38° (SE)
Elevation (altitude): 74.23°
Magnitude: -2.4
Distance to satellite: 419.8 km
In Earth's shadow (eclipsed): NO

Pass ending
Date/time: 12/15 18:37:50
Azimuth: 48.31° (NE)
Elevation (altitude): 0.32°
Magnitude: -
Distance to satellite: 2255.7 km
In Earth's shadow (eclipsed): YES

1269. New Ham Net, 12/15/2011, 7:00 pm

1271. How to Use a Soldering Iron: A Beginner’s Guide, f rom How-To Geek

Yahoo group: Queen_Creek_Hams
Date: 2011-12-17 21:27:51 UTC
From: Joe Sammartino
Topic: 1271 Message: 1271

Here's a good article on the subject of soldering for beginners. It's even a good refreshers for the more experienced should they have the need to teach some newbies.

Regards, Joe, N2QOJ

How to Use a Soldering Iron: A Beginner’s Guide<http://www.howtogeek.com/63630/how-to-use-a-soldering-iron-a-beginners-guide/>

[image: banner]

One art form that geeks really appreciate is soldering, but not all of us know the proper technique. It’s an easy skill to add to your geek resume, so let’s learn how and some old projects off the shelf.

(Image credit: oskay <http://www.flickr.com/photos/oskay/437342029/>)
What Is Soldering?

(Image credit: Public Domain Photos<http://www.flickr.com/photos/free-stock/4904404001/>
)

A soldering iron is a tool with a metal tip that gets really hot. We’re talking like 800 degree Fahrenheit, though you can adjust the temperature on a good iron. Its job is to transfer heat to things like wires, transistor leads, and pads on PCBs. After the appropriate areas are heated properly, solder is applied. If you plan on soldering, then you’re better off spending $30-$40 on a 20-30 Watt iron instead of on a cheap $15 one. You’ll get a longer-lasting tool that will work for a much wider variety of applications and you’ll get proper heat control to boot. There are also soldering guns available, but you should only use these when repairing thick cables and never on PCBs, as the tips have a live voltage running through them that can damage sensitive electronics.

(Image credit: Public Domain Photos<http://www.flickr.com/photos/free-stock/4791855222/>
)

Solder is a thin tube, usually rolled in spools, made of various metal alloys. Its job is to hold the individual components together. The individual components and their quantities can vary, but for computer electronics, you’re usually looking at a 60% tin and 40% lead. Lead-free solder is also available, though it has higher melting temperatures and less “wettability,” meaning you may need a better soldering iron to use it and removing it can be more tedious. Lead-free solder is better for the environment and has other benefits, and they function more or less the same way.

The inside of the tube is filled with “flux,” a substance that gets rid of oxidation and helps clean the surfaces involved in the fusing process. For electronic use, you want rosin-core/rosin-flux solder. Acid-flux is used in plumbing and the acid can damage the sensitive components on PCBs.
Safety First!

(Image credit: intherough<http://www.flickr.com/photos/intherough/4965847276/>
)

Many who’ve never used a soldering iron are afraid of damaging equipment, but more important is the danger to yourself! Soldering irons get really hot (think, and solder itself is molten metal. Be sure to wear safety glasses, keep loose clothing and hair out of the way, and be careful with your fingers. Better still, use protective gloves. Solder can contain lead, so be sure to wash your hands thoroughly after handling it. It’s also really important to work in a well-ventilated area because the fumes from the rosin can cause damage to your lungs when inhaled. Honestly, it’s more common sense and preparation than anything. Just take proper precautions and you’ll be fine.
Cleaning and Tinning the Tip

(Image credit: Mae
Labs<http://www.maelabs.ucsd.edu/mae_guides/howto/soldering/>
)

In order to conduct heat properly, your soldering iron needs to be free of any old solder. After being exposed to air, it oxidizes and thus insulates against heat. We want heat to conduct so that we can apply everything quickly and efficiently. A dirty tip means that you’ll have to hold the iron on longer and risk heat damage to the PCB, and nobody wants that. Keep a wet sponge handy, and after the soldering iron is fully heated, softly scrape it against the sponge to remove old solder. The tip should be nice and shiny, or at least very close to it.

Next, we’re going to “tin” the tip. This will protect the tip and allow heat to conduct better via the presence of new solder. On the hot iron, carefully apply a small amount of fresh solder and coat the tip. It should still be shiny if you’ve done it right. As soon as you tin the tip you should start soldering your components together. After every few joins, clean and re-tin, and again before putting your iron away into storage. This will really help increase the longevity of your tool. A good soldering iron should easily last years this way.
Joining Parts

(Image credit: Soldering Is Easy Comic
Book<http://mightyohm.com/blog/2011/04/soldering-is-easy-comic-book/>
)

Hold the iron in your dominant hand and a long piece of solder in your other hand. When soldering two components together, you want to touch the area where they join with the soldering iron. Hold it there for about a second, then slide the solder underneath the tip of the iron, sandwiching it to the PCB (refer to above image, cursor points to solder). Hold it for

another second or two, feeding in how much solder you need. This amount will vary depending on the project, application, and diameter of the solder, so check your instructions and study the pictures to get a good idea of the end result.

(Image credit: Soldering Is Easy Comic Book<http://mightyohm.com/blog/2011/04/soldering-is-easy-comic-book/>)

Now, this is really important. Pull away the solder first, and continue holding the iron for another second. This allows the solder to continue to melt and pool, forming a good joint. Then, you can remove the iron. The total process shouldn't take more than 5 seconds, and usually you're aiming for 3-4.

Wait a few seconds and don't disturb the solder. It cools very quickly, but moving or blowing on the joint will cause it to deteriorate. A bad solder connection will look really oxidized, overly dull, and grainy. It also sort of looks like a ball of solder formed on the area. A good connection should be smooth and uniform, and its sides will be concave. It won't look like a raised ball, it'll look flat.
Desoldering

When removing a connection or undoing a mistake, you can often resolder over the original and add a touch of new solder. If you want to take the extra step and do it right, you can remove the old solder completely and start with a fresh work area. There are two tools you can use for this, a vacuum-based "solder sucker," or a solder wick.

(Image credit: Wikimedia Commons<http://en.wikipedia.org/wiki/File:Solder_sucker.jpg>)

A solder sucker is essentially a tiny hand-held syringe-like pump. It creates and uses vacuum pressure to suck solder off of whatever it's on. It's a great tool to have and works well.

(Image credit: Wikimedia Commons<http://en.wikipedia.org/wiki/File:Solder_wick_rolled.jpg>)

A solder wick is woven copper which the old solder bonds to. It's more expensive and it's expendable, so I usually don't recommend it. Some jobs, however, will greatly benefit from the clean finishing touches that a solder wick provides. Both tools have their strong points, and odds are that in your soldering career you'll need to use one or the other specifically from time to time. Having a clean working area is really important, as it provides the best results and minimizes risk of damage.

Soldering isn't particularly difficult. You just need to focus, keep a steady hand, and be safe. A good soldering iron will prove to be a

wonderful investment, leading to a much wider arrangement of geek projects at your disposal. Now that you know how, practice so that you’re ready to show off your skills!

1272. Comedian Tim Allen Stars as Radio Amateur on New TV Show 12/12/2011

Yahoo group: Queen_Creek_Hams

Comedian Tim Allen Stars as Radio Amateur on New TV Show 12/12/2011

Ham Radio in Hollywood: Comedian Tim Allen Stars as Radio Amateur on New TV Show 12/12/2011

Tim Allen -- star of Home Improvement, Toy Story, The Santa Clause and Galaxy Quest, just to name a few -- stars in Last Man Standing, an ABC comedy airing at 8 PM (EST) on Tuesday nights. Allen plays Mike Baxter, KA0XTT, a married father of three and the director of marketing at an outdoor sporting goods store in Colorado whose life is dominated by women. While Amateur Radio has not been prominently featured in the first episodes, according to John Amodeo, NN6JA -- the producer of Last Man Standing -- it is a part of the show and an important part of Mike's character.

The episode that will establish Mike as a radio amateur is currently scheduled to air in mid-January.

"Tim's character Mike is involved in creating the sales strategy for the store, including their catalog and Internet identity," Amodeo told the ARRL. "The store is like Bass Pro Shops or Cabelas. There is a strong self-sufficiency overtone to Mike's approach to life. Ham radio fits in the story as a means of emergency communication. It's not directly featured in the foreground story, but at the moment, it's a background element on the home set. Once I allow something to be put on the set, there's a chance the writers will feature it. Now that we have actually established Mike Baxter as KA0XTT, we can do more things featuring Amateur Radio."

To make Mike a ham, Amodeo needed Mike to have a call sign. So he contacted ARRL Media and Public Relations Manager Allen Pitts, W1AGP, to help him out. "In film and TV, we create fictitious telephone numbers, addresses and brands," Amodeo explained. "We do this mostly to avoid being sued by real brands and to avoid complications with advertisers. As a producer and a ham, I was torn between wanting the show to be accurate and needing to keep my studios out of trouble. An accurate and positive portrayal of ham radio on TV would be a good thing." Many TV shows and movies use telephone numbers with a 555 exchange (such as 555-1212), as that exchange is not valid.

Together with Pitts, and with input from Tim Allen, Amodeo created a call sign for Mike Baxter: KA0XTT. Since the show is set in Colorado, they wanted Mike to have a call sign with a 0 in it. "We wanted a call sign that sounded real, but was not valid," Amodeo said. "The call sign is a 2×3 format with an X suffix. A call sign in this format is an

experimental call sign and is not assignable to a radio amateur except in special circumstances. We especially liked the suffix, as it is a play on Tim's character from his former show, Home Improvement: `ex-Tim Taylor.'"

Amodeo told the ARRL that both his studio (Fox) and ABC were "delighted to have a useable call sign. In the past, TV shows just made up some crazy call or used someone else's without permission. And because we've had so much talk about Amateur Radio here on the show, a few of my production assistants took their Technician exam." Amodeo applied to be an ARRL Volunteer Examiner so he could help administer the exams. On October 6, Amodeo and two other ARRL VEs administered the Technician exam to seven prospective hams. All seven passed, with two making perfect scores.

Since Mike Baxter is a ham, he needed a shack. So Amodeo and the set designers installed an Amateur Radio station in the corner of Mike's set office. Allen, as Baxter, uses an ICOM IC-9100 HF/6 meter/2 meter transceiver and an IC-92AD handheld transceiver, both provided to the show courtesy of ICOM America. Amodeo told the ARRL that he has plans to add vintage equipment to the shack in the future. "The radio equipment was originally intended to be used as props and set dressing items," Amodeo told the ARRL. "But since eight of the show's staff members are radio amateurs, it didn't take long before we made the radio equipment `practical,' which is to say, actually capable of making radio calls live from the stage when we're not shooting." He said that radios will always be on and lit whenever they are shooting scenes in the office.

Pitts and ARRL News Editor S. Khrystyne Keane, K1SFA, have been working with Amodeo to make sure that Amateur Radio is correctly portrayed in the show. Keane also provided ARRL and Amateur Radio-related materials that are used on the set, such as issues of QST, NCJ and QEX, as well as a call sign map, a 2012 ARRL Handbook, a 2012 ARRL calendar and various ARRL stickers (look for one on the HF rig). "We also sent fake versions of DXCC, Worked All States and Worked All Continents certificates, as well as a Morse Code Proficiency Certificate," Keane explained. "Each certificate bears the name Mike Baxter and has KA0XTT as the call sign. All the certificates have issue dates of December 25, playing upon Tim Allen's role in The Santa Clause movie series."

Amodeo told the ARRL that he also installed a Comet CHV-5X HF dipole and GP-1 antenna for 2 meters and 70 cm (courtesy of NCG/Comet) "up high, about 50 feet, inside the sound stage. The ultimate goal is to have the hams on our staff make contacts from our stage during down times."

Last Man Standingalso stars Nancy Travis (Three Men and a Baby) as Mike's wife and Hector Elizondo Pretty Woman, The Princess Diaries, Monk) as Mike's boss. Amodeo also produced the critically acclaimed Sports Night and Arrested Development.

1273. need some on the air testing with GMRS

Yahoo group: Queen_Creek_Hams

From: Joe Sammartino
Topic: 1273 Message: 1273

Is there anyone on the Group that is GMRS capable locally?

I will be testing a GMRS radio system over the next couple of days. I'd like to get some assistance. It would require that you are licensed for GMRS and have a GMRS repeater capable HT or mobile for access.

If you can help me out, please contact me directly at:

jsammartino (at) gmail (dot) com

Thanks,

Joe, N2QOJ

East Valley Repeater Group
Monday December 19, 2011
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Somehow I don't expect them to include HAM TV - like Ham Nation does..

The HAM TV repeater on Santiago Peak - W6ATN - should be easy to access.

Bil Munsil
K1ATV HAM TV
Mesa AZ

PS - I'm not a fan of that program.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday December 19, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Hi Bil,

I think you meant to point out the incorrect spelling because we all know what the word is.

You can inform EVRG of the poor spelling.

If you notice, I excerpted their description directly from their Web site.

Regards,

Joe, N2QOJ

Posted Date: 12/19/2011
Traffic Alerts Map - December
19<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10126>

1. *Ocotillo Road between Hawes Road and 196th Street*
Traffic restrictions will be in place through Wednesday, December
28 due to a sinkhole on the south side of Ocotillo
Road. Crews will be in the area making repairs during normal
working hours. Various restrictions may be in place while
the repairs are being completed. Drivers are advised to obey all
speed limit and warning signs while driving through
the area.

2. *Road restrictions outside of Town*
The City of Mesa will be working in the area of Ellsworth and Ray
roads, as well as Power Road between Pecos and
Ray roads. More information on these and other restrictions in the
City of Mesa can be found at
http://www.mesaaz.gov/roads/LaneRestrictions.aspex.

*NOTE: Due to the nature of the work, days and times are subject to change
without prior notice. Motorists are encouraged to obey all posted signs,
traffic control devices, and directions from law enforcement officers or
flaggers who are controlling traffic.*

Some time in January 2012 the receive link from Mt Lemmon to White Tanks will be installed.

Then we in the Phoenix area will be able to watch all the activity on the Mt Lemmon HAM TV repeater.

After the incoming link is installed the Mt Lemmon receive link will be installed and then we will have full time two-way video and audio.

Bob "Hoppy" Hopkins
Electronics Club
Venture Out Resort
5001 East Main St. in Mesa. (Main and Higley)
480-830-6341

Amateur Radio Classes

Classes for technician, general, and extra amateur radio licenses will begin on Tuesday, January 10 2012. All interested students must meet in the Electronics building conference room at 12:00 pm where specific class times and locations will be announced. Classes will continue on Tuesdays and Thursdays until Thursday February 16,2012. The class fee is $10.00 plus a study manual must be purchased from $19.00 to $26.00. For more information contact Howard Heithoff at 480-540-3529 or Hoppy at 480-830-6341.

We usually get all of our students registered then we order the Study Manuals from HRO. by ordering this way we get a discount on the books and we usually have the books for the second class on Thursday.

We're located at 5001 East Main St. in Mesa. We're located between Greenfield and Higley on the south side of the street. We have a pretty strict security here and I have to notify security if you are coming into the Park. If you need more information, call me or send me an E-mail at ednahoppy@....

East Valley Repeater Group
Monday December 26, 2011
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Arizona Emergency Net - Maricopa
Monday December 26, 2011
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Fred usually runs a tight ship. You may wish to contact him directly.

Care to share any specifics of the virus, and why you think it came from there?

I have seen a lot of hijacked email addresses lately (hams) where the email comes from a known good address and passes the incoming virus check. These are mostly just spam, but some have an obviously suspect attachment with them.

Re: qrz.com infected?

Two days in a row 12-24 and 12-25 I accessed qrz.com and immediately got the virus Rogue:Win32/FakeRean - I found out the name later.

It turned off my anti-virus software - Malwarebytes and Microsoft Security Essentials. It also turned off remote access (so it told me) and the ability to go back to a prior, good, restore point.

My brother came over on the 24th and spent several hours finding out how to get to a good restore point. Then I ran both of the anti-virus programs and quarantined it.

I went back to qrz.com yesterday and - BLAMMO! - it came back.

This morning he WAS able to access my computer remotely (the virus lied to me) - and found the same good restore point again.

Bil

PS - I almost always run FireFox on my Windows 7 system.

Subject: Packet Radio
To: Bruce Barnes <brucekbarnes@...>

Hi Bruce,

How have you been?

Got a quick question. I have been trying to connect using a Signalink and
everything seems to
be working but i dont get any replies or see any traffic on
the display using fldigi.

Not sure if this is something you use but any help would be appreciated.

Trying to set up fldigi for NBEMS.

Thanks,

Tom Hurst
KF7SYE

Traffic Alerts Dec. 29 - Jan. 5
Traffic Alerts Dec. 29 - Jan. 5
Posted Date: 12/28/2011

*1. 197th Place/Queen Creek Road
*Town utility crews will be repairing a water valve on Queen Creek Road in the intersection of 197th Place on Tuesday, Jan. 3. While crews are working, 197th Place will be closed to northbound traffic, as will the westbound right travel lane on Queen Creek Road. Work will begin around 8 a.m. and will continue until approximately 2 p.m. The right lane closure on Queen Creek Road will remain in place until Wednesday afternoon, Jan. 4.

*2. Queen Creek Road/Merrill Road (220th Street)
*Work will be taking place on the irrigation structure on the northwest corner of the intersection. The north shoulder will be closed through Thursday, Jan. 5 - no traffic restrictions will be in place.

*Road restrictions outside of Town
*The City of Mesa will be working in the area of Ellsworth and Ray roads, as well as Power Road between Pecos and Ray roads. More information on these and other restrictions in the City of Mesa can be found at http://www.mesaaz.gov/roads/LaneRestrictions.aspex.

- Traffic Alerts Map - Dec 30 2011<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10158>

*NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

From: Joe Sammartino
Topic: 1293 Message: 1293

Sonoqui Wash Channelization and Riggs Road Crossing Improvement Projects
Posted Date: 12/29/2011

[image: Maricopa County Department of Transportation]Riggs Road traffic is currently diverted onto a temporary construction bypass road through the work site. Concrete placement for the new Riggs Road Bridge abutments is now complete and new curb and gutter along Marsh Road (south of Riggs Road) is in place. This month, the contractor will begin forming the center bridge pier, placing concrete for the new box culvert crossing just east of the 203rd Place alignment, and placing "rip-rap" (large rock) on the channel banks to provide erosion protection.

*Traffic Restrictions
*During construction, traffic will be maintained through the channel north of Riggs Road via a temporary construction bypass road between approximately 201st Street and 203rd Street. Lane restrictions can be anticipated. Access will be maintained at all times for residents, businesses and emergency vehicles. Please allow extra time to travel through the area as there may be traffic delays.

*About the Project
*Sonoqui Wash improvements include channel excavation and slope stabilization between Chandler Heights Road and Riggs Road, the construction of a multi-use path and the construction of a new channel eastward to Crismon Road along the south side of Riggs Road.

The Riggs Road crossing project includes construction of a new bridge over the Sonoqui Wash with sidewalk, bike lanes and equestrian accommodation under the bridge linking to the Town of Queen Creek's trail system. In addition, this project is constructing a new east/west roadway (Marsh Road) south of Riggs Road between just west of the 202nd Place and 204th Street alignments.

Construction Work Hours: In accordance with seasonal changes, the contractor may begin activities as early as 6 a.m. and work until 7 p.m. Some evening or weekend work may be required. Project completion is slated for September 2012.

*24-hour Construction Hotline: (480) 350-9288 *

Tom, I have one of these but it has been a while since I did anything with it... and it is still in storage..

But, sounds like the sound is not set correctly and for the life of me I don't remember how I set mine up. I ended up re-reading the manual and setting it up step-by-step and got mine working.
There is also a Yahoo group that is all about that thing.. called TigertronicsSignaLink

Hope that helps.

Lost in Oregon with my snorkel!!!

Terry

1297. Re: [Queen_Creek_Hams] Re: Fwd: Packet Radio

Yahoo group: Queen_Creek_Hams
Date: 2011-12-30 07:30:04 UTC
From: Joe Sammartino
Topic: 1290 Message: 1297

Tom is not yet a member of this Group so I will copy him on this message post so he sees Terry's response as well as mine.

First of all, I don't believe Fldigi supports packet mode. At least it is not listed in the description at the developer's website:

http://www.w1hkj.com/

Secondly, that make sense since there are only two packet engine software applications in existence for sound cards. They are:

- AGW Packet Engine - very popular and it's been around a long time. Most packet control programs support this "soft" TNC.
http://www.sv2agw.com/ham/agwpe.htm
The best known and most definitive site regarding sound card based packet operations with AGW can be found at:

http://www.soundcardpacket.org/

- Sound Card TNC by UZ7HO - this is a recent development and is being well received by hams. It emulates the AGW packet engine but has additional features.
http://uz7.ho.ua/index.php?lang=eng&id=4

Thirdly, packet mode isn't exactly a "narrow" digital mode so I am not surprised it is not included in the Flidigi s/w stack by the NBEMS (Narrow Band Emergency Message System).

I hope that helps clear up the non-receive issue.

Tom, please join our Group and let us know how you are advancing on this project.

Regards,

Joe, N2QOJ

Subject: Radios in the Park - 21 January 2012
To: Cris McBride <kb7qxq@...>

Please work on participating in the coming "Radios in the Park" as you are
able. This is a great opportunity to use your radios in a non-stressful
situation and learn to push the PTT on your radio and even talk into/across
the microphone!! You can ask any question you think of and someone can
surely answer it or find the answer soon, for you. *See the message below:*

Also, remember our 5th Saturday 0700 net on 3.990.

We are still looking for volunteer net control operators to help out
occasionally with the net operations. This is a fine way to practice
organizational skills on the air!

Cris
kb7qxq
Pinetop, AZ

We will be doing another Radios in the Park event on Saturday, 21 January
2012, between 10:00 & 14:00.****

** **

The “theme” of this event will be PSK and other digital modes.****

This means that if you have the necessary equipment to operate in these
modes, please bring it to your “park” and plan on using it.****

** **

As usual, 146.460MHz 77.0Hz Simplex will be the contact freq that every
“park” should monitor for coordinating activities.

****

And if you have a second VHF radio on site, keep in mind that the storehouse radio in Mesa, Rim Link & EAARS systems are available for those who are out of simplex range.****

Feel free to make prior arrangements with others you wish to contact also, be these contacts via HF or repeater systems.****

** **

This is an informal activity. Go in small groups of about 6 people and several transceivers in each group. Each group should be at least a few miles apart from the next closest group.

****

Set up your portable emergency equipment at the city park or any other temporary location of your choice.****

The purpose of this activity is to REALLY test your equipment and practice your skills of setting up and operating under temporary / portable / emergency conditions.****

Power your equipment with anything you have except for the commercial power grid.****

If you don’t have a generator or a battery, keep in mind that just about every motor vehicle has a 12 volt DC electrical system that can power your communications equipment.****

Even an ATV or motorcycle with its engine running at low idle can power a typical amateur radio HF / VHF / UHF transceiver.****

And a fully charged typical car battery will power a typical transceiver for many hours without running the engine at all.****

But it’s a good idea to run the engine for a few minutes every hour to keep the battery from becoming deeply discharged. As this is not healthy for a typical car battery, unless it’s an aftermarket deep cycle battery such as an Optima Yellow or Blue Top or similar make & model.****

** **

Make contacts with whoever you wish and do as you please. ****

If you’re a new ham or one who is a bit “mic shy”, now is the time to overcome these issues and just get on the air and talk, talk, talk. Practice, practice, practice and learn, learn!****

Unlike the Saturday morning and Sunday evening nets where you only transmit once to check in, this is an activity where you can really blow the cobwebs off of your heat sink and get it good and warm J****

You do not need to participate during the entire time window. Come and go when the time is convenient for you. ****

** **

Please use 146.460 simplex for making initial radio checks and coordinating activities on other freqs and bands only. Please don’t rag chew QSO on this freq so it won’t be tied up for others who want to coordinate.****

And program your PL tone encoder and PL tone decoder (if your rig has a decoder) to 77.0 HZ. This way if someone not participating in our event decides to use the freq, we won’t be bothered by them.****

** **

The only rules of this activity other than 146.460 simplex are:****

- #1- BE SAFE!!!****
- #2- HAVE FUN J****

** **

** **

73,****

*Intense solar activity may affect Earth today (Friday, Dec
30),*potentially disrupting radio and cell phone transmissions:

*(Additional Sun spot information from **arrl.org*
<http://arrl.org/>*website link is updated every 15 min
*: *http://prop.hfradio.org/* <http://prop.hfradio.org/>)

On Monday, the sun released a coronal mass ejection (CME), which is a
"massive eruption of solar plasma," according to
Space.com<http://www.space.com/14055-solar-storms-northern-lights-wednesday.html>.
The blast is expected to affect the Earth through Saturday.

"Coronal Mass Ejections from the last few days may cause isolated periods
of G1 (Minor) Geomagnetic Storm Activity on December 28-29," the National
Oceanic and Atmospheric Administration's Space Weather Prediction
Centerwrote in an update. "R1 (Minor) radio blackouts are expected
until 31
December."

If the storms are powerful enough, they could temporarily interrupt radio
frequencies, GPS signals and cell phone communication, and possibly affect
power grids, according to Space.com.

NOAA estimated that there was a 20-40 percent chance of these disruptive
polar geomagnetic storms on Dec. 28-29 in response to the impact of one or
more CMEs.

Another potential result of these storms is impressive auroral displays,
also known as northern
lights<http://abcnews.go.com/WNT/video/northern-lights-aurora-borealis-time-lapse-michigan
-14812181>.
Skywatchers at higher latitudes, closer to Earth's poles, are being alerted
to the storms and urged to keep an eye out for auroras.

Experts say the sun's increased activity is part of an 11-year cyclical pattern.

The sun had a low rate of activity between 2005 and 2010, but has had several eruptions, powerful flares and CMEs this year.
NASA's Solar Dynamics Observatory tweeted on Wednesday<https://twitter.com/#!/NASA_SDO>that two CMEs occurred within 24 hours earlier this week.

*ATT closes deal on $1.9 billion wireless spectrum purchase from Qualcomm *

AT&T Inc. has officially completed its $1.9-billion purchase of wireless spectrum licenses owned by San Diego-based Qualcomm Inc.

The deal gives AT&T the ability to offer service on wireless spectrum that covers an area of more than 300 million people nationwide, with more than 70 million of them in five of the top 15 metropolitan areas, such as Los Angeles, San Francisco, New York, Boston and Philadelphia.

The nation's second-largest wireless carrier announced the closure of the purchase Tuesday in a short statement<http://www.att.com/gen/press-room?pid=22165&cdvn=news&newsarticleid=33596&mapcode=corporate%7Cwireless-networks-general&utm_source=feedburner&utm_medium=feed&utm_campaign=Feed%3A+AttAllCategoriesRssFeeds+%28AT%26T+All+Categories+RSS+Feeds%29>on its website after the Federal Communications Commission approved the purchase Friday<http://latimesblogs.latimes.com/technology/2011/12/fcc-att-qualcomm-spectrum.html>.

The FCC's sign-off on the purchase followed AT&T's decision last week<http://latimesblogs.latimes.com/technology/2011/12/att-pulls-out-of-t-mobile-acquisition-deal.html>to drop its attempted $39-billion takeover of T-Mobile USA, the fourth-largest wireless carrier in the U.S.

Until the AT&T backed off its bid to buy T-Mobile, the FCC was reviewing both the spectrum deal and the takeover together -- a move that was expected to push any possible approval into next year<http://latimesblogs.latimes.com/technology/2011/08/fcc-to-review-att-deals-with-t-mobile-and-qualcomm-together.html>.

AT&T's new wireless licenses applies to the 700 MHz<http://www.qualcomm.com/news/releases/2011/12/23/qualcomm-announces-fcc-approval-sale-700-mhz-spectrum-licenses-att>spectrum, which the FCC described in its approval of the deal as "underutilized" by the telecommunications industry.

1303. Re: [Queen_Creek_Hams] Fwd: Solar activity today (Frdiay) and ATT purchases right for 700 mHz wireless communications

Yahoo group: Queen_Creek_Hams
Date: 2011-12-31 18:05:53 UTC
From: Jim Henderson
Topic: 1299 Message: 1303

This solar story is/was a no-show . It was ran in the UK Daily Mail
(minus the usual centerfold):

http://www.dailymail.co.uk/sciencetech/article-2079352/Massive-solar-storm-knock-radio-signals-produce-amazing-Northern-Lights.html?ito=feeds-newsxml

and it amounted to a slow news day over-blow.

In contrast, the NOAA/USAF official forcast had this to say on the 28th:

>IIB. Geophysical Activity Forecast: The geomagnetic field is
> expected to be at quiet to active levels with a chance for isolated
> minor storm levels on day one (29 December) as multiple CMEs are
> expected to arrive. Quiet to unsettled level are expected on day two
> (30 December) as effects the previous CMEs wane. Predominantly
> quiet levels are expected on day three (31 December).

For a 7-day graph of the solar wind and geomag field, look at:

http://www.swpc.noaa.gov/ace/MAG_SWEPAM_7d.html

I was asked on the KF6EZT repeater yesterday about sites that are good
info. I have collected close to 200, but now have trimmed it to about 50.

For a very basic report and forecast go to:

http://www.swpc.noaa.gov/forecast.html

For one of the best organized and complete sites, if not the very best in
general, go to:

www.solarham.com

It has more info than the casual HF operator might need, but more than
enough to satisfy the student of how 'space weather' affects the ionosphere
and magnetic field.

If that is not 'too much information', have a look at:

http://www.lmsal.com/solarsoft/last_events/

40 years ago there was the 'WWV solar indicies'. Now there are more solar
observation instruments in more locations on Earth and in space than ever
before.

Email me if you want more...

73 and HNY

Jim, KF7E

1304. ISS pass tonight

Yahoo group: Queen_Creek_Hams
Date: 2011-12-31 23:13:56 UTC
From: Jim Henderson
Topic: 1304 Message: 1304

For your New Years Eve viewing pleasure:

Data:

31 DEC 11 19:33:36 319.2 19:38:51 45 41.1 19:43:58 122.1 0:10:22

Explanation:

Appears 1934 local (7:34PM) bearing 319 degrees (to the northwest)

Peaks at 1939 at al elevation of 45 degrees, bearing 41.1 degrees (slightly to the northeast)

Passes to the southeast and disappears at 19:43 bearing 122. Duration about 10 minutes.

The ISS was on 2 meter packet 4 hours ago, 145.825 MHz.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday January 2, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

1308. Arizona Emergency Net - Maricopa, 1/2/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-01-02 16:03:37 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1308 Message: 1308

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday January 2, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1310. Streaming Feed

Yahoo group: Queen_Creek_Hams
Date: 2012-01-04 00:05:59 UTC
From: Joe Sammartino
Topic: 1310 Message: 1310

Hi Folks,

I have a new feature for you folks......

There is now - via the Internet - a streaming audio feed of local ham vhf / uhf activity.

It covers the following:

Simplex - 146.500 / 146.460 Mhz
Repeater - 448.775, Queen Creek Ham Repeater
Repeater - 449.825, East Valley Repeater Group
Repeater - 446.575, Queen Creek Event Repeater
Repeater - 147.380, N2ULY / WB7TUJ

You can access it by navigating this link. Once there, bookmark it or drag to your desktop.

http://www.radioreference.com/apps/audio/?feedId=10544

This feed will be running 24/7 and has a delay of about 35 seconds introduced by the stream provider (because its free).

The actual monitored activity is being provided by one of my scanners and a dedicated computer. It can only provide one frequency at a time, so whichever frequency is active first while scanning gets streamed.

Feedback is always welcome.....

Regards,

Joe, N2QOJ

From: Bruce Barnes
Topic: 1310 Message: 1311

I was going to ask about the way it handled multiple inputs. Not sure I understand it still. For example, if all the frequencies are quiet and then somebody comes up on the QC repeater, it will stream that conversation right? If there is a pause in the repeater conversation, and during that time, a QSO starts up on another frequency, 146.5 for example, I assume that new QSO on .5 will then stream. Is that right?

Nice job by the way...

Bruce

Thanks...Bruce....

Bruce's assessment is 100%. I could create a priority for one specific frequency. So in his example, if a QSO started *again* on the repeater, the stream would switch back to the QC repeater.

I don't know if that is good, though. Activity on the simplex and WB7TUJ repeater is very little. The EVRG repeater will only be very active at net times.

Let's see how it goes. I can always configure the priority approach down the road.

Feedback!!!!!

Regards,

Joe, N2QOJ

Date submitted 12-22
Date for publication 12-30

Amateur Radio classes
Classes for technician, general, and extra amateur radio licences begin on Tuesday, January 10 2012. All interested students must meet in the Electronics building conference room at 12:00 pm where specific class times and locations will be announced. Classes will continue on Tuesdays and Thursdays until Thursday February 16,2012. The class fee is $10.00 plus a study manual must be purchased from $19.00 to $26.00. For more information contact Howard Heithoff 540-3529 or Hoppy 830-6341.

PS. This is a copy of the article that was published in our News letter here in Venture Out Resort. We're located at 5001 East Main St. in Mesa. We're located between Greenfield and Higley on the south side of the street. We have a pretty strict security here and I have to notify security if you are coming into the Park. Need more information send me an E-mail at ednahoppy@....

1317. Internet stream test

Yahoo group: Queen_Creek_Hams
Date: 2012-01-06 23:32:18 UTC
From: Joe Sammartino
Topic: 1317 Message: 1317

Folks,

For those of you listening to the stream, I've made some level adjustments today.

http://www.radioreference.com/apps/audio/?action=wp&feedId=10544

Please feed back on (1) level to your player and (2) quality of audio. Remember, not all frequencies put out nice audio to begin with so figure that in to your review.

Regards,

Joe, N2QOJ

1323. The Latest on HOAs and Ham Antennas in the U.S. of A.

Yahoo group: Queen_Creek_Hams
Date: 2012-01-07 04:00:32 UTC
From: Kenn Burnell
Topic: 1323 Message: 1323

The link below is the latest case on record of a petition brought before the FCC by the ARRL, involving Ham radio antennas and Home Owner Associations. I asked the law firm of Davis Miles, PLLC and McGuire Gardner, a division of Davis Miles, PLLC to research the subject. The "latest" is almost nine YEARS old. The bottom line is what we expected to find - the FCC rules do not restrict HOAs from regulating Ham antennas unless thay are also used to receive long distance TV signals, among other things. For safety reasons, FCC "approved" antennas may not extend higher than 12 feet over a roof line.

Most HOA attorneys in Arizona have advised their Home Owner Associations not to try to regulate TV antennas on homes and other dwellings. Some have also advised their clients not to try to regulate "small" Ham antennas (poles as opposed to towers) since the issue is a considered to be a "gray area" and courts in Arizona most often rule against Home Owner Associations, especially when "damage" cannot be proven.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday January 9, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

1332. Arizona Emergency Net - Maricopa, 1/9/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-01-09 16:03:50 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1332 Message: 1332

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday January 9, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1333. Video Series - Useful Web Sites for Ham Radio

Yahoo group: Queen_Creek_Hams
Date: 2012-01-10 16:23:55 UTC
From: Joe, N2QOJ - ARRL VEC VE
Topic: 1333 Message: 1333

Hello folks,
I'm creating a series of short video tutorials regarding ham radio topics.
Since we have a few newer hams on this Group also, I thought I would make this announcement here as well.
The first in the series is a presentation of a useful web site for amateur radio operators - www.QRZ.com.
Many of you have heard some of us refer to this web site often. It's a great free service for many resources.
http://youtu.be/UK9TH7qVoFs
Let me know what you think about the video. I always appreciate feedback and ideas for additional topics.
Regards,
Joe, N2QOJwww.n2qoj.com480.270.4563

1338. Roots N' Boots Queen Creek

Yahoo group: Queen_Creek_Hams
Date: 2012-01-12 17:01:54 UTC
From: Joe Sammartino
Topic: 1338 Message: 1338

Here is today's announcement from the Town concerning the Roots N' Boots event from March 30 to April 1st.

This is an event that the volunteer communications team has been asked to support.

This announcement contains good information of the event with links to more detail.

Regards,

Joe, N2QOJ

==========

Posted Date: 1/12/2012

[image: Friends of Horseshoe Park]Local businesses are invited to join in on the fun as we put on our boots and celebrate our roots at the second annual Roots N' Boots Queen Creek <http://qcrodeo.org/>, taking place at Horseshoe
Park & Equestrian Centre <http://www.queencreek.org/hpec> from March 30-April 1. Based on last year's success, this year's event, hosted by Friends of Horseshoe Park <http://friendsofhorseshoepark.org/>, has expanded to include three days of family fun!

Applications are now being accepted for vendors and sponsors for the event, which drew thousands of spectators last year. Don't miss the opportunity to showcase your products and services to thousands of loyal customers. Booth rates are designed to be affordable, and will provide direct access to thousands of potential customers.

Join us for family friendly and kid-focused attractions including a full-sized carnival, Family Rodeo, three PRCA
Rodeo<http://www.prorodeo.com/>performances, live entertainment, lawn mower races, petting zoo, pony rides
and much more!

Take your business to the next level by participating in this highly anticipated annual event! Vendor spaces and sponsorship opportunities are limited, so reserve your booth today!

For more information about the event or vendor applications, visit www.RootsNBoots.org or e-mail vendors@.... Vendor
spaces are limited, and available on a first come, first serve basis.

- Vendor applications now being accepted for Roots N' Boots Queen Creek<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10190>

1343. MCSO surplus radio for sale

Yahoo group: Queen_Creek_Hams
Date: 2012-01-14 17:26:02 UTC
From: ars_k1atv
Topic: 1343 Message: 1343

Some time back I bought one of the MCSO surplus radios and it's still in the trunk of my car and as been there the whole time.

Looks like I'll never do anything with it so I might as well sell it to someone who will use it.

I'll let it go for what I paid for it - 50 bux. It also has the antenna adapter at no extra charge.

Come on by to get it but please call first.

1344. ERC/EAARS 2-m net

Yahoo group: Queen_Creek_Hams
Date: 2012-01-15 02:06:44 UTC
From: Kenn Burnell
Topic: 1344 Message: 1344

For thise interested in Emergency Communications --

From: Cris McBride vandcmcbride@...

These are the repeaters for the 0845 ERC/EAARS net on the second Saturday
of each month:

Linked repeaters: (all PL tones are 141.3)

146.86 Heliograph Peak
147.28 Guthrie Peak – Greenlee County
145.21 Jacks Peak New Mexico.
145.41 Pinal Peak south of Globe AZ
147.16 Mt Lemmon near Tucson
146.70 Greens Peak Near Show Low and Round Valley
145.27 South Mt-Alpine
147.08 Mule Mt near Bisbee

And, as Paul Harvey used to say, "This is the rest of the story" ::>

ERC is Emergency Radio Communications
EAARS is the Eastern Arizona Amateur Radio Society (http://eaars.org/).

Dr. McBride is also associated with two other ERC Saturday morning nets --
the MARA Net and the BCS-ERC (BCS is Bishops' Central Storehouse and has to
do with the location of the repeater) net. Those nets meet on the BCS-ERC
repeater at 146.720 MHz (standard minus offset) with a PL tone of 100 Hz.
The schedule is as follows:

MARA - Every Saturday at 0815.
BCS-ERC - The first Saturday of the month at 0845.

Arizona Emergency Net - Maricopa
Monday January 16, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1348. Foxhunt on Feb 4th

Yahoo group: Queen_Creek_Hams
Date: 2012-01-18 23:54:50 UTC
From: Byon Garrabrant
Topic: 1348 Message: 1348

I spoke to a few people after the last meeting about Fox Hunts (aka T-Hunting, Hidden Transmitter Hunting, Amateur Radio Direction Finding). I was planning to give a talk at a future meeting, but it turns out there will be a hunt before the next meeting, so I wanted to notify and invite everyone.

The hunt will be on Feb 4th, likely in the morning. The starting point is not yet set, nor is the format of the hunt, but I'm guessing it will be a driving hunt. The idea is that the hider (the "fox") will go somewhere in the central Phoenix area, and transmit a signal on 2 meters. Then all the hunters listen in, and try to find where the fox is hiding. This is typically done by pointing a directional antenna in different directions, watching the radio's s-meter for the strongest signal, and then moving towards the transmitter, repeating until you get there. We will provide hints as needed, and usually afterwards, we all get together at a local restaurant for lunch and to share experiences.

All you need is a tape measure yagi (see web page below), and an attenuator if possible. The yagi can be built for just a few dollars. I'll have some extra equipment to loan, and be available to help new hunters. You can hunt as a team if you want. Feel free to email me with questions, and watch the web site http://n6bg.com/foxhunt/ for further details.

In my amateur radio experience, this has definitely been the most fun aspect of the hobby for me. Hopefully you will enjoy it too.

Thanks,
Byon, N6BG

WA6SVT/R to become W7ATN/R to match Mt Lemmon.

Mike Collis, WA6SVT of Crestline CA will be in town for the ATN-AZ meeting 4 Feb.

He will come a day early so as to work on the receive link from Mt Lemmon.

Inside work will include changing the ID to match the one on Mt Lemmon and the outside work will include installing the 8 ft receiving antenna.

1355. Video Series - Useful Web Sites for Ham Radio

Yahoo group: Queen_Creek_Hams
Date: 2012-01-24 00:34:40 UTC
From: Joe Sammartino
Topic: 1333 Message: 1355

Hello folks,

Get the popcorn and get comfortable....

Here is the second installment of the "Useful Web Sites for Ham Radio" series - www.HamUniverse.com.

This site is particularly useful for new hams and experienced hams who think they know everything. It the first place I visit for a beginner's understanding of a specific topic - batteries, grounding, electronics, repeater usage, etc. The short discussions are written and presented in understandable language without the overuse of goofy jargon and technical terms.

Visit: http://youtu.be/FoW8vPb_wwQ

As always, please let me know what you think. I always appreciate feedback and ideas for additional topics.

Regards,

Joe, N2QOJ

I just learned that the President will be flying into Phoenix Mesa Gateway tomorrow at about 3:30 PM. The word is that he is visiting at Intel.

That usually means a heightened state of awareness for all first responders - law enforcement and public safety.

Might be interesting to monitor tower operations tomorrow.

I find more complete info at www.airnav.com and enter KPHX for the overall approach freqs, or about the same data for Willy if you enter KIWA.

I also have all the charts and approach plates, so it will be interesting to see (hear) what happens.

And yes...

You can use this web site to listen to ANY ATC in the country!

Kind of handy....

1365. EchoLink and Android 4

Yahoo group: Queen_Creek_Hams
Date: 2012-01-25 22:47:57 UTC
From: Joe Sammartino
Topic: 1365 Message: 1365

As some of you may know, EchoLink Android does not function with Android 4.

Ever since my Motorola Xoom's automatic update of ICS (Ice Cream Sandwich, AKA Android 4), the EchoLink Android app stopped working. Actually, it forces close and stops.

I contacted Jonathan Taylor, K1RFD, the creator of EchoLink, EchoLink Android and EchoLink Apple yesterday.

He confirmed that (1) he is aware of the problem and (2) he is working on a fix for it. It is a slow process because he is using an ICS environment emulator to debug and test.

His response:

"Joe,

I'm aware of the issue and have been working on a fix, having to do with the structure of some of the networking code. Unfortunately, progress is a bit slow since I am limited to the emulator currently...hopefully I'll get the Xoom update soon. "
So, there is no ETA on the fix at this time, but it is being worked on.
Great!

Regards,

Joe, N2QOJ

Traffic Alerts Map Jan. 26-Feb. 2
Traffic Alerts Map Jan. 26-Feb. 2
Posted Date: 1/26/2012

*The Town's Streets Department will be performing crack seal operations in the following locations for the week of Jan. 23-27:
*

Note that dates are approximate and those streets which are affected will be posted with temporary traffic control signs.

1. *Montelena Subdivision*

- 201st Way south of Via Del Jardin
- Via Del Palo *and* Via Del Oro east of 201st Street
- Via Del Rancho *and *Camina Buena Vista east of 202nd Way
- 202nd Way* and *204th Street south of Via Del Rancho
- 203rd Street south of Camina Buena Vista
- Poco Calle and Camina Plata east and west of 203rd Street

2. *Arroyo de la Reina Subdivision*

- 199th Way north of Ocotilo Road
- Rivera Drive south of 199th Way
- Arroyo Court west of Hawes Road

3. *Will Rogers Subdivision*

- 203rd Street *and* 205th Street south of Ocotillo Road
- Appaloosa Drive, Bronco Drive, *and* Colt Drive west of 205th Street
- Palomino Drive south of Colt Drive

4. *Queen Creek Road west of Crismon Road*
Crews will be working on the north side of Queen Creek Road re-installing new power poles. The north shoulder will remain closed overnight, with all traffic shifted to the south during working hours.

PLEASE NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1368. ATN-AZ Winter Meeting

Yahoo group: Queen_Creek_Hams
Date: 2012-01-28 01:37:05 UTC
From: Bil Munsil
Topic: 1368 Message: 1368

ATN-AZ NEWSLETTER
Winter 2012

MEETING:
Kevin Jacobson AD7OI will be our host the February 4th meeting at his company in Phoenix, Innovative Control Systems Inc. 10801 N. 24th Ave, Suite 102, and meeting will start at 11AM. Please RSVP so we can best plan for the meeting.
We have several members interested in running for office, Tom Sellet KE6QK, Kevin Jacobson AD7OI, and Lee Weitcel K0CCU. If you know of anyone else who has an interest to run for office, please nominate them at the meeting.
11:00 Welcome and introductions Kevin AD7OI
11:10 Repeater report Mike WA6SVT
11:25 Financial report Mike WA6SVT
11:35 Net report Bob W8ARZ and Robert KD6PSD
11:50 Discussion and Vote for change of dues from $50 to $75 per year (dues can be paid after we vote or during lunch)
12:00 Lunch followed by tour of Kevin's company and lab
12:45 Nominations for President, Vice President and Promotion Coordinator
12:55 Election of officers
1:10 Discussion and vote to amend the constitution and bylaws to change back from mandatory four meetings to two meetings per year
1:20 New Business
1:30 End of meeting

WHITE TANK:
Lots of work going on with a new controller, repaired 2441.5 MHz FM receiver and a larger link dish to be installed starting February 3rd. Mike has received a new ID chip for the repeater so we can now use the club call W7ATN. Mike is still the trustee of the repeater.

LEMMON:
A trip will be planned to hang the link dish on the tower for 2417.5 MHz link receiver. The controller will get a fresh reboot and reprogrammed. The 445.225 voice and control repeater will have some adjustments to tighten the squelch. When this is done we will have a full automatic two way link to White Tank.
Coverage is extensive from Mt. Lemmon and it can also cover most of the east Phoenix valley as well as Tucson so the link will merge the coverage of both repeaters into one giant coverage repeater system or network.
Future plans are to add a 2441.5 MHz FM receiver. If you have friends in the Tucson area, encourage them to get on ATV.

PRESIDENT's COMMENTS:
In a phone call with Peter KD7OIW he wanted me to relay the following; he enjoyed working with the club this past year and is happy with the progress

the club has made and wished he could have done more but the auto accident and passing of Kathleen last spring changed everything.
He has been helping Bob W8ARZ with the engineering of Bob's net control station to make it better than ever. He wants to thank Bob and Robert for a great job conducting the nets. He said he sent in the renewal of his ham license and has his shack cleared out as it was used for storage room over the last several months and will back on the air soon.
Peter regrets not making the meeting as he will be on a weeklong trip with his church to Mexico to do volunteer work.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday January 30, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1372. N2QOJ Tool Bar

Yahoo group: Queen_Creek_Hams
Date: 2012-02-01 22:58:22 UTC
From: Joe Sammartino
Topic: 1372 Message: 1372

Folks,

A couple of you had mentioned to me that you had downloaded my N2QOJ Browser Toolbar and were using it. That was a nice surprise. The toolbar had not been updated in a very long time (I didn't think anyone was using it!) so now it is freshened up with new links and topics. MS IE and Firefox seem to work best. Chrome has some issues with the news feeds.

Let me know if you have any recommendations or suggestions for additional items to include.

As always, thanks for the feedback.

Regards,

Joe, N2QOJ

1380. To watch the net

Yahoo group: Queen_Creek_Hams
Date: 2012-02-06 01:04:24 UTC
From: ars_k1atv
Topic: 1380 Message: 1380

To watch tonight's (Sunday) net go to batc.tv.
Click on ATV Repeaters
If W7ATV is streaming (and now it is)
Highlight it and
Click on View Stream.

You will see the inside of the W7ATN repeater building on Mt Lemmon - including the aforementioned fire extinguisher.

1384. Re: To watch the net

Yahoo group: Queen_Creek_Hams
Date: 2012-02-06 14:59:04 UTC
From: ars_k1atv
Topic: 1380 Message: 1384

Thanks for watching.

This was the inaugural occurrence so it might get better in the future.

The quality on the stream is usually worse than directly off the repeater. It was almost a P3 or P4 signal (with P5 being broadcast quality) as I viewed it here.

Mike Collis, WA6SVT, was in from CA for the weekend and spent most of Friday and Saturday on White Tanks working on the new installs.

Several locals were also up there until dark working as well.

There may need to be some tweaking next time Mike is in AZ - which may be another six months.

The net control, KA6PSD, picks it up off the White Tanks repeater and then streams it to the batc.tv website - which is in the UK.

1387. Arizona Emergency Net - Maricopa, 2/6/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-02-06 15:55:32 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1387 Message: 1387

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday February 6, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Traffic Alerts Map Feb. 9-16
Traffic Alerts Map Feb. 9-16
Posted Date: 2/9/2012

*The Town's Streets Department will be performing crack seal operations in the following locations the week of Feb. 13-17:

Note that dates are approximate and those streets which are affected will be posted with temporary traffic control signs.*

1. *Roman Estates Subdivision*

- Julius Road west of Hawes Road
- Caesar Road west of Hawes Road
- Augustus Avenue west of Hadrian Way
- Marcus Street west of Hadrian Way
- Claudius Road north of Julius Road
- Antonius Street, south of Caesar Road
- Titus Street west of Antonius Street
- Titus Circle east of Titus Street
- Tiberius Drive south of Caesar Road
- Hadrian Way north of Julius Road
- 198th Street north of Julius Road

The City of Mesa will be working in the area of Ellsworth and Ray roads; as well as Power Road between Pecos and Ray roads. More information on these and other restrictions in the City of Mesa can be found at http://www.mesaaz.gov/roads/LaneRestrictions.aspx.

- Traffic Alerts Map Feb. 9-16<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10381>

Please Note: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

Traffic Alerts Map Feb. 16-23
Traffic Alerts Map Feb. 16-23
Posted Date: 2/16/2012

Traffic Signals:

1. *Rittenhouse Road/Village Loop South*
Work to construct a new traffic signal at this intersection will begin this week. During construction, drivers can expect to encounter some shoulder closures on Rittenhouse Road, as well as some lane shifts on both Rittenhouse Road and Village Loop South between the hours of 8:30 a.m. and 4 p.m.

*Traffic Restrictions:
*
2. *Ellsworth Road/Heritage Loop Road (Victoria Lane)*
Crews will be installing a new utility service, which will require that traffic be shifted on Ellsworth Road. Work will be taking place between 8:30 a.m. and 4 p.m., Monday through Friday.

3. *Rittenhouse Road/Village Loop South*
Crews will be working to install a new traffic signal at this intersection. Lane restrictions are scheduled beginning on Wednesday, Feb. 15, and continuing through Thursday, March 15, between the hours of 8:30 a.m. and 4 p.m.

The City of Mesa will be working in the area of Ellsworth and Ray roads; as well as Power Road between Pecos and Ray roads. More information on these and other restrictions in the City of Mesa can be found at http://www.mesaaz.gov/roads/LaneRestrictions.aspx.

East Valley Repeater Group
Monday February 27, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Topic: 1406 Message: 1406

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday February 27, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Traffic Alerts Map March 1 - March 8
Traffic Alerts Map March 1 - March 8
Posted Date: 3/1/2012

*Traffic Signals:

*

1. *Rittenhouse Road/Village Loop South
*Work to construct a new traffic signal at this intersection began on Tuesday, Feb. 21. Construction is anticipated to last for approximately 60 days.

Traffic Restrictions:

**

2. *Rittenhouse and Combs roads
*Crews will be working along the west side of Rittenhouse Road, north of Combs Road, installing new utility lines for Century Link Communications<http://www.centurylink.com/>.
This work will close the west shoulder. No other traffic restrictions are anticipated.

3. *Rittenhouse Road/Village Loop Road South*
Crews will be installing a new traffic signal at this intersection, which will require some intermittent travel lane and shoulder restrictions until approximately March 15, between the hours of 8:30 a.m. and 4 p.m.

The Town's Streets Department will be performing crack seal operations in the following subdivisions the week of March 5-9:

**

- The Villages
- Queen Creek Ranchettes
- San Marquis

Note: dates are approximate and those streets that are affected will be posted with temporary traffic control signs. Drivers are advised to obey all posted signs in the area where crews may be working.

The City of Mesa <http://www.mesaaz.gov/Home/> will be working in the area of Ellsworth and Ray roads; as well as Power Road between Pecos and Ray roads. More information on these and other restrictions in the City of Mesa can be found at http://www.mesaaz.gov/roads/LaneRestrictions.aspx.
Traffic Alerts Map March 1 - 8<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10451>

1409. Breakfast followed by Shooting Range Fun

Yahoo group: Queen_Creek_Hams
Date: 2012-03-03 01:35:18 UTC
From: Joe Sammartino
Topic: 1409 Message: 1409

Folks,

One of our members, Jim Millyard, KC7QPI, is a range officer at the indoor shooting range (Ted's Shooting Range) behind the Home Depot at Germann and Power Roads.

Jim has racked some free range time that he is graciously offering to our band of ham radio shooter enthusiasts.

So, after our next breakfast on Saturday, March 10th, Jim is inviting all interested ham members who would like to have fun with some free range time, to join him at Ted's Shooting Range.

All you need to bring is your handgun(s) and ammunition. Range time will be free and you can buy targets - or bring your own targets if you have them.

We'll be heading out from the Flight Deck Cafe directly to Ted's Shooting Range: *http://tinyurl.com/7yqctsr*
*
*
18395 S 186th Drive
Suite 106
Queen Creek, AZ 85142
480.840.9202

Please send me an email if you are interested in taking Jim up on his invitation. We'd like to get an idea of how many folks would like to go.

Safe shooting,

Joe, N2QOJ

GM Fellow QC hams

I will be attempting the summit of Piestewa Peak this morning/afternoon. Would appreciate it if you would point your 2m beams towards Squaw Peak/Piestewa Peak and give me a contact.
I'm looking at operating on 146.52 +/-

You can follow me up the mountain here. aprs.fi in the callsign field, input n7az-7

Thanks

Ok, I see that Squaw Peak will be just to your Southeast and it looks to be slightly higher in elevation, maybe another 100 feet or so. Let's hope that won't be a problem.

Have a great time.

From: Jon Goering
Topic: 1415 Message: 1420

I have leaned things overtime hiking different trails and I have learned things doing SOTA summits. One I learned today, and that is not turn your APRS radio on at the bottom of a big mountain and let it beacon at high power. You'll have just enough juice to make 1 contact by the time you get to the summit. So at some point, I get to do this one again.

Thanks for those setting around waiting for me, I made it, but no radio.

Ohhhh yea, what happened to 146.52 being a calling frequency? I couldnt use .52 because a group of lids were using it.

I was watching you off and on today Jon, but didn't see any movement early in the day. I got busy in the afternoon and didn't have a chance to turn on the radio.

I know what you mean about the calling frequency. We've abandoned that one because of Woody and his friends unfortunately camping on that frequency. They pretty much own it. In and around QC, some of us are monitoring 146.50 for that purpose.

Cheers - Bruce

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday March 5, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

1425. Re: Breakfast followed by Shooting Range Fun

Yahoo group: Queen_Creek_Hams
Date: 2012-03-05 04:19:58 UTC
From: Joe Sammartino
Topic: 1409 Message: 1425

Folks,

We have a dilemma.....March 10th is also Aviation Day at Phoenix Mesa Gateway airport. That presents two problems:

1 - The Flight Deck Cafe may be a difficult breakfast meeting location due to the increased activity, parking, and other logistical problems associated with Aviation Day.

2. We might have members that want to attend Aviation Day but still take advantage of Jim's gracious Shooting Range offer.

So, as I see it, we have two choices:

1. - Keep the date, as is, but choose another site for Breakfast such as Rudy's American Mexican Restaurant.

2. Change the date so that we can still attend the Flight Deck Cafe followed by the Shooting Range trip. This option gives any member, who is interested in Aviation Day, the ability to attend both events.

Jim and I need to hear from those of you that are interested

Thanks,

Joe, N2QOJ

I'd vote to push breakfast back a week, if the range offer goes with it. I don't see the breakfast as a problem, it is having two great events scheduled on the same morning.

BTW the last Aviation Day had parking at the other end of the field from the Flight Deck, and
free bussing. This year, the new parking lot on the north side is open, but I cannot tell from the leaflet which lot will be used this Saturday.

Jim

Folks,

One of our members, Jim Millyard, KC7QPI, is a range officer at the indoor shooting range (Ted's Shooting Range) behind the Home Depot at Germann and Power Roads.

Jim has racked some free range time that he is graciously offering to our band of ham radio shooter enthusiasts.

So, after our next breakfast on Saturday, March 10th, Jim is inviting all interested ham members who would like to have fun with some free range time, to join him at Ted's Shooting Range.

All you need to bring is your handgun(s) and ammunition. Range time will be free and you can buy targets - or bring your own targets if you have them.

We'll be heading out from the Flight Deck Cafe directly to Ted's Shooting Range:
http://tinyurl.com/7yqctsr

18395 S 186th Drive
Suite 106
Queen Creek, AZ 85142
480.840.9202

Please send me an email if you are interested in taking Jim up on his invitation. We'd like to get an idea of how many folks would like to go.

Safe shooting,

Joe, N2QOJ

1428. Arizona Emergency Net - Maricopa, 3/5/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-03-05 15:55:18 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1428 Message: 1428

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday March 5, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

For those of you that are in favor of pushing out the breakfast to March 17th, is that because you are planning to attend Aviation Day and don't want to miss the breakfast/shooting opportunity?

I have to ask because only a couple of you have explicitly stated you want to go to the shooting range...

Thanks,

Joe

I will have the "Queen Creek Easy J" on display at the next Queen Creek meeting. Building instructions are now available on the Superstition ARC web site under the latest Communicator newsletter button on the left edge of the home screen.

For those of you that are in favor of pushing out the breakfast to March 17th, is that because you are planning to attend Aviation Day and don't want to miss the breakfast/shooting opportunity?

I have to ask because only a couple of you have explicitly stated you want to go to the shooting range...

Thanks,

Joe

Folks,

We have a dilemma.....March 10th is also Aviation Day at Phoenix Mesa Gateway airport. That presents two problems:

1 - The Flight Deck Cafe may be a difficult breakfast meeting location due to the increased activity, parking, and other logistical problems associated with Aviation Day.

2. We might have members that want to attend Aviation Day but still take advantage of Jim's gracious Shooting Range offer.

So, as I see it, we have two choices:

1. - Keep the date, as is, but choose another site for Breakfast such as Rudy's American Mexican Restaurant.

2. Change the date so that we can still attend the Flight Deck Cafe followed by the Shooting Range trip. This option gives any member, who is interested in Aviation Day, the ability to attend both events.

Jim and I need to hear from those of you that are interested

Thanks,

Joe, N2QOJ

Folks,

One of our members, Jim Millyard, KC7QPI, is a range officer at the indoor shooting range (Ted's Shooting Range) behind the Home Depot at Germann and Power Roads.

Jim has racked some free range time that he is graciously offering to our band of ham radio shooter enthusiasts.

So, after our next breakfast on Saturday, March 10th, Jim is inviting all interested ham members who would like to have fun with some free range time, to join him at Ted's Shooting Range.

All you need to bring is your handgun(s) and ammunition. Range time will be free and you can buy targets - or bring your own targets if you have them.

We'll be heading out from the Flight Deck Cafe directly to Ted's Shooting Range:

Hi Folks,

If you have GMRS capability, I have a GMRS repeater up and running for the next couple of days at:

462.575 (+), PL = 107.2 Hz.

Feel free to check in and give me a call. Just call for Joe and/or WPWI554.

Regards,

Joe

Good Afternoon All ;

As it turns out , I will be unable to attend the Breakfast this Saturday, but I am sure going to miss the Shooting Range!!! That sounds like it is going to be a lot of fun.
